In January 1976 the Government was reorganized. Ratsiraka sought to balance representatives of different regions. Several leading figures from the more left-wing of the former political parties were included in the Supreme Revolutionary Council. Colonel Joël Rakotomalala, an army officer, was appointed Prime Minister, but the civilian element in government was increased. The following July, Col. Rakotomalala was killed in an air accident. His successor was a civilian, Justin Rakotoniaina, and the new Council of Ministers formed in August included only one military figure.

In December 1976 serious racial conflict between Comorans and Malagasy in Majunga left several hundred Comorans dead. Arrangements were made for the repatriation of the majority of Comoran immigrants.

### Government

According to the Constitution of December 1975, the Head of State is a President elected for seven years by universal adult suffrage. The President is Chairman of a 12-member Supreme Revolutionary Council. The members of the Council are chosen by the President, four of them from a list presented by the People's National Assembly. The President appoints a Prime Minister and endorses his choice of ministers. A People's National Assembly is elected by universal suffrage for a five-year term; elections are due to take place in 1977. A single ruling party will be created. The *fokonolona*, traditional community units which have been introduced as the basis of local government since 1973, are to grow in importance.

### Defence

In 1975 total armed forces numbered 4,760 men; army, 4,000; navy, 600; and air force, 160. There is a para-military gendarmerie of 6,600.

### Economic Affairs

The economy is principally agricultural with the great majority of the population living on the land. Agricultural produce is mainly for subsistence but also forms the bulk of exports, the most important of which is coffee, followed by cloves and clove oil, vanilla, rice and sugar. Tobacco, pepper and bananas are also grown for export. Large herds of cattle are maintained but contribute little to the economy. There are extensive mineral deposits including graphite, mica, nickel and copper, but only limited commercial exploitation. Since 1969 chromite deposits at Andriamena have been mined, and in 1974 over 64,000 tons of chromium ore were extracted. In 1971 bauxite was found in the south and a company set up to mine it. The oil refinery at Tamatave, which is based on imported petroleum, has contributed significantly to exports since 1967. Industry is confined largely to processing agricultural produce.

The economy has long been dominated by foreign business interests but since 1972 successive governments have extended state control of essential sectors and imposed strict controls on the operation of foreign-owned enterprises. Since mid-1975 Ratsiraka's government has nationalized the banking and insurance sectors and has taken control of the major industrial and commercial organizations. There has been a serious drop in private investment from abroad since 1972, but aid from foreign government sources enables the economy to survive. Madagascar withdrew from the Franc Zone in 1973 but France continued to support the Malagasy currency. Both the balance of payments and the budget show a considerable deficit. There have been serious shortages, especially of rice, the basic food on the island. Agricultural reform is a priority of the 1974–77 development plan and there are signs that redistribution of land is beginning to increase production. The annual population growth rate of 3 per cent exacerbates the difficulties of the economy. However, inflation was reduced from 22 per cent in 1974 to 6.6 per cent in the year ending September 1976.

### Transport and Communications

The terrain is difficult and transport is not well developed. There are 884 km. of railway, mainly single track and narrow gauge. Of the 38,000 km. of roads and tracks, most can be used only in dry weather. Most of the west coast rivers are navigable for about 160 km., and on the east coast the Pangalanes canal follows the coast from Tamatave to Farafungana. The chief ports are Tamatave, Majunga and Diégo-Suarez. The international airport is at Ivato, near Antananarivo, and there is an extensive internal airways network which provides the main means of travel, especially in the wet season.

### Social Welfare

All medical services are free and there are family allowances as well as benefits for industrial accidents and occupational diseases. Much welfare is offered by Christian missions.

### Education

Madagascar has both public and private schools. Efforts are being made to increase the number of schools and the primary schools can now accommodate over half the children. There is one university. The education system is being remodelled to suit local conditions and needs. Since 1976 five years' education has been officially compulsory.

### Tourism

Plans have been prepared to develop tourism and it was hoped to increase the number of tourists from 6,000 in 1968 to 20,000 in 1973, but this has proved over-optimistic.

*Visas* are not required to visit Madagascar by nationals of France.

### Sport

The most popular sports are football, rugby, basketball and swimming. Athletics, tennis, golf and volleyball also have their following.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension Day), May 30th (Whitsun), June 26th (Independence Day), November 1st (All Saints' Day), December 25th (Christmas), December 30th (Anniversary of the Democratic Republic of Madagascar).

**1978:** January 1st (New Year), March 27th (Easter Monday), March 29th (Commemoration of 1947 Rebellion).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 franc malgache (MG).

Exchange rates (December 1976):

1 franc MG = 2 French centimes;
£1 sterling = 414.1 francs MG;
U.S. $1 = 250.0 francs MG.

## FINANCE

100 centimes = 1 franc malgache (Malagasy franc).

Coins: 1, 2, 5, 10 and 20 francs MG.

Notes: 50, 100, 500, 1,000 and 5,000 francs MG.

Exchange rates (December 1976): 1 franc MG = 2 French centimes; £1 sterling = 414.1 francs MG;
U.S. $1 = 250.0 francs MG.
1,000 francs MG = £2.415 = $4.00.

*Note:* Between December 1958 and August 1969 the value of the Malagasy franc was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. $1 = 246.853 Malagasy francs). Since January 1960 the Malagasy franc has been equivalent to 2 French centimes (1 French franc = 50 Malagasy francs). In August 1969 the Malagasy franc was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 Malagasy franc = 0.3601 U.S. cent ($1 = 277.71 Malagasy francs) until August 1971. From December 1971 to February 1973 the official rate was 1 Malagasy franc = 0.3909 U.S. cent ($1 = 255.785 Malagasy francs). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the Malagasy franc has fluctuated on foreign exchange markets in line with the French franc. The average market rates (Malagasy francs per U.S. dollar) were: 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; and 214.3 in 1975. In terms of sterling, the central exchange rate between August 1969 and June 1972 was £1 = 666.503 Malagasy francs (1 Malagasy franc = 0.15004p).

## THE CONSTITUTION

According to the constitution endorsed by referendum on December 21st, 1975, Madagascar's institutions are as follows:

*The President of the Republic*, elected for seven years by universal suffrage;

*The Supreme Revolutionary Council* (*SRC*), "the guardian of the Malagasy Socialist Revolution". The President of the Republic is Chairman by automatic right of the SRC, of which he names two-thirds of the members. He chooses the other four members from a list presented by the People's National Assembly;

*The People's National Assembly*, whose deputies are elected for five years by universal suffrage. It holds two ordinary sessions a year;

*The Government*, responsible to the President of the Republic, who names the Prime Minister and endorses the Premier's choice of Ministers. The Prime Minister is automatically a member of the SRC;

*The Military Development Committee*, a consultative organ whose endorsement is essential for any national defence programme or programme of social and economic development;

*The Constitutional High Court*, seven members, with a renewable five-year mandate.

Local government is entrusted to *fokonolona*, traditional small communities. The ideology of the state is socialist, as expressed in the Malagasy Socialist Revolutionary Charter.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Malawi lies in southern central Africa, with Zambia to the west, Mozambique to the south and east, and Tanzania to the north. Lake Malawi forms most of the eastern boundary. The climate is tropical, but much of the country is high enough to modify the heat. The official language is English, though Chichewa is being promoted as the basis for a "Malawi Language". Most Africans follow traditional beliefs. There are about 10 per cent Protestants and 10 per cent Roman Catholics, and there is a Muslim community among the Asians, as well as a Hindu minority. The national flag (proportions 3 by 2) has black, red and green horizontal stripes, with a rising sun in red on the black stripe. The capital is Lilongwe.

### Recent History

Malawi was formerly the British protectorate of Nyasaland. In 1953 it was linked with two other British dependencies, Northern and Southern Rhodesia, to form the Federation of Rhodesia and Nyasaland. Elections in August 1961 gave the Malawi Congress Party (MCP), led by Dr. Hastings Kamuzu Banda, a majority on the Legislative Council. The MCP campaigned for independence and secession from the Federation. Dr. Banda became Prime Minister in February 1963 and the Federation was dissolved in December. Nyasaland became independent, as Malawi, in July 1964. Two years later the country became a republic, and a one-party state, with Dr. Banda as the first President. In 1967 Malawi created a major controversy amongst African states by officially recognizing the Republic of South Africa and this recognition has continued to draw much criticism from leaders of other African states. In 1971 Dr. Banda became Life President of Malawi and the first African head of state to visit South Africa. In 1976, however, Malawi recognized the communist-backed MPLA Government in Angola and refused to recognize the independence granted by South Africa to the Transkei "homeland".

Malawi, both economically and militarily, lies in the South African sphere of influence although recruitment of Malawi citizens to work in South African mines has been banned since 1974. Malawi has an extradition agreement with South Africa, which has also supplied Malawi with arms. Relations with its neighbours, Zambia and Tanzania, were strained for some years though they have since improved, and in 1975 Dr. Banda made his first official visit to Zambia. Dr. Banda rules the country firmly and tolerates no political opposition, on account of which a number of dissident civilian elements have been indefinitely detained. These include several thousand Jehovah's witnesses who have been persecuted and detained since 1972 for refusing to join the MCP. In May 1976 Dr. Banda ordered the expulsion of about 250 Goan Asians with British passports and he has given all Asians until June 1977 to wind up their businesses in rural areas and move to Lilongwe, Zomba or Blantyre.

### Government

Malawi is a republic with an elected President whose term of office is normally five years, though Dr. Banda is now President for life. Executive power is vested in the President and legislative power in the unicameral National Assembly of 85 members, mostly nominated by the Malawi Congress Party. The country is divided into three Regions and 24 Districts.

### Defence

Malawi's defence forces number 1,600 men. All services form part of the army. There are also national police forces totalling about 3,000 men.

### Economic Affairs

Malawi has few resources and agriculture, which employs 90 per cent of the population, mostly at subsistence level, is the mainstay of the economy. The principal cash crops are tea and tobacco (which account for over half the export receipts), cotton, sugar, groundnuts and maize. The economy is hampered by a consistently adverse balance of trade. The lack of mineral wealth is a severely limiting factor although the manufacturing sector has made considerable progress since independence, helped by a favourable political and economic climate for foreign investment. Annual output grew by an average of 13 per cent between 1964 and 1973 and long-term prospects remain good. Trade is mainly with the United Kingdom, South Africa and Rhodesia, with the United Kingdom accounting for by far the largest share of exports.

Malawi is able to finance more than half its monetary fixed investment from local sources and the 1974/75 budget showed a surplus for the first time. The 1965–69 development plan has been extended yearly and the 1976/77–1978/79 programme provides for the expenditure of K280 million, with priority being given to transport and agriculture. Imported inflation since 1975 has not been entirely offset by improved prices for Malawi's agricultural commodities and in that year the foreign exchange reserves fell for the first time since 1967.

### Transport and Communications

There are 566 km. of railways in Malawi, which are linked at two points to those of Mozambique, and there are plans for the construction of a line from the capital to the Zambian border by 1978. There are about 2,000 miles of trunk roads. As well as Air Malawi there are air charter firms. Since Rhodesia's declaration of independence, Blantyre has become a focal point for regional air services in southern Africa. There are plans for an international airport near Lilongwe.

### Social Welfare

A social development agency, now part of the Ministry of Labour, was set up in 1958. Its work includes care and protection of young people, the destitute, and the physically handicapped, probation work, sport, community centres and women's clubs. The Ministry of Community Development and of Social Welfare, created in 1972, initiates and expands welfare projects. Hospitals and health facilities are to be extended under a 15-year plan compiled by the Ministry of Health.

### Education

Malawi has a high literacy rate and in 1974/75 there were over 600,000 African children receiving primary education. Secondary education is provided in government and government-aided schools. The University of Malawi has more than 1,100 students. Many students go to the United Kingdom and the U.S.A.

### Tourism

The country has a small but growing tourist industry. Big game, fine scenery and an excellent climate form the basis of the country's tourist potential.

*Visas* are not required to visit Malawi by nationals of EEC countries (except France), Finland, Iceland, Israel (diplomatic and military only), Madagascar, Norway, Portugal, Rhodesia, San Marino, South Africa, Sweden, Commonwealth countries and United States of America (for duration of six months).

### Public Holidays

**1977:** May 14th (Kamuzu Day, birthday of President Banda), July 6th (Republic Day), August 1st (Bank Holiday), October 17th (Mothers' Day), December 25th–26th (Christmas and Boxing Day).

**1978:** January 1st (New Year's Day), March 3rd (Martyrs' Day), March 24th–27th (Easter).

### Weights and Measures

The imperial system is in use.

### Currency and Exchange Rates

100 tambala = 1 kwacha (K).

Exchange rates (December 1976):

£1 sterling = 1.520 kwacha.

U.S. $1 = 90.0 tambala.

## FINANCE

100 tambala=1 Malawi kwacha (K).
Coins: 1, 2, 5, 10 and 20 tambala.
Notes: 50 tambala; 1, 5 and 10 kwacha.
Exchange rates (December 1976): £1 sterling=1.520 kwacha; U.S. $1=90.0 tambala.
100 Malawi kwacha=£65.79=$111.11.

*Note:* The Malawi kwacha was introduced in February 1971, replacing the Malawi pound (at par with the pound sterling) at the rate of £1=2 kwacha. From November 1967 the exchange rate was £1=U.S. $2.40, so the initial value of the kwacha was $1.20 ($1=83.33 tambala). This valuation remained in force until August 1971. The exchange rate was 1 kwacha=$1.303 ($1=76.75 tambala) from December 1971 to June 1972, when the kwacha began "floating" with the pound sterling. The fixed rate of £1 sterling=2 kwacha remained effective until November 1973. From November 1973 to June 1975 the value of the kwacha was determined independently on the basis of movements of sterling and the U.S. dollar in exchange markets. Since June 1975 the kwacha has been valued in terms of the IMF Special Drawing Right (based on a weighted "basket" of 16 national currencies), with a mid-point rate of 1 SDR=1.054 kwacha, while the exchange rate against the U.S. dollar continues to be adjusted from month to month. The average value of the kwacha was $1.226 in 1973; $1.191 in 1974; and $1.156 in 1975.

# THE CONSTITUTION

A new Constitution was introduced in 1966. Malawi is a one-party state with a Presidential form of government. There is a unicameral parliament of 85 members.

### Fundamental Rights

The following rights are guaranteed by the Constitution: life, personal liberty, protection from slavery and forced labour, from inhuman treatment, from deprivation of property, privacy of the home, security under the law, freedom of conscience, of expression, of assembly and association, of movement, protection from racial discrimination.

### The President

Malawi is a Republic with a President. By an amendment of November 1970, provision was made for a Life President limited to the present presidency only.

### Parliament

There is a Parliament, consisting of the President and the National Assembly. The National Assembly has 85 members, mostly nominated by the Malawi Congress Party. A Speaker is elected from among the ordinary members of the Assembly. The Assembly may change the Constitution by a two-thirds majority on the second and third readings. All members must belong to the Malawi Congress Party. The Parliamentary term is normally five years. The President has power to prorogue or dissolve Parliament.

### Executive Powers

Executive power is exercised by the President acting as Prime Minister. Ministers are responsible to the President.

## JUDICIAL SYSTEM

The Courts administering justice are the Supreme Court of Appeal, High Court, Magistrates' Courts and Traditional Courts.

The High Court consists of the Chief Justice and three Puisne Judges. The High Court has unlimited jurisdiction in civil and criminal matters. It hears appeals from the Magistrates' Courts. The Regional Traditional Courts hear all homicide cases involving Malawians. They hear appeals from Traditional Courts and from Regional Traditional Courts appeal lies to the National Traditional Court of Appeal. The Minister of Justice has the power to restrict appeals from Traditional Courts where the majority of civil cases are heard and determined to Traditional Appeals Courts. Appeals from the High Court go to the Supreme Court of Appeal in Blantyre.

Malawi Railways Ltd. and the Central Africa Railway Co. Ltd., its wholly-owned subsidiary, operate between Nsanje and Salima and between Nkaya and Nayuci on the eastern border with Mozambique, covering a total of 566 km. The two railways and the Trans-Zambesia Railway Co. Ltd. and Mozambique Railways form the links from the Mozambique ports of Beira and Nacala to Malawi and countries to the west. Construction has commenced on an extension from Salima to Lilongwe, and an additional line from Lilongwe to the Zambian border is due to be completed by 1978.

The line has a rail/lake interchange station at Chipoka on Lake Malawi from where steamer services are operated by the railways to other lake ports in Malawi.

### ROADS

The total road mileage is 6,808 miles of which 1,884 miles are main roads. The road system runs from the Salisbury-Blantyre road east and then north through Blantyre, Lilongwe and Mzimba to join Tanzania and Zambia at Tunduma. Other important roads link this north-south route with the railway and Lake Malawi in the east, and Zambia and Mozambique in the west. A 300-mile highway along the edge of Lake Malawi, the "Kamuzu Highway", is under construction. All main, and most secondary roads, are all-weather roads.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The federation of Malaysia consists of the 11 States of Peninsular Malaysia in the southern part of the Kra peninsula, with Thailand to the north and the island of Singapore to the south, and the States of Sabah and Sarawak on the north of the island of Kalimantan (Borneo), bordering Indonesia. The climate is tropical, with uniformly high temperatures and rain in all seasons. The official language is *Bahasa Malaysia*, based on Malay, but English is widely used. Islam is the established religion, practised by all Malays; most of the Chinese community follow Buddhism, Confucianism and Taoism, the Indians are predominantly Hindu; there is a minority of Christians among all races, and animism is practised, particularly in Sabah and Sarawak. Malaysia's national flag (proportions 2 by 1) has 14 horizontal stripes, alternating red and white, with a blue canton containing a yellow crescent and star. The capital is Kuala Lumpur.

### Recent History

In 1948 the Federation of Malaya was created under British protection. In the same year an armed Communist revolt broke out and was not completely suppressed until 1960. In August 1957 Malaya became independent.

Malaysia was established on September 16th, 1963, through the union of the independent Federation of Malaya, the internally self-governing state of Singapore, and the former British colonies of Sarawak and Sabah (North Borneo). Singapore left the federation in August 1965. The States of Malaya were designated West Malaysia in 1966 and later styled Peninsular Malaysia. Malaysia is a member of the Colombo Plan and the Association of South-East Asian Nations (ASEAN).

The general elections held in 1969 were followed by serious inter-communal rioting, engendered by Chinese discontent with the increasingly Malay-dominated government and Malay resentment of the economic dominance of the Chinese community. The rioting precipitated the resignation, in September 1970, of Tunku Abdul Rahman, Prime Minister since independence. The new Prime Minister, Tun Abdul Razak, widened the Government coalition to create a ten-party National Front, which absorbed most of the former opposition parties. Racial tension was reduced, though not eradicated, by the government policy of increasing Malay participation in commerce and industry while, at the same time, improving the political rights of the Chinese community. In the 1974 general elections the National Front gained an overwhelming majority in Parliament and retained control of all 13 state assemblies.

However, in 1975 political stability was threatened by the resurgence of the communist guerrilla movement in Peninsular Malaysia. A number of emergency regulations were introduced but the Government was unable to prevent continuing terrorist attacks during 1976. In January 1976 the Prime Minister, Tun Abdul Razak, died and was succeeded by the Deputy Prime Minister, Datuk Hussein bin Onn.

Since 1971 the Government has moved away from its previous pro-Western, anti-Communist stance in international affairs, adopting a more neutral line and establishing diplomatic relations with its Communist neighbours. However, during 1976 the Government adopted a harder line against internal communism, launching a campaign to eliminate communist influence in politics and the media. In 1976 relations with Thailand became strained when in June the Thai Government revoked an agreement between the two countries for mutual co-operation against communist insurgency in the border area. Although the new Thai Government expressed a wish for renewed co-operation, no new border agreement had been signed by the end of 1976.

### The Government

Malaysia is a federation of 13 states. The capital, Kuala Lumpur, is a separate Federal Territory. The Supreme Head of Malaysia is a monarch, elected for a five-year term from the hereditary Rulers of nine of the states. The monarch acts on the advice of Parliament and a Cabinet. Parliament consists of the Dewan Negara (Senate) and the Dewan Ra'ayat (House of Representatives). The Senate has 58 members, including 32 appointed by the Head of State and 26 elected by State Legislative Assemblies (two from each). The House of Representatives consists of 154 members elected for five years by universal adult suffrage, 114 from Peninsular Malaysia, 24 from Sarawak and 16 from Sabah.

### Defence

In 1975 the armed forces totalled 61,100: army 51,000, navy 4,800, and air force 5,300. The Five-Power Defence Arrangement for joint consultations between Malaysia, New Zealand, Australia and the United Kingdom established a token Commonwealth force in Malaysia. Estimated defence spending for 1976 totalled 1,025.6 million ringgits.

### Economic Affairs

The economy is based on the export earnings of a narrow range of products, in which rubber, tin, palm oil and timber predominate. Malaysia is the world's leading producer of natural rubber. The rubber industry provided about 20 per cent of total export earnings in 1975, and is the chief employer of labour in Malaysia, as well as the largest single source of government revenue. In 1974 earnings from palm oil rose by about 120 per cent to an estimated M$1,022 million, and during 1975 palm oil superseded tin to become Malaysia's second highest export earner, accounting for 16 per cent of total export earnings. Malaysia is also the world's major producer of tin, producing 63,346 tons of tin concentrate in 1975. Tin is mined exclusively in Peninsular Malaysia and is sold mainly to the U.S.A. Malaysia's fourth export is timber and export earnings from logs and timber rose by 20 per cent in the 12 months to the end of September 1974, compared with the previous 12 months, to reach M$1,658 million.

In the second half of 1974 world prices of rubber and timber fell significantly. The Government introduced a stockpile programme in an effort to stabilize rubber prices and in June 1975 an agreement was reached with the two other principal rubber producers, Indonesia and Thailand, on a price regulation policy. The fall in the price of timber resulted in widespread redundancies in the timber industry.

Although world prices of rubber and timber recovered only slightly in 1975, the fall was in some way offset by the improvement in earnings from petroleum and palm oil exports, and by the fact that the price of tin remained relatively high. Petroleum production rose by 10 per cent in 1975 to nearly 33 million barrels.

As the prices of Malaysia's principal imports, machinery, transport equipment, manufactures and chemicals, continued to rise, there was a balance of payments deficit in 1975 of M$100 million. Real growth, 4 per cent in 1975, rose to an estimated 8.5 per cent in 1976. The manufacturing sector maintained its position as the fastest growing sector of the economy in 1975, accounting for nearly 15 per cent of G.D.P., and continued to expand in 1976. The Third Malaysia Plan (1976–80) aims to achieve an annual real growth rate of 8.5 per cent, compared with 7.4 per cent under the Second Malaysia Plan. It is hoped to keep price inflation down to 5 per cent a year and to reduce unemployment from 7 per cent to 6.1 per cent over the plan period.

## Transport and Communications

Communications within Peninsular Malaysia are excellent and there are frequent services by air and sea between Peninsular Malaysia and Sarawak and Sabah. In Peninsular Malaysia there were 11,308 km. of roads in 1975, including 9,606 km. of main roads. The state-owned Malayan Railway had a total length of 1,659 km. in 1974. The country has a network of airfields and five major international airports.

## Social Welfare

Social welfare comes under the two Malaysian Ministries of Health and of Welfare Services. Employers and employees contribute to the Employees' Provident Fund for retirement benefits. The independent Social Welfare Lotteries Board contributes large sums to welfare schemes. Government-sponsored social work among the aged and disabled is supported by many voluntary societies. Under the Third Malaysia Plan (1976–80), 1,044 million ringgits has been allocated to social and community services.

## Education

Total school enrolment in 1975 was estimated at more than 2.8 million. In 1974, 91 per cent of the 6 to 11 age group in Peninsular Malaysia were enrolled at primary schools. Some 70 per cent of the total population are literate. Education between the ages of 6 and 15 is free and compulsory in Peninsular Malaysia. Sabah and Sarawak, although under the Federal Ministry of Education, enjoy some local autonomy over education. There are five universities.

## Tourism

Malaysia has a fast-growing tourist industry, the cultures of the many ethnic groups present being a particular attraction. In 1975 2,602,624 tourists visited Malaysia and foreign exchange earnings from tourism were M$390 million.

*Visas* are not required to visit Malaysia by nationals of Belgium, Denmark, Finland, France, German Federal Republic, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, San Marino, Sweden, Switzerland, United Kingdom and Commonwealth and U.S.A.

## Sport

The national sport is football but badminton, cricket, tennis, golf, basketball, table tennis and bowling are also played. There is some sea-fishing and jungle exploration.

## Public Holidays

Each State has its own public holidays, and the following federal holidays are also observed:

**1977:** May 1st (Labour Day), May 2nd (Wesak Day), June 1st (Birthday of H.M. of the Yang di-Pertuan Agong), August 31st (National Day), September 15th and 16th (Hari Raya Puasa), November 10th (Deepavali), November 21st (Hari Raya Haji), December 25th (Christmas).

**1978:** January/February* (Chinese New Year), February 20th (Maloud, Prophet Muhammad's Birthday).

*From the 1st–3rd day of the first moon of the Lunar Calendar.

## Weights and Measures

Since 1972 Malaysia has gradually converted from the imperial system to the metric system. There is also a local system of weights and measures:

1 cupak = 1 quart
1 gantang = 1 gallon
1 tahil = 1⅓ ounces
16 tahils = 1 kati = 1⅓ lb.
100 katis = 1 picul = 133⅓ lb.
40 piculs = 1 koyan = 5,333⅓ lb.

## Currency and Exchange Rates

100 cents = 1 ringgit or Malaysian dollar (M$).

Exchange rates (December 1976):
£1 sterling = M$ 4.19;
U.S. $1 = M$ 2.53.

## FINANCE

(Malaysia)

100 cents (sen) = 1 ringgit or Malaysian dollar (M$).

Coins: 1, 5, 10, 20 and 50 cents; 1 ringgit.

Notes: 1, 5, 10, 50, 100 and 1,000 ringgits.

Exchange rates (December 1976): £1 sterling = M$4.19; U.S. $1 = M$2.53.

M$100 = £23.85 = U.S. $39.53.

*Note:* The Malaysian dollar was introduced in June 1967, replacing (at par) the Malayan dollar. From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M$8.5714) or 32.667 U.S. cents (U.S. $1 = M$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Malaysian dollar was valued at 35.467 U.S. cents (U.S. $1 = M$2.8195). From February to June 1973 the Malaysian dollar's value was 39.407 U.S. cents (U.S. $1 = M$2.5376). In terms of sterling, the exchange rate was £1 = M$7.347 from November 1967 to June 1972. The Malaysian dollar was interchangeable with the Singapore and Brunei dollars until May 1973. Since June 1973 the Malaysian dollar has been allowed to "float". From September 1975 the Malaysian dollar's link with the U.S. dollar was ended and its value determined by changes in a weighted "basket" of currencies of the country's main trading partners. In June 1976 the Malaysian dollar was officially renamed the ringgit. The average market exchange rate (ringgits per U.S. dollar) was: 2.443 in 1973; 2.407 in 1974; 2.402 in 1975.

# THE CONSTITUTION

### Supreme Head of State

The Yang di-Pertuan Agong (King or Supreme Sovereign) is the Supreme Head of Malaysia.

Every act of government flows from his authority although he acts on the advice of Parliament and the Cabinet. The appointment of a Prime Minister lies within his discretion, and he has the right to refuse to dissolve Parliament even against the advice of the Prime Minister. He appoints the Judges of the Federal Court and the High Courts on the advice of the Prime Minister. He is the Supreme Commander of the Armed Forces. The Yang di-Pertuan Agong is elected by the Conference of Rulers, and to qualify for election he must be one of the nine Rulers. He holds office for five years or until his earlier resignation or death. Election is by secret ballot on each Ruler in turn, starting with the Ruler next in precedence after the late or former Yang di-Pertuan Agong. The first Ruler to obtain not fewer than five votes is declared elected. A Deputy Supreme Head of State (the Timbalan Yang di-Pertuan Agong) is elected by a similar process. On election the Yang di-Pertuan Agong relinquishes, for his tenure of office, all his functions as Ruler of his own State and may appoint a Regent. The Timbalan Yang di-Pertuan Agong exercises no powers in the ordinary course, but is immediately available to fill the post of Yang di-Pertuan Agong and carry out his functions in the latter's absence or disability. In the event of the Yang di-Pertuan Agong's death or resignation he takes over the exercise of sovereignty until the Conference of Rulers has elected a successor.

### Conference of Rulers

The Conference of Rulers consists of the Rulers and the heads of the other States. Its prime duty is the election by the Rulers only of the Yang di-Pertuan Agong and his deputy. The Conference must be consulted in the appointment of judges, the Attorney-General, the Elections Commission and the Public Services Commission. It must also be consulted and concur in the alteration of State boundaries, the extension to the federation as a whole of Muslim religious acts and observances, and in any bill to amend the Constitution. Consultation is mandatory in matters affecting public policy or the special position of the Malays and natives of Sabah and Sarawak. The Conference also considers matters affecting the rights, prerogatives and privileges of the Rulers themselves.

### Federal Parliament

Parliament has two Houses—the Dewan Negara (Senate) and the Dewan Ra'ayat (House of Representatives). The Senate has a membership of 58, made up of 26 elected and 32 appointed members. Each State Legislature, acting as an electoral college, elects two Senators; these may be members of the State Legislative Assembly or otherwise. The Yang di-Pertuan Agong appoints the other 32 members of the Senate. Members of the Senate must be at least 30 years old. The Senate elects a President and a Deputy President from among its members. It may initiate legislation, but all money bills must be introduced in the first instance in the House of Representatives. All bills must be passed by both Houses of Parliament before being presented to the Yang di-Pertuan Agong for the Royal Assent in order to become law. A bill originating in the Senate cannot receive Royal Assent until it has been agreed to by the House of Representatives, but the Senate has delaying powers only over a bill originating from and approved by the House of Representatives. Senators serve for a period of six years, but the Senate is not subject to dissolution. Parliament can by statute increase the number of Senators elected from each State to three. The House of Representatives consists of 154 elected members. Of these, 114 are from Peninsular Malaysia, 24 from Sarawak and 16 from Sabah. Members are returned from single-member constituencies on the basis of universal adult franchise. The life of the House of Representatives is limited to five years, after which time a fresh general election must be held. The Yang di-Pertuan Agong may dissolve Parliament before then if the Prime Minister so advises.

### The Cabinet

The Yang di-Pertuan Agong appoints a Cabinet to advise him in the exercise of his functions, consisting of the Prime Minister and an unspecified number of Ministers who must all be members of Parliament. The Prime Minister must be a citizen born in Malaysia and a member of the House of Representatives who, in the opinion of theYang di-Pertuan Agong, commands the confidence of that House. Ministers are appointed on the advice of the Prime Minister. A number of Assistant Ministers (who are not members of the Cabinet) are also appointed from among Members of Parliament. The Cabinet meets regularly under the chairmanship of the Prime Minister to formulate policy.

### Public Services

The Public Services, civilian and military, are non-political and owe their loyalty not to the party in power but to the Yang di-Pertuan Agong and the Rulers. They serve whichever government may be in power, irrespective of the latter's political affiliation. To ensure the impartiality of the service, and to protect it from political interference, a number of Services Commissions are established under the Constitution to select and appoint officers, to place them on the pensionable establishment, to decide as to promotion, and to maintain discipline.

### The States

The heads of nine of the thirteen States are hereditary Rulers. The Ruler of Perlis has the title of Raja and that of Negri Sembilan, Yang di-Pertuan Besar. The rest of the Rulers are Sultans. The heads of the States of Malacca, Penang, Sabah and Sarawak are each designated Yang di-Pertuan Negara and do not participate in the election of the Yang di-Pertuan Agong. Each of the 13 States has its own written Constitution, and a single Legislative Assembly. Every State Legislature has powers to legislate on matters not reserved for the Federal Parliament. Each State Legislative Assembly has the right to order its own procedure, and the members enjoy parliamentary privilege. All members of the Legislative Assemblies are directly elected from single-member constituencies. The head of the State acts on the advice of the State Government, which advice is tendered by the State Executive Council or Cabinet in precisely the same manner as the Federal Cabinet tenders advice to His Majesty the Yang di-Pertuan Agong.

The Legislative authority of the State is vested in the head of the State in the State Legislative Assembly. The executive authority of the State is vested in the head of the State but executive functions may be conferred on other persons by law. Every State has an Executive Council or Cabinet to advise the head of the State, headed by a Chief Minister (in Malacca, Penang, Sabah and Sarawak) or Mentri Besar (in other States), and collectively responsible to the State legislature. Each State in Peninsular Malaysia is divided into administrative districts under a District Officer. Sabah is divided into four residencies: West Coast, Interior, Sandakan and Tawau with headquarters at Kota Kinabalu, Keningua, Sandakan and Tawau respectively. The island of Labuan is administered by a District Officer responsible direct to the State Secretary in Kota Kinabalu. Sarawak is divided into five Divisions, each in charge of a Resident—the First Division, with headquarters at Kuching; the Second Division, with headquarters at Simanggang; the Third Division, with headquarters at Sibu; the Fourth Division, with headquarters at Miri; the Fifth Division, with headquarters at Limbang.

### Amendment

From February 1st, 1974, the city of Kuala Lumpur, formerly the seat of the Federal Government and capital of Selangor State, is designated the Federal Territory of Kuala Lumpur. It is administered directly by the Federal Government and returns five members to the Dewan Ra'ayat.

## JUDICIAL SYSTEM

The two High Courts, one in Peninsular Malaysia and the other in Sabah and Sarawak, have original, appellate and revisional jurisdiction as the federal law provides. Above these two High Courts is a Federal Court which has, to the exclusion of any other court, jurisdiction in any dispute between States or between the federation and any State; and has special jurisdiction as to the interpretation of the Constitution. There is also unlimited right of appeal from the High Courts to the Federal Courts and limited right of appeal from the Federal Court to the Yang di-Pertuan Agong who refers such appeals to the Judicial Committee of the Privy Council in the United Kingdom. The High Courts each consist of the Chief Justice and a number of Puisne Judges. The Federal Courts consists of the Lord President together with the two Chief Justices of the High Courts and four Federal Judges. The Lord President and Judges of the Federal Court, and the Chief Justices and Judges of the High Courts, are appointed by the Yang di-Pertuan Agong on the advice of the Prime Minister, after consulting the Conference of Rulers.

The Sessions Courts, which are situated in the principal urban and rural centres, are presided over by a President, who is a member of the Federation Legal Service and is a qualified barrister. Their criminal jurisdiction covers the less serious indictable offences, excluding those which carry penalties of death or life imprisonment. Civil cases are usually heard without a jury. Civil jurisdiction of a President Sessions Court is up to $5,000 and Special President's Sessions Courts can hear cases of up to $10,000. The Presidents are appointed by the Yang di-Pertuan Agong.

The Magistrates' Courts are also found in the main urban and rural centres and have both civil and criminal jurisdiction, although of a more restricted nature than that of the Sessions Courts. The Magistrates consist of officers from either the Federation Legal Service or are seconded from the administration to the Judicial Department for varying periods up to three years. They are appointed by the heads of the States in which they officiate on the recommendation of the Chief Justice.

**Lord President of the Federal Court of Malaysia:** Hon. Mr. Justice Tun Mohamed Suffian bin Hashim, s.s.m., d.i.m.p., j.m.n. (Brunei), p.j.k., m.a., ll.b., Bar.-at-Law.

**Chief Justice of the High Court in Peninsular Malaysia:** Tan Sri Gill, s.s., p.s.m.

**Chief Justice of the High Court in Sabah and Sarawak:** Hon. B. T. H. Lee, (Kota Kinabalu).

# RELIGION

Islam is the established religion but freedom of religious practice is guaranteed. All Malays are Muslims. A small minority of Chinese are Christians but most Chinese follow Buddhism, Confucianism and Taoism. Of the Indian community, about 70 per cent are Hindu, 20 per cent Muslim, 5 per cent Christian and 2 per cent Sikh. In Sabah and Sarawak there are many animists.

# MALDIVES

## INTRODUCTION

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Maldives, lying about 420 miles south-west of Sri Lanka, consists of over 1,000 islands in the Indian Ocean. The climate is equatorial. The language, Maldivian, is related to Sinhala. Islam is the predominant religion. The flag (proportions 3 by 2) is red, bearing a green rectangle in the centre, charged with a white crescent. The capital is Malé.

### Recent History

The Maldives, called the Maldive Islands until 1969, formerly had an elected Sultan as head of state. The islands were placed under British protection, with internal self-government, in 1887. They became a republic in January 1953 but the sultanate was restored in February 1954. The Maldives became fully independent, outside the Commonwealth, on July 26th, 1965. Following a referendum, the country became a republic again in November 1968, with Ibrahim Nasir, Prime Minister since 1954, as President. The islands have been a member of the Colombo Plan since 1963 and of the UN since 1965.

In 1956 the Maldivian and United Kingdom Governments agreed to the establishment of a Royal Air Force staging post on Gan, an island in the southernmost atoll, Addu. In 1960 the Maldivian Government entrusted Gan and other areas of Addu as a free gift to the United Kingdom for an initial 30 years. However, in 1975 the British Government decided to close the base and evacuation of Gan by the British forces was completed in March 1976. This created a large commercial and military gap, with 800 Maldivians losing jobs at the base from which they derived an income of £300,000 per year in foreign exchange. The United Kingdom granted £500,000 in aid over four years to ease the effects of withdrawal. Having invited tenders for the leasing of Gan "for any purpose considered reasonable" in June 1976, the Maldivian Government withdrew the offer in July and in January 1977 was planning to develop the island as a major tourist centre.

In March 1975 the Prime Minister, Ahmed Zaki, was arrested and banished in a bloodless coup by President Nasir, who took over the duties of Prime Minister.

### Government

Legislative power is held by the unicameral People's Council (*Majlis*), with 48 members (40 elected for five years by universal adult suffrage and eight appointed by the President). Executive power is vested in the President, elected by popular vote for five years. He governs with the assistance of an appointed Cabinet, responsible to the *Majlis*. The country has 19 administrative districts.

### Economic Affairs

The economy is based on fishing. Until 1972 all fish was exported to Sri Lanka. However, Sri Lanka decided to stop importing "Maldive Fish" (prepared from bonito) by 1980 and fresh fish is now sold to two international companies in Japan. Other industries include shipping, tourism and coconut, copra and coconut oil production. In 1974 India indicated that it would aid the creation of an economic infrastructure for the Maldives and further co-operation was expected with schooling and administrative training and with the major industries.

## STATISTICAL SURVEY

**Area:** the archipelago consists of 19 atolls, comprising 1,196 islands of which 203 are inhabited; the total area is 20,000 square miles, including lagoons. The land area is 298 square km. (115 square miles).

**Population** (1974 census): 128,697. The population of the capital, Malé, was 16,246.

**Births and deaths** (1975): 5,232 registered births; 1,539 registered deaths (including stillbirths).

**Employment:** Fishing, copra-production, and making coir yarn.

**Agriculture:** Production (1975—metric tons): Coconuts 8,390, Copra 1,426, Taro 1,000, Other roots and tubers 5,000 (FAO estimates); also papaya, screwpine, pomegranates, pineapples, some citrus fruit, plantains, breadfruit, millet, sorghum, maize, onions, chillies and yams.

**Fishing:** (*See Table on next page*).

**Currency:** 100 larees = 1 Maldivian rupee. Exchange rates (Dec. 1976): £1 sterling = 14.66 rupees; U.S. $1 = 8.85 rupees; 100 Maldivian rupees = £6.82 = $11.30.

**Budget:** Government Expenditure (1975) 25,153,242 rupees.

**Imports:** Total value of imports (1975) 26,532,909 Maldivian rupees.

**Exports** (1975—tons): dried fish 1,930.3, fresh fish 5,782.04, salted fish 14.9, fish meal 75, shark fins 3.14; tortoise shells 4.04, red coral 25.5, cowries 60.65, amber 0.003. The total value of major exports was Maldivian Rs. 6,940,637.96.

Dried fish, known as "Maldive fish", is sold to the Sri Lanka Government. Fresh fish is sold to the Marubeni Fishing Corporation of Japan and to International Commerce Promoters Ltd. of Bangkok.

**Transport:** International shipping (metric tons): 2,133 loaded; 16,569 unloaded in 1975.

**Tourism** (1974/75): tourist arrivals 5,637.

**Communications** (1975): radio licences issued 2,727.

**Education** (1975): Nursery: 16 teachers, 439 pupils; Primary and secondary: 60 teachers, 1,455 pupils.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Mali is a land-locked state in West Africa, with Algeria to the north, Mauritania and Senegal to the west, Guinea and the Ivory Coast to the south and Upper Volta and Niger to the east. The climate is hot and dry with temperatures ranging from 24° to 32°C (75°–90°F) and increasing northward into the Sahara Desert. The official language is French but a number of other languages, including Bambara and Sonrai, are widely spoken. About 65 per cent of the population are Muslims and more than 30 per cent follow animist beliefs, the remainder being Christians. The national flag (proportions 3 by 2) is a vertical tricolour of green, gold and red. The capital is Bamako.

### Recent History

Mali was formerly French Sudan, a part of French West Africa. In April 1959 it merged with Senegal to form the Federation of Mali, which became independent in June 1960. Senegal seceded two months later and the remnant of the Federation was proclaimed the Republic of Mali in September 1960. The first President, Modibo Keita, adopted authoritarian socialist policies and broke away from the French political and financial bloc. Despite communist aid, rapid inflation forced Keita to return to the Franc Zone in 1967, at the price of a 50 per cent devaluation. The elected National Assembly was dissolved in January 1968. Keita was overthrown in November 1968 by a group of junior army officers, who ruled as the Military Committee of National Liberation (CMLN). The constitution was abrogated and political parties banned.

Lt. (later Col.) Moussa Traoré emerged as the dominant figure in the new régime, with the posts of Head of State and President of the CMLN, and in September 1969 replaced Capt. Yoro Diakité as President of the Government. Diakité died in prison in 1973. Opposition to the Government has been effectively suppressed. The CMLN has been preoccupied by the appalling economic situation, but it has had little success in coping with Mali's difficulties. Despite provision for a return to civilian rule in the new constitution of June 1974, President Traoré dismissed suggestions that this was at all imminent in 1976 and stressed that the army had a political role to play even after a return to barracks. However, in September 1976 the Union Démocratique du Peuple Malien was inaugurated as sole party, marking the first step towards the reintroduction of civilian political institutions.

### Government

Since the coup of 1968, the Military Committee of National Liberation (CMLN) has ruled by decree with the assistance of an appointed Council of Ministers. A new constitution, approved by referendum in June 1974, provides for the CMLN to remain in power for a further five years, after which a President and National Assembly would be the main institutions of government. Mali has 19 administrative districts.

### Defence

The army numbers 4,200, including a paratroop company. There are also three patrol boats on the Niger, and 150 men in the Soviet-equipped air force.

### Economic Affairs

Mali is poor in natural resources. A large part of the country lies in the Sahara Desert and is capable of supporting only a sparse nomadic population dependent on its flocks and herds. By 1974 the Sahel drought had killed a large proportion of the livestock in the north. There has since been two years' normal rainfall. Only about 20 per cent of the land is suitable for cultivation, the principal crops being rice, cotton, millet, cassava and ground-nuts. There is extensive river fishing and dried and smoked fish are exported. Industry still occupies a minor position in the economy and is based on the processing of food, cotton, hides, skins and wool. Exports are growing slowly but the trade gap is widening, due mainly to imports of cereals and consumer goods, but in 1976 imports were restricted and credit purchases of consumer goods controlled.

Since Mali's return to the Franc Zone in 1967 an austerity programme has been in force as a condition of French support for the Mali franc. Wages have been held down and the state sector has been restricted. However, the Government has proved incapable of pruning the bureaucracy on which it depends for vital support. Aid has been received from many sources, especially France, the People's Republic of China and the U.S.S.R. International relief organizations have helped mitigate the effects of the Sahel drought.

Mali is a member of the OAU, CEAO and ECOWAS and is an associate member of the EEC.

### Transport and Communications

The river Senegal and the river Niger, which is navigable for its total length in Mali of 1,782 kilometres, form the chief arteries of transport. The only railway runs from Koulikoro via Bamako to the Senegal border (640 km.) and then to Dakar (Senegal). Roads are being improved, and almost half the 13,000 km. of classified roads are open all the year. Domestic and international air services are provided by Air Mali and several foreign airlines.

### Social Welfare

The Government maintains anti-smallpox and yellow fever services and there are a number of state hospitals and medical centres.

### Education

Education is free and, in theory, compulsory for all children between the ages of 6 and 15. In 1971 only 20 per cent of children eligible for primary education and 2 per cent of those eligible for secondary education were enrolled at schools. The army has set up a mass literacy programme, teaching peasants to read and write. Over 500

Malian students receive higher education abroad, mainly in France and Senegal.

### Tourism

Tourism is being developed, based on hunting and fishing and the celebrated city of Timbuktu.

*Visas* are required to visit Mali by citizens of all countries except France.

### Public Holidays

**1977:** May 1st (Labour Day), July 14th (National Day), September 22nd (Independence Day), September 15th (Id ul Fitr, end of Ramadan), November 22nd (Id ul Adha, Feast of the Sacrifice), December 12th (Muslim New Year), December 25th (Christmas).

**1978:** February 20th (Mouloud, Birth of the Prophet).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rate

100 centimes = 1 franc malien (Mali franc).

Exchange rates (December 1976):

1 Mali franc = 1 French centime;
£1 sterling = 828.25 Mali francs;
U.S.$1 = 500.00 Mali francs.

## FINANCE

100 centimes = 1 franc malien (Mali franc).
Coins: 5, 10 and 25 Mali francs.
Notes: 50, 100, 500, 1,000, 5,000 and 10,000 Mali francs.
Exchange rates (December 1976): 1 Mali franc = 1 French centime = 50 centimes CFA;
£1 sterling = 828.25 Mali francs; U.S. $1 = 500.00 Mali francs.
1,000 Mali francs = £1.207 = $2.000.

*Note:* The Mali franc was introduced in July 1962, replacing (at par) the franc CFA. From December 1958 the franc CFA was valued at 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. $1 = 246.853 francs CFA). Since January 1960 the franc CFA has been equivalent to 2 French centimes. The Mali franc maintained this value until May 1967, when it was devalued by 50 per cent to 1.8 milligrammes of gold, equal to 1 French centime or 0.20255 U.S. cent (U.S. $1 = 493.706 Mali francs). In August 1969 the Mali franc was devalued (in line with the French franc) to 1.6 milligrammes of gold, the exchange rate being 1 Mali franc = 0.18004 U.S. cent ($1 = 555.419 Mali francs) until August 1971. From December 1971 to February 1973 the official rate was 1 Mali franc = 0.19547 U.S. cent ($1 = 511.570 Mali francs). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the Mali franc has fluctuated on foreign exchange markets in line with the French franc. The average market rates (Mali francs per U.S. dollar) were: 504.4 in 1972; 445.4 in 1973; 481.0 in 1974; and 428.6 in 1975. In terms of sterling, the central exchange rate between August 1969 and June 1972 was £1 = 1,333.01 Mali francs (1 Mali franc = 0.07502p).

# THE CONSTITUTION

The 1960 Constitution was abrogated by the Military Committee of National Liberation (CMLN), which in November 1968 replaced it by a "Fundamental Law". Under this, the CMLN and the Supreme Court ruled by decree. In 1974 a new Constitution was approved by referendum. Under its provisions there is to be a President and Head of Government elected by universal suffrage for not more than two five-year terms, and a National Assembly elected for a four-year period. Mali is to be a single-party state. The Constitution also allows, however, for a five-year transition period during which the CMLN will continue to rule the country. People who held political office between March 1966 and November 1968 will be ineligible for membership of the new institutions.

# MAURITANIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Mauritania lies in north-west Africa, with Morocco and Algeria to the north, Mali to the east and south and Senegal due south. The north of the country is mainly desert, but the south is more fertile and suitable for cultivation. The climate is hot and dry. The official languages are French and Arabic, although most people speak Arabic or Hassaniya. The population is almost entirely Muslim, Islam being the State religion. The national flag (proportions 3 by 2) is emerald green with a five-pointed gold star and a horizontal gold crescent moon in the centre. The capital is Nouakchott.

### Recent History

Mauritania, a former French colony, became independent in November 1960. President Moktar Ould Daddah has held power since then, meeting opposition from the non-Arab minority and from the small proletariat. Miners' strikes led to the integration of the trade union into the sole political party. In 1974 Daddah responded to left-wing opposition pressure by nationalizing the foreign-owned iron-mining company, MIFERMA.

Mauritania has moved away from the French sphere of influence, leaving OCAM in 1965, ending French military assistance and setting up a national currency outside the Franc Zone in 1973. President Daddah has stressed Islamic links, and in 1973 Mauritania joined the Arab League.

Spain's decision in 1974 to withdraw from the adjacent Spanish Sahara led Mauritania to put forward its own claim to the territory. In November 1975, after lengthy negotiations, an agreement between Spain, Morocco and Mauritania established a tripartite administration of the Sahara until Spain relinquished control in February 1976. A Mauritanian Assistant-Governor was appointed and Mauritanian troops have since been in action against guerrillas of the Algerian-backed Sahara liberation organization, Polisario, in the south of the territory. In April 1976 Western Sahara was partitioned between Mauritania and Morocco, which took about two-thirds of the territory, in defiance of the declaration by Polisario in February of the independent Saharan Arab Democratic Republic. Mauritania renamed the southern third Tiris El Gharbia, formerly Rio de Oro, with Dakhla (formerly Villa Cisneros) as the regional capital. There have been frequent clashes with Polisario guerrillas and in June the presidential palace in Nouakchott was shelled when a large Polisario force almost reached the capital unnoticed.

In 1976 Morocco's ambitions caused apprehension, as the presence of Moroccan troops in Mauritania appeared to threaten not only the continued occupation of Tiris El Gharbia, but the future of Mauritania itself. The war also caused the rupture of diplomatic relations with Algeria, a former ally. As a result, some Mauritanians favour the establishment of an independent state in Western Sahara as a buffer against Morocco, but the re-election of President Daddah for a fourth five-year term in August by over 99 per cent of the electorate, although he was sole candidate, would indicate that, for the time being, the country is united behind him and endorses the present policy.

### Government

The single political party, the *Parti du peuple mauritanien* (PPM), nominates the President, who is elected by popular referendum for five years. He exercises executive power and governs with the assistance of an appointed Council of Ministers. Legislative power belongs to the unicameral National Assembly, with 70 members elected by universal adult suffrage for five years from a single list of PPM candidates.

### Defence

There is an army of 4,500 men, a gendarmerie of 1,300, a navy of 100 and an air force of 150. Military service for two years is compulsory. Defence accounted for over 30 per cent of the 1976 budget.

### Economic Affairs

Nomadic Moors, many of whom are serfs, living by herding cattle and sheep, make up some 70 per cent of the population. Persistent drought has killed much of their livestock and disrupted their traditional way of life. Settled agriculture is restricted to about 400,000 African peasants in the Senegal valley, who grow millet, sorghum and rice. Rich offshore fishing grounds have been extended by the acquisition of additional Saharan coastline and agreements on catches have been concluded with several countries. The freezing and processing of fish at Nouadhibou is a significant industry. Plans for industrial development include the construction of an oil refinery and the establishment of an iron and steel industry.

Iron ore from F'Derik and copper from Akjoujt provide some 90 per cent of export earnings, and give Mauritania a trade surplus. These mineral reserves are expected to last less than 20 years and the companies exploiting them were nationalized in 1974 and 1975. Mauritania is to take an as yet unspecified share in the Moroccan-held Bou-Craa phosphate mines, but the cost of pursuing the war against Polisario and of administering the new Saharan region have set back development plans and it is proving to be a liability rather than an asset.

### Transport and Communications

The Senegal river is an important artery of transport A 652-km. railway has been built from F'Derik to Nouadhibou for the transport of iron ore. The port of Nouadhibou has been extended to handle mineral exports and accommodate the fishing industry. The main international airport is at Nouakchott, with a second at Nouadhibou. There are about 6,200 km. of roads and tracks, and the 1,000 km. Trans-Mauritanian highway linking Nouakchott and Néma is due for completion in the early 1980s.

### Social Welfare

The National Social Insurance Fund administers family allowances, industrial accident benefits, insurance against occupational diseases, and old-age benefits. Nouakchott has a hospital and there are a few regional dispensaries.

### Education

Despite expansion in education facilities since 1960 including provisions for nomadic families, only 17 per cent of children attend school. Arabic has been compulsory since 1967, in addition to French.

### Tourism

Owing to the hot climate, the best months for visiting Mauritania are from November to May. There are hotels in the principal towns. Hunting, visiting the oases, and touring the Berber villages are the chief attractions.

*Visas* are not required to visit Mauritania by the nationals of Andorra, Benin, the Central African Empire, Chad, the Congo People's Republic, France, Gabon, Guinea, the Ivory Coast, Libya, Mali, Monaco, Niger, Senegal, Togo, Tunisia and the Upper Volta.

### Sport

There is little organized sport, although football is sometimes played. Hunting and fishing are popular.

### Public Holidays

**1977:** May 1st (Labour Day), May 25th (African Liberation Day), July 14th (Leilat al Meiraj—Ascension of Muhammed), September 15th (Korité—Id ul Fitr, end of Ramadan), November 22nd (Tabaski—Id ul Adha), November 28th (National Day), December 12th (Muslim New Year).

**1978:** January 1st (New Year's Day), February 20th (Mouloud—Birth of Muḥammad).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

5 khoums = 1 ouguiya.

Exchange rates (September 1976):

£1 sterling = 75.03 ouguiya.
U.S. $1 = 44.73 ouguiya

# STATISTICAL SURVEY

Unless otherwise indicated, figures in this Survey exclude Mauritania's section of Western Sahara, acquired in 1976.

## AREA AND POPULATION

The eleven regions are known only by a number; the capital comprises a separate District. In 1974 the Government announced that the fifth of the then eight regions was to be divided into two new regions, numbers IX and X, with Tijikja and Selibaby as chief towns.

In February 1976, Mauritania officially took control of the former West Saharan region Rio de Oro. Renamed Tiris El Gharbia, region XI has an area of approximately 104,000 sq. km. and the chief town is Dakhla (formerly Villa Cisneros).

## FINANCE

5 khoums = 1 ouguiya.
Coins: 1 khoum; 1, 5, 10 and 20 ouguiya.
Notes: 100, 200 and 1,000 ouguiya.
Exchange rates (September 1976): £1 sterling = 75.03 ouguiya; U.S. $1 = 44.73 ouguiya.
1,000 ouguiya = £13.33 = $22.36.

*Note:* The ouguiya was introduced on June 29th, 1973, replacing the franc CFA at the rate of 1 ouguiya = 5 francs CFA = 10 French centimes. The fixed relationship to French currency (and thus to the franc CFA) was maintained until the end of 1973. Since then the rate against the U.S. dollar has been fixed by the Central Bank of Mauritania and is adjusted from month to month. The average exchange rates (ouguiya per U.S. dollar) were: 45.18 in 1974; 43.18 in 1975. Many of the figures in the tables below are expressed in francs CFA. For details of previous changes in the exchange rate of the franc CFA, *see* the chapter on Benin.

## THE CONSTITUTION

(Promulgated May 20th, 1961. Revised February 12th, 1965, July 12th, 1966, and February 1968.)

**Sovereignty:** The State is republican, indivisible, democratic and social. Islam is the religion, and there is freedom of conscience and of religious practice. Government resides in the Mauritanian people who exercise it through representatives and by referenda. Suffrage is universal, equal and secret. It is open to all Mauritanian citizens of both sexes who are of age, and who hold civil and political rights.

**Government:** The President decides and conducts the policy of the country. The sole candidate for the Presidency is appointed by the *Parti du peuple mauritanien* (*PPM*) and the President is elected by direct and universal suffrage for five years. The President orders the administration and the internal security forces, exercises power according to law, executes the laws, appoints state officials, and negotiates and concludes settlements with the Community and its member states. He nominates and dismisses the members of the government. The members of the government take the oath in front of the bureau of the National Assembly.

**National Assembly:** Legislative power belongs to the Assembly, which is elected for five years. All citizens of the Republic over 25 years of age, holding civil and political rights, are eligible for seats. The PPM is the only official party and institutionalized as such. The Assembly holds two ordinary sessions a year. The Assembly can hold a special session at the request of the President or of the majority of members.

**The Supreme Court:** Its organization and functions are determined by the Constitution.

**Justice:** The judiciary is independent of any other authorities. Judges may under certain circumstances be removed from office. Justice is administered in the name of the people of Mauritania. The President of the Republic is guarantor of the independence of the magistrature.

**Local Government:** The organs of local government are the region and the commune, administered by the local councils.

**Revision:** The power to revise the Constitution is in the hands of the President and the members of the Assembly.

# MAURITIUS

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Mauritius lies in the Indian Ocean. The principal island, from which the country takes its name, lies east of Madagascar. The other main islands are Rodrigues, the Agalega Islands and the Cargados Carajos Shoals (St. Brandon Islands). The climate is sub-tropical, and cyclones can be severe. English, French, Creole (derived from French), Hindi, Urdu and Chinese are all spoken by the various communities, though the first two are normally used for official purposes. Europeans and Creoles are mostly Roman Catholics; 70 per cent of the Indian population are Hindus, the rest being Muslims. The national flag (proportions 3 by 2) has four equal horizontal stripes: red, blue, gold and green. The capital is Port Louis.

### Recent History

The island was a French colony from 1715 to 1810, when it was taken by Britain. Immigration, however, came mainly from East Africa and India (Mauritius had no indigenous human inhabitants) and the European population is largely French-speaking.

Racial strife led to serious riots in 1968. Following the victory of the pro-independence Labour Party in the 1967 general election, Mauritius attained independence within the Commonwealth in March 1968, with Dr. Sir Seewoosagur Ramgoolam as Prime Minister.

The coalition government formed after independence broke down in December 1973, when Gaëtan Duval disassociated the *Parti Mauricien Social Démocrate* (PMSD) from the Prime Minister's Labour Party following disagreement over foreign policy and increases in taxation. The Labour Party, in coalition with the *Comité d'Action Musulman* (CAM), continued in office and steadily pursued an open foreign policy that led to closer relations with continental Africa and a wide variety of socialist states while maintaining the established contacts with France, India and the United Kingdom.

The state of emergency imposed shortly before independence was revoked in 1970 but reimposed the following year when a general strike and radical political opposition began, and in early 1977 it remained in force. General elections were postponed in 1972 and, when held in December 1976, surprisingly produced a majority of seats for the left-wing opposition *Mouvement Militant Mauricien* (MMM), led by Paul Bérenger. Contributory factors included the high level of unemployment and opposition to the American base on the island of Diego Garcia in the Chagos Archipelago, a former Mauritian dependency incorporated in the British Indian Ocean Territory in 1965. Sir Seewoosagur Ramgoolam was, however, able to form a new coalition government including the Labour Party and the CAM, which had contested the elections jointly as the Independence Party, and the PMSD.

### Government

Executive power is vested in the British monarch as Head of State, represented by an appointed Governor-General who is guided by the advice of the Cabinet. Legislative power is vested in the unicameral Legislative Assembly, with 71 members: the Speaker, 62 members elected by universal adult suffrage for five years and eight "additional" members (the most successful losing candidates of each community). The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to the Assembly.

### Defence

The country has no standing defence forces.

### Economic Affairs

The island is an extreme example of a one-crop economy, with sugar production accounting for about 90 per cent of exports and total cultivable land, and 28 per cent of the labour force. Good crops and rising prices resulted in a real growth in G.N.P. of 20 per cent in 1973 and 18 per cent in 1974, but 1975 production was badly affected by a cyclone, which destroyed between 20 and 30 per cent of the crop, and export prices fell in 1976.

Tea was successfully introduced as a new crop and now constitutes a valuable export, though the 1975 crop was also damaged by the cyclone. Subsistence farming is on a very small scale and food imports account for nearly a quarter of the total, contributing greatly to the 15 per cent rate of inflation in 1975. Petroleum products form less than 11 per cent of imports, as power is provided by hydroelectric sources and the recycling of sugar by-products. Technical assistance from the U.S.S.R. is regenerating the fishing industry.

By developing subsistence agriculture, industry and tourism, the government aims to diversify the economy and reduce the unemployment rate (7.5 per cent in 1975). The Mauritius Export Processing Zone has, since 1971, successfully attracted foreign investment in manufacturing, particularly in import substitution industries. The 1975–80 Second Development Plan is principally concerned with overcoming poverty and unemployment through the expansion of agriculture, technological industries and skilled manufacturing. Textiles, electronics and diamonds are the fastest growing sectors.

Mauritius is a member of OCAM which it joined in 1971. In 1972 it became an associate member of the European Economic Community and exports to the Community benefit from a reduction in tariffs. Following the expiry of the Commonwealth Sugar Agreement in 1974, Mauritius was allotted an annual quota of 492,000 tons of sugar on EEC markets. The agreement, vital to Mauritius's economic future, is to last indefinitely subject to a review after seven years, and the sugar price is to be reviewed annually.

### Transport and Communications

Port Louis is served by several cargo shipping lines crossing the Indian Ocean, as well as coastal shipping services, and there is an international airport. Modernization of the harbour at Port Louis is due to be completed in 1980 and a new airport at Plaines des Roches is to be constructed with aid from the People's Republic of China. The road network is good considering the mountainous terrain, and there were 375 km. of metalled roads in 1976.

### Social Welfare

The social infrastructure includes a well developed health service and several hospitals: about a seventh of the total budget is devoted to other welfare services.

### Education

Primary education is free, and is provided for about 150,000 children at government and government-aided schools (1975). Standards are high and most of the population are literate, though education is not compulsory. There is a large private sector in secondary education, total secondary enrolment being 65,303 in 1975. Teacher training is undertaken by a college and the Institute of Education which also pioneers education reform. Government expenditure on education rose from 86 million rupees in 1974 to an estimated 119.8 million rupees in 1976. The University of Mauritius has over 1,300 full and part-time students and in 1973 there were over 1,300 students abroad.

### Tourism

Major attractions include the superb beaches, fine mountain scenery, the ideal climate and the blend of cultures. Distance from major centres of population has so far limited the industry's development to the luxury trade but growth in recent years has been remarkable. The number of visitors increased from 15,000 in 1968 and 49,000 in 1971 to 72,915 in 1974, when revenue from tourism reached 112 million rupees. Tourism provides work for about 9,000 people and it is hoped that the number of visitors will rise to 200,000 by 1985.

*Visas* are not required to visit Mauritius by nationals of the United Kingdom and Commonwealth; nationals of Belgium, Denmark, Finland, the Federal Republic of Germany, Greece, Iceland, the Netherlands, Norway, Spain, Sweden, Tunisia and Turkey require no visas for a visit of six months or less, and nationals of France, Italy and South Africa for a visit of three months or less.

### Sport

Football, basketball, tennis, volleyball, fishing, swimming and golf are popular sports.

### Public Holidays

**1977:** May 1st (Labour Day), August 15th (Assumption), September 8th (Mid-Autumn Festival), September 15th (Id ul Fitr, end of Ramadan), September 16th (Ganesh Chaturthi), October 24th (United Nations Day), November 1st (All Saints' Day), November 6th (Ganga Asnan), November 10th (Divali), November 22nd (Id ul Adha, Feast of the Sacrifice), December 25th (Christmas), December 26th (Boxing Day).

### Weights and Measures

The metric system is in standard use.

### Currency and Exchange Rates

100 cents = 1 Mauritian rupee.

Exchange rates (December 1976):

£1 sterling = 11.125 rupees;
U.S. $1 = 6.714 rupees.

## FINANCE

100 cents=1 Mauritian rupee.
Coins: 1, 2, 5, 10, 25 and 50 cents; 1 rupee.
Notes: 5, 10, 25 and 50 rupees.
Exchange rates (December 1976): £1 sterling=11.125 rupees; U.S. $1=6.714 rupees.
100 Mauritian rupees=£8.99=$14.89.

*Note:* Before January 1976 the Mauritian rupee was tied to the pound sterling, its value being fixed at 7½p (£1=13.333 rupees). From November 1967 to August 1971 the central exchange rate was 1 rupee=18 U.S. cents (U.S. $1=5.556 rupees). In December 1971 the U.S. dollar was devalued but the rupee retained its value in terms of sterling and the IMF Special Drawing Right (SDR), so the new exchange rate was 1 rupee=19.543 U.S. cents ($1=5.117 rupees). However, in June 1972 the rupee was "floated" in line with sterling. The average market exchange rates (rupees per U.S. dollar) were: 5.3385 in 1972; 5.4422 in 1973; 5.7031 in 1974; and 6.0268 in 1975. In January 1976 the rupee's link with sterling was broken and the currency was pegged to the SDR (based on a weighted "basket" of 16 national currencies since July 1974) at a mid-point of 7.714 rupees per SDR, representing a depreciation of 28 per cent from its pre-float valuation.

## THE CONSTITUTION

The Mauritius Independence Order, 1968, as amended by the Constitution of Mauritius (Amendment) Act No. 39 of 1969, provides for a Cabinet consisting of the Prime Minister and not more than twenty other Ministers. The Prime Minister, appointed by the Governor-General, is the member of the Legislative Assembly who appears to the Governor-General best able to command the support of the majority of members of the Assembly. Other Ministers are appointed by the Governor-General acting in accordance with the advice of the Prime Minister.

The Legislative Assembly consists of the following:

(i) The Speaker.
(ii) Sixty-two elected members.
(iii) Eight additional members.
(iv) The Attorney-General if not an elected member.

For the purpose of electing members of the Legislative Assembly, the island of Mauritius is divided into twenty-three member constituencies. Rodrigues returns two members. The official language of the Legislative Assembly is English but any member may address the Chair in French.

# MEXICO

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The United Mexican States are bordered to the north by the U.S.A. and to the south by Guatemala. The climate varies with altitude. The lowlands are hot and wet with an average temperature of 18°C (64°F) while the highlands are temperate. Much of the north and west is desert. The principal language is Spanish, the mother tongue of 90 per cent in 1970, while about 8 per cent speak indigenous languages. About 96 per cent of the population are Roman Catholics and there are about 900,000 Protestants. The national flag (proportions 7 by 4) consists of vertical green, white and red stripes, the central white stripe being charged with the state emblem. The capital is Mexico City.

### Recent History

Since 1927 the country has been governed by a nominally left-wing party, now called the Partido Revolucionario Institucional (PRI), in an effective one-party system, while maintaining a democratic form of election. In 1940 the President, Gen. Manuel Avila Camacho, embarked on a programme of industrialization. His successor, President Miguel Alemán Valdés, concentrated on expanding educational services. President Adolfo López Mateos held office from 1958 to 1964. In 1963 agreement was reached with the U.S.A. over the disputed Chamizal zone under which 437 acres of land were transferred to Mexico. In July 1964 Lic. Gustavo Díaz Ordaz was elected President and took office in December. The 1968 Olympic Games were held in Mexico City in October and were accompanied by violent worker and student demonstrations against the Government. Lic. Luis Echeverría Alvarez won the presidential elections of 1970 and pledged that his government would extend the benefits of Mexico's prosperity to all sectors of the population. President Echeverría strengthened diplomatic links with countries of all political persuasions, particularly with Third World countries. In 1975 the Government signed trade and co-operation agreements with the EEC and CMEA in an effort to reduce its economic dependence on the U.S.A.

In the July 1976 elections the PRI candidate, José López Portillo, a former Secretary of Finance, was elected President with almost 95 per cent of the votes cast and took office in December 1976.

Just before the end of his mandate, Sr. Echeverría expropriated 100,000 hectares of land in north-west Mexico, resulting in a major protest by farm owners, private property organizations and businessmen throughout the country. It also sparked off illegal seizures of land and blockades by landless peasants. In December the courts returned the land to its former owners, causing an outcry from peasant unions.

On taking office President López Portillo called for national unity and a period of austerity. He indicated a return to more business-oriented policies and a swing to the right, and announced his intention to carry out a major tax reform programme to improve income distribution.

### Government

Mexico is a federal republic comprising 31 states and a Federal District (around the capital). Under the 1917 Constitution, legislative power is vested in the bicameral National Congress, elected by universal adult suffrage. The Senate has 64 members (two from each state and the Federal District) who serve a six-year term. The Chamber of Deputies has 245 members who serve for three years. Executive power is held by the President, directly elected for six years at the same time as the Senate. He governs with the assistance of an appointed Cabinet. Each state has its own constitution and is administered by a Governor (elected for six years) and an elected Chamber of Deputies.

### Defence

Military service is voluntary but there is a part-time conscript militia. In 1976 the armed forces totalled 89,500 regulars plus 250,000 part-time conscripts to the army. There were 69,000 regulars in the army, 14,500 in the navy (including naval air force and marines) and 6,000 in the air force. Defence expenditure for 1975 was 7,262 million pesos.

### Economic Affairs

Agriculture accounts for almost a quarter of the national income, although only 15 per cent of Mexico's land is cultivable and over 40 per cent of arable land requires artificial irrigation. In 1974 a programme of collectivization of small land-holdings was begun, aimed at increasing productivity and improving rural living conditions. The principal food crops are maize, wheat, rice and kidney beans and the major export crops are sugar, cotton, coffee, fruit and vegetables. Sugar production was adversely affected in 1975 by severe floods. A National Farm Plan (1975–80) was launched with the aim of increasing the production of basic foodstuffs. The forests provide a variety of hard and soft woods. Some 3,600 million pesos was invested in the fishing industry between 1971 and 1976, resulting in an increase in the fish catch of 197,000 tons to 451,000 tons.

Mexico is one of the world's leading producers of silver and sulphur, and other minerals include coal, zinc, lead and manganese. Large deposits of copper, phosphates and uranium have been discovered. As a result of the discovery of extensive oil reserves in Tabasco, Chiapas, Veracruz and Campeche, petroleum production reached one million barrels per day at the end of 1976. There are proven oil reserves of 11,000 million barrels. In 1976 Pemex began to export oil at a rate of 20,000 barrels per day and aims to increase exports to at least 400,000 barrels per day by 1982. An extensive refinery construction programme has increased refining capacity to 910,000 barrels per day. An intensive exploration programme aims to discover further significant reserves by 1982. The petrochemical industry grew by 22 per cent in 1975 and 23 new plants were due to go on stream in 1976/77.

There has been considerable expansion of industry: 80 per cent of consumer goods are now made in Mexico and manufactured goods account for 42 per cent of exports. Decentralization of industry away from Mexico City is being encouraged. There is heavy government investment in industry and in December 1976 a $5,000 million industrial investment plan was announced, covering sectors such as petrochemicals, capital goods industries, vegetable oils, tourism and the motor industry. The steel industry is expanding rapidly; investment in 1976 reached $1,600 million. In 1976 the first stage of the Sicartsa steel complex at Las Truchas was completed, with an annual production capacity of 1.3 million tons. When the final stage of the complex is completed in 1980, production should reach 11 million tons per year.

A law regulating foreign investment, passed in 1973, confirmed state ownership of petroleum, basic petrochemicals, electricity, railways, telegraph and wireless communications. The sectors of radio and television, transport on federal highways, gas distribution and forestry are reserved for Mexican companies. The law also specified the proportions of foreign holdings allowable in companies operating in other spheres of economic activity.

The economy grew by only 4 per cent in 1975, compared with 6 per cent in 1974, due mainly to the world economic recession. Total public foreign debt rose to over $10,000 million at the end of 1975 and the trade position deteriorated sharply in 1976. Inflation fell to 11.3 per cent in 1975 but was expected to rise again in 1976 to about 15 per cent. In August 1976 the Government abandoned the parity of the peso to the dollar, fixed in 1954, and allowed the peso to float freely. The immediate result was an effective 37 per cent devaluation. To counteract the adverse effects of a lower parity, a price control policy, a tax on excess profits and austerity measures to limit public spending were introduced.

Despite an American stand-by credit of $600 million, the peso fell by a further 26 per cent in November. Between August and December 1976 inflation reached an annual rate of 70 per cent. The Government limited the selling of foreign currencies and, with the accession of President López Portillo, the outflow of funds slowed. The President reintroduced the silver "peso fuerte", announced a number of tax reforms and called for increased private investment. Further reforms and policies have yet to be announced.

Mexico is a member of LAFTA and SELA.

### Transport and Communications

Road transport accounts for some 70 per cent of all public passenger traffic and 60 per cent of freight traffic. Uneconomic railway lines have been replaced by highways, narrow-gauge sections by broad-gauge, and a network of feeder roads serves the main-line railways. In 1974 there were 24,700 km. of railways and 160,000 km. of all-weather roads, including three sections of the Pan American Highway. About 40 per cent of the road network is paved. The difficult terrain encourages air transport and there are nearly 900 airports and landing fields. There are 42 international airports. International air transport is provided by a large number of national and foreign airlines. The chief ports are Veracruz, Tampico and Acapulco and regular shipping services are maintained by Mexican, European and American lines. A new port, Puerto Lázaro Cárdenas, in Michoacán, was opened in 1974 and a port at Puerto Madero is due for completion in 1979.

### Social Welfare

Social welfare is administered by the Mexican Social Security Institute and financed by contributions from employers, employees and the Government. In May 1970 a new Labour Law was instituted to replace the existing law of 1931. It provided for longer holidays, overtime rates and restrictions, increased bonuses, sexual equality, and trade union surveillance of company tax returns. Of particular note was the innovation of compulsory profit-sharing, and the law's demand that employers provide housing for their employees. Nearly 23 per cent of the 1976 federal budget was allocated to social welfare.

### Education

State education is free and compulsory and covers two years of pre-primary and six years of primary schooling followed by three years at secondary school or a specialized institute. Much is being done in the field of adult education and the illiteracy rate dropped from 52 per cent in 1946 to 24 per cent in 1971; about a sixth of the national budget is allocated to education. There are 44 universities.

### Tourism

In 1974 tourism accounted for over 40 per cent of foreign exchange earnings. Eighty-four per cent of visitors come from the United States and Canada. The country is famous for volcanoes, coastal scenery and the great Sierra Nevada (Sierra Madre) and Rocky Mountain ranges. The relics of the Mayan and Aztec civilizations and of Spanish Colonial Mexico are of historic and artistic interest. Tourist facilities were improved for the Olympiad in 1968, including work on 5 airports and provision for some 20,000 more hotel beds in the main centres. Zihuatanejo on the Pacific coast and Cancún on the Caribbean are being developed as tourist resorts by the Government with funds supplied by the World Bank and the Inter-American Development Bank. The Government also plans to spend $2,100 million on doubling existing accommodation between 1974 and 1980.

*Visas* are not required to visit Mexico by nationals of the following countries: Austria, Belgium, Canada, Denmark, Finland, France, the Federal Republic of Germany, Italy, Luxembourg, Netherlands, Norway, Sweden, Switzerland, the United Kingdom and the U.S.A.

### Sport

Football and baseball are the chief sports and cycling, boxing, tennis, basketball, horseracing, polo, golf and climbing have a considerable following; bullfighting, rodeos and jai-alai (pelota) retain their popularity. Facilities for swimming and sea-fishing are excellent.

## FINANCE

100 centavos = 1 Mexican peso.
Coins: 1, 5, 10, 20 and 50 centavos; 1, 5, 10 and 25 pesos.
Notes: 1, 5, 10, 20, 50, 100, 500 and 1,000 pesos.
Exchange rates (December 1976): £1 sterling = 33.95 pesos; U.S. $1 = 20.50 pesos.
1,000 Mexican pesos = £29.45 = $48.78.

*Note:* From June 1949 to April 1954 the exchange rate was U.S. $1 = 8.65 Mexican pesos (1 peso = 11.56 U.S. cents). In April 1954 the par value of the peso was fixed at 8.0 U.S. cents ($1 = 12.50 pesos) and this remained in effect until August 1976, despite two devaluations of the U.S. dollar (in December 1971 and February 1973). In terms of sterling, the exchange rate was £1 = 30.00 pesos from November 1967 to August 1971; and £1 = 32.57 pesos from December 1971 to June 1972. Since September 1976 the peso has been allowed to "float".

# THE CONSTITUTION

The present Mexican Constitution was proclaimed on February 5th, 1917, at the end of the revolution which began in 1910 against the régime of Porfirio Díaz. Its provisions regarding religion, education and the ownership and exploitation of mineral wealth reflect the long revolutionary struggle against the concentration of power in the hands of the Church and the large landowners, and the struggle which culminated in the 1930s in the expropriation of the properties of the foreign oil companies. It has been amended from time to time; the most recent amendment converted the territories of Baja California Sur and Quintana Roo into states.

## GOVERNMENT

**The President and Congress.** The President of the Republic, in agreement with the Council of Ministers and with the approval of Congress or of the Permanent Committee when Congress is not in session, may suspend constitutional guarantees in case of foreign invasion, serious disturbance, or any other emergency endangering the people.

The exercise of supreme executive authority is vested in the President, who is elected for six years and enters upon his office on December 1st of the year of his election. The presidential powers include the right to appoint and remove members of his cabinet, the Attorney-General, the governors of the Federal District and the territories; to appoint, with the approval of the Senate, diplomatic officials, the higher officers of the army, and ministers of the Supreme and higher courts of justice. He is also empowered to dispose of the armed forces for the internal and external security of the Federation.

Congress is composed of a Chamber of Deputies elected every three years, and a Senate whose members hold office for six years. One deputy is elected for every 250,000 inhabitants or for a fraction exceeding 100,000. The Senate is composed of two members for each state and two for the federal district. Regular sessions of Congress begin on September 1st and may not continue beyond December 31st of the same year. Extraordinary sessions may be convened by the Permanent Committee.

The powers of Congress include the right to pass laws and regulations; impose taxes; specify the bases on which the Executive may negotiate loans; declare war; raise, maintain and regulate the organization of the armed forces; establish and maintain schools of various types throughout the country; approve or reject the budget; sanction appointments submitted by the President of ministers of the Supreme Court and magistrates of the superior courts of the Federal District and the territories; approve or reject treaties and conventions made with foreign powers; and ratify diplomatic appointments.

The Permanent Committee, consisting of 29 members of Congress (15 of whom are deputies and 14 senators), officiates when Congress is in recess, and is responsible for the convening of extraordinary sessions of Congress.

**The States.** Governors are elected by popular vote in a general election every six years. The local legislature is formed by deputies, who are changed every three years. The judicature is specially appointed under the Constitution by the competent authority (it is never subject to the popular vote).

Each state is a separate unit, with the right to levy taxes and to legislate in certain matters. The states are not allowed to levy inter-state customs duties.

**The Federal District** consists of Mexico City and several neighbouring small towns and villages. The Governor is appointed by the President.

### EDUCATION

According to the Constitution, the providing of educational facilities is the joint responsibility of the federation, the states and the municipalities. Education shall be democratic, and shall be directed to developing all the faculties of the individual, at the same time imbuing him with a love of his country and a consciousness of international solidarity and justice. Religious bodies may not provide education, except training for the priesthood. Private educational institutions must conform to the requirements of the Constitution with regard to the nature of the teaching given. The education provided by the states shall be free of charge.

### RELIGION

Religious bodies of whatever denomination shall not have the capacity to possess or administer real estate or capital invested therein. Churches are the property of the nation; the headquarters of bishops, seminaries, convents and other property used for the propagation of a religious creed shall pass into the hands of the State, to be dedicated to the public service of the federation or of the respective state. Institutions of charity, provided they are not connected with a religious body, may hold real property. The establishment of monastic orders is prohibited. Ministers of religion must be Mexican; they may not criticize the fundamental laws of the country in a public or private meeting; they may not vote or form associations for political purposes. Political meetings may not be held in places of worship.

### LAND AND MINERAL OWNERSHIP

Article 27 of the Constitution vests direct ownership of minerals and other products of the subsoil, including petroleum and water, in the nation, and reserves to the federal government alone the right to grant concessions in accordance with the laws to individuals and companies, on the condition that they establish regular work for the exploitation of the materials. At the same time, the right to acquire ownership of lands and waters belonging to the nation, or concessions for their exploitation, is limited to Mexican individuals and companies, although the State may concede similar rights to foreigners who agree not to invoke the protection of their governments to enforce such rights. No alien may acquire direct ownership over lands and waters within an area 100 kilometres wide along the frontiers or 50 kilometres along the coast.

The same article declares null all alienations of lands, waters and forests belonging to towns or communities made by political chiefs or other local authorities in violation of the provisions of the law of June 25th, 1856,* and all concessions or sales of communally-held lands, waters and forests made by the federal authorities after December 1st, 1876. The population settlements which lack *ejidos*, or cannot obtain restitution of lands previously held, shall be granted lands in proportion to the needs of the population. The area of land granted to the individual may not be less than 10 hectares of irrigated or watered land, or the equivalent in other kinds of land.

The owners affected by decisions to divide and redistribute land (with the exception of the owners of farming or cattle-rearing properties) shall not have any right of redress, nor may they invoke the right of *amparo* in protection of their interests. They may, however, apply to the Government for indemnification. Small properties, the areas of which are defined in the Constitution, will not be subject to expropriation. The Constitution leaves to Congress the duty of determining the maximum size of rural properties.

Monopolies and measures to restrict competition in industry, commerce or public services are prohibited.

* * *

The Constitution provides for the procedure known as *juicio de amparo*, a wider form of *habeas corpus*, which the individual may invoke in protection of his constitutional rights.

A section of the Constitution deals with work and social security.

Voting rights are exercised by all Mexicans who are 18 years old.

# JUDICIAL SYSTEM

The Mexican legal system follows strictly the principle of written law. Accordingly, the definition of rights and duties, and their scope, and the procedure to ensure and enforce them are fixed in codes, such as the civil code, criminal procedure code, etc.

The courts include the Supreme Court with twenty-one ministers; five Circuit Collegiate Tribunals (*Tribunales Colegiados de Circuito*), each with three magistrates; six Circuit Unitary Tribunals (*Tribunales Unitarios de Circuito*), each with six magistrates; and forty-six District Courts with forty-six judges. The system of trial by jury also exists. Ministers of the Supreme Court, circuit magistrates and district judges, once appointed, may only be removed on the ground of misconduct.

# MONGOLIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Mongolian People's Republic lies in Central Asia with the Soviet Union to the north and China to the south, east and west. The climate is dry and extreme with winter temperatures well below freezing. The main language is Mongolian. Kazakh is spoken in the province of Bayan-ölgiy. There is no State religion but traces of Buddhist Lamaism and Shamanism still survive. The national flag (proportions 2 by 1) has red, blue and red vertical stripes with a golden star and the soyombo emblem on the left-hand stripe. The capital is Ulan Bator.

### Recent History

Mongolia was formerly the Chinese province of Outer Mongolia. In 1911, following the republican revolution in China, Mongolian nationalists declared the province's independence. With backing from Tsarist Russia, Outer Mongolia gained autonomy, as a feudal Buddhist monarchy, but accepted Chinese suzerainty in 1915. Following the Russian revolution of 1917, China began to re-establish control in Mongolia in 1919. Mongol leaders appealed to the new Soviet regime for help in 1920. In March 1921 Mongolian communists met in the U.S.S.R. to found the Mongolian People's Party, called the Mongolian People's Revolutionary Party (MPRP) since 1924, and established a Provisional People's Government. After nationalist forces, with Soviet help, overthrew Chinese rule in the Mongolian capital, independence was proclaimed, and the monarchy restored, in July 1921. The U.S.S.R. recognized the People's Government in November.

In May 1924 the U.S.S.R. acknowledged Chinese authority in Mongolia but in November, after the King's death, the Mongolian People's Republic (MPR) was proclaimed. The MPR was maintained despite Chinese protests, mainly due to Soviet support. The Government mounted campaigns to collectivize the economy and to destroy the power of the nobility and Buddhist priests. In 1932 an armed uprising was suppressed with Soviet help. Following a purge of the MPRP and army leadership in 1936–39, power was concentrated in the hands of Marshal Horloogiyn Choybalsan as Prime Minister and Party leader. In 1939 a Japanese invasion from Manchuria was repelled by Soviet and Mongol forces and the resultant truce lasted until August 1945. A plebiscite in October 1945 voted 100 per cent for independence and this was recognized by China in January 1946.

Choybalsan died in January 1952 and was succeeded as Prime Minister by Yumjaagiyn Tsedenbal. Dashiyn Damba became First Secretary of the MPRP in April 1954. During the 1950s Mongolia, previously recognized only by other communist countries, established relations with non-aligned states. Tsedenbal replaced Damba as First Secretary of the MPRP in November 1958 and a new constitution was adopted in July 1960. Mongolia has not been recognized by the U.S.A., which blocked its membership of the UN until October 1961.

During the early 1960s Mongolia attempted to maintain a neutral position in the Sino-Soviet dispute but since 1966 the Government has given unequivocal support to the U.S.S.R. and relations with China have greatly deteriorated. Mongolia accuses the Chinese Government of ill-treating the Mongol population in China and of wishing to expand its territory at Mongolia's expense. Several border incidents have been reported.

Jamsarangiyn Sambuu, Head of State since July 1954, died in May 1972. He was replaced in June 1974 by Tsedenbal, who retained the MPRP leadership but relinquished the post of Prime Minister to Jambyn Batmönh.

### Government

Under the 1960 Constitution, the supreme organ of state power is the People's Great Hural (Assembly), with 287 members elected (unopposed) by universal adult suffrage for four years. The Assembly usually meets only twice a year but elects a Presidium of 10 members to be its permanent organ. The Chairman of the Presidium is Head of State. The highest executive body is the Council of Ministers, appointed by (and responsible to) the Assembly.

Political power is held by the communist Mongolian People's Revolutionary Party (MPRP), the only legal party. The MPRP's highest authority is the Party Congress, which elects the Central Committee (91 full members and 61 candidate members were elected in 1976) to supervise Party work. The Committee elects a Political Bureau (eight full members and two candidate members) to direct its policy.

For local administration, Mongolia is divided into 18 provinces and three municipalities.

### Defence

In 1976 defence forces comprised an army of 28,000 men with about 2,000 air force personnel and some Soviet technical advisers. Military service is for 2 years. Weapons, ammunition and vehicles are supplied by the U.S.S.R. Estimated defence expenditure for 1976 is 407 million tögrög, around 13.7 per cent of budgetary expenditure, and some 32 million tögrög more than 1975.

### Economic Affairs

Animal herding is the main economic activity and is practised throughout the country. About 24.5 million horses, cattle, sheep, goats and camels are raised. The herdsmen are organized in collectives, of which there were 257 in 1976. State farms, of which there were 36 in 1974, practise agriculture on a large scale. The principal crops produced are cereals, potatoes and vegetables.

Industry, which contributes less to GNP than agriculture, is mainly devoted to the processing of food and livestock products such as hides and wool, textile manufacturing and light engineering. The industrial co-operatives, nationalized in 1972, have formed the basis of the new ministry of communal economy and services. The country's industrialization has been greatly assisted by foreign aid from other C.M.E.A. member countries, particularly the U.S.S.R. The major industrial centres are at

Ulan Bator (over 50 per cent of gross industrial production), Darhan and Choybalsan, near supplies of coal. Other important minerals include fluorspar (for the Soviet iron and steel industry), tungsten, tin, gold and lead. Large-scale copper mining and concentrating is to begin in 1978 at Erdenet, 330 kilometres north-west of Ulan Bator.

The deterioration of relations with China led to the loss of Chinese labour and consumer goods and of income from freight traffic between China and the Soviet Union. There have been frequent complaints of inefficiency and poor workmanship in industry. As in the U.S.S.R., a new management system is being introduced, involving greater flexibility in planning and the use of economic incentives.

In 1976, 80 per cent of Mongolia's trade was with the U.S.S.R., and over 16 per cent with other members of the C.M.E.A. Most of the remainder was with China, Viet-Nam and other communist countries. In 1975 Mongolian–Soviet trade was worth about 509 million roubles.

Under the Fifth Five-Year Plan (1971–75), national income increased by 38 per cent, gross industrial production by 55.2 per cent, gross agricultural production by 26 per cent, and the volume of foreign trade by 60 per cent. The draft percentage increases for the Sixth Five-Year Plan (1976–80) are, respectively, 37–41, 60–65, 26–30 and 40–45.

### Transport and Communications

The Mongolian railway system has a total length of about 1,397 km. There are over 1,500 km. of surfaced roads but much traffic is cross-country by motor vehicle and along the caravan routes. Steamer services operate on the Selenge and Orhon rivers and Lake Hövsgöl. Air transport operates to Irkutsk and Moscow and throughout the country.

### Social Welfare

There were over 100 hospitals with 13,250 beds and 2,720 doctors in 1973. In 1975 there were 10 hospital beds and two doctors per 1,000 of the population (in Ulan Bator, 18 and three respectively). There are also a number of clinics and medical stations.

### Education

Elementary education is compulsory. The curriculum varies between four, seven and ten years. In 1976 enrolment in the 560 general schools was almost 320,000, in special secondary schools 12,900, and technical schools 13,350. Students receiving higher education in 1976 totalled 12,800 with about 700 teachers. There is one university and five other institutions of higher education.

### Sport

Wrestling, archery and horse-riding are the chief sports. Winter sports, athletics and weight lifting are also popular.

### Public Holidays

**1977:** May 1st (Labour Day), July 11th (National Day), November 7th (Russia's October Revolution).

**1978:** January 1st (New Year).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 möngö = 1 tögrög (tughrik).

Exchange rates (December 1976):

£1 sterling = 5.56 tögrög;
U.S. $1 = 3.33 tögrög.

# THE CONSTITUTION

The Mongolian People's Republic is a sovereign democratic state of working people. All land, natural resources, factories, transport and banking organizations are state property. In addition to state ownership the people have co-operative ownership of public enterprises, especially in livestock herding. A limited degree of private ownership is also permitted.

The supreme state power is the People's Great Hural (Assembly), which is elected every four years by universal, direct and secret suffrage of all citizens over the age of 18; the last elections took place in June 1973. It has the power of amending the Constitution (by a two-thirds majority), adopting laws, formulating the basic principles of policy and approving the budget and economic plans. Its Presidium consists of a Chairman (who is Head of State), First Vice-Chairman, a Vice-Chairman, a Secretary and seven members. The functions of the Presidium are to interpret legislation and issue decrees, ratify treaties and appoint or dismiss (with the approval of the People's Great Hural) the members of the Council of Ministers.

The Council of Ministers is the highest executive power and consists of the Chairman, First Vice-Chairmen, Vice-Chairmen, Ministers and Chairmen of State Commissions.

Local government is exercised by Hurals and their executive committees at Aymag (Province) and Somon (County) levels.

# TRANSPORT

## RAILWAYS

**Ulan Bator Railway:** Ulan Bator; Dir. A. V. REMAROV; Deputy Dir. N. TSERENNOROV.

External Lines: from the Soviet frontier at Naushki Sühbaatar (connecting with the Trans-Siberian Railway) to Ulan Bator on to the Chinese frontier at Dzamyn-üüd/Erhlien and connecting with Peking (total length 1,115 km.).

Branch: from Darhan to Sharyn Gol coalfield (length 68 km.); branch from Salhit near Darhan westwards to Erdenet (Erdenetiyn-ovoo open-cast copper mine) in Bulgan Province (length about 170 km.).

Eastern Railway: Choybalsan; from the Soviet frontier at Borzya/Ereentsav to Choybalsan (length 237 km.).

Mongolia's railways account for over 75 per cent of total freight turnover.

## ROADS

Main roads link Ulan Bator with the Chinese frontier at Dzamyn üüd/Erhlien and with the Soviet frontier at Altanbulag/Kyakhta. A road from Chita in the U.S.S.R. crosses the frontier in the east at Mangut/Onon (Öldziy) and branches for Choybalsan and Öndörhaan. In the west and north-west, roads from Biysk and Irkutsk in the U.S.S.R. go to Tsagaannuur, Bayan-ölgiy Aymag, and Hanh, on Lake Hövsgöl, respectively. The total length of these and other main roads is about 8,600 km. The length of asphalted roads is now approaching 1,600 km., almost entirely in towns. The first section of a hard-surfaced road between Ulan Bator and Bayanhongor was completed in 1975. The road from Darhan to Erdenet is also to be surfaced. Inter-provincial and intra-provincial traffic goes across country in most cases.

There are bus services in Ulan Bator and other large towns, and lorry services throughout the country on the basis of 25 motor transport depots, mostly situated in provincial centres.

## INLAND WATERWAYS

Water transport plies Lake Hövsgöl and the River Selenge (474 km. navigable) in the northern part of the country. Tugs and barges on Lake Hövsgöl transport goods brought in by road to Hanh from the U.S.S.R. to Hatgal on the southern shore.

## CIVIL AVIATION

**Mongolian Civil Air Transport (MIAT):** Ulan Bator; f. 1956; internal services to most provincial centres and many county centres; thrice-weekly service from Ulan Bator (Buyant-Uhaa) to Irkutsk; equipment includes An-24, Il-14, An-2, Mi-4, Ka-26; Head of Chief Directorate for Civil Aviation Maj.-Gen. # MOROCCO

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Morocco is situated in the extreme north-west of Africa. It is bordered by Algeria to the east and Mauritania to the south. The climate is warm and sunny on the coast, while the plains of the interior are intensely hot in summer. Average temperatures are 27°C (81°F) in summer and 7°C (45°F) in winter for Rabat, and 38°C (101°F) and 4°C (40°F) respectively for Marrakesh. The rainy season in the north is from November to April. The official language is Arabic, but a large minority speak Berber. Spanish is widely spoken in the northern regions and French in the rest of Morocco. The established religion is Islam, to which most people belong, and there are Christian and Jewish minorities. The national flag (proportions 3 by 2) is red with a five-pointed green star in the centre. The capital is Rabat.

### Recent History

From 1912 to 1956 Morocco was divided into French and Spanish Protectorates and the International Zone of Tangier (created in 1923). In 1956 the country became independent and Tangier's special status was ended in 1960. Previously a Sultanate, Morocco became a Kingdom in 1957 and acquired the northern strip of Spanish Sahara in 1958. In 1960 King Mohammed V took charge as Prime Minister but died the following year and was succeeded by his son, the present King Hassan II. A new constitution was drawn up in 1962 to provide for a more widely-based government. Following disturbances in Casablanca, a "state of exception" was declared in June 1965, and Parliament was suspended until 1970, when an amended constitution, approved in July, set up a unicameral Chamber of Representatives and strengthened the power of the King.

In July 1971 a section of the army attempted to overthrow the monarchy, but the revolt was suppressed by loyal troops led by Gen. Mohammed Oufkir. There were many arrests and executions and a purge of government officials was carried out. At the same time numerous members of the left-wing *Union Nationale des Forces Populaires* (UNFP) were tried for allegedly plotting to overthrow the Government. Another new constitution was approved by referendum in March 1972.

An unsuccessful attempt to assassinate King Hassan was made in August 1972, apparently instigated by the Minister of Defence and Army Chief of Staff, Gen. Oufkir, who committed suicide immediately afterwards. The King took personal command of the army and offered government participation to the opposition parties, Istiqlal and UNFP. However, he refused to allow the fundamental reforms which they demanded as a pre-condition of acceptance. Terrorist activities in early 1973 were officially interpreted as the beginnings of a guerrilla movement, backed by the military régime in Libya. The Rabat section of the UNFP was outlawed and several hundred people, including UNFP leaders, were arrested.

A major diplomatic campaign initiated in July 1974 to annex the Spanish Sahara received active support from all opposition parties. Morocco brought the issue before the International Court of Justice and a mission from the UN Committee on Colonialism was sent to the territory. The findings of both the mission and the World Court were unsatisfactory to Morocco. In November 1975 Hassan ordered a "Green March" by over 100,000 Moroccan volunteers to occupy the territory. The marchers barely crossed the border before they were stopped, but on November 14th Spain, Mauritania and Morocco agreed on a tripartite administration in the Sahara. Moroccan troops moved into the territory to confront a guerrilla uprising led by the local Algerian-backed liberation movement, Polisario.

In January and February 1976 there were clashes between Moroccan and Algerian troops in the Sahara. At the end of February Spain's withdrawal from the territory was officially completed, and at the beginning of March Polisario formed a Saharan Government-in-exile in Algeria. Morocco and Mauritania broke off diplomatic relations with Algeria, but the possibility of full-scale war receded since Algeria limited itself to providing support and refuge for Polisario guerrillas. In April Morocco and Mauritania agreed on a division of the territory and the joint exploitation of its phosphates. The Moroccan sector was annexed as three new provinces centred on El Aïoun, Smara and Bojador. Guerrilla warfare continued throughout 1976. Moroccan troops were able to inflict heavy casualties and to ensure the security of the major towns, but they could not prevent constant infiltration, harassment and sabotage, especially of the important conveyor belt linking the Bucraa mines with the coast.

In November 1976 local elections were held throughout Morocco. All but one of the opposition parties agreed to participate in the elections for the first time since 1963. National elections were to be held before April 1977. Although political arrests and trials continued, even the left-wing USFP (formerly the banned Rabat branch of the UNFP) declared its support for King Hassan and his Saharan policy.

### Government

Under the Constitution of 1972 the King appoints the Prime Minister and Cabinet, approves legislation and has the right to dismiss parliament. Legislation is carried out by a single Chamber of Representatives, two-thirds of whom are elected by direct universal suffrage and a third of whom are indirectly elected.

### Defence

In 1976 Morocco had an army of 65,000, a navy of 3,000 and an air force of 5,000 men. There is obligatory military service of 18 months. Defence expenditure in 1976 totalled 1,129 million dirhams.

### Economic Affairs

Agriculture and mining are the mainstays of the economy. The chief crops are wheat, barley, maize and citrus fruits. Livestock-raising is important and fishing is well developed. The most important minerals extracted are phosphates, of which Morocco is by far the world's leading exporter. Other deposits include iron ore, coal, lead, zinc, cobalt and manganese.

Industry is still on a small scale but has been developed under a series of Five-Year Plans since 1960. A number of important dam projects have been completed, providing both power and irrigation. Despite constant exploration, no significant oil deposits have yet been discovered.

King Hassan has consistently encouraged foreign investment and private enterprise, but in recent years the State has adopted a more active and aggressive role in promoting Morocco's economic interests. In 1973 over 200,000 hectares of foreign-owned land were taken over by the State for redistribution among the rural population, a considerable step forward in the agrarian reform programme which has been pursued since 1966. Certain measures of Moroccanization have been imposed on foreign firms and strong action has been taken against those failing to comply.

In 1973/74 Morocco quadrupled the price of phosphates, and between the two years the value of phosphate exports rose from 788 million dirhams to 4,075 million dirhams, representing over 50 per cent of export earnings in 1974. However, in 1975 a drop in world demand caused a fall in Moroccan phosphate production to only 14,119,000 metric tons, compared with 19,749,000 metric tons the previous year. Prices also fell from 1974 levels. Morocco's trade deficit grew from 852 million dirhams in 1974 to 4,156 million dirhams in 1975, as exports declined and imports continued to increase. Morocco is expected to benefit from exploitation of the Bucraa phosphate mines in the Moroccan sector of the former Spanish Sahara. A year after Spanish withdrawal from the territory, however, production from the mines had still not resumed.

There are still great inequalities of wealth in Moroccan society. There is a serious unemployment problem and emigration of workers is encouraged, the money they earn abroad being an important source of income for the country. Tourism is also a valuable sector of the economy. During the 1968–72 development plan an average growth rate of 5.5 per cent per annum was achieved, and the 1973–77 plan envisages an annual growth rate of 6.5 per cent.

### Transport and Communications

There are 1,778 km. of railway of which 730 km. are electrified. Paved roads extend for 13,500 km., of a total road length of 25,000 km. The chief ports are Casablanca, Safi and Mohammedia. There are six international airports and about 50 airfields.

### Social Welfare

All employees are required to contribute to a Social Welfare Fund which provides against illness, occupational accidents and old age. There were 24,554 hospital beds in 1973.

### Education

There are state primary, secondary and technical schools and also private schools. All primary school teachers are Moroccan, but about 7,000 secondary school teachers come from France, although teacher-training is expanding. Over half the children of school age attend school. Education for both sexes between 7 and 13 years old has been compulsory since 1963. Girls generally leave school younger than boys and make up only 28 per cent of secondary school pupils and 13 per cent of students in higher education. There are two universities and several other institutions for higher education. In 1971 adult illiteracy averaged 78.6 per cent (males 66.4 per cent, females 90.2 per cent).

### Tourism

Morocco is famous for a hot and sunny climate, its ancient, walled towns, the modern capital Rabat and the modern port Casablanca, for desert and mountains and Atlantic and Mediterranean resorts. Tourists from all over the world visit Fez and Marrakesh.

*Visas* are not required to visit Morocco by nationals of Arab League states (except Sudan), Argentina, Australia, Brazil, Canada, Chile, Ghana, Guinea, Indonesia, Ivory Coast, Japan, Liberia, Madagascar, Mali, Mexico, New Zealand, Nigeria, Peru, Philippines, Puerto Rico, Turkey, U.S.A., Venezuela, Zaire, or any West European country except Portugal and Spain).

### Sport

Football is the most important sport and tennis and skiing are also popular.

### Public Holidays

**1977:** May 1st (Labour Day), August 16th (Beginning of Ramadan), September 15th (Eid el Seghir-Id ul Fitr, end of Ramadan), November 18th (Independence Day), November 22nd (Eid el Kebir-Id ul Adha, Feast of the Sacrifice), December 12th (Muslim New Year), December 21st (Ashoura).

**1978:** February 20th (Mouloud, Birth of the Prophet), March 3rd (Festival of the Throne, anniversary of King Hassan's accession).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 Moroccan francs (centimes) = 1 Moroccan dirham.

Exchange rates (December 1976):

£1 sterling = 7.47 dirhams;
U.S. $1 = 4.51 dirhams.

# STATISTICAL SURVEY

Statistics for Morocco exclude the portion of the former Spanish Sahara annexed in February 1976.

## FINANCE

100 Moroccan francs (centimes) = 1 Moroccan dirham.
Coins: 1, 2, 5, 10, 20 and 50 francs; 1 and 5 dirhams.
Notes: 5, 10, 50 and 100 dirhams.
Exchange rates (December 1976): £1 sterling = 7.47 dirhams; U.S. $1 = 4.51 dirhams.
100 Moroccan dirhams = £13.38 = $22.17.

*Note:* The dirham was introduced in October 1959, replacing the Moroccan franc (at par with the old French franc until December 1958) at the rate of 1 dirham = 100 francs. At the same time the currency was devalued by 17.0 per cent, with the former exchange rate (U.S. $1 = 420 Moroccan francs) being replaced by a new rate based on a relationship with French currency, initially fixed at 1 French franc = 1.025 Moroccan francs (1 French franc = 1.025 dirhams after the introduction of the new French franc in January 1960). In terms of U.S. currency, the rate was $1 = 5.0605 dirhams (1 dirham = 19.761 U.S. cents), which remained in operation until August 1971, while the relationship to French currency became 1 French franc = 91.111 Moroccan francs after August 1969. From December 1971 to February 1973 the official exchange rate was $1 = 4.661 dirhams (1 dirham = 21.455 U.S. cents). A new par value of $1 = 4.195 dirhams (1 dirham = 23.84 U.S. cents) was established in February 1973 but in March 1973 the French authorities ceased to maintain the franc-dollar rate within previously agreed margins. Morocco maintained a link with the French franc, although the fixed relationship was ended in May 1973. As a result of these changes, the market exchange rate since March 1973 has fluctuated widely above and below the par value, although the latter continued to be the basis for calculating the value of foreign trade transactions until the end of 1974. The average market rates (dirhams per U.S. dollar) were: 4.5959 in 1972; 4.1069 in 1973; 4.3698 in 1974; and 4.0525 in 1975. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 12.145 dirhams.

# THE CONSTITUTION

(Promulgated March 10th, 1972, after having been approved by national referendum.)*

**Preamble:** The Kingdom of Morocco, a sovereign Moslem State, shall be a part of the Great Maghreb. As an African State one of its aims shall be the realization of African unity. It will adhere to the principles, rights and obligations of those international organizations of which it is a member and will work for the preservation of peace and security in the world.

**General Principles:** Morocco shall be a constitutional, democratic and social monarchy. Sovereignty shall pertain to the nation and be exercised directly by means of the referendum and indirectly by the constitutional institutions. All Moroccans shall be equal before the law, and all adults shall enjoy equal political rights including the franchise. Freedoms of movement, opinion and speech and the right of assembly shall be guaranteed. Islam shall be the state religion.

**The Monarchy:** The Crown of Morocco and its attendant constitutional rights shall be hereditary in the line of H.M. King Hassan II, and shall be transmitted to the oldest son, unless during his lifetime the King has appointed as his successor another of his sons. The King is the symbol of unity, guarantees the continuity of the state, and safeguards respect for Islam and the Constitution. The King shall have the power to appoint and dismiss the Prime Minister and Cabinet Ministers and shall preside over the Cabinet. He shall promulgate legislation passed by parliament and have the power to dissolve the House of Representatives; is empowered to declare a state of emergency and to initiate revisions to the Constitution. The Sovereign is the Commander-in-Chief of the Armed Forces; makes appointments to civil and military posts; appoints Ambassadors; signs and ratifies treaties; presides over the Council for National Development Planning and the Supreme Judiciary Council; and exercises the right of pardon.

**Legislature:** This shall consist of a single assembly, the Chamber of Representatives, which shall comprise 240 members elected for a four-year term. Two-thirds of the members shall be elected by direct universal suffrage, and one-third by an electoral college composed of councillors in local government and employers' and employees' representatives. The Chamber shall pass legislation, which may be initiated by its members or by the Prime Minister; authorize any declaration of war; and approve any extension beyond thirty days of a state of emergency.

**Government:** The Government shall be responsible to the King and the Chamber of Representatives and shall ensure the execution of laws. The Prime Minister shall be empowered to initiate legislation and to exercise statutory powers except where these are reserved to the King. He shall put before parliament the Government's intended programme and shall be responsible for co-ordinating ministerial work.

**Relations between the Authorities:** The King may request further consideration of legislation by the Chamber before giving his assent; submit proposed legislation to a referendum by decree; and dissolve the Chamber of Representatives if a Bill rejected by the Chamber is approved by referendum. He may also dissolve the Chamber by decree, but the succeeding Chamber may not be dissolved within a year of its election. The Chamber of Representatives may defeat the Government either by refusing a vote of confidence moved by the Prime Minister or by passing a censure motion; either eventually shall involve the Government's collective resignation.

**Judiciary:** The Judiciary shall be independent. Judges shall be appointed on the recommendation of the Supreme Council of the Judiciary presided over by the King.

---

* For the most part the Constitution is unchanged from the one drawn up by King Hassan II and promulgated in 1962. This provided for two houses of parliament, one elected by universal suffrage and one by electoral colleges, and was superseded by that of July 1970, which introduced a unicameral Chamber of Representatives, of which two-thirds of the members were to be elected by universal suffrage, and increased the powers of the monarch.

## JUDICIAL SYSTEM

The **Supreme Court** (*Majlis el Aala*) is responsible for the interpretation of the law and regulates the jurisprudence of the courts and tribunals of the Kingdom. The Supreme Court sits at Rabat and is divided into five Chambers.

**First President and Attorney-General:** Brahim Keddara.

The nine **Courts of Appeal** hear appeals from lower courts and also comprise a criminal division.

The **Sadad Tribunals** pass judgment, without possibility of appeal, in personal, civil and commercial cases involving up to 300 dirhams. These tribunals also pass judgment, subject to appeal before the Regional Tribunals, in the same cases up to 900 dirhams, in disputes related to the personal and successional statutes of Moroccan Muslims and Jews, and in penal cases involving misdemeanours or infringements of the law.

The **Regional Tribunals** deal with appeals against judgments made by the Sadad Tribunals; and pass judgment in the first and last resort in cases of personal property of 900 to 1,200 dirhams or property producing a yield of up to 80 dirhams. The Regional Tribunals also pass judgment, subject to appeal before the Court of Appeal, in actions brought against public administrations in administrative affairs, and in cases of minor offences in penal matters.

**Labour Tribunals** settle, by means of conciliation, disputes arising from rental contracts or services between employers and employees engaged in private industry. There are 14 labour tribunals in the Kingdom.

A special court was created in 1965 in Rabat to deal with corruption among public officials.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Mozambique lies on the east coast of Africa, bordered to the north by Tanzania, to the west by Malawi, Zambia and Rhodesia and to the south by South Africa. The wet season has average temperatures of 83°F and the dry season has average temperatures of 65°–68°F at Maputo. Portuguese is the official language although tribal dialects, principally Makua Lomwe are widely spoken. The population is mainly animist although there are a million Christians, the majority of whom are Roman Catholic, and 800,000 Muslims. The national flag features four triangles radiating from a common apex at the upper hoist corner. From the top the stripes, separated by white slivers, are green, red, black and yellow. A white cog-wheel, featuring a hoe, book, rifle and red star, is superimposed in the upper left. The capital is Maputo.

### Recent History

Mozambique became a Portuguese colony in the nineteenth century and an overseas province in 1951. Nationalist groups began to form in the 1960s. Frelimo (Frente de Libertaçao de Moçambique—Mozambique Liberation Front) was formed in 1962 by the merger of three existing nationalist parties. Its military campaign was launched in 1964 and continued until the ceasefire in September 1974. After the *coup* in Portugal in April 1974, independence negotiations between Frelimo and the new Portuguese government took place. In September agreement was reached and the country was administered by a transitional government composed of representatives of Portugal and Frelimo until independence on June 25th, 1975.

Since independence government policy has included the nationalization of schools, hospitals, banking and insurance. Emphasis is placed on political re-education. Political activists have established "*grupos dinamizadores*" to increase political awareness in rural areas.

In December 1975 a revolt by dissident elements of the armed forces and police was put down. Attempts to establish communal villages and farms have encountered opposition, particularly in the north, and it was reported that Tanzanian troops had helped the Mozambican forces' efforts to crush anti-government dissidents.

In March 1976 the border with Rhodesia was closed, economic sanctions applied and all Rhodesian assets in Mozambique were seized. The country was put on a war footing. Various countries and international agencies provided aid to cover the resulting $165 million estimated loss of revenue in 1976. President Machel played a leading role in the attempts to encourage a peaceful solution to the constitutional problems of Rhodesia and Namibia but in 1976 joined the Presidents of Angola, Botswana, Tanzania and Zambia in condemning the Turnhalle talks on the future of Namibia and the proposed arrangements for the transition to black majority rule in Rhodesia agreed between the Rhodesian Prime Minister, Ian Smith, and the U.S. Secretary of State, Dr. Henry Kissinger. Mozambique is the principal base for Rhodesian guerrillas and parts of western Mozambique have been damaged in Rhodesian raids on the guerrilla training and refugee camps. In late 1976 the Government established a Solidarity Bank to aid the liberation movements of Rhodesia, Namibia and South Africa, into which each citizen must put one day's salary every month.

Relations with Portugal deteriorated in 1976, and almost all the 250,000 Portuguese who had remained in the country after independence left by the end of the year. Mozambique is establishing closer ties with the U.S.S.R. and has signed various co-operation agreements with the Soviet Government. At the end of 1975 Mozambique and Tanzania set up a Joint Co-operation Committee with the aim of making their economies complementary. There is to be joint training of diplomats, soldiers and police under this agreement. A similar committee has been proposed with Zambia.

### Government

The 1975 Constitution proclaims that Frelimo is the directing power of the state and of society. Legislative power is vested in the People's Assembly, with 210 members (mainly Frelimo officials) to be indirectly elected after the third Frelimo Congress held in early 1977. The President of the Republic, who is Head of State, is the President of Frelimo. He holds executive power and governs with the assistance of an appointed Council of Ministers.

### Defence

A National Defence Force has been created, within which there are no ranks. A people's organization, Serviço Nacional de Segurança Popular (the National Service of Popular Security), was established to work with the Government and the armed forces on matters of national security. There were an estimated 20,000 troops in 1976 and two batallions of Tanzanian troops are deployed in Mozambique.

### Economic Affairs

The economy is based on agriculture which employs about 90 per cent of the working population. The major cash crops are cashew nuts, sugar, cotton, tea and sisal. Mozambique is the world's largest producer of cashew nuts, supplying 45 per cent of world output. Maize, bananas, rice and copra are also grown. In 1976 the Government began a scheme of resettling peasants, including more than 60,000 refugees repatriated from Tanzania, into communal villages of about 1,000 families who would work communal farms. However, there has been much opposition to this proposal.

There are considerable mineral resources although only coal and bauxite are at present exploited. Production of coal from Moatize in the Tete region is to be increased from 300,000 tons in 1975 to a target of 3 million tons. High-grade iron ore deposits exist in large quantities in the Mecuco area. Diamonds, gold, emeralds and semi-precious stones have been discovered in Tete province. Mozambique has two-thirds of the world's known reserves of tantalite and is the world's second largest source of beryl. Vast natural gas deposits have been discovered.

Industry is limited and Mozambique is heavily dependent on South African industrial products. Food processing forms the basis of this sector, with sugar refining, cashew- and wheat-processing predominating. Other industries include cotton spinning and weaving, brewing and the manufacture of cement and fertilizers. A tile factory, capable of supplying domestic demand and producing for export, was due to start production in mid-1976.

Since independence agricultural and industrial production has fallen by between 70 and 75 per cent, mainly due to reduced productivity and the exodus of skilled Portuguese workers. Traditionally 60 per cent of foreign trade was with Rhodesia but this has been lost due to the closure of the border in March 1976. Closure of road and rail links has also meant lost revenue from traffic with Zaire, Botswana, Malawi and South Africa. There is a severe shortage of staple foods and industrial products as Rhodesia was the principal supplier before 1976. It is estimated that the annual loss of revenue from severing relations with Rhodesia would stabilize at about $120 million after 1977.

Trade with South Africa continued in 1976 and the South African Government is helping Mozambique to reorganize its ports and electrify various railway lines into South Africa. Mozambique has traditionally received over 25 per cent of its foreign exchange from South Africa in the form of gold sent as part payment for the 130,000 Mozambican miners working in South African mines. However, this income, approximately R100 million in 1975, fell in 1976 because of the lower price of gold and a decreased labour flow.

Mozambique is faced with the problems of low foreign exchange reserves and a massive balance of payments deficit. Even with its income from South Africa, the 1976 deficit is estimated at $220 million. Priority sectors are agriculture, energy and communications, and Mozambique is relying heavily on aid from international agencies and individual countries. It is co-operating closely with Tanzania and hopes to alleviate its economic situation by forging closer links with the rest of Black Africa as well as with the U.S.S.R. Long-term economic progress revolves around the Cabora Bassa dam but the supply of electricity from the world's fourth largest hydro-electric scheme was a year behind schedule by the end of 1976.

### Transport and Communications

In 1977 there were 3,696 km. of railways. The country is lacking a good network of roads, with only 39,173 km. of roads and tracks in 1974. A road linking Mozambique with Zambia is under construction and there are plans to link Mozambique with Tanzania by building a bridge over the Ruvuma River. The main ports are Maputo, the second largest port in Africa, Beira, Nacala and Quelimane. A cargo terminal at Moatize, opened in 1976, will link the port of Beira to Zambia and Zaire and handle goods for these countries. Air transport is operated by the state-owned DETA which has pooled its resources with the Angolan airline TAAG. There are sixteen airports, three of which are international airports.

### Social Welfare

Most white doctors have left, leaving only 100 doctors for a population of 9 million in late 1975. Health services have been nationalized and an emergency medical plan, to cost $22 million, has been drawn up. It gives priority to medical training.

### Education

Eighty-five per cent of the population are illiterate. The university at Maputo, renamed the Eduardo Mondlane University in 1976, reopened in 1976 after having been closed for a year. All university students must give as many years of public service as time spent at university.

# THE CONSTITUTION

The Constitution of the People's Republic of Mozambique was approved by the Central Committee of Frelimo on June 20th, 1975, and came into force at independence on June 25th, 1975. The following summary includes the most important articles of the Constitution:

### Section I: General Principles

1. The People's Republic of Mozambique is a sovereign, independent and democratic State.

2. Power belongs to the workers and peasants united and led by Frelimo and is exercised by the organs of people's power.

3. Frelimo is the leading force of the State and Society.

4. The Republic has the following fundamental objectives:
   The elimination of colonial and traditional structures;
   the extension of people's democratic power;
   the building of an independent economy;
   the defence and consolidation of national independence and unity;
   the pursuit of the struggle against colonialism and imperialism.

5. The Mozambique People's Liberation Forces (FPLM) are responsible for national defence. Its Commander-in-Chief is the President of Frelimo.

8. The land and the natural resources of the soil and subsoil, of the territorial waters and continental shelf of Mozambique are the property of the State.

10. The State economic sector is the leading and driving factor in the national economy.

11. The State encourages individual peasants and workers to organize themselves in collective forms of production.

12–14. Personal property is guaranteed and foreign capital shall be authorized to operate within the framework of the State's economic policy.

19. The Republic is a secular State in which there is absolute separation between the State and religious institutions.

### Section II: Fundamental rights and duties of citizens

26. All citizens enjoy the same rights and are subject to the same duties, irrespective of colour, race, sex, ethnic origin, place of birth, religion, level of education, social position or occupation.

28. All citizens over 18 years of age are entitled to vote and be elected.

30. Active participation in the defence of the country and the Revolution is the right and supreme duty of every citizen.

27. All citizens enjoy freedom of opinion, assembly and association.

33. Individual freedoms are guaranteed by the State, including the freedom to practise or not to practise a religion.

35. The State guarantees accused persons the right to a legal defence.

### Section III: State Organs

#### Chapter I: People's Assembly

37. The People's Assembly, with no more than 210 members, is the supreme organ of the State and is the highest legislative organ of the Republic. Pending further definition it shall comprise the following members:
   members of Frelimo's Central and Executive Committees;
   Ministers and Vice-Ministers of the Government;
   Provincial governors;
   members chosen by the Central Committee from among Frelimo and FPLM cadres;
   two representatives, designated by the Central Committee, from each provincial mass organization;
   at least 10 citizens chosen by the Central Committee.

38. Decisions are made by absolute majority vote.

42. The Assembly is convened and presided over by the President of the Republic. It meets in ordinary sessions twice a year and in extraordinary session when requested by the Central Committee, the President, the Permanent Commission of the Assembly or by at least one-third of the members of the Assembly.

44. The Permanent Commission of the Assembly consists of 15 members elected by the Assembly from among its members on the proposal of the Central Committee.

45. The Permanent Commission assumes the functions of the Assembly in the periods between meetings of that body. It is answerable to the Assembly, and is presided over by the President.

#### Chapter III: President of the Republic

47–52. The President of the People's Republic of Mozambique is the President of Frelimo and the Head of State. His function is to create ministries and define their jurisdiction; to direct the activities of the Council of Ministers and preside over its meetings; to appoint and dismiss members of the Council of Ministers, the President and Vice-President of the Supreme People's Court and the Attorney-General of the Republic, provincial governors, the governor and deputy governor of the Bank of Mozambique, the general commander and deputy general commander of the Police Corps, the rector of the University and diplomatic representatives of the Republic in other countries; to promulgate and have issued laws and legislative decrees; to declare a state of war and conclude peace treaties; to proclaim mobilization; to accredit diplomatic representatives of other countries; to pardon and commute sentences and to declare a state of siege or emergency. In the event of the President's death, resignation or permanent incapacity his functions shall be immediately assumed by Frelimo's Central Committee who shall nominate a new President.

#### Chapter IV: Council of Ministers

53–54. The Council of Ministers comprises the Ministers and Vice-Ministers of the Republic and is presided over by the President of the Republic. It is answerable to the Assembly and must comply with resolutions of Frelimo's Congress, Central Committee and Executive Committee, laws of the Assembly and its Permanent Commission and decisions of the President of the Republic.

#### Chapter V: Administrative organization and local state organs

55. The Republic is administered in provinces, districts and localities.

57. The highest State organ in a province is the Provincial Government presided over by the governor, who is answerable to Frelimo and the Central Government.

58. There shall be a Provincial Assembly in each province.

60. The President of the Republic may annul decisions of the governors, Provincial Governments and Provincial Assemblies.

### Chapter VI: Judiciary

62. Judicial functions shall be performed by the courts, through the Supreme People's Court and other courts provided for in the law on the judiciary.

64. The President of the Supreme People's Court is appointed by the President of the Republic.

65. The judiciary is independent.

### Section IV: Symbols of the People's Republic of Mozambique

### Section V: Final and transitional provisions

70. Pending the creation of the Assembly with constituent powers, any alteration to the Constitution is the task of Frelimo's Central Committee.

72. Until the People's Assembly starts to function, its legislative powers shall be exercised by the Council of Ministers.

# NAMIBIA
## (SOUTH WEST AFRICA)

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Capital

Namibia lies in south-west Africa, with South Africa to the south and south-east, Botswana to the east and Angola to the north. The narrow Caprivi Strip between Angola and Botswana in the north-east extends Namibia to the Zambesi River, giving it a border with Zambia. The coastal areas have mild temperatures though the territory is subject to droughts and unreliable rainfall, and includes the Namib Desert. The official languages are Afrikaans, German and English. The Europeans and substantial numbers of the African communities are Christians. The capital is Windhoek.

### History

In 1920 the League of Nations granted South Africa a mandate over South West Africa. The interpretations of its obligations have been the subject of repeated controversy, and South Africa has been consistently criticized at the UN over its extension of *apartheid* to the Territory. The UN General Assembly voted to terminate South Africa's mandate in October 1966; set up a UN Council for South West Africa in May 1967; and changed the name of the territory to Namibia in June 1968. The International Court of Justice considered the dispute four times and again in 1971 when it ruled that South Africa's presence was illegal.

In 1964 a South African government commission recommended setting up ten homelands for the territory's ethnic groups. Legislative Councils were created for the Ovambo Homeland in 1968 and others were formed during the following years but the system of tribal appointment for leadership continues in some homelands. In the controversial elections of January 1975 Chief Filemon Elifas was returned as chief minister for Ovamboland, though he was assassinated in August that year.

In 1972 the UN Security Council initiated contacts with South Africa in an attempt to resolve the deadlock over Namibia, and the UN Secretary-General, Dr. Kurt Waldheim, visited South Africa. Further contacts failed to produce agreement and in December 1973 the Security Council terminated contact with South Africa. The General Assembly recognized the South West African People's Organisation (SWAPO) as the sole representative of the Namibian people. SWAPO has a legal wing which is tolerated in Namibia, though its members are subject to harassment and detention without trial under South Africa's security laws, and an illegal external wing based in exile, both led by the SWAPO President, Sam Nujoma. The external wing controls the People's Liberation Army of Namibia (PLAN), whose guerrilla activities have steadily increased since its first operations in the 1960s, particularly since the MPLA victory in Angola in 1976.

During 1973 and 1974 South Africa became more flexible, influenced by events in Rhodesia and in the former Portuguese territories of Angola and Mozambique. The South African Prime Minister, B. J. Vorster, tried to create a multi-racial Advisory Council for the territory but it was boycotted by SWAPO and most influential Africans. In November 1974 the all-white South West Africa Legislative Assembly decided to organize a multi-racial constitutional conference on the territory's future, suggesting considerable constitutional changes, and talks began at the Turnhalle in Windhoek in September 1975, attended by 134 delegates representing the territory's eleven main ethnic groups. Neither the UN nor the Organization of African Unity (OAU) recognizes the conference, owing to its ethnic and non-democratic basis and its exclusion of political organizations. In January 1976 the UN Security Council ordered South Africa to withdraw its forces from Namibia and allow free elections, and further pressure was applied by the U.S. Secretary of State, Dr. Henry Kissinger, during discussions with Mr. Vorster. The South African Prime Minister undertook not to interfere if the Turnhalle conference invited the participation of delegates from the legal wing of SWAPO, a move advocated by many of the conference delegates. This was rejected by SWAPO, which declared that it would negotiate for Namibian independence directly with South Africa only after several preconditions, including the withdrawal of South African armed forces and the release of political prisoners, had been met.

In August 1976 the constitutional committee of the Turnhalle conference announced December 31st, 1978, as a target date for Namibian independence, that it should be a unitary state (a point previously resisted by the white delegates) and that an interim government was to be formed as soon as a constitution had been drafted. These proposals received South African backing but were rejected by SWAPO, the UN and the OAU, which stated that SWAPO was entitled to foreign military assistance in its struggle to liberate Namibia. In December the UN Committee on the Ending of Colonialism declared its support for the guerrilla war. In January 1977 the Turnhalle conference proposed a three-tier system of government (*see* below) before independence.

### Government

Namibia elects six members to the South African House of Assembly and two to the Senate, with two further senators appointed by the South African President to represent Namibia. The South West Africa Legislative Assembly has no powers in matters involving defence, railways and harbours, civil aviation, native affairs and certain legal affairs. Only Europeans may vote.

By June 1976 a state of emergency was in force in much of northern Namibia, including large parts of Ovamboland, Okavango and Caprivi, which was placed under virtual martial law. In April 1976 the South African Government designated the East Caprivi homeland a self-governing territory named Caprivi, with a cabinet, comprising the chief minister (a chief) and five other members, and a legislative council.

The constitution proposed by the Turnhalle conference in January 1977 envisages a three-tier system of government in the period leading to independence in 1978. Administration will be at municipal, provincial and national levels, under a strong central government. Executive power will reside in a cabinet council, including the leaders of the 11 ethnic delegations at the conference.

### Defence

South African defence forces, estimated at 40,000 troops in 1976, are stationed in the territory. There have been frequent clashes with guerrilla forces of the People's Liberation Army of Namibia (PLAN), the military wing of SWAPO.

### Economic Affairs

Namibia is rich in minerals, particularly diamonds, copper, lead, zinc, tin and vanadium. In 1973 revenue from mineral sales totalled R230 million. Consolidated Diamond Mines of South West Africa, the world's largest producer of gem diamonds, is based in Namibia. The huge uranium mine at Rössing is being jointly developed by the South African Industrial Development Corporation and the British company Rio Tinto-Zinc. An initial annual output of 5,000 metric tons of uranium oxide was expected in 1976 but, owing to technical difficulties, that figure is unlikely to be reached before 1978. No official statistics for production for Namibia have been issued since 1966, but it has been estimated that the G.D.P. is 30 per cent higher than the G.N.P. A large share of the national income is remitted abroad in the form of dividends and other payments. The fishing industry is second to mining, and is based on the production and processing of pilchards (sardines).

The major agricultural industries are the processing of meat and livestock products, including karakul pelts from the estimated 4.4 million karakul sheep in the territory. Manufacturing output is negligible. The gap between black and white workers' wages is larger than that in South Africa, and African wage levels are in general very low.

### Transport and Communications

Since 1969 South Africa has increased expenditure on roads and railways and joint hydro-electric development schemes, initially with Portugal but since 1975 with Angola. In 1972 there were 2,756 km. of tarred roads with a further 303 km. under construction. Most improvements are concentrated on benefiting the southern, white-occupied zone.

### Social Welfare

In 1966 there were 130 hospitals and clinics.

### Education

The South African Government took control of education in 1921. A large-scale education development plan began only after 1964 with a Five-Year Plan in accordance with the Bantu Education Act of 1953. Education is based on *apartheid*, with separate facilities for different ethnic groups. A 1973 survey estimated that 69 per cent of black Namibians were illiterate. The South African Government forced the closure of over 170 independent church schools between 1922 and 1973.

### Tourism

Tourism is considerably stimulated by the Etosha Pan, one of the finest game reserves in Africa. In 1972 an estimated 250,000 tourists visited Namibia, an increase of 34,000 over 1971 and 59,000 over 1970.

### Sport

Sport is racially segregated. Rugby football is the most popular game.

### Public Holidays

**1977:** May 19th (Ascension Day), May 31st (Republic Day), September 5th (Settlers' Day), October 10th (Kruger Day), December 16th (Covenant Day), December 25th–27th (Christmas).

**1978:** January 1st (New Year's Day), March 24th–27th (Easter).

### Weights and Measures

The metric system is in use.

### Currency and Exchange Rates

South African currency: 100 cents = 1 rand.

Exchange rates (December 1976):

£1 sterling = 1.441 rand;
U.S. $1 = 87.0 South African cents.

## STATISTICAL SURVEY

### AREA AND POPULATION

(1960 census and 1970 census)

| AREA (sq. miles) | AFRICAN RESERVES (sq. miles) | TOTAL POPULATION | WHITES | AFRICAN | COLOUREDS | WINDHOEK (capital) |
|---|---|---|---|---|---|---|
| 317,827 | 81,500 | 526,004 | 73,464 | 428,575 | 23,963 | 35,916 (whites 19,200) |

## TOURISM

The Etosha Pan is one of the finest game reserves in Africa and in 1972 an estimated 250,000 tourists visited Namibia's game parks, an increase of 34,000 over 1971 and 59,000 over 1970.

# NAURU

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag

The Republic of Nauru is a small island in the Central Pacific, lying about 1,300 miles north-east of Australia. Nauru has a warm and pleasant climate. About half the population are Nauruans. Their language is Nauruan but English is widely understood. Most Nauruans belong to the Nauruan Protestant Church. The national flag (proportions 2 by 1) is blue, divided by a horizontal gold bar, with a 12-pointed white star at the lower left.

### Recent History

A former German colony, the island was occupied by Australia during the 1914–18 war. The island continued under the administration of Australia under a League of Nations mandate which also named the United Kingdom and New Zealand as co-trustees. Between 1942 and 1945 Nauru was occupied by the Japanese. In 1947 the island was placed under United Nations Trusteeship, with Australia as the administering power on behalf of the Governments of Australia, New Zealand and the United Kingdom. The UN Trusteeship Council proposed in 1964 that the indigenous people of Nauru be resettled on Curtis Island, off the Queensland coast. This offer was made in anticipation of the progressive exhaustion of the island's phosphate deposits. The Nauruans elected to remain on the island, and studies were put in train in 1966 for the shipping of soil to the island to replace the phosphate rock. Nauru received a considerable measure of self-government in January 1966, with the establishment of Legislative and Executive Councils, and proceeded to independence on January 31st, 1968.

The Head Chief of Nauru, Hammer DeRoburt, was elected President in May 1968 and re-elected in 1971 and 1973. Dissatisfaction with his increasingly personal rule led to the Parliamentary election of a new President, Bernard Dowiyogo, in December 1976 and the formation of a new cabinet.

### Government

Legislative power is held by a unicameral Parliament, with 18 members elected by universal adult suffrage for up to three years. Executive power is held by the President, who is elected by Parliament for its duration and governs with the assistance of an appointed Cabinet, responsible to Parliament.

### Economic Affairs

The island's only industry is phosphate mining, which is manned largely by indentured labour. About four-fifths of the area is phosphate-bearing rock, but deposits are expected to be exhausted by 1992, by which time, it is hoped, Nauru will be able to derive economic security from its shipping and civil aviation services and from its proposed role as a tax haven for international business.

### Social Welfare

The Government maintains a comprehensive social welfare system which provides housing and free medical treatment for all citizens.

### Education

In 1971 the island had 10 primary schools, with 65 teachers and 1,118 pupils, and two secondary schools with 29 teachers and 364 pupils.

### Currency and Exchange Rates

Australian currency: 100 cents = 1 Australian dollar ($A).

Exchange rates (December 1976):

£1 sterling = $A1.593;
U.S. $1 = 95.0 Australian cents.

## STATISTICAL SURVEY

**Area:** 8.2 square miles.

**Population** (June 30th, 1972): Total 6,768 (Nauruan 3,471, Other Pacific Islanders 1,787, Chinese 883, European 627).

**Agriculture and Livestock** (1975–FAO estimates): Coconuts 1,700 metric tons; Chickens 4,000, Pigs 2,000.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Nepal is a landlocked country in the Himalaya mountain range, between India and the People's Republic of China. The climate varies sharply with altitude. The central Valley of Kathmandu is warm and sunny in summer with an average annual temperature of 11°C (62°F). Winter temperatures fall below zero at times in January. The official language is Nepali, spoken by 52 per cent of the population in 1971. Other languages include Maithir (11.5 per cent) and Bhojpuri (7 per cent). Nearly 90 per cent of the population are Hindus, with 7.5 per cent Buddhists and 3 per cent Muslims. The national flag (proportions 3 by 4) is comprised of two crimson pennants, each with a blue border. The upper section is charged with a white crescent moon and the lower section with a white sun in splendour. The capital is Kathmandu.

### Recent History

Nepal promulgated its first Constitution in 1959 but considerable opposition to the elected government developed, and in 1960 King Mahendra dissolved Parliament, banned political parties and inaugurated personal rule. In 1962 a new Constitution established the party-less Panchayat (Assembly) system.

In January 1972 King Mahendra died and was succeeded by his son, who was crowned as King Birendra Bir Bikram Shah Dev in February 1975. Early in 1975 King Birendra set up a commission to examine the Panchayat system. In December 1975 Nagendra Prasad Rijal resigned as Prime Minister and was succeeded by Dr. Tulsi Giri, who had been appointed by King Birendra in 1972 as a political aide, with Cabinet rank, to advise on ways of strengthening democracy. In December 1975 the new Government made major changes to the Constitution, the most significant of which established the influential "Go To the Village" National Campaign committee as a constitutional body with control over political affairs and Panchayat activities.

A Sino-Nepalese friendship treaty was concluded in 1956, and in 1961 Nepal signed a border agreement with China. Good relations with China, the Soviet Union and the U.S.A. have been successfully maintained in recent years. At his coronation in 1975 King Birendra called for recognition of Nepal as a zone of peace, and during the year relations were established with East Africa and the EEC. Also during 1975 the Government began rehabilitation of the Khampas, anti-Chinese guerillas from Tibet based in Nepal, who had been disarmed by the Nepal forces in 1974.

Relations with India, however, deteriorated in 1974 following demonstrations in Nepal against India's decision to make Sikkim an associate State of India. India imposed increasingly harsh trade terms on Nepal and the Trade and Transit Treaty between the two countries was not renewed in 1976. In October 1976 the Indian Government restricted entry of Nepalese into certain border districts of India.

The banned Nepali Congress Party, led by B. P. Koirala, went into exile in India in 1968. In 1975 India gave official assurances that it would curb an armed attack on Nepal threatened by Koirala. In December 1976 Koirala and some followers arrived in Kathmandu and were almost immediately arrested.

### Government

Nepal is a constitutional monarchy. Executive power is vested in the King, who presides over the unicameral legislature, the Rashtriya Panchayat (National Assembly), from whose 135 members he also selects a Prime Minister and Cabinet. The Panchayat system is four-tiered. Village councils are elected, whose members then elect district councils, whose members elect zonal councils, whose members elect 112 members of the National Panchayat. The remaining 23 members of the National Panchayat are nominated by the Crown. The term of office of the National Panchayat is four years. No political parties are allowed under the Panchayat system. A constitutional body was formed in 1975 to watch over political affairs and to propagate Panchayat ideology.

For local administration, Nepal is divided into 14 zones, each headed by an appointed Commissioner.

### Defence

Nepal has an army of about 20,000 men.

### Economic Affairs

Much of the country is heavily forested and too steep for cultivation, yet 92 per cent of the population depend on agriculture. The agricultural settlements are confined to the Kathmandu Valley and wider sections of the river valleys and there is a small exportable surplus of foodstuffs. Steps are being taken to develop agriculture with particular emphasis on irrigation. Cotton-growing is being introduced into the western Terai region.

The only mineral so far discovered in significant quantities is mica, mined east of Kathmandu; there are also small deposits of lignite, copper, cobalt and iron ore. Nepal's rivers have a potential for hydro-electric power production. Two hydro-electric projects are under way, costing more than U.S. $1,000 million in international aid. The projects are expected to become productive in the late 1980s and could supply all the energy requirements of northern India.

A New Industrial Development Policy, implemented in 1974/75, encouraged new industries in the private sector. The fifth Five-Year Plan (1975–80) envisages setting up new industries, including cotton textiles, vegetable oil and paper and pulp, in both private and public sectors. The jute, timber and tourist industries are the major earners of foreign currency. However, jute exports suffered because of fire at factories in Biratnagar in 1976, and forest is disappearing at an annual rate of 8 per cent in spite of the Government's reafforestation scheme.

Nepal's major trading partner is India and almost all Nepal's imports pass through the port of Calcutta. In 1974 India increased the prices to Nepal of many previously subsidized goods, and the two countries failed to renew their Trade and Transit Treaty when it expired in 1976. Nepal renewed trade agreements with the People's Republic of China and North Korea in 1975, and imports of oil from the U.S.S.R., which began when India suspended supplies in 1974, met Nepal's oil requirements almost entirely in 1976.

The fifth Five-Year Plan (1975–80) envisages expanding agricultural production by almost 20 per cent. Foreign aid will finance 45 per cent of the total outlay. Nepal receives aid in order of size from the U.S.A., China and India as well as from Europe. In 1975 Kuwait agreed to finance the Kulekhani hydro-electric power project, and Iran agreed to assist with development of tourist facilities.

Nepal is a member of the Colombo Plan.

### Transport and Communications

There are short sections of motorable roads around Kathmandu and a mountain road links the capital with the Indian railhead at Raxaul. Heavy goods on this route are transported by a 42-kilometre ropeway from Hetauda to Kathmandu. A number of important new roads have been built, notably that linking Kathmandu and the Tibetan border at Kodari, and others are under construction, including the 992-kilometre Mahendra Highway and the 400-kilometre Pokhara-Surkhet Road. There are two sections of railway totalling 100 kilometres. Coolies, however, are still the principal means of transport, supplemented by ponies, mules and yaks in the more open upper valleys. A national shipping corporation was set up in 1971. Regular air services link India, Thailand and the larger towns in Nepal. Nepal has telegraph links with both India and Pakistan.

### Social Welfare

In 1975 hospital beds totalled 2,148, less than one for every 5,000 of the population, and there was one physician for every 33,000. The fifth Five-Year Plan envisages building 24 new hospitals and increasing the number of health centres from 351 to 459.

### Education

Free primary education for five years was introduced in government schools in 1975 and it is expected that by 1980 64 per cent of primary school-age children will be enrolled. In 1974/75 primary school pupils totalled some 458,000 and there were about 250,000 pupils at over 1,800 secondary and higher educational establishments. A national education plan with a vocational emphasis was introduced in 1971 to ensure greater manpower utilization. There is one university. In 1971 adult illiteracy averaged 87.5 per cent (males 77.6 per cent, females 97.4 per cent).

### Tourism and Sport

Tourism is being developed by the construction of new tourist centres in the Kathmandu valley and regular air services link Kathmandu with Pokhara Lake. Mountaineering requires large-scale organization and Sherpa porters may be engaged. Big game hunting can be found in the "Terai" of southern Nepal. Major tourist attractions include Lumbini, the birthplace of Buddha, and Mount Everest. Over 92,000 tourists visited Nepal in 1975.

*Visas* are required by nationals of all countries except India.

### Public Holidays

**1977:** August/September (Indra Jatra—Festival of Rain God), October, over a week (Dasain—Durga Puja Festival), October/November, two days (Tihar—Festival of Lights), December 15th (Mahendra Jayanti and Constitution Day), December 28th (King Birendra's Birthday).

**1978:** February 18th (Tribhuvan Jayanti—Birthday of the late King Tribhuvan and Rashtriya Prajatantra Divas—National Day), February/March (Shivaratri—in honour of Lord Shiva), April (Navabarsha—New Year's Day), April (Baishakh Purnima—Birthday of Lord Buddha).

### Weights and Measures

Nepal uses the Indian system of weights but has other measures of its own. Steps have been taken to introduce the metric system.

### Currency and Exchange Rates

100 paisa (pice) = 1 Nepalese rupee (NR).

Exchange rates (December 1976):

£1 sterling = 20.71 NR;
U.S. $1 = 12.50 NR.

# THE CONSTITUTION

(*Promulgated December* 1962, *amended in* 1967 *and* 1975)

## GOVERNMENT

The Constitution of Nepal comprises a constitutional monarchy with executive power vested in the King but ordinarily exercised on the recommendation of a Cabinet led by a Prime Minister, selected by the King from among the membership of the National Panchayat or Assembly. The Cabinet is responsible to the Panchayat but the King has power to grant or withhold assent to Bills at his discretion.

### State Council

The Constitution also provides for a State Council which will declare upon the succession or appoint a Regency Council, besides giving advice to the King in times of emergency.

### Legislature—Rashtriya Panchayat

The Rashtriya (National) Panchayat, which is at the apex of the party-less Panchayat system of democracy, is the supreme national unicameral legislature, comprising 135 members, 112 of whom are elected from among the members of the Anchal Sabhas (Zonal Councils), who in turn are elected from among the members of Zilla Sabhas (District Councils) who, again in turn, are elected from the Gaon Sabhas (Village Councils). In other words, membership of the Rashtriya Panchayat is based on the popular election of Local Panchayat (which is the basic unit of the four-tiered Panchayat System), from each of which members choose from among themselves representatives for District Panchayat. They may advance by similar stages to the zonal and then to the Rashtriya Panchayat. The remaining members are nominated by the Crown according to the Constitution.

The Rashtriya Panchayat is a perpetual body whose members are elected from Zonal Councils and serve a fixed term of four years. House proceedings are open to the public. A summary record of the proceedings of every meeting of the House or its committees is published.

Bills to the House are presented by the Committees of the House, in consultation with Ministers. The annual budget is submitted to the House for consideration, deliberation and adoption. And in order that these legislative tasks be conducted with becoming dignity and efficiency, the members of the House fully enjoy the privilege of freedom from arrest for anything spoken in the House or the manner in which voting is exercised.

## CITIZEN'S RIGHTS AND DUTIES

Besides enumerating a number of fundamental rights, including the right against exile, the Constitution lays down a series of fundamental duties of the citizen.

## AMENDMENTS

Amendments to the 1962 Constitution, adopted in 1967 and 1975 include the following: Prime Minister to be appointed by the King who may, if he wishes, consult the National Panchayat; Ministers to be collectively and individually responsible to the King; King to appoint directly the Zonal Commissioners who are to enjoy greater powers than the Chairmen of Zonal Panchayat Assemblies; Speaker of the House to be appointed by at least two-thirds of Rashtriya Panchayat; Associations for non-political purposes allowed but political parties continue to be banned; provision for appointment of an independent Election Commission; the country to be divided into four zones for electoral purposes, with elections for all elective bodies every four years on a rotational basis; elected members of National Panchayat can be recalled.

There are over 3,000 kilometres of roads, of which about 1,700 are metalled. There are short sections of motorable roads around Kathmandu and a mountain road, Tribhuwana Rajpath, links the capital with the Indian railhead at Raxaul. The Siddhartha Highway, constructed with Indian assistance, connects the Pokhara Valley in mid-west Nepal with Sonauli on the Indian border in Uttar Pradesh. A British-built section of 40 km. links Butwal with Barghat. Mahendra Highway will have a total length of 992 km. of which 655 km. had been completed in 1976. Construction of the 400 km. Pokhara-Surkhet road began in 1974 and this will eventually be linked to an all-weather highway which is planned between Dhangadhi and Dedeldhura in the west.

A fleet of container trucks operates between Calcutta and Raxaul and other points in Nepal for transporting exports to, and imports from, third countries.

# NETHERLANDS ANTILLES

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Netherlands Antilles consist of two groups of islands in the Caribbean, some 800 km. apart. The main group, lying off the coast of Venezuela, consists of Aruba, Bonaire and Curaçao; to the north, forming part of the Leeward Islands, lie the small volcanic islands of St. Eustatius, Saba and St. Maarten (the northern half of the latter island being part of the French dependency of Guadeloupe). The climate is tropical, moderated by the sea, with temperatures averaging 28°C (82°F), and little rainfall. Dutch is the official language, and English and Spanish are also widely spoken; there is also a local dialect, Papiamento, a mixture of Dutch, Spanish, Portuguese, English and African dialect. In the Leeward Islands English is generally spoken. The population is almost all Christian, and 87 per cent are Roman Catholics. The state flag (proportions 3 by 2) has a red vertical stripe on a white background, crossed by a horizontal blue stripe charged with six white stars arranged in an oval. The capital is Willemstad in Curaçao.

### Recent History

Although first discovered by Spanish explorers in 1499, the Netherlands Antilles have been in Dutch possession since the seventeenth century. In 1954 a Charter gave the islands full autonomy in domestic affairs. In May 1969, severe workers' riots in Curaçao brought about the resignation of the Prime Minister; elections were held in October. In February 1970, the socialist government of Ciro Kroon resigned over the nomination of a new governor and in 1971 the government of E. Petronia resigned over the defeat in the *Staten* of new financial measures. Elections were held in August 1973, and Juancho Evertsz became Prime Minister. Negotiations have taken place with the Dutch government with the aim of achieving independence by 1980.

### Government

Executive power in internal affairs is vested in the Council of Ministers. The Council is responsible to the legislature (*Staten*), with 22 members elected by universal adult suffrage. The Governor is responsible for external affairs and is assisted by an Advisory Council.

### Economic Affairs

Agriculture is comparatively unimportant although efforts are being made by the Government to promote farming, cattle raising and horticulture. The chief products are aloes (Bonaire is a major exporter), sorghum, divi-divi, groundnuts and beans, fresh vegetables and tropical fruit. The chief industry is oil refining; Curaçao and Aruba have become increasingly important with the development of the Venezuelan oil industry. The Shell refinery at Curacço (capacity 350,000 barrels per day) and that of Lago Oil in Aruba (capacity 400,000 barrels per day) are among the largest in the world. Oil refining accounts for about 95 per cent of exports by value.

Under the Multi-Annual Development Plan (1961–76) the Government's aim was to improve the islands' infrastructure and diversify the economy. Tourism became a boom industry with the construction of several hotels, particularly on Aruba and St. Maarten. Efforts were made to attract non-oil manufacturing industries and an electronics plant and two chemical plants were set up in the late 1960s. One of the largest dry docks in the western hemisphere, capable of handling ships of 120,000 tons, was established in Curaçao. There are also two oil transshipment terminals on Aruba and Curaçao and two more are under construction on Bonaire.

The economy was severely affected by the oil crisis in late 1973 and by mid-1974 the oil refineries were operating well below capacity. The non-oil manufacturing sector has suffered from the adverse affects of the world recession and a system of free zones, in which goods imported for re-export are not subject to import duties, has met with rather limited success in its aim to develop the Netherlands Antilles into a major distribution centre. These recent economic difficulties have resulted in a 20 per cent unemployment rate. The tourism sector, however, has enjoyed a continuous boom and is an important source of revenue.

### Education

Education is not compulsory. The Government spends about a third of the budget on education and there are good facilities. In 1974 there were 126 primary schools, three-quarters of which were private. There is very little illiteracy.

### Transport and Communications

There are no railways. All the islands have a good system of all-weather roads. Each island has a good harbour and an airport. International airlines run regular services to Curaçao, Aruba and St. Maarten.

### Tourism

Tourism is a major industry on all the islands and several new hotels have been built on Aruba. Tourism by cruise ships continues to expand.

*Visas* are not required by nationals of Belgium, Bolivia, Chile, Colombia, Ecuador, Luxembourg and the Netherlands.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension), May 30th (Whit Monday), December 15th (Statute Day), December 25th–26th (Christmas).

**1978:** January 1st (New Year's Day), March 24th (Good Friday), March 27th (Easter Monday), April 30th (Queen's Birthday).

### Weights and Measures

The metric system is in force.

### Currency

100 cents = 1 Netherlands Antilles gulden (guilder) or florin (N.A.Fl.).

Exchange rates (December 1976):

£1 sterling = 2.966 N.A.Fl.
U.S. $1 = 1.790 N.A.Fl.

# THE CONSTITUTION

The latest constitutional changes for the Netherlands Antilles are embodied in the Charter of the Kingdom of the Netherlands, which came into force on December 29th, 1954. Under the Charter the Netherlands, Surinam and the Netherlands Antilles (and Netherlands New Guinea) were constituted as a single realm under the House of Orange.

The Netherlands and the Netherlands Antilles each enjoy full autonomy in domestic and internal affairs and are united on a footing of equality for the protection of their common interests and the granting of mutual assistance.

Whenever the Netherlands Council of Ministers is dealing with matters coming under the heading of joint affairs of the realm (in practice mainly foreign affairs and defence) the Council assumes the status of Council of Ministers of the Kingdom. In that event the Minister Plenipotentiary appointed by the Government of Netherlands Antilles takes part with full voting powers in the deliberations.

A legislative proposal regarding affairs of the realm and applying to the Netherlands Antilles as well as to the metropolitan Netherlands is sent, simultaneously with its submission to the Netherlands Parliament, the States-General, and to the parliamentary body of the Netherlands Antilles. The latter body can report in writing to the States-General on the draft Kingdom Statute and designate one or more special delegates to attend the debates and furnish information in the meetings of the Chambers of the States-General. Before the final vote on a draft the Minister Plenipotentiary has the right to express an opinion on it. If he disapproves of the draft, and if in the Second Chamber a three-fifths majority of the votes cast is not obtained, the discussions on the draft are suspended and further deliberations take place in the Council of Ministers of the Kingdom. When special delegates attend the meetings of the Chambers this right devolves upon the delegates of the parliamentary body designated for this purpose.

Executive power in internal affairs is vested in a nominated Council of Ministers, who are responsible to the legislature (Staten). The Netherlands Antilles Staten consists of twenty-two members elected by general adult suffrage. The Governor is responsible for external affairs and is aided by an Advisory Council.

## UNIVERSITY

**Universitat di Aruba:** Aruba; 15 teachers; 150 students.

# THE NEW HEBRIDES

The New Hebrides, including the Banks and Torres Islands, form an archipelago of some 70 islands in the south-western Pacific Ocean, stretching from south of the Solomon Islands to the east of New Caledonia. Since 1906 the islands have been governed as an Anglo-French Condominium. Under this arrangement each power is responsible for its own citizens and other non-New Hebrideans who choose to be *"ressortissant"* of either power. Indigenous New Hebrideans may not claim either French or British citizenship.

In 1974 a Representative Assembly was established but this has not satisfied nationalist aspirations, led by the New Hebrides National Party which in 1975 won a majority of the elected seats in the Assembly and has continued to press for independence.

## STATISTICAL SURVEY

**Area:** 14,763 square kilometres (12 large and 60 small islands forming a double chain of islands about 440 miles long).

**Population** (1967 Census): 77,982 (73,937 indigenes). Est. population at June 30th, 1976: 97,468; Vila (capital) 16,604 (December 31st, 1975).

**Employment:** The native population is mainly engaged in peasant agriculture, producing both subsistence and cash crops. Most Europeans are employed in commerce or government service.

**Agriculture:** 150,000 acres are cultivated; there are 750,000 acres of forest. Production (1975—metric tons): coconuts 259,800 (FAO estimate), copra 27,046, meat 943; small quantities of cocoa and coffee.

**Livestock** (1975—FAO estimates): Cattle 104,000, Pigs 63,000, Goats 7,000, Poultry 128,000.

**Fishing:** 8,000 metric tons landed in 1974 (FAO estimate); (1975) 5,218 metric tons frozen fish.

**Mining:** (1975) 46,520 tons of manganese exported.

**Finance:** Australian and local currency are both legal tender.

100 cents = 1 Australian dollar ($A). Coins: 1, 2, 5, 10, 20 and 50 cents. Notes: 1, 2, 5, 10, 20 and 50 dollars. Exchange rates (December 1976): £1 sterling = $A1.593; U.S. $1 = 95.0 Australian cents; $A100 = £62.76 = U.S. $105.21. *Note:* For previous changes in the exchange rate, *see* the chapter on Australia.

100 centimes = 1 New Hebrides franc (franc néo-hébridais). Exchange rates (December 1976): 1 NH franc = 6.1875 French centimes; £1 sterling = 133.86 NH francs; U.S. $1 = 80.81 NH francs; 1,000 NH francs = £7.471 = U.S. $12.375.

The currencies are locally interchangeable at the rate of $A1 = 85 NH francs (December 1976).

**Condominium Budget** (1975): Revenue 737 million FNH; Expenditure 102 million FNH.

**British Budget** (1974–75): Revenue $A4,450,453; Expenditure $A4,220,528.

**French Budget** (1975 estimate): 9 million FNH.

**External Trade** (1975): *Imports:* 2,496 million NH francs (chief items rice, canned foods, beer and wines, building materials, petrol and fuel oils, clothing, textiles, machinery, vehicles and spares). *Exports:* 787.5 million NH francs (chief items frozen fish, copra; others: timber, manganese, cocoa, frozen and canned beef). Principal trading partners are Australia, France, Japan and U.S.A.

**Transport** (1975): *Roads:* 4,389 vehicles. *Shipping:* 333 ships called at New Hebrides ports. *Aviation:* 1,113 aircraft landed.

**Tourism:** In 1975 42,969 cruise ships passengers arrived in the New Hebrides and a further 15,838 visitors arrived for longer stays. Visitors are mainly from Australia and and New Caledonia.

**Education:** The British Administration runs six primary schools, one secondary school and a teacher-training college, with a total of 12–15,000 pupils. The French Administration runs 47 primary schools, two with secondary facilities, and two *lycées* (grammar schools). Total attendance is about 8,000. In addition, over 200 primary schools are maintained by missions and voluntary agencies.

## THE CONSTITUTION

In 1902, Joint Deputy Commissioners were appointed by Britain and France and in 1906 an Anglo-French Convention established the Condominium as a Joint Administration. Citizens of the two Powers enjoy equal rights of residence, personal protection and trade. Each Power retains sovereignty over its nationals and business corporations. There is no Territorial sovereignty and natives bear no allegiance to either Power.

There are three elements in the structure of administration: the British National Service, the French National Service and the Condominium (Joint) Departments. An Advisory Council, established in 1957, was presided over by the Resident Commissioners, until, following talks in 1974, Britain and France agreed to the establishment of a Representative Assembly of 42 members which replaced it in 1975.

More than half the islands have local authorities and in 1975 the municipal authorities of Vila and Santo were created.

## THE GOVERNMENT

**British High Commissioner:** EDWARD N. LARMOUR, C.M.G. (resident in London).

**French High Commissioner:** JEAN-GABRIEL ERIAU (resident in Nouméa, New Caledonia).

The High Commissioners are joint and equal heads of the Administration acting locally through British and French Resident Commissioners. The Joint Administration consists of the British National Service, the French National Service and certain Condominium services, including Treasury, Customs and Inland Revenue, Public Works and Transport, Posts and Telephones, Radio, Lands, Survey, Ports and Harbours, Civil Aviation, Agriculture and Meteorology. A rough balance is kept between nationalities in numbers appointed.

### BRITISH NATIONAL ADMINISTRATION

**Resident Commissioner:** JOHN S. CHAMPION, O.B.E.

### FRENCH NATIONAL ADMINISTRATION

**Resident Commissioner:** ROBERT GAUGER.

### REPRESENTATIVE ASSEMBLY

A 42 member Representative Assembly was established in 1974. Twenty-nine members are elected by universal adult suffrage, nine (three British, three French and three New Hebridean) by economic interests (three each from British and French interests in the Chamber of Commerce and three representing the rural co-operative movement) and four by the traditional chiefs. The members are elected for a three-year term.

The Assembly is presided over by the two Resident Commissioners who are not bound to enact resolutions unacceptable to them in their executive capacity unless these resolutions are confirmed by a two-thirds majority of all the Assembly's members.

In December 1976 the National Party held 16 of the 29 elected seats, the Union des Communautés Néo-Hébridaises 10, and the coalition formed by Nagriamel and the Mouvement Autonomiste des Nouvelles-Hébrides 2 seats.

The National Party and its allies hold a total of 21 of the 42 seats.

## POLITICAL PARTIES

**National Party:** f. 1972; aims at independence from Franco-British administration and more power for the indigenes and for the return of their lands; Pres. Rev. WALTER LINI.

**Union des Communautés Néo-Hébridaises:** f. 1974; for legal reform and increased involvement of the indigenous Melanesian population in the territory's affairs; Pres. JEAN-MARIE LEYE.

**Mouvement Autonomiste des Nouvelles-Hébrides:** f. 1974; aims to involve Melanesians in creating a political structure similar to those existing in New Caledonia and French Polynesia; Pres. AIME MALERE.

**Nagriamel:** f. 1963; rural party aiming at return of land to indigenes; Leader JIMMY STEPHENS.

## JUDICIAL SYSTEM

### CONDOMINIUM COURTS

**The Joint Court:** comprises a British Judge and a French Judge who alternate as President and are assisted by a Public Prosecutor, a Registrar and a Native Advocate.

**British Judge:** Sir LOUIS GEORGES SOUYAVE.

**French Judge:** L. CAZENDRES.

**Courts of First Instance:** In each District. The court has jurisdiction over all offences committed against Joint administrative regulations. Composed of British and French District Agents or full-time magistrates sitting with one assessor.

### NATIONAL COURTS

For all suits between non-natives, except for certain land claims.

### NATIVE COURTS

Composed of one of the two Agents of the District sitting with two native assessors. Their jurisdiction covers all criminal offences committed by natives.

## RELIGION

Most of the inhabitants are Christian. Twelve Protestant groups are represented, including Presbyterian and Church of Melanesia (Anglican). The Roman Catholic Church is also well established.

**Church of Melanesia:** Bishop: The Rt. Rev. D. A. RAWCLIFFE; Lolowai, Longana.

**Roman Catholic:** Bishop of Port Vila: (vacant). Apostolic Administrator PIERRE MARTIN; B.P. 59, Port Vila.

## THE PRESS

There are no independent daily or weekly newspapers.

**New Hebridean Viewpoints:** quarterly journal published by New Hebrides National Party, Vila.

**New Hebrides News:** British Residency; f. 1955; fortnightly; circ. 3,200.

**Nabanga:** French Residency; f. 1975; fortnightly tabloid; circ. 2,500.

## RADIO

**Radio Vila:** P.O.B. 110, Port Vila; f. 1966; broadcasts in English, French and Pidgin; Mans. R. J. MAKIN, J. MASSIAS.

In 1975 there were 15,000 receivers.

## FINANCE

New Hebrides is rapidly developing as a tax-haven. There are a growing number of banks, exempted from tax, largely administered by trust companies. Bank Gutzwiller, Kurz, Bungener Overseas (Ltd.), Banque de l'Indochine et de Suez, Barclays International, Commercial Banking Company of Sydney, Bank of New South Wales, Commonwealth Savings Bank of Australia (agency), National Bank of Australia, Hong Kong and Shanghai Bank, Australia and New Zealand Bank, Commercial Bank of Australia have branches in the New Hebrides.

## TRANSPORT

### ROADS

In 1975 there were 400 miles of roads, 240 miles of which consisted of seasonal earth motor tracks.

### SHIPPING

The principal ports are Vila and Santo.

**Burns Philp (New Hebrides) Ltd.:** agents for regular services linking the New Hebrides with Australia, the Solomon Islands and New Guinea.

The New Hebrides are served by Messageries Maritimes and P&O Lines.

There are also other passenger and cargo services linking the New Hebrides with the United Kingdom, Australia and New Zealand.

### CIVIL AVIATION

The principal airports are Bauer Field (Efate) and Pekoa (Santo).

The New Hebrides are also served by Air Nauru, Air Pacific and Union des Transports Aériens.

**Air Melanesia:** P.O.B. 72, Hong Kong and New Zealand House, Vila; f. 1966; operates internal regular and charter service under the auspices of New Hebrides Airways and Société Française Air Hébrides, a subsidiary of Union des Transports Aériens.

# NEW ZEALAND

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

New Zealand lies in the South Pacific Ocean, 1,100 miles south-east of Australia. It consists of North Island and South Island, separated by the narrow Cook Strait, and several smaller islands, including Stewart Island in the south. The climate is moderate, with an average temperature of 52°F (12°C), except in the far north where higher temperatures are reached. The language is English and the Maori population also uses its own tongue. About 35 per cent of the population are Anglicans, 22 per cent Presbyterian and 16 per cent Roman Catholics, with the remainder belonging to other Christian denominations. The national flag (proportions 2 by 1) is blue, with a United Kingdom flag as a canton in the upper hoist. In the fly are four five-pointed red stars, edged in white, in the form of the Southern Cross. The capital is Wellington, on North Island.

### Recent History

New Zealand is a former British colony. It became a dominion, under the British Crown, in 1907 and achieved full independence by the Statute of Westminster, passed by the British Parliament in 1931 and accepted by New Zealand in 1947. Since the Second World War New Zealand has taken an increasing part in world affairs.

In 1962 Western Samoa, formerly administered by New Zealand, attained independence, and in 1965 the Cook Islands attained full internal self-government, but retained many links, including common citizenship, with New Zealand. In October 1974, Niue, one of New Zealand's island territories, obtained similar status "in free association with New Zealand". The latter, however, remains responsible for Niue's defence and external affairs and continues to provide financial and other aid.

In December 1972 the first Labour government for over twelve years came to power, under the leadership of Norman Kirk, after a succession of National Party administrations. When Labour took office, the economy was thriving, mainly as a result of an international price boom for agricultural commodities. However, this prosperity brought with it the problem of inflation. The Kirk cabinet imposed a three-year price freeze on government charges, including transport and public utilities, but soaring domestic demand and the energy crisis of 1973–74 led to a rapid rise in imports, a consequent reduction in exchange reserves and a severe balance of payments problem, leading to extensive borrowing from abroad to maintain full employment.

The Labour government pursued a more independent foreign policy than its predecessors. It phased out New Zealand's military commitments under the South-East Asia Treaty Organization (SEATO) and established diplomatic relations with the People's Republic of China. In 1974 New Zealand protested strongly against French testing of nuclear weapons in the Pacific.

Norman Kirk died in August 1974 and Wallace Rowling, his Finance Minister, became Prime Minister in September. During his term of office the economic recession worsened and the currency was devalued twice. In November 1975 a general election resulted in victory for the National Party. The new Prime Minister, Robert Muldoon, introduced austere economic policies and a wage freeze which has led to prolonged and bitter conflict with the trade unions. A determined campaign against illegal immigrants has also been conducted.

### Government

Executive power is vested in the British monarch, as Head of State, and is exercisable by an appointed representative, the Governor-General, who must be guided by the advice of the Executive Council (Cabinet), led by the Prime Minister. Legislative power is vested in the unicameral House of Representatives, with 87 members (including four Maoris) elected for three years by universal adult suffrage. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to the House.

### Defence

The total strength of regular forces in 1976 was 12,575: army 5,432, navy 2,843, air force 4,300. Defence spending for 1975/76 amounted to $NZ186.6 million.

### Economic Affairs

The external economy is heavily dependent on the pastoral and agricultural industries: wool, meat and dairy produce account for over 80 per cent of total exports and 14 per cent of GDP. In 1974/75 the United Kingdom took over 20 per cent of exports, mainly meat and dairy produce. The United Kingdom's entry into the EEC in 1973 has resulted in reduced trade, but better terms than were expected, especially for New Zealand's dairy produce, were negotiated. New Zealand's next largest overseas markets are Australia, the U.S.A., the EEC and Japan. Markets are being extended in the Pacific region, South-East Asia, Latin America and the Caribbean countries.

In 1965 New Zealand and Australia established a free trade agreement (NAFTA), under which duties on selected commodities have been progressively eliminated.

Industrial production is expanding and now accounts for nearly a quarter of GDP and 12 per cent of total exports. Exotic forests, under controlled management, provide a continuing supply of timber for the growing pulp and paper industry. Coal production is sufficient for all local needs and the refining of imported crude oil supplies most of the country's petroleum and related products. Light industry continues to expand, the principal branches being food-processing and canning, car-assembly, transport equipment, wood and cork products, textiles and footwear, apparel and made-up textile goods. Hydro-electric power resources have been further developed. A government-sponsored steel industry, based on the smelting of local iron sands, is in operation on the west coast of the North Island, and a large aluminium smelter at Bluff produces about 80,000 tons annually. High quality silica sand has also been found in South Canterbury (South Island). In addition to the oil refinery at Marsden Point, Whangarei, and an inland natural gas field at Kapuni, North Island, off-shore oil and extensive natural gas deposits have been discovered at Maui off the Taranaki Coast.

Since 1974 New Zealand has faced serious economic problems. The trade surplus of 1973 was followed by a 1974 deficit of $NZ 880 million as a result of diminishing export receipts, particularly for wool and meat, and an increase in import costs. The trade gap exceeded $NZ 1,000 million per year by mid-1975. Heavy foreign borrowing, stricter import controls and a 15 per cent devaluation in August 1975 went some way towards stabilizing the situation but the trade deficit for the 12 months ending July 1976 was still $NZ 701 million. Throughout 1976 the Muldoon government pursued austere budgetary policies and implemented a wage freeze.

Following the 17.5 per cent devaluation of the Australian dollar in November 1976 New Zealand devalued by 7 per cent but in December adjusted this to a 5 per cent devaluation.

### Transport and Communications

In 1976 New Zealand had almost 5,000 km. of railways and 92,604 km. of roads. There are about forty ports, the chief of which are Auckland, Wellington, Lyttelton (the port of Christchurch) and Dunedin. Much traffic between North and South Island is by air; there are also roll-on roll-off ferry services linking Wellington with Picton and Lyttelton. The main centres are joined by an air service network and New Zealand is linked to most major Pacific countries by international airlines. There are international airports at Auckland, Christchurch and Wellington. In July 1971 the earth satellite station at Warkworth (north of Auckland) was opened and is linked to the INTELSAT III communications system over the Pacific.

### Social Welfare

New Zealand has a comprehensive social welfare system administered by the Department of Social Security. A tax is levied on all incomes to finance the services, which provide medical care and benefits for old age, blindness, widowhood, orphanhood, unemployment and sickness, as well as superannuation and family benefits. There are reciprocal agreements with Australia and the U.K.

### Education

State education is free and, between the ages of six and fifteen, compulsory. Primary education lasts from five to eleven, after which children pass on to intermediate schools for two years before going on to secondary schools until a maximum age of eighteen. In 1973 more than 441,462 pupils were enrolled in primary schools, over 82,211 at intermediate schools, and nearly 209,000 in secondary schools. Special educational services cater for children in remote areas and for the physically handicapped. There are six universities and an agricultural college with university status.

### Tourism

New Zealand's tourist attractions are chiefly natural: high mountains, lakes, hot springs and beaches. There are abundant opportunities for outdoor recreation and New Zealand is particularly well-known for its fishing.

*Visas* are not required to visit New Zealand by nationals of Belgium, Denmark, France, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Sweden, Switzerland and the United Kingdom. Visa requirements are waived for limited periods for nationals of the Federal Republic of Germany, Finland, Iceland, Japan and the U.S.A.

### Sport

Rugby football is the national game but rugby league, soccer, swimming and tennis are also very popular. Horse racing also has a wide following.

### Public Holidays

**1977:** June 6th (Queen's Official Birthday), October 24th (Labour Day), December 25th (Christmas Day), December 26th (Boxing Day).

**1978:** January 1st (New Year's Day), February 6th (New Zealand Day), March 24th–27th (Easter), April 25th (ANZAC Day).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 cents = 1 New Zealand dollar ($NZ).

Exchange rates (December 1976):

£1 sterling = $NZ 1.826;
U.S. $1 = $NZ 1.103.

## FINANCE

100 cents=1 New Zealand dollar ($NZ).
Coins: 1, 2, 5, 10, 20 and 50 cents.
Notes: 1, 2, 5, 10, 20 and 100 dollars.
Exchange rates (December 1976): £1 sterling=$NZ1.826; U.S. $1=$NZ1.103.
$NZ100=£54.76=U.S. $90.63.

*Note:* The New Zealand dollar was introduced in July 1967, replacing the New Zealand pound at the rate of £NZ1=$NZ2 From October 1961 the New Zealand pound had a value of U.S. $2.78, so the initial value of the New Zealand dollar was U.S. $1.39 (U.S. $1=71.9 NZ cents). This remained in force until November 1967, after which the exchange rate was $NZ1= U.S. $1.12 (U.S. $1=89.3 NZ cents) until August 1971. From December 1971 to February 1973 the par value of the New Zealand dollar was U.S. $1.216 (U.S. $1=82.2 NZ cents), though the effective mid-point rate was $NZ1=U.S. $1.195. From February to July 1973 the exchange rate was $NZ1=U.S. $1.351 (U.S. $1=74.0 NZ cents). In terms of sterling, the exchange rate was £1=$NZ2.143 ($NZ1=9s. 4d. or 46.67p.) from November 1967 to December 1971; and £1=$NZ2.180 from December 1971 to June 1972. The fixed relationship with the U.S. dollar was ended in July 1973, since when the basis for the New Zealand dollar's valuation has been a weighted "basket" of currencies of the country's main trading partners. In September 1973 the New Zealand dollar was revalued by 10 per cent against this "basket" (becoming equivalent to U.S. $1.478) but in September 1974 it was effectively devalued by about 6.2 per cent, and in August 1975 by 15 per cent. In November 1976 the currency was devalued by a further 7 per cent but this was partially reversed in December. For converting the value of foreign trade transactions, the average value of the New Zealand dollar was: U.S. $1.136 in 1971; U.S. $1.195 in 1972; U.S. $1.363 in 1973; U.S. $1.401 in 1974; U.S. $1.215 in 1975.

# THE CONSTITUTION

### Head of State

Executive power is vested in the Queen and is exercisable by her personal representative, the Governor-General.

In the execution of the powers and authorities vested in him the Governor-General must be guided by the advice of the Executive Council; but if in any case he sees sufficient cause to dissent from the opinion of the Council, he may act in the exercise of his powers and authorities in opposition to the opinion of the Council, reporting the matter to the monarch without delay, with the reasons for his so acting.

### Executive Council

The Executive Council consists of the Governor-General and all the Ministers. Two members, exclusive of the Governor-General or the presiding member, constitute a quorum. The Governor-General appoints the Prime Minister and, on the latter's recommendation, the other Ministers.

### House of Representatives

Parliament comprises the Crown and the House of Representatives.

The number of members constituting the House of Representatives is eighty-seven—eighty-three drawn from general seats and four from Maori seats. They are designated "Members of Parliament".

Parliaments sit for three-year terms.

Everyone over 18 may vote in the election of members for the House of Representatives. Since August 1975 any person, regardless of nationality, ordinarily resident in New Zealand for 12 months or more and resident in an electoral district for one month or more is qualified to be registered as a voter. Compulsory registration of all electors except Maoris was introduced at the end of 1924; it was introduced for Maoris in 1956.

There are 83 European electoral districts and four Maori electoral districts. As from August 1975 any person of the Maori race, which includes any descendant of such a person, who elects to be considered as a Maori for the purposes of the Electoral Act may enrol on the Maori roll for that particular Maori electoral district in which that person resides.

By the Electoral Amendment Act, 1937, which made provision for a secret ballot in Maori elections, Maori electors were granted the same privileges, in the exercise of their vote, as general electors.

In local government, with some minor exceptions, there is a wider electoral franchise, non-residential rate payers also being eligible to vote.

# RADIO AND TELEVISION

The Broadcasting Corporation of New Zealand (BCNZ), established in 1977, supervises the independent operating corporations, Radio New Zealand (RNZ), Television Service One (TV1) and Television Service Two (TV2), and provides transmission facilities for them. It also receives licence revenues and allocates them to the corporations. Each corporation keeps its own revenue from commercial advertising. Colour broadcasting began in 1973.

**Broadcasting Corporation of New Zealand (BCNZ):** Bowen State Bldg., Bowen St., P.O.B. 98, Wellington; f. 1977; nine member board; supervises public radio and television in New Zealand; Chair. RON A. JARDEN.

**Radio New Zealand:** P.O.B. 2092, Wellington; f. 1975; controls 26 community radio stations, 3 public radio networks (one of which is a commercial network comprising 22 stations) and a short-wave service directed primarily to the south-west Pacific islands and south-eastern Australia. It also manages the New Zealand Symphony Orchestra and associated concerts on behalf of the BCNZ. The non-commercial National Programme broadcasts 24 hours a day; Chair. P. J. DOWNEY; Dir.-Gen. GEOFFREY WHITEHEAD.

**Television Service One:** Avalon Television Center, P.O.B. 30355, Lower Hutt, Wellington; f. 1975; colour television network covering almost the whole country; broadcasts for approximately 95 hours per week; commercial for 5 days a week; Chair. R. G. COLLINS; Dir.Gen. ALAN MORRIS.

**Television Service Two:** P.O.B. 3819, Auckland; f. 1975; available to 74 per cent of the population; operates for approximately 77 hours per week; commercial for 5 days a week; Chair. K. G. FRASER; Dir.-Gen. ALLAN MARTIN.

Commercial radio has been operating in New Zealand since 1970. In 1976 there were seven privately-owned commercial radio stations, depending entirely on commercial revenue but operating under the supervision of the BCNZ.

In October 1971, when the radio licence fee was abolished, there were 712,794 licensed radio sets. In November 1975 there were 816,979 licensed television sets.

# NEW ZEALAND'S ASSOCIATED TERRITORIES

New Zealand's associated territories are the self-governing Cook Islands and Niue and the dependent territories of the Tokelau Islands and the Ross Dependency.

## COOK ISLANDS

The 14 inhabited and one uninhabited islands of the Cook Islands are located midway between Samoa and Tahiti. The Cooks form two groups; the Northern Cooks which are all atolls, and include Pakapuka, Rakahanaga and Manihiki, and the Southern Cooks, including Aitutaki, Mangaia and Rarotonga, which are all volcanic islands.

### Recent History

The Cook Islands were proclaimed a British Protectorate in 1888 and a part of New Zealand in 1901. On August 4th, 1965, they became a self-governing territory in free association with New Zealand. The people are British subjects and New Zealand citizens. The Premier elected in 1965, Albert Henry, has retained power, but in the 1975 elections met his stiffest opposition thus far.

### Economic Affairs

Economic and agricultural development on the Cook Islands has always suffered from isolation and smallness. All forms of exports, but in particular fresh fruit, oranges, bananas, tomatoes and pineapples, have been hindered by lack of shipping and inadequate marketing in New Zealand metropolitan centres.

The islands receive a large proportion of their revenue in the form of aid from New Zealand and remittances sent back to the islands by migrants. A New Zealand-owned plant cans pineapple and orange juice near Ararua, reducing dependency on fresh fruit markets.

The outstanding feature of the Cook Islands is the migration of outer islanders into Rarotonga and from there to New Zealand, where, until 1976, Cook Islanders enjoyed free entry as New Zealand citizens. In 1975 more Cook Islanders lived in New Zealand than in the islands. Migrants have tended to work in the timber towns of Kawerau and Tokoroa, in the Auckland metropolitan area, in Wellington and in the meat packing industry in Southland.

## RADIO

**Cook Islands Broadcasting and Newspaper Corporation:** Rarotonga; broadcasts in English and Maori; Gen. Man. MICHAEL DROLLET.

There were 7,000 radio sets in 1975.

## TRANSPORT

Ships from New Zealand, the United Kingdom, Japan and the U.S.A. call at Rarotonga. The New Zealand Shipping Corporation operates fortnightly services between the Cook Islands and New Zealand ports. An international airport was opened at Rarotonga in 1972. There is an internal air service (Cook Islands Airways), operating between Rarotonga and Aitutaki. Passenger flights to and from New Zealand are made via Air N.Z. Ltd. thrice weekly—twice direct and once via Fiji. One flight from New Zealand per week continues to Tahiti, returning to Rarotonga the next day.

# NIUE

Niue is a coral island of 259 square kilometres, located about 480 kilometres east of Tonga and 930 kilometres west of the Southern Cook Islands. It is a self-governing dependency of New Zealand. Niueans have free entry to New Zealand and a sizeable resident Niuean community exists there. Emigration is continuing. Vegetables, fruit, copra and handicrafts are exported to New Zealand. New Zealand aid is being employed to establish a bee industry and to introduce dairy and beef cattle for local consumption. A small forestry project is also being undertaken.

## STATISTICS

**Area:** 259 sq. km. (100 sq. miles).

**Population:** 4,048 (estimate, December 1975).

The birth rate in 1975 was 41.3 per 1,000 and the crude death rate 6.0. The infant mortality rate per 1,000 live births was 12.5.

### EMPLOYMENT

Under a current programme the Agriculture Department is rehabilitating the coconut industry and developing grass land, cattle and other farming operations. The Niue government is the major employer, however, and most workers are employed by government departments. There is no unemployment problem.

### AGRICULTURE

The main crops are coconuts, taro, yams, limes, cassava (manioc), kumara and passion fruit. About 51,000 of the island's 64,000 acres are used for agriculture and over 13,000 acres are merchantable forest. The main livestock are beef cattle, pigs and poultry.

### FINANCE

Currency: 100 cents=1 New Zealand dollar ($NZ). For details, *see* the Cook Islands.

BUDGET
($NZ, April 1st to March 31st)

| | Revenue | Expenditure | New Zealand Subsidy |
|---|---|---|---|
| 1973/74 | 375,089 | 2,407,137 | 1,495,313 |
| 1974/75 | 410,778 | 3,237,813 | 2,367,822 |
| 1975/76 | 579,407 | 3,700,123 | 2,516,000 |

Revenue is raised mainly from import and export duties, sale of postage stamps, court fines and income tax.

### EXTERNAL TRADE

($NZ '000)

| | 1973 | 1974 | 1975 |
|---|---|---|---|
| Imports | 721.0 | 1,151 | 2,095 |
| Exports | 136.5 | 168 | 197 |

Export items include copra, plaited ware, honey, passion fruit and limes.

New Zealand takes most of Niue's export (nearly 73 per cent in 1975) and provides a large part of the island's imports (nearly 79 per cent in 1975). The main imports are foodstuffs, vehicles and spares, building materials, and oil and petrol.

## GOVERNMENT

In October 1974 Niue gained self-government in free association with New Zealand. The latter, however, remains responsible for Niue's defence and external affairs and will continue economic and administrative assistance. Executive government in Niue is through the Premier, assisted by three Ministers. Legislation is carried out by the Niue Assembly but New Zealand, if called upon to do so by the Assembly, will also legislate for the island. There is a New Zealand representative in the territory.

**New Zealand Representative:** W. J. ASHWELL.

### THE CABINET

(*November* 1976)

**Premier and Minister of Finance, Government Administration and Police:** Hon. ROBERT R. REX, O.B.E.

**Minister of Agriculture, Economic Development and Education:** Hon. M. Y. VIVIAN.

**Minister of Health, Justice, Radio and Post Office:** Hon. Dr. E. LIPITOA.

**Minister of Works, Electricity, Fisheries, Forestry and Tourism:** Hon. F. F. LUI.

## JUDICIAL SYSTEM

**The Land Court:** is concerned with litigation over land and titles.

**Land Appellate Court:** hears appeals over decisions of the Land Court.

## RADIO

**Niue Broadcasting Division:** Administrative Department, P.O.B. 67, Alofi; broadcasts in Niue and English; Commissioner C. A. ROBERTS.

There were 650 radio sets in 1975.

## TRANSPORT

There are 77 miles of all-weather roads and 66 miles of access and plantation roads. At March 31st, 1976, there were 739 registered motor vehicles of which 497 were motor cycles, 205 cars and 37 trucks. The best anchorage is an open roadstead at Alofi, the largest of Niue's 13 villages. A shipping service is maintained with New Zealand via Tonga, Fiji and Samoa on a regular four-weekly basis.

An airstrip of 5,400 ft., capable of taking most types of aircraft except modern jet aircraft, and a twice-weekly air service from New Zealand, via Fiji, Tonga and Western Samoa, is operated by Air N.Z. Ltd. and Polynesian Airlines Ltd.

# ROSS DEPENDENCY

The Ross Dependency comprises the sector of Antarctica between 160° E. and 150° W. longitude and the islands lying between those degrees of longitude and south of latitude 60° S. It has been administered by New Zealand since 1923.

### AREA

(Estimate in sq. km.)

| TOTAL | LAND AREA | ICE SHELF |
|---|---|---|
| 730,000 | 400,000 | 330,000 |

Scott Base on Ross Island was established in 1957. Cape Hallett is a joint New Zealand-United States base. In 1968 a new scientific station was set up some 130 km. west of Scott Base.

**Ross Dependency Research Committee:** Wellington; responsible for co-ordinating and supervising all scientific activity in the Dependency.

# TOKELAU ISLANDS

The Tokelau group consists of three atolls, Atafu, Nukunono and Fakaofo, which lie 300 miles north of Western Samoa.

The islands became a British protectorate in 1877. At the request of the inhabitants Britain annexed the islands in 1916 and included them within the Gilbert and Ellice Islands Colony. In 1925 the United Kingdom Government transferred administrative control to the Governor-General of New Zealand. In 1946, the Group was officially designated the Tokelau Islands and in 1948 sovereignty was transferred to New Zealand. From 1962 until the end of 1971 the High Commissioner for New Zealand in Western Samoa was also the Administrator of the Tokelau Islands. In November 1974 the administration of the Tokelau Islands was transferred to the Ministry of Foreign Affairs in New Zealand.

## STATISTICS

### BUDGET

(April 1st to March 31st)

1975/76: Revenue $NZ 62,625; Expenditure $NZ 540,022.

Financial aid from New Zealand totalling $NZ1,400,000 for three years 1974/75 to 1976/77 was announced in February 1974.

Revenue is derived mainly from copra export duty, import duty, and sale of postage stamps. Expenditure is devoted mainly to the provision of social services, particularly health, education, and agriculture.

### EXTERNAL TRADE

In 1975/76 copra exports totalled $NZ74,171. There were no other exports. The main imports are foodstuffs, building materials and kerosene.

### TRANSPORT

The Group is visited five or six times per year by vessels under charter.

## GOVERNMENT

The administration of the Tokelau Islands is the responsibility of the Ministry of Foreign Affairs in New Zealand. The Secretary of Foreign Affairs is the Administrator and certain powers are delegated to a Senior Administrative Officer (formerly District Officer) and senior officers of the Ministry of Foreign Affairs. By agreement with the government of Western Samoa, the office of the Tokelau Islands administration is based in Apia.

### LOCAL GOVERNMENT

There is a *Faipule* (who is also the magistrate) on each island who is democratically elected by the people triennially. He is responsible to the Administrator and presides over the Council of Elders (*Fono*).

## RELIGION

On Atafu and Fakaofo most inhabitants are members of the London Missionary Society; on Nukunonu all are Roman Catholic.

# NICARAGUA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Nicaragua lies in the Central American isthmus, bounded by the Pacific Ocean to the west and the Caribbean to the east. Its neighbours are Honduras to the north and Costa Rica to the south. The climate is tropical, with a mean average temperature of 25.5°C (78°F). The rainy season extends from May to October. The national language is Spanish, although English is widely understood. There is no state church but Roman Catholicism is dominant. The national flag (proportions 2 by 1) has three horizontal stripes of blue, white, and blue, with the state emblem in the centre. The capital is Managua Distrito Nacional.

### Recent History

Since 1933 the Somoza family has dominated Nicaraguan politics. In that year Gen. Anastasio "Tacho" Somoza, commander of the National Guard, seized power by *coup d'état*. On his death by assassination in 1956, his son Luis became president and another son, Anastasio "Tachito", assumed the command of the National Guard. On the retirement of Luis Somoza in 1963, René Schick Gutiérrez became president until his death in 1966. After a violent electoral campaign, he was succeeded in 1967 by Gen. Anastasio Somoza Debayle, who retained his command over the National Guard. Gen. Somoza's term as President ended in April 1972.

Following a pact between the opposition Conservatives and the Liberal Party, which supports Gen. Somoza, both houses of Congress voted their dissolution in August 1971 in order that elections be held to form a constituent assembly which would amend the Constitution to allow Gen. Somoza to be re-elected as President in 1974. In the meantime a triumvirate composed of members of the Liberal and Conservative parties ruled the country.

In December 1972 an earthquake destroyed about three-quarters of the buildings in Managua, making a quarter of a million people homeless and killing about 10,000 others. In January 1973 Gen. Somoza became President of the National Emergency Committee and imposed martial law. In September 1974 he was elected President by an overwhelming majority and took office in December. Martial law was lifted in June 1974 but a state of emergency continued. In December 1974, following the mass kidnapping by guerrillas of several prominent Nicaraguans, martial law was again imposed, all constitutional guarantees were suspended and strict censorship introduced. Previously moderate opposition grew in strength during 1975, due to the Government's increasingly repressive measures.

### Government

Under the 1974 Constitution, legislative power is vested in the bicameral National Congress, comprising a Senate (30 members) and a Chamber of Deputies (70 members). Both houses are elected for six years by universal adult suffrage. Executive power is held by the President, also directly elected for six years. He governs with the assistance of an appointed Council of Ministers.

### Defence

Nicaragua had armed forces totalling 7,100 men in 1976: 5,400 in the army, 1,500 in the air force and 200 in the navy. Paramilitary forces numbered 4,000 men. The defence budget for 1976 was 226.4 million córdobas.

### Economic Affairs

Agriculture is the dominant industry, employing over half the work force and accounting for almost 75 per cent of export earnings. Cotton, coffee and meat are the principal exports. Sugar, timber and bananas are also important. Workable deposits of gold, silver, lead and zinc were discovered in 1968 in northern Nicaragua. Large deposits of natural gas were discovered in 1974 off the Pacific coast and several oil companies are exploring for oil off the Nicaraguan coast. Industry is on a modest scale, including a petroleum refinery, textile mills, tobacco, cement and soluble coffee plants, dairies and a wide range of processing plants. Industrial production fell by 9 per cent in 1973 as a result of the earthquake in December 1972 but recovered in 1974. An estimated U.S. $1,000 million were required to restore the economy.

A 1975–79 Reconstruction and Development Plan is being implemented at a cost of some U.S. $6,000 million, of which one-third will be invested in the reconstruction and development of Managua. The aims of the Plan are to improve living conditions, employment and per capita income, to encourage regional development and to reduce the economy's dependence on the external sector. To this end it is planned to harness geothermic power for the generation of electricity, build a hydro-electricity plant on the San Juan river, open the river for commercial traffic and develop an inland canal system. The Government is also planning more credit and promotion incentives for tourism and the production of non-traditional goods.

The economic growth rate in 1975 was only 2.1 per cent, compared with 9.2 per cent in 1974. This decline was due mainly to the fall in world commodity prices, higher import costs, credit restrictions and the collapse of the reconstruction boom. Inflation fell to 10 per cent in 1975, compared with 17 per cent in 1974. The economy was expected to improve in 1976, due to higher export prices. Nicaragua is a member of the OAS, ODECA, the Central American Common Market, SELA and the IADB.

### Transport and Communications

There are 14,436 km. of roads, including the 485 km. north-south stretch of the Pan American Highway. State railways (373 km.) join important towns and private lines serve the banana plantations. Several rivers are navigable to small craft and steamers serve towns on Lake Nicaragua. LANICA, the state airline, operates internal and international services.

### Social Welfare

There is a compulsory national health insurance scheme for wage-earners in all departments on the Pacific coast. The allocation for health in the 1976 budget was 120 million córdobas.

### Education

Primary education is free and compulsory for children between the ages of 6 and 13. In 1974 there were 2,370 primary and secondary schools. The literacy rate was 41.6 per cent in 1973. There are many commercial schools and two universities.

### Tourism

The mountainous region with its occasionally active volcanoes, the Huellas de Acahualinca outside Managua which show ancient footprints of men fleeing from volcanic lava, the mineral baths of Tipitapa and the abundant sea, lake and river fishing are the principal tourist attractions of Nicaragua. Several large hotels are under construction.

*Visas* are not required to visit Nicaragua by nationals of Costa Rica, Denmark, El Salvador, Guatemala, Honduras, Norway, Spain, Sweden and the United Kingdom.

### Sport

Baseball and basketball are widely played. Swimming and fishing are popular.

### Public Holidays

**1977:** May 1st (Labour Day), May 27th (Army Day), July 14th (Abrogation of the Chamorro-Bryan Treaty), August 10th (Managua local holiday), September 14th (Battle of San Jacinto), September 15th (Independence Day), October 12th (Columbus Day), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 24th–25th (Christmas).

**1978:** January 1st (New Year's Day), February 1st (Air Force Day), March 21st–27th (Holy Week).

A considerable number of local holidays are also observed.

### Weights and Measures

The metric system is officially used, although the following Spanish and local units are also in general use:

Length: cuarta = 8.13 inches
vara = 2.76 feet
cuadra = 91.9 yards
legua = 2.6 or 3 miles
Weight: libra = 1.014 lb.
arroba = 25.362 lb.
quintal = 101.44 lb.
Volume: liquid galon = 0.888 gallon
Area: manzana = 1.74 acres
caballería = 27.9 acres
legua cuadrada = 12 sq. miles
Capacity: medio = 500 cu. inches
= 1 peck.
fanega = 24 medios

### Currency and Exchange Rates

100 centavos = 1 córdoba.

Exchange rates (December 1976):
£1 sterling = 11.64 córdobas;
U.S. $1 = 7.03 córdobas.

Notes: 1, 5, 10, 20, 50, 100, 500 and 1,000 córdobas.
Exchange rates (December 1976): £1 sterling = 11.64 córdobas; U.S. $1 = 7.03 córdobas.
100 córdobas = £8.59 = $14.23.

*Note:* In July 1955 the central exchange rate was fixed at U.S. $1 = 7.00 córdobas (1 córdoba = 14.286 U.S. cents). The market rate is $1 = 7.0263 córdobas (1 córdoba = 14.232 U.S. cents). These rates have remained in effect despite two devaluations of the U.S. dollar (in December 1971 and February 1973). In terms of sterling, the central rate was £1 = 16.80 córdobas from November 1967 to August 1971; and £1 = 18.24 córdobas from December 1971 to June 1972. The Central American peso (C.A.$), used for transactions within the Central American Common Market, is at par with the United States dollar.

# THE CONSTITUTION

The constitution was promulgated in March 1974.

Nicaragua is a unitary, sovereign and independent state. Nicaraguan citizens include those over 21 years of age, those over 18 years of age who are literate or who are married and those under 18 years of age who have finished secondary education.

### Rights and guarantees

All Nicaraguans are equal before the law. The State guarantees individual liberty; no-one can be detained without an order and anyone detained must be freed or tried after 24 hours. The State guarantees the inviolability of the home. Everyone has the right to movement, to choose a place of residence, and to emigrate and immigrate. The nation's cultural treasures are under the protection of the State and cannot be removed from the national territory. The State can declare a state of economic emergency when deemed necessary. Private monopolies are prohibited but state monopolies can be established when deemed necessary. Unions or associations may be established for legal purposes. No-one can be persecuted for his beliefs or for any action that is within the law. The State guarantees freedom of speech and the right to meet in private for peaceful purposes. The State prohibits the establishment of a Communist Party or any party with a similar ideology, or of any party with an international organization. Anyone belonging to such a party is prohibited from holding any public office. The State guarantees the right to petition and the inviolability of correspondence. The state also guarantees and protects intellectual property and the rights of the author, inventor or artist, freedom of conscience and the practice of religion. All citizens have the right and duty to work.

The Guardia Nacional de Nicaragua shall guarantee the sovereignty and independence of the nation, the integrity of its territory, internal peace and individual freedoms. Its members can neither vote nor hold any political office. The Supreme Commander of the Armed Forces is the President of the Republic. Military service is obligatory.

### Legislative power

Legislative power is exercised by a two-chamber Congress elected by direct popular vote every six years. The Chamber of Deputies shall have no fewer than 70 members and the Senate shall have no fewer than 30 members and their substitutes. The Senate also includes those former Presidents who were elected by popular vote and the Presidential candidate who was second in the poll. Congress shall meet in the capital on April 15th each year and shall hold 60 sessions. Extraordinary sessions may be convened by the executive or by a majority of the members of Congress through its President. The quorum is the majority of its members and all decisions shall be made by absolute majority except where specified otherwise. The armed forces may enter the chambers only when requested to do so by the President of the House.

Each chamber has the following individual functions:

- to elect its governing board;
- to establish the agenda;
- to appoint commissions;
- to request infomation from the Ministers.

As separate bodies, the Congress has the following functions:

- to form laws;
- to declare a state of economic emergency;
- to approve or reject treaties;
- to impose taxes and fix the administration's expenditure;
- to vote on the budget;
- to declare war;
- to approve, modify or reject treaties and contracts made by the Executive;
- to grant amnesties.

On the proposal of the executive, the chambers of Congress may grant subsidies, give prizes, awards, pensions and honours and confer military ranks.

The two chambers of Congress also meet as one body and are presided over in alternate three-monthly periods by the Presidents of the two chambers. In this form they have the following functions:

to elect their President, Vice-President, Secretaries and Vice-Secretaries;
to establish the agenda of each session;
to elect three of its members to replace the President in the case of temporary or permanent absence. The President must approve those chosen;
to elect magistrates;
to accept the resignation of the President of the Republic, his replacements, magistrates and judges.

Once a bill, proposed by the Chamber of Deputies or the Executive, is approved by the Chamber of Deputies, it passes to the Senate and then to an Examining Board, after which it is passed to the Executive for promulgation. If the bill is rejected by the Senate it is returned to the Chamber of Deputies for amendment, but if it is returned to the Senate without amendments and is again rejected by the Senate it cannot be promulgated. The President may exercise his power of veto. If so the bill is returned to the Senate which may propose a combined session of Congress. If this Congress ratifies the rejected bill by a two-thirds majority the Executive must promulgate it.

### Executive power

Executive power is vested in the President and Council of Ministers. The President is elected for six years by direct popular vote. In the case of his temporary incapacity, absence or in the case of his resignation, he shall be replaced by the Minister of the Interior and then his elected substitute. The President has the following powers:

to open Congress;
to convene extraordinary sessions of Congress;
to present the budget;
to present annual reports, bills and treaties through a Minister;
to promulgate laws and use the power of veto;
to issue laws when Congress is in recess;
to grant amnesties;
to supervise the conduct of the members of the judiciary;
to command the armed forces;
to appoint Ministers, Vice-Ministers and civil servants;
to direct foreign affairs, appoint ambassadors and receive foreign ambassadors;
to declare war and conclude peace treaties;
to supervise credit institutions;
to direct and supervise education and to combat illiteracy;
to supervise monetary stability;
to guarantee and protect artistic and literary property;
to order the arrest of those who threaten public security;
to order a state of national emergency;
to suspend or restrict constitutional guarantees under specified circumstances.

Decrees and proposals issued by the President must be endorsed by the Council of Ministers who are answerable to Congress and who shall carry out the administration of public services.

### Judicial power

The judiciary comprises the Supreme Court of Justice, the Appeal Courts, the Labour Court, the Conciliation and Arbitration Court and Local Tribunals. The President of the Supreme Court is the head of the judiciary. The magistrates of the Supreme Court are elected for six years. The judiciary is independent.

### Constitutional Revision

Amendments to the constitution signed by fifteen deputies must be presented to the Chamber of Deputies, where they are debated twice. They are then passed to the Senate and then to a combined session of Congress, after which they are passed for approval to the Constitutional Commission and the Executive.

### ROADS

In 1971 there were some 13,147 km. of roads and tracks. Of these 1,335 km. were paved and 5,040 km. were classed as all-weather. The rest can be used only in the summer. The Pan American Highway runs for 485 km. in Nicaragua and links Managua with the Honduran and Costa Rican frontiers and the Atlantic and Pacific Highways connecting Managua with the coastal regions.

### SHIPPING

Corinto, Puerto Somoza and San Juan del Sur, on the Pacific, and Puerto Cabezas and El Bluff, on the Atlantic, are the principal ports: Corinto deals with about 60 per cent of trade.

**Autoridad Portuaria de Corinto:** Corinto; port authority.

**Marina Mercante Nicaragüense (Mamenic):** Managua, D.N.; regular services between Central America, New York, New Orleans and Europe and a roll-on-roll-off service between Managua and Miami.

Steamship services are provided by Cía. de Navegación Chilena, Cie. Générale Transatlantique, Grace, Isbrandtsen, Italian, Johnson, Royal Netherlands, Standard Fruit and United Fruit Lines.

### CIVIL AVIATION

#### DOMESTIC AIRLINE

# NIGER

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of the Niger is a landlocked state in West Africa, with Algeria and Libya to the north and Nigeria and Benin to the south. Mali and Upper Volta lie to the west and Chad to the east. The climate is hot and dry with an average temperature of 28°C (84°F). The official language is French but numerous indigenous languages are used, including Hausa, spoken by half the population, Tuareg, Djerma and Fulani. About 85 per cent of the population are Muslims. Most of the remainder follow animist beliefs and there is a small Christian minority. The national flag (proportions 8 by 7) is a horizontal tricolour of orange, white and green, the central white stripe being charged with an orange disc. The capital is Niamey.

### Recent History

Formerly a part of French West Africa, Niger was granted independence in 1960. Hamani Diori was elected President, and re-elected in 1965 and 1970, when he received the support of 98 per cent of the electorate. His one-party government, having repressed an attempted rebellion in 1963–64, seemed one of the most secure in Africa, and President Diori himself gained considerable international prestige as a spokesman for francophone Africa. He maintained very close links with France, and received aid from Nigeria and Libya. The discovery of uranium in Niger, and its exploitation by France, provided an opportunity for the economic development of the country, previously limited to simple agriculture and nomadic stock-raising.

In recent years the Sahel drought has affected Niger very severely, and the administration of famine relief and the refugee camps was widely considered to be both corrupt and inefficient. The grievances of civil servants and students, denied any legal form of expression by the one-party system, resulted in a strike in schools and colleges, lasting from October 1973 to January 1974, and a number of violent demonstrations. In April 1974, the army staged a brief and almost bloodless *coup*. Diori was arrested, and Lieut.-Col. Seyni Kountché, the Chief of Staff of the Armed Forces, became President. The new military government suspended the Constitution, dissolved the National Assembly and announced that its main objectives were the elimination of corruption and greater efficiency in dealing with the famine.

In the interest of national independence the new government obtained the withdrawal of French troops from Niger and weakened French control of uranium exploitation. In August 1975 the Vice-President of the ruling Supreme Military Council was arrested, along with two other prominent figures, on a charge of plotting to seize power, and in January 1976, the Secretary of State for Information was detained. In March 1976, Major Moussa Bayere, dismissed from the Government in February, led an abortive coup. Nine of those implicated, including Bayere, were subsequently sentenced to death.

### Government

Since the military *coup* of April 1974, Niger has been ruled by a Supreme Military Council of army officers. A Provisional Government of military ministers and civilian secretaries of state has been appointed.

### Defence

Niger's armed forces are on a small scale. There is an army of 2,000 men and para-military forces totalling 1,800 men. Arms and equipment come mainly from France. The air force consists of 100 men and a few transport planes.

### Economic Affairs

The economy is agricultural and 90 per cent of the people are dependent on cultivation and the raising of livestock. Livestock is at present the main source of wealth. The herds of cattle, sheep and goats are large but often of poor quality. Much of the land is desert. The chief crops are millet, sorghum, cassava and beans. A ten-year development plan for 1973–82 emphasizes the importance of rural development. Priority will be given to growing millet, both for food and for export after processing. Persistent drought and the depredations of pests are the main problems. In 1973/74 drought was so severe that crop production declined sharply and much livestock was destroyed. In 1976, Niger appealed for more foreign aid, expecting a food shortfall of about 200,000 metric tons.

Large uranium deposits at Arlit, in the north-west, were discovered in 1966 by the French Atomic Energy Commissariat, which has been granted mining rights for 75 years. Production from the first mine began in 1971. Further deposits have been discovered, to be exploited at a later date. In 1974 the Government took steps to break the French monopoly of uranium production and consumption. Cassiterite and gold are mined, and other minerals have been found. Several permits have been granted for oil exploration.

Industry is on a small scale and manufacturing accounted for only 8.5 per cent of Gross Domestic Product in 1973. The industrial sector is to be expanded under the current ten-year plan, mainly to replace imports.

### Transport and Communications

There are no railways. Two highways cross the country from east to west and from north to south, giving access to neighbouring countries. Roads and tracks total about 6,985 km. Many road extension and improvement schemes are in progress. The River Niger is navigable for 300 km. In 1973 a river route between Gaya, in the south of Niger, and Port Harcourt was opened, giving access to the sea. The internal airways system is operated by Air Niger. The main international airport is at Niamey.

### Social Welfare

There are 2 hospitals, 36 departmental medical centres, 116 dispensaries and a number of mobile clinics. In 1973 the country had 100 physicians.

### Education

Education is free but there are insufficient schools; in 1975 only 13 per cent of children of school age received education. A university was opened at Niamey in 1973 and in 1976 the construction of the Islamic University of West

Africa began at Say. Scholarships are provided for higher education in France and Senegal.

**Tourism**

There is an abundance of wild life and hunting is the chief tourist attraction. Lake Chad also provides game fishing.

*Visas* for visits to Niger are not required by subjects of the following countries: Andorra, Benin, the Central African Empire, Chad, the Congo People's Republic, France, Gabon, Guinea, the Ivory Coast, Mali, Mauritania, Monaco, Senegal, Togo, the United Kingdom and the Upper Volta.

**Sport**

There is very little organized sport but football is popular.

**Public Holidays**

**1977:** August 3rd (Independence Day), September 15th (Id ul Fitr, end of Ramadan), November 22nd (Id ul Adha, Feast of the Sacrifice), December 12th (Muslim New Year). December 18th (Republic Day).

**1978:** January 1st (New Year's Day), February 20th (Mouloud, Birth of the Prophet).

(*Note:* the Christian community in Niger also observes Easter, Whitsun, Ascension Day, Assumption, All Saints' Day and Christmas.)

**Weights and Measures**

The metric system is in force.

**Currency and Exchange Rates**

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA = 2 French centimes;
£1 sterling = 414.1 francs CFA;
U.S. $1 = 250.0 francs CFA.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Federal Republic of Nigeria is a West African coastal state within the Gulf of Guinea, with Niger to the north, Benin to the west and Cameroon to the south-east. The climate is tropical in the south with an average temperature of 32°C (90°F) and high humidity. It is drier and semi-tropical in the north. Rainfall reaches more than 150 inches in parts of the south-east. The official language is English. Hausa, Ibo and Yoruba are spoken in the north, east and west respectively. Islam is the main religion in Northern and part of Western Nigeria. Some of the population follow animist beliefs and about a quarter are Christians. The national flag (proportions 2 by 1) has vertical bands of green, white and green. The capital is Lagos.

### Recent History

The Nigerian people, previously organized in the Yoruba, Hausa, Bornu, Fulani, Ibo and other states, obtained their independence from the United Kingdom in 1960 as a federation of four regions. In 1961 the northern part of the British-administered Trust Territory of Cameroon was incorporated into the Northern Region. In October 1963 Nigeria became a Republic within the Commonwealth. In January 1966 civil government was brought to an end by the overthrow and death of two Regional Premiers and of the Federal Prime Minister, Alhaji Sir Abubakar Tafawa Balewa. A Supreme Military Council was set up by the Army Commander, Maj.-Gen. Johnson Aguiyi-Ironsi, who proposed to abolish the federal structure and establish a unitary state. Inter-communal violence, in which many Ibos living outside their homeland in the Eastern Region were killed or forced to leave, resulted in dislocation of the country and the breakdown of central authority. Gen. Aguiyi-Ironsi was killed in July 1966 and his successor, Lt.-Col. (later Gen.) Yakubu Gowon, revived federalism.

Early in 1967 relations between the Federal Government and the Military Governor of the Eastern Region, Lt.-Col. Chukwuemeka Odumegwu-Ojukwu, rapidly grew worse and in May Col. Ojukwu announced the secession of the Eastern Region and its independence as the Republic of Biafra. War between the Federal Government and Biafra broke out in July 1967 and continued until January 1970, when, after Ojukwu's departure to the Ivory Coast, Biafra surrendered. Meanwhile a 12-state structure proposed by the Federal Government to replace the four regions came into effect in April 1968.

After Biafra's surrender, General Gowon's regime reunited the nation and reconstructed the areas devastated in the civil war. Internal stability and increasing economic prosperity derived from oil gave Nigeria an influential voice in African affairs and allowed it to pursue an open foreign policy. After revoking a promise to restore civilian rule in 1976 and failing to curb widespread corruption in the administrative and public sectors, General Gowon faced mounting opposition which culminated in his overthrow by a bloodless *coup* in July 1975, while he was attending a summit meeting of the OAU in Uganda. Brig. (later Gen.) Murtala Ramat Muhammed, formerly Federal Commissioner for Communications, was nominated as Head of State by Nigeria's new military leaders. General Muhammed was killed in an abortive coup in February 1976 and was succeeded as Head of State by Lt.-Gen. Olusegun Obasanjo, Chief of Staff of the armed forces.

In 1975 the Federal Military Government purged the civil service and armed forces. It has since taken over the country's radio and television network and leading newspapers, announced a partial demobilization of the army and embarked on a programme to restore democracy and civilian rule by October 1979. The Federal Military Government has extended federal power at the expense of regional considerations; in March 1976 the 12 existing states were replaced by 19 and the decision taken to build a new federal capital at Abuja in Niger State. Nigeria has been sharply critical of the white regimes in southern Africa.

### Government

Nigeria has been under military rule since January 1966. Under the 1967 Constitutional Decree, legislative and executive functions are vested in the Supreme Military Council (SMC), whose President is Head of State and Government. The SMC rules by decree but delegates powers to the Federal Executive Council, comprising Commissioners in charge of government Ministries. Nigeria consists of 19 States, each administered by an appointed Military Governor at the head of an Executive Council. The leading military commanders liaise with the State Governors through the National Council of States.

In August 1976 many of the functions of State governments were devolved to Local Government Councils, whose members were elected in November and December. A constituent assembly of 203 members will be elected by these councils, acting as electoral colleges, to consider the draft constitution published in October 1976. An electoral commission has been established to organize elections to state and federal legislatures, to register political parties and to draw up constituencies. Democratic civilian rule is promised by October 1979.

### Defence

1976 estimates put the strength of the army at 221,000 men. Naval strength is 3,500 and the air force has 5,500 men. There is a civil police force of 40,000. Military service is voluntary. In December 1975, it was announced that 100,000 soldiers would be demobilized. Nigeria has the largest defence force in Africa. Defence expenditure in the Third National Development Plan is ₦2,800 million, much of it for new equipment, and the Plan provides for the doubling of the police force.

### Economic Affairs

The huge rise in the price of oil after the 1973 Middle East War gave an extra impetus to the Nigerian economy. As a member of OPEC and the world's eighth largest producer of oil in 1975, the benefits for Nigeria from the oil boom have been enormous. The foreign exchange position has been strengthened, the economy has expanded at an estimated annual rate of 8 per cent in real terms since 1971, foreign aid has been greatly reduced and large numbers of jobs created. In 1975 crude petroleum exports provided 92.7 per cent of the total value of exports. Nigeria's trade balance, which has consistently remained in surplus since 1965 despite the civil war, more than doubled from 1972 to 1973, when it was ₦1,054 million. In 1974 it exceeded ₦4,000 million but the visible surplus dropped to ₦1,204 million in 1975, largely owing to a decline in oil production. An investment of ₦5,000 million is planned in the petroleum industry and the oil sector during 1975–80. Due to the Government's conservation policy and the fall in world demand, average daily production fell from 2.26 million barrels in 1974 to 1.78 million barrels in 1975. The 20 per cent reduction in output, however, meant only a 4 per cent decrease in revenues. In 1976 daily production was increased to about 2.1 million barrels. The one refinery at Port Harcourt was unable to meet the national fuel requirements in late 1975, and there are plans to construct at least four more refineries. Nigeria plans to establish natural gas and petrochemical industries by the 1980s. In 1974 negotiations led to a government majority shareholding in Shell/BP, AGIP/Phillips, SAFRAP, Mobil and Texaco. There are plans to merge the Nigerian National Oil Corporation and the Federal Ministry for Petroleum to form the Nigerian National Petroleum Corporation.

Under the 1972 Nigerian Enterprises Promotion Decree, which was strengthened and expanded in 1976, "indigenization" has been energetically pursued, alien participation in many small businesses has been barred, and Nigerian majority shareholding in numerous larger firms made compulsory.

Agriculture used to be the mainstay of the economy and in 1960 provided 80 per cent of total export earnings. By 1975, because of the vast growth in petroleum exports, agriculture's share had dropped to 7 per cent though it still employs over two-thirds of the working population. In 1976 the Federal Military Government introduced an emergency programme, "Operation Feed the Nation", to increase agricultural production and reduce the high level of food imports and inflation. The main commercial crops are cocoa, palm oil and kernels, groundnuts, cotton and rubber. There is extensive exploitation of forests for various timbers. Nigeria's fish resources are to be developed. Fishing provides a living for an estimated 1.5 million people. There are also plans to expand and modernize the livestock industry. Minerals include tin, columbite (of which Nigeria supplies 95 per cent of the world's industrial requirements), coal, iron ore and crude petroleum. The U.S.S.R. is helping to build a major iron and steel complex at Ajaokuta, which is due to come on stream in 1983.

Industry is diversified, and there has been rapid expansion of manufacturing industries. Brewing, aluminium products, textiles, cigarettes and cement are important. The main priorities of the National Reconstruction and Development Plan (1970–75) were the problems of economic management and unemployment. The 1975–80 Development Plan lays emphasis on development of agriculture and the industrial infrastructure and increased Federal aid for education and health. G.D.P. is expected to increase at an average rate of 9.1 per cent annually during the plan period. Estimated expenditure under the plan is ₦32,000 million, of which ₦20,000 million is to be spent in the public sector. Reduced oil revenues, a declining trade surplus and an inflation rate of 30 per cent in 1975 resulted in a freeze on government expenditure and reintroduction of import controls in 1976. The Government played a major part in the establishment of the Economic Community of West African States (ECOWAS) in May 1975.

## Transport and Communications

There are 3,504 km. of railways and over 88,000 km. of roads. The Nigerian Government has embarked on a major road construction programme to which it has allocated ₦3,400 million from the Development Plan. The narrow-gauge railway system is being extensively rebuilt and 1,000 km. of standard-gauge line added.

The Niger and other rivers are navigable. The chief ports are Lagos and Port Harcourt. An internal air network links the principal towns, and international services are provided by Nigerian Airways and foreign lines. Eighteen airports in Nigeria are to be redeveloped by the Government and Nigerian Airways' fleet is to be expanded. Each of the state capitals is to have a modern airport. In 1975 it was announced that Nigeria's radio and television services would be expanded at a cost of ₦40 million and the following year they were placed under the control of a National Broadcasting Authority.

## Social Welfare

The National Provident Fund provides against sickness, retirement and old age. A scheme of retirement pensions and other benefits covers government employees. During 1974 the Federal Government introduced legislation to provide a workers' welfare scheme and a National Emergency Relief Agency. The Federal Government has assumed the states' responsibility for the buildings, equipment and personnel of the health service and plans to establish 450 basic health units with 56,700 beds by 1980. The number of teaching hospitals is to be expanded from six to 18 and 20 combined schools of nursing and health technology are to be built. In 1972 Nigeria had 42,101 hospital beds and 2,271 physicians.

## Education

Only 20 per cent of the population is literate. In 1973 there were 4,662,400 pupils in primary schools and over 20,000 at university. Education is partly the responsibility of the State governments although the Federal Government has played an increasing role since 1970 and controls the 12 universities. The 1975–80 Development Plan allows for ₦2,500 million to be spent on the development of education. Universal free primary education was introduced in 1976 and will be compulsory from 1980, and 800 secondary schools are to be established, increasing the expected student enrolment at all educational levels to about 14 million by 1980. Problems include shortages of schools and trained teachers; in 1976 there were 156 teacher-training colleges but 74 new ones are to be built by 1980.

## Tourism

Tourism is being developed. The country has fine coastal scenery, thick forests and a stimulating climate on the northern plateau. Nigerian traditional art has exceptional richness and diversity. The All Nigerian Festival of Arts and Culture is held annually in different states and the second World Black and African Festival of the Arts and Culture (FESTAC) took place early in 1977.

*Visas* are not required to visit Nigeria by nationals of Benin, Cameroon, Chad, Ireland, the Ivory Coast, Morocco, Niger, Togo, the United Kingdom and Commonwealth countries.

### Sport

Football, boxing, wrestling, athletics, tennis and swimming are the most popular sports. The Government allocated ₦7 million for expenditure on sports projects in 1975.

### Public Holidays

**1977:** September 13th and 14th (Id ul Fitr, end of Ramadan), September 30th (National Day), November 20th and 21st (Id ul Kabir), December 25th–26th (Christmas).

**1978:** January 1st (New Year's Day), February 20th (Mouloud, Birth of the Prophet), March 24th-27th (Easter).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 kobo = 1 naira (₦).

Exchange rates (October 1976):

£1 sterling = 99.7 kobo;

U.S. $1 = 62.9 kobo.

## STATISTICAL SURVEY

### AREA AND POPULATION

(Census, November 1963 and November 1973)

## FINANCE

100 kobo = 1 naira (₦).
Coins: ½, 1, 5, 10 and 25 kobo.
Notes: 50 kobo; 1, 5 10, and 20 naira
Exchange rates (October 1976): £1 sterling = 99.7 kobo; U.S. $1 = 62.9 kobo.
100 naira = £100.28 = $159.05.

*Note:* The naira was introduced on January 1st, 1973, replacing the Nigerian pound (£N) of 20 shillings (240 pence) at the rate of £N1 = 2 naira. Between September 1949 and August 1971 the Nigerian pound was valued at U.S. $2.80. In December 1971 the value was revised to $3.04. The value of the naira was consequently fixed at $1.52 (U.S. $1 = 65.79 kobo). Despite the devaluation of the U.S. dollar in February 1973, this exchange rate remained in effect until April 1974, since when the naira has been allowed to "float". The average value of the naira was $1.588 in 1974 and $1.625 in 1975. The Nigerian pound was at par with the pound sterling until November 1967, after which the exchange rate was £N1 = £1.167 sterling until June 1972.

# THE CONSTITUTION

A Constitutional Decree was published in Lagos on March 17th, 1967, to replace all earlier Decrees. The following are its principal provisions:

1. Legislative and executive power is vested in the Supreme Military Council. The Chairman of the Council is the head of the Military Government. The Supreme Military Council is composed of the Regional Military Governors and the Military Administrator of the Federal Territory; the Heads of the Nigerian Army, Navy and Air Force, the Chief of Staff of the Armed Forces and the Inspector-General of Police or his Deputy.

2. The Supreme Military Council can delegate powers to a Federal Executive Council, which is composed of military and civilian Commissioners drawn from all the States of the Federation, with representatives of the armed forces. The Federal Attorney-General and the Secretaries to Federal and State Governors, as well as other appropriate officials, may attend the meetings of either Council in an advisory capacity.

3. On certain matters of legislation, the concurrence of all the Military Governors is required. These matters include any decrees affecting or relating to the territorial integrity of a State, or altering entrenched clauses of the 1963 Constitution, or affecting the Federation in respect of trade, commerce, transport, industry, communications, labour, the public service or public finance (including approval of new capital projects in Federal estimates), or affecting external or security affairs, or affecting the professions and higher education.

4. Special powers are given to the Supreme Military Council to override State legislation, with the concurrence of a majority of Military Governors, if that legislation impedes the exercise of Federal authority or constitutes a danger to the continuance of Federal Government in Nigeria.

5. The creation of new States will be treated as an entrenched clause of the Constitution.

6. Certain additional matters covered by the Decree include: the revived power to appoint local authority police; one Federal Supreme Court judge will be appointed by each State; decrees made since January 1966 may be repealed or amended by individual Military Governors; the new Decree cannot be challenged in a court of law; power of appointment to higher Civil Service posts is in the hands of the Supreme Military Council, acting on the advice of the Public Service Commission.

On May 27th, 1967, the Supreme Military Council issued a decree creating 12 states out of the four existing Regions.

In July 1975 the Federal Military Government announced a five-stage transitional programme which would ensure democratic civilian rule by October 1st, 1979. A draft constitution, to be considered by a Constituent Assembly elected by the Local Government Councils, was launched in October 1976. It provides for an elected National Assembly composed of a President with executive powers, a Senate and a House of Representatives. A plurality of political parties is envisaged and fundamental human rights would be guaranteed by the constitution.

In March 1976 the number of states was increased from 12 to 19, and a plan to transfer the federal capital from Lagos to Abuja in Niger State, was announced.

## JUDICIAL SYSTEM

The High Courts of Justice are superior Courts of Record and have unlimited jurisdiction in the first instance except in certain cases which are reserved to the Federal Supreme Court, for example, disputes between any of the component parts of the Federation involving any question as to the existence or extent of any legal right, and matters arising under any Treaty or affecting Consular Officers or any international organization outside Nigeria. The High Courts also have jurisdiction to hear appeals from Magistrates' and Native Courts. There is also a Revenue Court and a National Industrial Court.

In 1976 a Special Military Tribunal was set up to try cases of treason, certain categories of murder and other offences. The president and four other judges are all members of the armed forces or police. Sentences are subject to confirmation by the SMC and there is no right of appeal.

The Magistrates' Courts have original jurisdiction in a large variety of civil and criminal cases, some also have jurisdiction to hear appeals from Native Courts. The offices of Chief Magistrate have been retained in all areas.

Native Courts have been retained throughout the Federation. The law administered in those Courts is, generally speaking, the Native Law and Custom prevailing in the area of their jurisdiction. In the Islamic districts of the Northern States Muslim law is administered and the Sharia Courts act as the courts of appeal.

The Federal Supreme Court is the final Court of Appeal in Nigeria, consisting of the Chief Justice and ten Justices of the Supreme Court. The Federal Court of Appeal was established by decree in 1976 and is an intermediate appellate court between the Supreme Court, the High Court of a State, the Revenue Court and certain tribunals.

The Judges of the Federal Supreme Court and of the High Courts of Justice are appointed by the President. Judges of the High Courts of the States are appointed by the Governor of each State.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Sultanate of Oman lies at the extreme south-east of the Arabian peninsula and is flanked by the United Arab Emirates on the extreme north, by Saudi Arabia on the north and west, and by the People's Democratic Republic of Yemen on the extreme west. The frontier with Saudi Arabia is very ill-defined. The climate is exceptionally hot and humid in the summer (maximum temperature 42°c (108°F) ) and mild in the winter. The official language is Arabic, though English is spoken in business circles. The majority of the population are Ibadhi Muslims; about a quarter are Sunni Muslims. The national flag has horizontal stripes of white, red (one-fifth of the depth) and green, with a red vertical stripe at the hoist. In a canton at the upper left is the state badge, in white. The capital is Muscat, but there is a capital area extending from Muscat through Mutrah to Seeb.

### Recent History

Officially known as Muscat and Oman until 1970, the Sultanate has had a special relationship with Britain since the nineteenth century. The army and police force still have some British officers. Sultan Said bin Taimur succeeded his father in 1932 and maintained a strictly conservative and isolationist rule until July 1970, when he was overthrown by his son in a bloodless palace *coup*. The new Sultan, Qaboos bin Said, then began a liberalization of the régime, and increased spending on development.

A major problem in recent years has been a drawn-out conflict with Marxist guerrilla forces in Dhofar Province. These groups united to form the Popular Front for the Liberation of Oman and the Arabian Gulf in 1972, and the name was changed in July 1974 to People's Front for the Liberation of Oman (PFLO). Much of the guerillas' support came from the People's Democratic Republic of Yemen. In March 1976 a cease-fire between Oman and the Yemen P.D.R. was arranged by Saudi Arabia, and Sultan Qaboos granted an amnesty to Omanis who had been fighting for the PFLO. Peaceful development of the Dhofar (renamed "Southern") region then began, although Iranian troops, who had been aiding the Sultan, remained in Dhofar until January 1977, when their withdrawal was announced.

### Government

The Sultan rules with the advice of an appointed Cabinet. Oman has no parliament and no political parties. Legislation is by decree. The country is divided into 38 *wilayet* (governorates).

### Defence

The Omani armed forces number 14,150, excluding expatriate personnel of various nationalities on secondment or contract. Defence expenditure increased from 12.4 million rials in 1970 to 265 million in 1976. Support for Oman in the Dhofar operations came from Jordan, Saudi Arabia, Iran and the United Arab Emirates.

### Economic Affairs

Cereal crops are grown for local consumption, while dates, limes and pomegranates are the chief export crops. Cattle breeding is extensive in Dhofar, and the Oman camel is highly valued throughout Arabia. The most urgent problem is the shortage of water. Production of oil was begun in August 1967 by Petroleum Development (Oman) Ltd., in which the Oman Government took a 60 per cent share in July 1974. Royal Dutch/Shell now own 34 per cent, the Compagnie Française des Pétroles 4 per cent and Partex 2 per cent. Concessions have also been awarded to other companies (*see* Oil section). Oman's oil revenues in 1976 are expected to be U.S. $1,500 million, but are likely to fall to $1,000 million by 1980. There is hope that copper and other mineral production will be developed.

### Social Welfare

Oman has a free National Health Service, with 1,200 hospital beds, 150 doctors and 350 nurses.

### Education

Since 1970 great advances have been made in education and by 1975 55,752 children were receiving education. This was expected to rise to 65,000 by 1976.

### Public Holidays

**1977:** July 12th* (Leilat al Meiraj, Ascension of the Prophet), September 13th* (Id ul Fitr, end of Ramadan), November 18th (National Day), November 19th (Birthday of the Sultan), November 21st* (Id ul Adha, Feast of the Sacrifice), December 12th* (Muslim New Year).

**1978:** February 20th* (Mouloud, Birth of the Prophet).

* Dependent on the Muslim lunar calendar; these dates may vary by one or two days from the dates given.

### Weights and Measures

The imperial, metric and local systems are all used although the metric system was adopted in 1974.

### Currency and Exchange Rates

1,000 baiza = 1 rial Omani.

Exchange rates (December 1976):

£1 sterling = 572.3 baiza;
U.S. $1 = 345.4 baiza.

## STATISTICAL SURVEY

**Area:** 105,000 square miles (272,000 sq. km.).

**Population:** 750,000 (estimate for mid-1973); Capital area (Muscat to Seeb) estimated 50,000. Estimated number of gainfully employed 150,000; agriculture 109,000; fisheries 15,000; government 10,000; construction 6,000; oil, banking, services 5,000; others 5,000 (1972.)

**Agriculture:** Land utilization 1971 (hectares): Batinah 13,800; Interior 19,920; capital area 1,080; Musandam 400; Dhofar 800. Crops include dates, lucerne, limes, onions, wheat, bananas, mangoes, tobacco, sorghum, sweet potatoes, chickpeas and coconuts.

## FINANCE

1,000 baiza = 1 rial Omani (formerly called the rial Saidi).
Coins: 2, 5, 10, 25, 50 and 100 baiza.
Notes: 100, 250 and 500 baiza; 1, 5 and 10 rials.
Exchange rates (December 1976): £1 sterling = 572.3 baiza; U.S. $1 = 345.4 baiza.
100 rials Omani = £174.73 = $289.52.

*Note:* The rial was introduced in May 1970, replacing the Persian Gulf Indian rupee at the rate of 1 rial = 21 rupees = £1 sterling. The initial value of the rial was U.S. $2.40 ($1 = 416.7 baiza), which remained in operation until August 1971. From December 1971 to February 1973 the rial's value was $2.6057 ($1 = 383.8 baiza). The present dollar valuation has been effective since February 1973. The rial was at par with the pound sterling until the latter was allowed to "float" in June 1972.

## TRANSPORT

The number of motor vehicles is rapidly increasing. In 1975 20,000 vehicles were registered, compared with 5,516 in 1971.

### ROADS

A network of adequate graded roads links all the main centres of population and only a few mountain villages are not accessible by Land Rover. A rapid road construction programme began in 1970 and by 1976 there were 789 kilometres of asphalt road. A new coastal highway between Muscat and Mutrah is under construction and scheduled for completion in 1978. In Dhofar tarmac roads have been completed from Raysut through Salalah to Taqa. Roads between Seeb and Nizwa and Salalah and Thumrait have been completed and a rural bus service started operations in 1975.

### SHIPPING

The new port of Mina Qaboos which was completed in 1974 at a cost of R.O. 18.2 million provides nine deep-water berths, warehousing facilities and a harbour for dhows and coastal vessels. In 1974 361 vessels visited Mina Qaboos. A coastal harbour has been completed at Raysut with berths for five ships. The oil terminal at Mina al Fahal can accommodate the largest super-tankers on off-shore loading buoys. Similar facilities for the import of refined petroleum products exist at Mina al Fahal and Riyam (near Muscat).

There are regular services to Britain (Strick Line), Australia (P & O), India and Pakistan (Gulf Shipping Co.) and Japan (Showa Line).

Loading facilities for smaller craft exist at Sohar, Khaboura, Sur, Marbat and Salalah.

A modern civil airport is under construction at Salalah. Other airlines using Seeb include Alia, Air India, British Airways, Iran Air, Kuwait Airlines, Middle East Airlines, Pakistan International Airways, Saudia, Somali Airlines and UTA (passenger); and Trans Mediterranean Airways and Tradewinds (cargo).

**Gulf Air:** (*see* Bahrain).

# PAKISTAN

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Pakistan is bordered by India to the east and Afghanistan and Iran to the west. It has a short frontier with China in the far north-east. The climate is hot and dry with an average temperature of 80°F (27°C) except in the mountains where the winters are cold. The national language is Urdu. Punjabi, Sindhi and Pushtu are also widely spoken and English is extensively used. The state religion is Islam, embracing about 97 per cent of the population, the remainder being mainly Hindu or Christian. The national flag (proportions 3 by 2) is dark green, charged with a white crescent moon and a five-pointed white star, with a vertical white stripe at the hoist. The capital is Islamabad.

### Recent History

Pakistan was created in August 1947 by the partition of the former British India into the independent states of India and Pakistan. It originally had two parts, East Pakistan and West Pakistan, separated by about 1,000 miles of Indian territory. The new nation was formed in response to demands by Muhammad Ali Jinnah's Muslim League for a specifically Islamic state, to free Muslims from domination by the Hindu majority in the sub-continent. Partition led immediately to religious and frontier conflicts in which hundreds of thousands of lives were lost. Since 1949 a cease-fire line has separated Pakistani and Indian forces in the disputed territory of Jammu and Kashmir. In February 1975, however, Sheikh Abdullah, the former Kashmiri leader, dropped his insistence on a plebiscite to decide the state's future and agreed to serve as Chief Minister in the Indian-held part of Kashmir.

From the time of partition the eastern and western sections of Pakistan were united only by religion, with no geographical, economic or racial coherence. The majority of the population lived in the smaller wing, East Pakistan, but political and military power was concentrated in the West. Pakistan's difficulties were increased by the search for a workable political system. A republic was established in March 1956 but in October 1958 parliamentary government ceased and was replaced by martial law. General (later Field-Marshal) Muhammad Ayub Khan was appointed Martial Law Administrator and in 1960 was elected President by the "basic democracy" system he had established. Wide-spread disorders in 1968, especially in East Pakistan, led to Ayub Khan's resignation in March 1969. General Agha Muhammad Yahya Khan replaced him and martial law was reimposed.

In December 1970 elections were held for an assembly which was to draw up a new constitution. For the first time the East Pakistanis were to be allowed a majority in the assembly. Sheikh Mujibur Rahman's Awami League, standing for autonomy, won with an overwhelming majority in East Pakistan and the Pakistan People's Party (P.P.P.) won most seats in the West. Yahya Khan tried to persuade Sheikh Mujib to form a coalition government with the P.P.P., but negotiations broke down and in March 1971 the army was sent in to settle the matter by force. East Pakistan declared its independence as the People's Republic of Bangladesh and civil war broke out. Indian support for the Bengalis grew and in December 1971 the Indian army intervened, forcing the Pakistani army to surrender within two weeks. Bangladesh's independence became a reality. A cease-fire was accepted and Yahya Khan resigned. Zulfiqar Ali Bhutto, head of the P.P.P., became President of the truncated Pakistan, which left the Commonwealth in January 1972. In February 1974 Pakistan recognized Bangladesh.

In 1972 President Bhutto proposed a constitution which seemed to have the support of all parties. In early 1973, however, opposition parties of the right and left formed a United Democratic Front to demand amendments. Their fears that the constitution gave too much power to the Prime Minister and the central government were encouraged by events in Baluchistan where tribal fighting was followed, in February 1973, by the imposition of direct presidential rule and the taking of emergency powers.

An amended constitution came into force in August 1973, with Bhutto as Prime Minister. The situation in Baluchistan remained grave with fighting between government forces and tribal guerrilla groups. In April 1974 the Government announced the ending of army operations in Baluchistan and an amnesty for political opponents, but fighting continued until the end of the year. In December 1975, following reports of uprisings in the province, Governor's rule was imposed on Baluchistan. This was ended in December 1976 and a new P.P.P. Cabinet was sworn in.

At the beginning of 1975 violence increased in the North-West Frontier Province, and in February the Chief Minister, Hayat Mohammed Sherpao, was murdered. The Prime Minister banned the National Awami Party (NAP), which he accused of working to bring about the secession of a large part of Pakistan and of directing terrorist activities with the reported support of Afghanistan. Abdul Wali Khan, the leader of the NAP, and many others were arrested. A case of conspiracy against them was still being heard in January 1977 by a special tribunal under the Defence of Pakistan Ordinance.

Pakistan's former alignment with the Western bloc has to a large extent given place to improved relations with China, Viet-Nam, North Korea, Iran, Turkey and especially the United Arab Emirates. Diplomatic and trade links were established with Bangladesh in 1976, and relations with Afghanistan and with India, which had been strained, improved. Pakistan's decision to buy a nuclear waste reprocessing plant from France brought criticism from the U.S.A. and Canada during 1976. In December Canada suspended technical assistance and supplies to the one Canadian nuclear reactor in Karachi, which generates most of Karachi's electricity.

In January 1977 it was announced that elections would be held for the National and Provincial Assemblies in March. The NAP was barred from taking part in the elections. The nine opposition parties fought the election jointly as the Pakistan National Alliance.

## Government

Under the 1973 constitution, the chief executive is the Prime Minister, elected by the National Assembly. His advice is binding on the President, who is a constitutional Head of State elected at a joint sitting of Parliament. The Federal Legislature comprises two houses: the National Assembly and the Senate. The National Assembly has 200 members directly elected by universal adult suffrage on a basis of proportional representation. Six seats in the Assembly are reserved for minorities. In addition there are 10 women members elected by the Assembly. Under the Constitution the Senate is of 63 members, mainly elected by the Provincial Assemblies. In 1976, however, the Senate still had only 45 members. The Prime Minister and the Cabinet he leads are normally answerable to the Legislature but, under a 1975 amendment, the Government may declare a state of emergency without parliamentary approval. Pakistan is composed of four provinces (each with a Governor, a Chief Minister, a Cabinet and a Provincial Assembly), the federal capital of Islamabad and federally administered "tribal areas".

## Defence

In 1976 the armed forces totalled 428,000 men including 11,000 in the navy and 17,000 in the air force. The defence budget for 1976/77 is 7,987 million rupees. Pakistan is a member of the Central Treaty Organization (CENTO).

## Economic Affairs

Agriculture is the mainstay of the economy. Wheat, rice, sugar cane and cotton are the main crops. After 1971 agricultural production increased more slowly than it had during the 1960s, and in 1974/75 it declined by 2 per cent because of drought. However, output of all major crops except cotton subsequently increased and in 1976/77 Pakistan achieved self-sufficiency in wheat. Land remained unevenly distributed in spite of legislation to limit the size of holdings. In January 1977 further land reforms were introduced and the land recovered from individual owners was distributed free to the peasants cultivating it. At the same time the land revenue system was replaced by an agricultural income tax system.

Pakistan has a wide range of minerals, but mining is not greatly developed. Gas fields have been discovered during extensive searches for oil and in January 1977 oil was struck at Doudak. Water is a valuable resource and extensive irrigation works have been undertaken. The large earth-filled Tarbela Dam, as well as providing irrigation, had a capacity of 700,000 kW. of electricity in December 1976.

Most major industries, except sugar and textiles, have been taken over or nationalized, as have the insurance companies, banks, shipping firms and distributors of petroleum products. Pakistan's first steel mills, to be completed in 1980, will be built with Soviet aid near Karachi.

Over 50 per cent of export earnings are from rice and cotton. Aiming at narrowing the trade gap, the Government encouraged diversification of export markets in 1974/75, and no country took more than 7 per cent of total exports. Foreign aid is needed to meet the balance of payments deficit. Aid, which is now given in form of loans rather than grants, has come, in order of size, from the U.S.A., Iran, the U.S.S.R., the Federal Republic of Germany, the United Kingdom, Canada and Japan.

The economy recovered in 1975/76, due to a rise in agricultural output. Home remittances from Pakistanis in the Middle East have increased invisible earnings. The annual plan for 1976/77 envisaged a growth in G.D.P. of 8.1 per cent, to be achieved by large investment. Private sector investment more than doubled between 1974 and 1976 and was to account for 24 per cent of total investment in 1976/77. Almost half the development expenditure is allocated to defence. A six-year Development Plan (1977–83) was being prepared in December 1976.

## Transport and Communications

Pakistan's rail and road systems, which were developed before Partition, have had to be adjusted to the new frontiers although some rail transit facilities have been negotiated with India. There were 8,808 km. of railways in 1973. The principal port is Karachi. A second port some 20 miles away, Port Mohammad Bin Qasim, is to start operating in 1978. International air transport is provided by Pakistan International Airways Corporation (PIA) and twenty-three foreign airlines.

## Social Welfare

Social welfare services are run mainly through the Development Schemes and Urban Community Projects. Government support is given to voluntary bodies providing social relief. The National Council of Social Welfare provides care for children, women, delinquents and the handicapped. An Old-Age Benefits Scheme was inaugurated in 1976, managed by the State Life Insurance Corporation.

In 1973 there were 3,497 hospitals with some 36,000 beds, and 16,485 registered doctors. In 1976 the Government doubled the birth control budget and planned sterilization of 7 per cent of couples by the 1980s.

## Education

Universal free primary education is a constitutional right but less than half Pakistan's children in fact receive it. The Government's target is to achieve universal primary education for boys by 1983 and for girls by 1987. All institutions except missions are nationalized. From 1976 agro-technical subjects were introduced into the school curriculum and 25 trade schools were established in 1976. There are 12 universities. Adult literacy averages about 15 per cent.

## Tourism

The Himalayan hill stations of Pakistan provide magnificent scenery, a fine climate and excellent opportunities for field sports, mountaineering and winter sports.

*Visas* are not required for visits up to 3 months by nationals of Belgium, Finland, Greece, Iceland, Ireland, Luxembourg, Morocco, the Netherlands, the Philippines, Romania, Tunisia, Turkey, the United Kingdom and Yugoslavia.

## Sport

Pakistan's principal sports are hockey, cricket, football, wrestling and squash rackets. Polo, athletics and swimming are also popular.

# THE CONSTITUTION

The following proposals were unanimously adopted by leaders of all parliamentary parties, meeting in Islamabad under the Chairmanship of President Bhutto on October 20th, 1972. The new Constitution was adopted by the National Assembly on April 10th, 1973, and came into force on August 14th, 1973.

## GOVERNMENT

In the Federal Parliamentary system the Head of the State is to be a constitutional President on whom the advice of the Prime Minister shall be binding in all respects. The Prime Minister, who is to be the chief executive, and his Cabinet shall be answerable to the Federal Legislature.

A constitutional amendment in February 1975 freed the government of the obligation to seek parliamentary approval to declare a state of emergency.

## LEGISLATURE—NATIONAL ASSEMBLY AND SENATE*

The Federal Legislature shall comprise two houses—the lower house called the National Assembly with 200 members elected directly for a term of five years, on the basis of universal adult suffrage, and the upper house, called the Senate, of 63 members who serve for four years, half retiring every two years. Each Provincial Assembly is to elect 14 Senators. The tribal areas are to return five and the remaining two are to be elected from the Federal Capital Territory by members of the Provincial Assemblies. Six seats in the National Assembly are reserved for minorities and for a period of 10 years from 1973 women are to get 10 seats, raising the strength of the Assembly to 216.

There shall be two sessions of the National Assembly and Senate each year, with not more than 120 days between the last sitting of a session and the first sitting of the next session.

The role of the Senate in an overwhelming majority of the subjects shall be merely advisory. Disagreeing with any legislation of the National Assembly, it shall have the right to send it back only once for reconsideration. In case of disagreement in other subjects, the Senate and National Assembly shall sit in a joint session to decide the matter by a simple majority.

An amendment to the Constitution shall require two-thirds majority in the National Assembly and its endorsement by a simple majority in the Senate. The members of the Senate may be taken in the Federal Cabinet provided their total number does not exceed 25 per cent of the total number of Central Ministers.

The stability of the parliamentary system is sought to be ensured through four main provisions. Firstly, the Prime Minister shall be elected by the National Assembly and the President must call on him to form a government. Secondly, any resolution calling for the removal of a Prime Minister shall have to name his successor in the same resolution which shall be adopted by not less than two-thirds of the total number of members of the lower house. The requirement of two-thirds majority is to remain in force for 15 years or three electoral terms whichever is more. Thirdly, the Prime Minister shall have the right to seek dissolution of the legislature at any time even during the pendency of a no-confidence motion. Fourthly, if a no-confidence motion is defeated, such a motion shall not come up before the house for the next six months.

All these provisions for stability shall apply *mutatis mutandis* to the Provincial Assemblies also.

## PROVINCIAL GOVERNMENT

In the matter of relations between Federation and Provinces, Parliament shall have the power to make laws, including laws bearing on extra-territorial affairs, for the whole or any part of Pakistan, while a Provincial Assembly shall be empowered to make laws for that Province or any part of it. Matters in the Federal Legislative List shall be subject to the exclusive authority of Parliament, while Parliament and a Provincial Assembly shall have power to legislate with regard to matters referred to in the Concurrent Legislative List. Any matter not referred to in either list may be the subject of laws made by a Provincial Assembly alone, and not by Parliament, although the latter shall have exclusive power to legislate with regard to matters not referred to in either list for those areas in the Federation not included in any Province.

The executive authorities of every Province shall be required to ensure that their actions are in compliance with the Federal laws which apply in that Province. The Federation shall be required to consider the interests of each Province in the exercise of its authority in that Province. The Federation shall further be required to afford every Province protection from external aggression and internal disturbance, and to ensure that every Province is governed in accordance with the provisions of the Constitution.

To further safeguard the rights of the smaller provinces, a Council of Common Interests has been created. Comprising the Chief Ministers of the four provinces and four Central Ministers to decide upon specified matters of common interest, the Council is responsible to the Federal Legislature. The constitutional formula gives the net proceeds of excise duty and royalty on gas to the province concerned. The profits on hydro-electric power generated in each province shall go to that province.

---

* Although the Constitution provides for a Senate of 63 members, the number in 1976 was still 45, the same as before the promulgation of the Constitution in 1973.

## RELIGION

### ISLAM

Islam is the state religion. Under the constitution of Pakistan the head of state must be a Muslim. Muslims made up 97.1 per cent of the population in 1961.

### HINDUISM

Hindus make up 1.6 per cent of the population.

### CHRISTIANITY

There is a small minority of Christians.

## THE PRESS

Pakistan's press today is largely a remnant of the Muslim press that became prominent during the struggle for the national State (1940–47). The first Urdu-language newspaper, the daily *Urdu Akhbar*, was founded in 1836. After 1945, with the introduction of modern equipment, the more influential English newspapers, such as *Dawn* and *The Pakistan Times*, were firmly established, while several new Urdu newspapers, for example *Nawa-i-Waqt* and *Jang*, became very popular.

In Pakistan there are 12 English dailies, 62 Urdu dailies and 10 in regional languages. In addition there are 230 weeklies and 16 bi-weeklies. These together with other publications number in all 1,222.

The Urdu press comprises 882 newspapers, with *Daily Jang*, *Mussawat*, *Imroze*, *Nawa-i-Waqt* and *Mashriq* being the most influential. The largest daily is *Daily Jang* (circ. 300,000). Though the English-language press reaches only 1 per cent of the population and totals 312 publications, it is influential in political, academic and professional circles.

# PANAMA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Panama is a narrow country situated at the southern end of the isthmus separating North and South America. It is bounded to the west by Costa Rica and to the east by Colombia in South America. The Caribbean Sea is to the north and the Pacific to the south. Linking the two coasts, and dividing Panama, is the Canal Zone, a narrow strip of territory on either side of the Panama Canal, over which the U.S.A. has territorial jurisdiction. The climate is tropical and the Caribbean coast receives up to 150 inches of rainfall per year. Spanish is the official language and Roman Catholicism the religion of most of the people. The national flag (proportions 3 by 2) has four quarters: on the top row the left-hand quarter is white with a five-pointed blue star in the centre, while the right-hand quarter is red; on the bottom row the left quarter is blue and the right quarter is white with a five-pointed red star in the centre. The capital is Panama City.

### Recent History

In October 1968, after only eleven days in office, the elected President, Dr. Arnulfo Arias Madrid, was deposed by National Guard officers, led by Col. (now Gen.) Omar Torrijos Herrera. The National Assembly was dissolved and political activity suspended. Political parties were abolished in February 1969. Elections were held in August 1972 for a National Assembly of Community Representatives. In October the Assembly conferred extraordinary powers on Gen. Torrijos as Chief of Government; at the same time a President and Vice-President with purely formal powers were elected. The Government favours nationalist policies. Considerable agrarian reform has been undertaken during the present administration.

The terms of the treaty by which the Panama Canal Zone was ceded to the United States, two weeks after Panama's emergence as an independent nation in 1903, have bedevilled relations between the two countries ever since. In 1974 agreement was reached on principles for a new treaty by which the U.S.A. would surrender its jurisdiction over the Canal Zone. The treaty had not been finalized by early 1977. In January 1976 13 opponents of the Government were deported. In September the worst student riots for eight years took place, resulting from student disagreement with the Government's handling of the Canal negotiations and increases in rice and milk prices whilst wages were frozen and unemployment high. Violent clashes between students and the National Guard led to the temporary closure of the National University. Panama is a member of the OAS.

### Government

The National Assembly of Community Representatives has 505 members elected by popular vote for a six-year term. The Assembly elects the President, who is Head of State, and the Vice-President. Under the Constitution, the President holds executive power but for a transitional period of six years from October 1972 the President's authority has been transferred to Gen. Omar Torrijos as Chief of Government, with almost unlimited powers. He is assisted by an appointed Cabinet Council. Panama is divided into nine provinces and three autonomous Indian Reservations. Each province has a governor appointed by the President.

### Defence

There is a National Guard of some 11,000 men, commanded by General Omar Torrijos, but a military force is assembled only in emergencies.

### Economic Affairs

Receipts from the Panama Canal and international capital flows are important sources of income to finance Panama's annual trade deficits. In 1975 the Government introduced measures, including the promotion of exports and reduction of certain imports, to counter this problem.

Although the country has developed its potential as a banking and commercial centre, the economy is based on the land with bananas, rice, sugar and maize as principal crops. Cocoa, hemp and coconuts are also grown.

Industries include an oil refinery, breweries, producers of cement and other construction material, sugar mills, paper and food processing. Panama has an oil refining capacity of 100,000 barrels per day. Exploratory oil drillings are being undertaken in the Gulf of Panama. In 1975 the Government took an 80 per cent stake in the Cerro Colorado copper project. There are estimated deposits of 3,500 million tons of copper and the Government hopes to exploit them in conjunction with Texas-Gulf. Fishing, especially for shrimps, is important although production fell in 1975 despite heavy investment. There are timber resources, notably mahogany. Chief exports are bananas, refined petroleum and shrimps, with the U.S.A. as the principal customer. Considerable revenue comes from shipping registration fees. Tourism is a growing industry and it is estimated that 450,000 tourists will visit Panama in 1980, compared with over 280,000 in 1975.

The economy suffered severely from the world economic recession. The average increase in the G.D.P. of 7 per cent annually between 1970 and 1973 was reduced to 3.5 per cent in 1974 and 2 per cent in 1975. Unemployment reached 10 per cent in 1975. The Government relies heavily on foreign borrowing and the public debt reached 928 million balboas in 1975. The aims of the 1976–80 Five-Year Plan include the creation of over 100,000 jobs and a 7 per cent average growth rate. Plans for revitalizing the economy are based on the continued expansion of trading, banking and financial services. The Colón Free Zone has become the second largest trading location after Hong Kong. In 1975 the value of goods passing through it was $918 million. It is planned to double the size of the Zone by 1980. The Plan also provides for State investment in the sugar and copper industries. Substantial investment has already been made in hydro-electric projects: the Bayano plant came into operation in 1976 and the La Estrella, 80 mW capacity and La Fortuna, 280 mW capacity, projects in Chiriquí province are to come into operation by 1979 and 1982 respectively.

Panama is a member of SELA and the IADB.

### Transport and Communications

There is a government-owned railway and two others which are United States-owned. In 1974 there were 7,128 km. of roads, about a third of which are paved. The Pan-American Highway was to be extended from Panama City to Colombia by 1976, thus making the highway complete. The merchant marine is one of the world's largest with over 17 million gross tons. Most of the vessels are foreign-owned but registered in Panama. There are plans to construct two new ports at a cost of 39.2 million balboas. Panama is well served by international airlines. There is an international airport in Panama City and a new one is being built at Tocumen.

### Social Welfare

The social security system provides health and retirement benefits. Both employers and employees contribute to the scheme, which is government operated. In 1975 a new social security bill was published, proposing an increase in social security taxes to finance higher retirement pensions and improved medical treatment.

### Education

The education system is divided into elementary, secondary and university schooling, each of six years duration. Education is compulsory between the ages of 7 and 15 years. There are two universities. Adult illiteracy averaged 21.7 per cent in 1971.

### Tourism

Panama is a growing tourist destination with many attractions for visitors.

*Visas* are not required to visit Panama by nationals of Costa Rica, El Salvador, Federal Republic of Germany, France, Honduras, Spain and Switzerland, for a stay of less than three months, and of the United Kingdom for a stay of less than 30 days.

### Sport

Water sports, baseball, basketball, boxing, horse racing, golf and tennis are popular sports.

### Public Holidays

**1977:** May 1st (Labour Day), October 11th (Revolution Day), November 3rd (Independence from Colombia), November 4th (National Flag Day), November 28th (Independence from Spain), December 8th (Mother's Day), December 25th (Christmas).

**1978:** January 1st (New Year's Day), January 9th (National Martyrs' Day), February 7th (Shrove Tuesday), March 24th (Good Friday).

### Weights and Measures

Both the metric and the imperial systems of weights and measures are in use. In 1972 the Government announced the gradual extension of the metric system to replace all other systems by 1982.

### Currency and Exchange Rates

100 centésimos = 1 balboa (B).

Exchange rates (December 1976):

£1 sterling = 1.66 balboas;
U.S. $1 = 1.00 balboa.

## THE CONSTITUTION

Under the 1972 Constitution the 505 members of the National Assembly of Community Representatives are elected by popular vote every six years. The Assembly in turn elects the President and Vice-President of the Republic. It meets for one month every year to elect the President and Vice-President of the National Assembly and to discuss and approve public treaties, etc.

The President of the Republic appoints Ministers, members of the National Legislative Commission (which approves all legislation) and holders of other key posts. A transitional clause in the Constitution transfers these powers temporarily to the Commander of the National Guard (Gen. Omar Torrijos Herrera) who effectively controls the nation's economic, social and political policies.

## TRANSPORT

**Ministry of Public Works:** controls all transport in Panama.

### RAILWAYS

Of the railways in Panama, two are owned by American companies, one being constructed primarily to carry fruit, and the other to work in conjunction with the Canal.

**Chiriquí National Railroad:** David City, Chiriquí; government-owned; operates 169 km. of track from Puerto Armuelles to David, via Concepción, with a branch line south to Pedregal; Pres. José A. Segovia F.

**Chiriquí Land Co.** (United Brands subsidiary): Panamá; operates two lines which run partly in Costa Rica: the Northern Line (Almirante, Bocas del Toro) with 177 km. and the Southern Line (Puerto Armuelles, Chiriquí) with 183 km.

**Panama Railroad:** P.O.B. 5023, Cristóbal, Canal Zone; owned by the Panama Canal Company; operates 190 km.; Pres. Maj.-Gen. David S. Parker.

### ROADS

In 1974 there were 7,128 km. of roads, about a third of which were paved. The two most important highways are the National from Panama City westwards to Concepción in the Province of Chiriquí, and eastwards as far as Chepo; and the Boyd-Roosevelt or Trans-Isthmian, linking Panama City and Colón. The Pan American Highway to Mexico City runs for 545 km. in Panama. There is a highway to San José, Costa Rica.

### SHIPPING

The Panamanian Merchant Marine is one of the world's largest and, in 1974, over 17 million gross tons of ships were registered under the Panamanian flag.

A number of lines make regular calls at Panamanian ports, including: Furness Withy, Grace, Holland America, New Zealand, Pacific Steam Navigation, Royal Mail, Shaw Saville and United Brands.

# THE CONSTITUTION

Occupation and use of the Canal Zone in perpetuity was granted to the United States by the Republic of Panama under Articles II and III of the 1903 Treaty. In effect, the Canal Zone is a United States Government reservation devoted to the protection, maintenance and operation of the Panama Canal in which private enterprise is not permitted except that directly related to the waterway and its operation.

The Code of Laws applicable within the Canal Zone is enacted by the Congress of the United States.

Administration is in the hands of the Panama Canal Company and the Canal Zone Government. The two units are headed by one man who is President of the Company and Governor of the Canal Zone. His appointment as Governor is made by the President of the United States subject to confirmation by the Senate and he is *ex-officio* President of the Company.

In early 1974 the treaty negotiators of the United States and Panama reached an agreement on principles for a new treaty which would abrogate the 1903 treaty. The United States is to surrender its jurisdiction over the Canal Zone. Both countries are to participate in the maintenance and protection of the Canal. The treaty had not been finalized by early 1977.

# THE GOVERNMENT

## CANAL ZONE GOVERNMENT

**Governor:** Maj.-Gen. H. R. PARFITT.

The Canal Zone Government performs the usual functions of city, county and state governments, including police, schools, customs, ports, immigration, roads, health and justice.

## PANAMA CANAL COMPANY

**Chairman of the Board:** VICTOR V. VEYSEY.

**President:** Maj.-Gen. H. R. PARFITT.

**Secretary:** THOMAS M. CONSTANT.

The Company's activities involve operating the Canal and the Panama Railroad. The Company is required to recover all costs of operation and maintenance, pay the net cost of the Canal Zone Government, and pay interest on the net investment of the United States in the Canal Company.

# JUDICIAL SYSTEM

*Magistrates' Courts:* Balboa and Cristóbal. Jurisdiction in criminal cases where the fine and punishment, except for a few specified offences, does not generally exceed $100 or 30 days in jail or both, and in civil cases where the claim is under $500.

*U.S. District Court:* Ancon and Cristóbal; hears appeals from the Magistrates' Courts; tries Civil and Criminal cases in excess of the limitations of the Magistrates' Court. Appeals from the District Court are decided by the *U.S. Court of Appeals for the Fifth Circuit* in New Orleans. Final stage of the review is by the U.S. Supreme Court.

*Advisory Pardon and Parole Board:* five members appointed by the Governor; makes recommendations to the Governor on application for pardon and parole.

# RADIO AND TELEVISION

There is one radio station (SCN) and one television station (SCN-TV), both operated by the U.S. Armed Forces as part of the Southern Command Network.

# FINANCE

**Banks:** *First National City Bank*: New York; branch in the Canal Zone.

*Chase Manhattan Bank:* New York; branch in the Canal Zone

# TRANSPORT AND TOURISM

**Canal:** Opened 1914; 82 km. long; ships take an average of 8 hours to go through the Canal. Terminal ports are Cristóbal on the Caribbean and Balboa on the Pacific.

**Railways:** *Panama Railroad* runs cross-isthmus services from Colón to Panamá.

**Civil Aviation:** Panama International Airport, Tocumen, by agreement also serves as the commercial airport for the Canal Zone.

**Tourism:** Panama Canal Information Officer, Balboa Heights, C.Z.; 287,363 persons visited the Canal in 1976.

# PAPUA NEW GUINEA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Independent State of Papua New Guinea lies east of Indonesia and north of the north-eastern extremity of Australia. It comprises the eastern section of the island of New Guinea, the western section of which is in Indonesia, and a number of smaller islands, including the Bismarck Archipelago (mainly New Britain, New Ireland and Manus) and the northern part of the Solomon Islands (mainly Bougainville and Buka). The climate is hot and humid throughout the year, with an average maximum temperature of 33°c and an average minimum of 22°c. Rainfall is heavy on the coast but lower inland. There are over 700 languages but Pidgin and, to a lesser extent, standard English are also spoken. The indigenous population is largely pantheistic but there are sizable Anglican, Roman Catholic and Ecumenist congregations. The flag is divided diagonally from the upper hoist to the lower fly, the upper portion bearing a golden bird of paradise on a red ground and the lower five white stars, in the form of the Southern Cross, on a black ground. The capital is Port Moresby.

### Recent History

Papua New Guinea was formed by the merger of the Territory of Papua, under Australian rule from 1906, with the Trust Territory of New Guinea, a former German possession which Australia administered from 1914, first under a military government, then under a League of Nations mandate, established in 1921, and later under a trusteeship agreement with the United Nations. Parts of both territories were occupied by Japanese forces from 1942 to 1945.

A joint administration for the two territories was established by Australia in July 1949. The union was named the Territory of Papua and New Guinea. A Legislative Council was established in November 1951 and gradually grew in size with an increase in the number of elected members. In 1963 the Australian Government provided for the Council to be replaced by a House of Assembly with an elected indigenous majority. The House was inaugurated in June 1964 and elections for an enlarged membership were held in 1968 and 1972. Before the last election the territory was renamed Papua New Guinea.

Papua New Guinea achieved internal self-government in December 1973 and full independence on September 16th, 1975. The problem of a secessionist movement in the district of Bougainville, which made a unilateral declaration of independence in September 1975, was resolved by the establishment of a provincial government with extensive autonomous powers in August 1976. The same status was granted to East New Britain in July 1976.

Michael Somare, who from 1972 served as Chief Minister in an interim coalition government, became Prime Minister on independence. He has remained in office despite widespread allegations of inefficiency in government ministries and of discrimination against the Highland provinces.

Papua New Guinea is a member of the South Pacific Commission.

### Government

Executive power is vested in the British monarch, represented by a Governor-General, who is appointed on the recommendation of the Prime Minister and acts on the advice of the National Executive Council (the Cabinet), led by the Prime Minister. Legislative power is vested in a unicameral House of Assembly with 102 members elected by universal adult suffrage for a term of four years. The Council is responsible to the House. For administrative purposes the country is divided into 17 districts and two provinces whose governments have a considerable degree of autonomy. Local government represents over 90 per cent of the population through more than 160 councils.

### Defence

Australia was responsible for the defence of Papua New Guinea until March 1975, when the Government assumed control of its national Defence Force, which comprises two infantry battalions, a squadron of five patrol boats and landing craft, and a fleet of three DC-3 aircraft. Total strength of the armed forces is approximately 3,500.

### Economic Affairs

Papua New Guinea's economy is based on its primary industries. Over 90 per cent of the population is engaged in subsistence agriculture, growing mainly roots and tubers, or small cash crop farming. After minerals, the chief exports are agricultural products, particularly coconuts, copra and related products, cocoa and coffee beans, rubber, palm oil and tea.

A comparatively recent, although already major, development is the exploitation of Papua New Guinea's extensive mineral resources, chiefly copper, gold, silver and, more recently, petroleum. The main source of copper is the island of Bougainville, where production began in 1972. Copper is the country's main export, accounting for two-thirds of earnings in 1973/74, while gold is also of considerable export significance. In these fields, as in the development of oil, gas and hydro-electricity, foreign investment, particularly by Japan, Australia and the U.S.A., is of paramount importance.

Forestry is a sizable activity and exports of sawn timber are growing steadily. Fishing, mainly for prawns, tuna and perch, and secondary manufacturing, of beer, concrete, gases and paint, are developing sectors, although, once again, foreign capital is indispensable.

The main trading partners are Japan, which accounts for about a third of external trade, and Australia, which accounts for nearly 30 per cent. Federal Germany is a customer of growing importance, especially for copper, while the U.S.A. and the United Kingdom have substantial, although, in the latter case, declining, trade with Papua New Guinea. China has recently begun to export to Papua New Guinea and seems ready to establish two-way trade.

Favourable world prices for copper, gold and some agricultural products created a healthy balance of payments position in the early 1970s, with growth in real

G.D.P. of 12.1 per cent between 1972/73 and 1973/74, when the country had a large trade surplus (exports were more than double imports) after many years of deficits. Since then, however, a drop in essential export commodity prices, especially for copper, combined with a continuing need for substantial imports of food (particularly meat), chemicals, cement and fuels, has led to a deterioration in the situation so that in 1974/75 the trade surplus was only K63 million. Following the devaluation of the Australian dollar in November 1976 the kina was devalued by over 7 per cent. Further currency adjustments in December and January reduced this devaluation to about 6 per cent.

The new government's present long-term policy aims at the improvement of the rural economy rather than the expansion of manufacturing industry, at stability and self-reliance rather than growth and dependence on foreign capital. However, in the short term, and possibly for a considerable time, foreign aid and investment are a necessity. The achievement of a balance between sustaining this vital foreign interest and operating controls and levies through licensing exploitation of resources and taxing profits therefrom is a major economic task for the Government.

### Transport and Communications

In 1974 there were over 12,000 km. of surfaced roads, of which over 3,600 km. were classified as highways or trunk roads. There are 11 international ports and regular passenger and cargo shipping services between Papua New Guinea and Australia, New Zealand, the U.S.A. and various Pacific territories. There are less frequent services to Asian ports and a cargo-only service to Europe. Papua New Guinea has an internal air service and international airports at Port Moresby and Lae.

### Social Welfare

Hospitals with modern facilities are located in the regional centres and a network of smaller hospitals, medical centres and aidposts is distributed over the rest of the country. In 1972 there were 452 hospitals, with 15,255 beds, but in 1973 only 226 physicians.

### Education

Education is available from pre-school to tertiary level but shortages of staff, facilities and finances permit only about 50 per cent of children to attend primary school. About one third of these continue to secondary level. Curricula are increasingly designed to permit school-leavers to return profitably to the rural areas in which over 90 per cent of the population lives. Vocational and technical schools teach trade skills according to the level of entry of the students and to whether they intend to proceed to full apprenticeships. Tertiary education is provided by the University of Papua New Guinea and the University of Technology. There are also teacher training colleges and higher institutions catering for specific professional training. In 1971 adult illiteracy averaged 67.9 per cent (males 60.7 per cent, females 75.6 per cent).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 toea = 1 kina (K).

Exchange rates (December 1976):

£1 sterling = 1.379 kina;
U.S. $1 = 83.2 toea.

100 toea = 1 kina.
Coins: 1, 2, 5, 10 and 20 toea; 1 kina.
Notes: 2, 5 and 10 kina.

Exchange rates (December 1976): £1 sterling = 1.379 kina; U.S. $1 = 83.2 toea.

100 kina = £72.53 = U.S. $120.18.

*Note:* The kina was introduced in April 1975, replacing (at par) the Australian dollar ($A). Australian currency remained legal tender until December 31st, 1975. The kina maintained its parity with the Australian dollar until July 1976, when a new exchange rate of 1 kina = $A1.05 was established. This remained in effect until November 1976, when the kina was revalued against the Australian dollar (to $A1.181) but devalued against other currencies. The November devaluation was partially reversed in December. Figures in this survey are sometimes expressed in Australian dollars. For details of previous changes in the exchange rate, *see* the chapter on Australia.

# THE CONSTITUTION

A new constitution came into effect on September 16th, 1975, when Papua New Guinea became independent.

## PREAMBLE

The national goals of the Independent State of Papua New Guinea are: integral human development, equality and participation in the development of the country, national sovereignty and self-reliance, conservation of natural resources and the environment and development primarily through the use of Papua New Guinean forms of social, political and economic organization.

## BASIC RIGHTS

All people are entitled to the fundamental rights and freedoms of the individual whatever their race, tribe, places of origin, political opinion, colour, creed or sex. The individual's rights include the right to freedom, life and the protection of the law, freedom from inhuman treatment, forced labour, arbitrary search and entry, freedom of conscience, thought, religion, expression, assembly, association and employment, and the right to privacy. Papua New Guinea citizens also have the following special rights: the right to vote and stand for public office, the right to freedom of information and of movement, protection from unjust deprivation of property and equality before the law.

## THE NATION

Papua New Guinea is a sovereign, independent state. There is a National Capital District which shall be the seat of government.

The constitution provides for various classes of citizenship. The age of majority is 19 years.

## HEAD OF STATE

Her Majesty the Queen of Great Britain and Northern Ireland is Queen and Head of State of Papua New Guinea. The Head of State appoints and dismisses the Prime Minister on the proposal of Parliament and other ministers on the proposal of the Prime Minister and the Governor-General, Chief Justice and members of the Public Service Commission on the proposal of the National Executive Council. All the privileges, powers, functions, duties and responsibilities of the Head of State may be had, exercised or performed through the Governor-General.

## GOVERNOR-GENERAL

The Governor-General must be a citizen who is qualified to be a member of Parliament or who is a mature person of good standing who enjoys the respect of the community. No one is eligible for appointment more than once unless Parliament approves by a two-thirds majority. No one is eligible for a third term. The Governor-General is appointed by the Head of State on the proposal of the National Executive Council in accordance with the decision of Parliament by simple majority vote. He may be dismissed by the Head of State on the proposal of the National Executive Council in accordance with a decision of the Council or of an absolute majority of Parliament. The normal term of office is six years. In the case of temporary or permanent absence, dismissal or suspension he may be replaced temporarily by the Speaker of the House of Assembly until such time as a new Governor-General is appointed.

### THE GOVERNMENT

The Government comprises the National Parliament, the National Executive and the National Judicial System.

#### National Parliament

The National Parliament is the House of Assembly, a single chamber legislature of members elected from single-member open or provincial electorates and not more than three nominated members who are appointed on a two-thirds absolute majority vote of Parliament. The National Parliament has 102 members elected by universal adult suffrage. The normal term of office is five years. There is a Speaker and a Deputy Speaker, who must be members of Parliament and must be elected to these posts by Parliament. They cannot serve as Ministers concurrently.

#### National Executive

The National Executive comprises the Head of State and the National Executive Council. The Prime Minister, who presides over the National Executive Council, is appointed and dismissed by the Head of State on the proposal of Parliament. The other ministers, of whom there shall be not fewer than six nor more than a quarter of the number of members of the Parliament, are appointed and dismissed by the Head of State on the proposal of the Prime Minister. The National Executive Council consists of all the ministers, including the Prime Minister, and is responsible for the executive government of Papua New Guinea.

#### National Judicial System

The National Judicial System comprises the Supreme Court, the National Court and any other authorized courts. The judiciary is independent.

The Supreme Court consists of the Chief Justice, the Deputy Chief Justice and the other judges of the National Court. It is the final court of appeal. The Chief Justice is appointed and dismissed by the Head of State on the proposal of the National Executive Council after consultation with the Minister responsible for justice. The Deputy Chief Justice and the other judges are appointed by the Judicial and Legal Services Commission. The National Court consists of the Chief Justice, the Deputy Chief Justice and no less than four nor more than six, other judges.

The Constitution also makes provision for the establishment of the Magisterial Service and the establishment of the posts of Public Prosecutor and the Public Solicitor.

### THE STATE SERVICES

The constitution establishes the following State Services which, with the exception of the Defence Force, are subject to ultimate civilian control.

#### National Public Service

The Public Service is managed by the Public Service Commission which consists of not fewer than four members appointed by the Head of State on the proposal of the National Executive Council. The Commission is responsible to the National Executive Council.

#### Police Force

The Police Force is subject to the control of the National Executive Council through a Minister and its function is to preserve peace and good order and to maintain and enforce the law. There shall be a Commissioner of Police who shall be responsible for the superintendence, efficient organization and control of the Force.

#### Papua New Guinea Defence Force

There shall be no office of Commander-in-Chief of the Defence Force. The Defence Force is subject to the superintendence and control of the National Executive Council through the Minister of Defence. The functions of the Defence Force are to defend Papua New Guinea, to provide assistance to civilian authorities in a civil disaster, in the restoration of public order or during a period of declared national emergency.

The fourth State Service is the Parliamentary Service.

The Constitution also includes sections on Public Finances, the office of Auditor-General, the Public Accounts Commission and the Ombudsman Commission, and the declaration of a State of National Emergency.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Paraguay is a landlocked state in central South America. Bolivia lies to the north, Brazil to the east and Argentina to the south and west. The climate is subtropical with a temperature range from an average maximum of 34.3°C (93.7°F) in January to an average minimum in June of 14°C (51°F). The official language is Spanish. Guaraní is spoken by the majority of the population. Roman Catholicism is the established religion and embraces 89 per cent of the population. There is a small Protestant minority. The national flag (proportions 2 by 1) has horizontal stripes of red, white and blue. The obverse side bears the state emblem in the centre of the white stripe, while the reverse side carries the seal of the Treasury. The capital is Asunción.

### Recent History

Paraguay suffered heavy losses in manpower in the Chaco War with Bolivia in 1932–35, although winning the bulk of a large disputed territory when the boundary was fixed in 1938. General Higinio Morínigo established an authoritarian regime in 1940. During a civil war from March to August 1947 supporters of the Partido Colorado defeated a coalition of Liberals and the Partido Revolucionario Febrerista, leading to the overthrow of Gen. Morínigo in June 1948. This was followed by a period of great instability until Gen. Alfredo Stroessner, the Army Commander-in-Chief, assumed power by a military coup in May 1954. He was elected President in July, as the unopposed Colorado candidate, and began to restore order. In 1955 the President assumed extensive powers and many opposition leaders went into exile, but some have since returned. General Stroessner, supported by the Partido Colorado and the armed forces, was re-elected by large majorities in 1958, 1963, 1968 and 1973.

In 1969 relations between the Church and the Government became strained, due to the former's demands that political prisoners be brought to trial or released. Several clerics were expelled, accused of undermining the State, but relations between Church and State have improved and these difficulties have been partly resolved. In November 1974 about 1,000 people were arrested for plotting against the regime but almost all were subsequently released. In 1976 the Government's expulsion of several Jesuits, for the alleged spreading of Marxist propaganda and for their support of guerrilla groups, resulted in violent incidents and the arrest of over 1,500 people. This, together with allegations of maltreatment of the Ache-Guayaki Indians, has led to protests, both within Paraguay and abroad, at Paraguay's serious violations of fundamental human rights.

A constitutional amendment submitted by the Partido Colorado to enable the President to stand for re-election in 1978 was approved in principle by the National Congress in July 1976. A constitutional convention is to meet in 1977 to revise Article 173, which prohibits re-election, in spite of which President Stroessner has held power for 23 years.

### Government

Under the 1967 Constitution, legislative power is held by the bicameral National Congress, whose members serve for five years (subject to dissolution by the President). The Senate has 30 members and the Chamber of Deputies 60 members. Elections to the Congress are by universal adult suffrage. The party receiving the largest number of votes (since 1947 the Partido Colorado) is allotted two-thirds of the seats in each chamber, the remaining seats being divided proportionately among the other contending parties. Executive power is held by the President, directly elected for five years at the same time as the Congress. He governs with the assistance of an appointed Council of Ministers.

### Defence

The armed forces totalled 16,600 men in 1976: army 12,300 and air force 2,500 men. The navy, which operates on the rivers, had 1,800 men, including marines. There are 5,000 men in the security forces. Military service is compulsory for 18 months. The defence budget for 1975 was 3,477 million guaraníes.

### Economic Affairs

Agriculture, livestock and timber account for 50 per cent of Paraguay's G.D.P. Meat is the leading export although its importance has declined since 1973, when it accounted for 32 per cent of export receipts, due mainly to the EEC ban on beef imports in 1975 and the general decline in world demand. Timber, mainly hardwoods, is the second largest export by value. The main crops are soyabeans, cassava, sugar cane, maize, cotton, rice, fruit and vegetables. Output of cotton and soyabeans rose by an estimated 18 per cent and 32 per cent respectively in 1975.

The principal industries are meat processing, timber and the processing of vegetable oils and cotton. The Government plans to develop industry. An industrial timber complex to produce 63,000 cubic feet of sawn hardwood annually began to operate in 1976. Two agro-industrial complexes are planned, both concentrating on the production of soya. Several projects are being undertaken in co-operation with Brazil, including a 50,000-ton capacity sugar refinery, a cement plant, hotels and a U.S. $50 million joint venture, known as ACEPAR, to produce 100,000 tons of steel per year from 1977.

Paraguay enjoyed a rapid rate of economic growth between 1970 and 1974 with an average annual increase of 6.2 per cent. The growth rates in 1974 and 1975 were approximately 8 per cent. There has been a balance of payments surplus for several years, resulting from increased volume and high prices of exports of meat and agricultural products. Increases in the cost of petroleum imports reduced this surplus in 1974 and 1975.

The 1971–75 Development Plan aimed at improving export facilities, developing agriculture (especially in regional areas), and modernizing the technique of timber production. The country's hydro-electric potential is being exploited. Paraguay is an exporter of electrical energy and could become the world's leading exporter if all proposed projects are completed. The Acaray hydro-electric complex, with a capacity of 90 MW, supplies surplus to Argentina and Brazil and its capacity is being doubled to 180 MW. Paraguay and Brazil are to carry out a project to develop the potential of the River Paraná at Itaipú. Construction began in 1975 and the planned capacity of the plant is 12,600 MW. The project is due for completion in 1988 at a cost of $5,120 million. Construction of the hydroelectric complex at the Yacyretá rapids, a joint Paraguay–Argentina venture which will have a capacity of 4,000 MW, was to begin in 1976. A second longer-term plan with Argentina is the Corpus project, also on the Paraná, with a planned capacity of 5,000 MW. Agreement was reached in 1975 for Bolivia to supply Paraguay with 3,000 barrels per day to cover Paraguay's oil requirements. Paraguay is a member of LAFTA, SELA, the IADB and the OAS.

### Transport and Communications

In 1976 there were 498 km. of railways and 11,000 km. of roads. The Pan American Highway runs for over 700 km. in Paraguay and the Trans-Chaco Highway extends from Asunción to Bolivia. The river Paraguay is navigable from Asunción to Concepción and beyond for small vessels, and there is considerable traffic along the River Paraná through Argentina to the Atlantic at Buenos Aires and Montevideo. In 1967 Paraguay and Argentina agreed to grant free navigation to merchant vessels of the two countries on the Rivers Plate, Paraguay and Paraná; in addition Paraguay enjoys free transit facilities at Buenos Aires and free port facilities at Paranagua, Brazil, Nueva Palmira, Uruguay and Antofagasta, Chile. There is a modern airport at Asunción for internal and international air transport and a new airport is to be built near Puerto Presidente Stroessner at a cost of $14 million.

### Social Welfare

A bilateral co-operative health service is in force with the U.S.A. and there are a number of large health centres. A five-year malaria eradication programme has been launched.

### Education

Primary education is free and, where possible, compulsory between 7 and 14 years of age, but there are insufficient schools, particularly in the remote parts of the country. In 1975 there were 2,796 primary schools and 731 secondary schools; there is one state and one Catholic university.

### Tourism

Tourism is undeveloped but with the growth of air transport and the construction of new international highways efforts are being made to promote it.

*Visas* are not required to visit Paraguay by nationals of Argentina, Belgium, Brazil, Chile, Denmark, Ecuador, Finland, France, the Federal Republic of Germany, Italy, Liechtenstein, Luxembourg, Mexico, the Netherlands, Norway, Spain, Sweden, Switzerland, the United Kingdom, the U.S.A. and Uruguay.

### Sport

Football is the most popular sport. Tennis, horse-racing, fishing, basket-ball and rugby are also popular.

### Public Holidays

**1977:** May 1st (Labour Day), May 14th–15th (Independence), May 19th (Ascension), June 9th (Corpus Christi), June 12th (Peace of Chaco), August 15th (Founding of Asunción), August 25th (Constitution Day), September 29th (Battle of Boquerón), October 12th (Discovery of America), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 25th (Christmas Day).

**1978:** January 1st (New Year's Day), February 3rd (St. Blaise's Day), March 1st (Heroes' Day), March 23rd (Maundy Thursday), March 24th (Good Friday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 céntimos = 1 guaraní (G).

Exchange rates (December 1976):

£1 sterling = 208.78 guaraníes;
U.S. $1 = 126.00 guaraníes.

## THE CONSTITUTION

Following the presidential elections of February 1968, the 1940 constitution was replaced by one formulated in 1967.

The preamble to the Constitution states that Paraguay is an independent republic whose form of government is representative democracy. The powers accorded to the legislature, executive and judiciary are exercised separately and independently. The official religion of Paraguay is Roman Catholicism.

All citizens of Paraguay are equal before the law and have the right to freedom of conscience, travel, residence and religion. The freedom of association is guaranteed as is the right of workers to organize and strike. Political parties are free to operate providing they do not advocate the destruction of the republican representative system. All Paraguayans may vote in elections after the age of eighteen. No laws may be retrospective in application.

The legislature is composed of the Senate and the Chamber of Deputies. The Senate is made up of at least thirty members, the Chamber of Deputies of at least sixty members. Legislation concerning national defence and international agreements may be initiated in the Senate. Financial, electoral and municipal legislation may be initiated in the Chamber of Deputies. Both chambers of Congress are elected for a period of five years subject to dissolution.

Executive power is discharged by the President of the Republic, who must be a Roman Catholic. He is elected by direct vote for a five-year term of office. The President formulates legislation and enacts it. He is the commander-in-chief of the armed forces and may dissolve Congress.

The Supreme Court is composed of five members who are appointed for five years by the President. The Supreme Court has the power to declare legislation unconstitutional.

# PERU

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Peru is situated on the Pacific coast of South America. It is bordered by Ecuador and Colombia to the north, Brazil and Bolivia to the east and Chile to the south. The climate varies with altitude, average temperatures being some 7°C (20°F) lower in the mountains than in the coastal region. The two official languages are Spanish and Quechua. Most of the population is Roman Catholic and there is a Protestant minority. The national flag (proportions 3 by 2) has vertical stripes of red, white and red. The capital is Lima.

### Recent History

In October 1968 a military *coup* deposed President Fernando Belaúnde Terry after five years in office and established Gen. Juan Velasco Alvarado as President. Congress was suspended and a military cabinet appointed. The Revolutionary government aimed at a complete structural transformation of the country.

In February 1975 a state of emergency was declared and constitutional guarantees suspended to combat anti-government rioting. Gen. Francisco Morales Bermúdez, generally regarded as a moderate, was appointed Prime Minister, Minister of War and Commander-in-Chief of the Army. Partly as a result of ill health, Gen. Velasco Alvarado was replaced as President in August 1975 by Gen. Morales Bermúdez, following an internal *coup* within the armed forces. He expressed his intention to continue with the social and economic revolution initiated by his predecessor, including reforms made within the agricultural, industrial and mining sectors with the aim of bringing a larger section of the peasant population into the economy.

In January 1976 there were widespread strikes following the announcement of a series of economic austerity measures. Events arising from dissension within the armed forces between leftist and moderate elements and from internal unrest provoked by further austerity measures led to the resignation in July of the Prime Minister and a cabinet reshuffle in which most of the leading instigators of the 1968 revolution were removed. The new Government implemented several measures which were interpreted as a move to the right, including the denationalization of the fishing industry, the reversal of the socialization of the press and the prohibition of strikes. In December it was announced that the Government had plans to return the country to democratic rule by 1980.

### Government

Both executive and legislative powers are exercised by the Armed Forces through the President, who rules by decree with the assistance of an appointed Council of Ministers and a Consultative Committee. The country is divided into 23 Departments, each administered by an appointed Prefect, and one Province.

### Defence

Military service is selective and lasts for two years. In 1976 the armed forces numbered 63,000 men: an army of 46,000, a navy of 8,000 and an air force of 9,000. There are para-military forces numbering 20,000 men. Defence expenditure for 1975 amounted to 16,860 million soles.

### Economic Affairs

Peru has a diversified agricultural economy, the chief crops being sugar cane, potatoes, rice, coffee and cotton. Livestock is raised, particularly in the mountains. Land expropriation, under the 1970 Land Reform Law, ended in 1976. The target of distributing 10 million hectares of land to 400,000 peasants is to be reached in 1977. The second stage of the programme, the collectivization of small unprofitable properties with a view to increasing productivity, is to begin in 1977/78.

Fishing is an important factor in the economy and Peru's fishmeal industry is the largest in the world, although activities were almost completely suspended during 1972/73 because of the disappearance of *anchoveta* stocks due to temporary climatic changes and over-fishing. Fishing recommenced in 1974 but the fishing seasons have been severely restricted. To combat deficiencies in the industry, it was nationalized in 1973 and a state corporation, Pescaperú, was set up. In 1976 the industry was denationalized in an attempt to resolve the problem of paying state subsidies to the fishing crews, although Pescaperú retains control over the fishmeal processing plants. In 1975 a large fishing complex at Paita and a canning and freezing plant at Challpesa were opened.

Minerals include copper (with reserves of over 1,000 million tons), silver, petroleum, iron ore, coal, phosphates and potash. In 1974 extensive deposits of high quality diatomite, nickel, copper, phosphates and manganese were discovered. In 1975 3,000 million tons of coal were discovered near Huanco. Following the expropriation of the Cerro de Pasco Corporation in 1974 and the Marcona Mining Company in 1975, the Government controls more than 50 per cent of national mineral production. The mining sector suffered setbacks in 1976 due to extensive labour disputes. The state mining corporation, Mineroperú, is to invest 75,000 million soles in mining development projects between 1976 and 1985. There are proven reserves of 600 million barrels of crude petroleum. In 1976 producion reached approximately 70,000 barrels per day and a further 40,000 barrels per day were imported from Venezuela and Ecuador to cover domestic consumption. Oilfields in the Amazon jungle should come into operation by 1978, raising daily production by 115,000 barrels and leaving a small surplus for export. The trans-Andean Nor-Peruano pipeline was completed at the end of 1976 and is to transport 30,000 barrels of oil a day to the Bayóvar terminal. In 1975 the Peruvian subsidiary of Gulf Oil was nationalized and the petroleum industry is in the hands of a state agency, Petroperú. However, in 1976 it was announced that foreign oil companies would be allowed to explore both in the Amazon jungle and off-shore.

The Government's principal aims are the redistribution of wealth and the organization of the economy into four sectors: the State, social property enterprises, private companies with industrial communities and small businesses. Between 1968 and 1976 the Government nationalized the fishing, copper, sugar and petroleum industries, but in 1976 the fishing industry was denationalized. The Government emphasized that, although the restructuring of the ownership of the means of production would continue, precedence would be given to the careful management of the economy. The 1975–78 National Development Plan provides for an annual growth rate of 7.5 per cent and the main areas for development under the Plan are fishing, petroleum, copper and heavy industry.

In 1975 Peru faced the problems of low agricultural output, a growth rate of only 4 per cent compared with 6.6 per cent in 1974, a 40 per cent inflation rate, a large balance of payments deficit and a total foreign debt of $3,144 million. To combat the critical economic situation various measures, including a wage freeze, import restrictions, expenditure cuts and increased taxes and prices, were introduced but they proved to be inadequate so more far-reaching measures were implemented in June and July. These included a 31 per cent devaluation of the currency, the second in nine months, bringing the total to 40 per cent. In September a policy of periodic adjustments of the exchange rate was introduced. There was little improvement in the economy by the end of 1976, with the growth rate estimated at 2.8 per cent and inflation at 36 per cent, but the budget deficit had been reduced by 11,500 million soles. A number of investments projects, including the Nor-Peruano pipeline, the Cerro Verde copper complex and the expansion of the Chimbote steelworks in which the Government had invested heavily, will begin to show results in 1977. In November the President announced that the role of management in the private sector would be strengthened, that the maximum workers' shareholding in *comunidades industriales* would be reduced from 50 per cent to 33.3 per cent and that the entire state sector would be rationalized.

Peru is a member of LAFTA, the Andean Group, SELA, the OAS and the IADB.

## Transport and Communications

Transport is made difficult by the terrain and internal air services are an important means of transport. In 1976 there were 2,105 km. of railways. The road system is centered on the 3,400 km.-long Peruvian section of the Pan American Highway which is crossed by the Trans-Andean Highway running from Lima. A new 480-km. road, part of the Trans-Andean Highway, connecting Lima and Callao with the headwaters of the Amazon, is due for completion in 1980. European shipping lines call regularly at Peruvian ports, the chief of which is Callao. The national port administration, Enapuperú, invested 2,000 million soles on port development in 1976 and the construction of three large river ports in the Amazon region began in 1975. Internal air transport is provided by three local airlines and international services are provided by several major airlines.

## Social Welfare

Social insurance is compulsory and benefits cover sickness, disability and old age. There are separate systems for wage earners and salaried employees. Labour legislation guarantees conditions of employment. A new social security pension law promulgated in 1974 established a single unified scheme for all employees.

## Education

Reforms promulgated since the 1968 revolution have instituted a three-level educational system. The first is for children up to the age of 6 in either nurseries or kindergartens. The second level, basic education, is free and, where possible, compulsory between the ages of 6 and 15. Higher education includes the pre-university and university levels. There is also provision for adult literacy programmes, professional, vocational and specialized education. Facilities are still limited but great emphasis is being laid on improving and extending the educational system. Peru has 33 universities.

## Tourism

Peru is famous for the relics of Inca and pre-Inca civilizations. There is spectacular mountain scenery including Lake Titicaca, situated at an altitude of 3,850 metres, and forest and jungle areas. Many of the towns have interesting examples of Spanish Colonial architecture and culture.

*Visas* are not required to visit Peru for up to ninety days by nationals of the following countries: Argentina, Austria, Belgium, Bolivia, Brazil, Canada, Colombia, Denmark, Ecuador, Finland, France, the Federal Republic of Germany, Italy, Japan, Liechtenstein, Luxembourg, the Netherlands, Norway, Portugal (up to sixty days), Spain, Switzerland and the United Kingdom.

## Sport

Football is the most popular sport and basketball, volleyball, horse-racing and bull- and cock-fighting are widely followed. There are opportunities for hunting and deep-sea fishing.

## Public Holidays

**1977:** May 1st (Labour Day), June 24th (Peasants' Day), June 29th (SS. Peter and Paul), July 28th–29th (Independence), August 30th (St. Rose of Lima), October 9th (Day of National Dignity), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 25th (Christmas Day).

**1978:** January 1st (New Year's Day), March 23rd–24th (Easter).

## Weights and Measures

The metric system is in force.

## Currency and Exchange Rates

Coins: 5, 10, 20, 25 and 50 centavos; 1, 5 and 10 soles.
Notes: 5, 10, 50, 100, 200, 500 and 1,000 soles.

Exchange rates (December 1976): £1 sterling = 112.68 soles; U.S. $1 = 68.00 soles.
1,000 soles = £8.875 = $14.706.

*Note:* From 1962 to 1967 the exchange rate was $1 = 26.82 soles (1 sol = 3.73 U.S. cents). In October 1967 a two-tier system was introduced. The exchange certificate rate, used for external trade transactions, was fixed at $1 = 38.70 soles (1 sol = 2.58 U.S. cents) while a draft or transfer rate was established for most non-trade transactions. In the case of the latter the rates from 1970 were $1 = 43.38 soles (buying) or 43.50 soles (selling). Despite two devaluations of the U.S. dollar (in December 1971 and February 1973), all these rates remained in effect until September 1975, when the two-tier system was ended and a single rate of $1 = 45.00 soles was introduced. This was in force until June 1976, when a new rate of $1 = 65.00 soles was established. Since September 1976 the exchange rate has been subject to small periodic adjustments. In terms of sterling, the exchange certificate rate was £1 = 92.88 soles from November 1967 to August 1971; and £1 = 100.84 soles from December 1971 to June 1972.

# THE CONSTITUTION

*This constitution has remained only partially in force during the several periods of military government since it was promulgated, including the present one.*

The existing Constitution was promulgated on April 9th, 1933. It has been amended from time to time.

Under the general guarantees some of the functions of the modern State are defined. Mines, lands, forests, waters, and, generally, all natural sources of wealth belong to the State. Conditions of their exploitation, either by the State or by means of concessions to private persons, will be fixed by law. In industry, the State will support profit-sharing schemes, and will legislate concerning the organization of industry, safety measures for workers, accident compensation, minimum wages, maximum hours and general conditions of work. In agriculture, the State will favour the preservation of the small rural property and may expropriate, with compensation, and subdivide land which is not being exploited economically.

Article 53 provides that the legal existence of political parties with international connections is not recognized, and those belonging to such parties may not hold political office.

Liberty of conscience and of beliefs is inviolable, and no one may be persecuted for his ideals. Freedom of the press is guaranteed, but compensation may be sought through legal channels by an injured party against the editor and author of a publication. Article 65 provides for the censorship of public spectacles. The principle of *habeas corpus* is recognized.

When the security of the State demands, the Executive may suspend wholly or in part, in the whole or in a part of the national territory, certain constitutional guarantees of the individual. If such suspension is decreed while Congress is in session, the Executive must inform Congress immediately. The suspension will be for thirty days only, and another decree will be needed for any further extension. The powers of the Executive during the suspension of guarantees will be fixed by law.

Voting for men and women between the ages of 21 and 60 is compulsory; after 60, voting is optional.

**The Legislative Power.** The Constitution provides for a bi-cameral legislature. Both the Senate of 45 members, and the Chamber of Deputies, consisting of 140 members are elected for six years. Congress begins its sessions on July 28th, and continues in ordinary session for 120 days. The President, with the agreement of his Cabinet, may convoke extraordinary sessions. Congress legislates, interprets, modifies and repeals laws; examines alleged infringements of the Constitution; imposes and repeals taxes; and approves or rejects the national and departmental budgets. However, any Congressional action to impose or repeal taxes or vote expenditure must be taken on the initiative of the Executive Power. Congress authorizes the Executive to negotiate State loans and provide funds for amortization. It approves or rejects the President's recommendations for the advancement of higher officers of the armed forces, and establishes the strength of those forces, and approves or withholds approvals of treaties negotiated by the Executive.

**The Executive Power.** The President is elected for a six-year term, which begins on July 28th of the year of election. First and Second Vice-Presidents are elected simultaneously with the President. The last-named is not eligible for re-election until after the lapse of at least one presidential term. This provision of the Constitution may not be reformed or repealed, and any person attempting to do so must retire from office, and will be permanently incapacitated from holding any public office. The President may not command the armed forces without the permission of Congress. On taking up such a command, he becomes subject to military laws and regulations. His tasks include the drafting of laws and the making of resolutions and decrees promulgating laws, the maintenance of internal order and external security, the convoking of presidential and congressional elections, and of extraordinary sessions of Congress. It is his duty to see that the resolutions of the Judicial Power are carried out. He organizes and distributes the armed forces, administers the finances of the State, negotiates treaties, appoints and removes the members of his Cabinet and, with the approval of his Cabinet, appoints members of the diplomatic corps, and selects candidates of Peruvian birth for archbishoprics and bishoprics, whose names are submitted to the Vatican.

**The Judiciary.** The Supreme Court, with its seat in Lima, consists of the President and 10 members, whose appointments have to be approved by Congress. Higher Courts function in certain departments determined by law, and Courts of First Instance in provincial capitals. There are justices of peace in all towns. Members of the Higher Courts are nominated by the President from a list submitted by the Supreme Court. Appointments to the lower courts must be ratified by the Supreme Court.

The Constitution provides that in each ministry there shall be one or more Consultative Commissions consisting of specialists in the various branches of activity of the ministry; and also provides for a Council of National Economy whose members shall represent the interests of consumers, capital, labour and the liberal professions.

**Regional Administration.** The country is divided into 24 Departments administered by Prefects. The Departments are divided into provinces, which in turn are divided into districts.

Municipal Councillors are nominally elected by direct vote, and foreigners are eligible, but for some years municipal bodies have been appointed without election. The Municipal Elections Law provides for elections every three years.

**Indigenous Communities.** The Constitution recognizes the legal existence and juridical personality of the indigenous communities, whose property may not be alienated except in the public interest, when compensation must be given. The State is responsible for the civil, penal, economic and administrative laws regulating these communities.

# THE PRESS

## DAILIES

### Lima

In 1974 the government promulgated a press reform law providing for the nationalization of the newspaper industry. In July 1974 several major newspapers were expropriated and were to be transferred to various sectors of society. In 1976 the Government replaced the editors of five of the six major dailies in Lima, except the editor of *Ojo*. In July twelve political journals were suspended, charged with the subversion of public order and the sabotage of Peru's economic recovery. Six of the journals were allowed to reappear in 1977 but the six more left-wing journals are still banned from publishing. A state publishing company, Editora-Perú, is to be established to take over those firms publishing the newspapers *El Peruano* and *La Crónica*. It has also been announced that the transfer of major newspapers to "organized sectors of society" will not take place and that freedom of expression would be restored within the limits of the revolution.

# THE PHILIPPINES

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of the Philippines lies in the Pacific Ocean east of South-East Asia. The principal islands of the Philippine archipelago are Luzon in the north and Mindanao in the south. Borneo is to the south-west and New Guinea to the south-east. The climate is maritime and tropical with high humidity. Rainfall is abundant and typhoons frequent. There are numerous language groups. Pilipino (Tagalog), based on Malay, is the native national language. English is widely spoken and some Spanish. Ninety per cent of the population is Christian (80 per cent Roman Catholic) and 7 per cent Muslim. The national flag (proportions 2 by 1) has two equal horizontal bands of blue and red with a gold sun and three stars on a white triangle next to the staff. The capital is Manila.

### Recent History

The Philippines were formerly a Spanish colony. After the Spanish-American War of 1898, Spain ceded the islands to the U.S.A. A Constitution, ratified by plebiscite in May 1935, gave the Philippines internal self-government and provided for independence after 10 years. During the Second World War the islands were occupied by Japanese forces from 1942 to 1945 but, after Japan's surrender, U.S. rule was restored. The Philippines became an independent republic on July 4th, 1946. A succession of Presidents under the control of U.S. economic interests and the Filipino landowning class, and corrupt, incompetent administrations did little to help the peasant majority or to curb disorder and political violence.

At elections in November 1965 the incumbent President, Diosdado Macapagal of the Liberal Party, was defeated by Ferdinand Marcos of the Nacionalista Party. President Marcos's inauguration in December was followed by rapid development of the economy and infrastructure of the Philippines, bringing increased prosperity. Marcos was re-elected in 1969. His second term was marked by civil unrest, with violent protests against corruption and the Government's support for U.S. policy in Viet-Nam, exacerbated by inflation and the need for further economic reform. Guerrilla activity, by the communist New People's Army (NPA) in the north and the Moro National Liberation Front (MNLF), a Muslim separatist movement, in the south, was also on the increase in the early 1970s.

In September 1972, before completing his (then) maximum of two four-year terms, President Marcos declared martial law in order to deal with subversive activity and introduce drastic reforms. Congress was suspended, opposition leaders arrested, stringent press censorship introduced and Marcos began to rule by decree. Following ratification by delegates from "Citizens' Assemblies", a new constitution was promulgated in January 1973. This provided for an elected National Assembly but, under transitional provisions, gave the incumbent President power to convene an interim National Assembly. However, this provision was postponed indefinitely. Referenda held in July 1973, February 1975 and October 1976 gave overwhelming mandates to Marcos for the continuation of martial law and postponing the full implementation of the constitution. The referendum of October 1976 also endorsed several constitutional amendments substituting an interim Legislative Assembly for the interim National Assembly previously envisaged.

The Government had achieved a considerable degree of success in its campaign against the NPA by the end of 1976, with the arrest of its Commander-in-Chief in August. However, the MNLF rebellion, allegedly supported by Libya and Malaysia, continued to constitute a major problem for the Government. Talks held in January 1975 broke down, but renewed negotiations with the MNLF leader in Libya in December 1976 produced a ceasefire agreement and Marcos agreed to the establishment of an autonomous Muslim region in the south, subject to the results of referenda to be held in the 13 provinces concerned. Further talks were planned for February 1977.

While the foreign policy of the Philippines has traditionally been in support of the U.S.A., during the 1970s the Marcos Government has moved towards a policy of non-alignment, establishing diplomatic relations with its communist neighbours and, in 1976, pressing for the renegotiation of the terms of its agreement with the U.S.A. by which U.S. bases are maintained in the Philippines. Talks on this question were postponed in December 1976.

### Government

The 1973 Constitution provides for a representative system of government, with legislative power vested in a unicameral National Assembly to be elected by direct popular vote for a six-year term. Executive power is vested in the Prime Minister, to be elected by the Assembly. However, since 1972 the Philippines has been under martial law and the definitive provisions of the constitution remained in abeyance at the end of 1976. Transitional provisions give the incumbent President (Ferdinand Marcos) full executive powers, without any fixed term of office. He also exercises legislative power by decree and is Commander-in-Chief of the armed forces. He governs with the assistance of an appointed Cabinet. In September 1976 a Legislative Advisory Council was set up. Local government is by Citizens' Assemblies under the Ministry of Local Government.

### Defence

The armed forces were estimated to total 77,000 in 1976, comprising an army of 45,000, navy of 17,000 and air force of 15,000. There is also a constabulary of 38,000 and a local self-defence force of 25,000. Defence expenditure for 1977 was estimated at 5,000 million pesos.

### Economic Affairs

The largest sector of the economy, agriculture, forestry and fishing, provided about 30 per cent of G.N.P. in 1975 while employing about half of the labour force. The principal crops for domestic consumption are rice and maize, in which the Philippines is anxious to attain self-sufficiency. Sugar is the leading export crop, accounting for 25 per cent of export earnings in 1975, followed by copra and coconut oil.

Manufacturing accounted for some 25 per cent of G.N.P. in 1975 and employed 15 per cent of the labour force. The principal industries are food processing, chemicals, petroleum refining and textiles. The domestic market absorbs most industrial production and nearly all leading exports originate from the agricultural and mining sectors. Copper is the most valuable mineral but there is significant production of nickel, gold, silver, iron, manganese and chrome.

In 1973 the Government launched the "Masagana 99" programme which aimed at increasing rice yields and achieving self-sufficiency in this crop. Rice farmers have been the major beneficiaries of a land reform programme, rural credit schemes and fertilizer subsidies. Milled rice production increased by 14 per cent in 1975/76 to an estimated 3.98 million tons. The world rise in commodity prices led to a dramatic increase in export earnings from sugar, logs, timber products and coconut oil in 1973/74. However, commodity prices fell in late 1974, resulting in a significant drop in export earnings of these products in 1975. In 1976 increased sugar production combined with continuing low prices resulted in the Government, which has controlled the industry since 1973, being unable to pay the producers or to sell the huge sugar surplus at economic prices.

The mining and manufacturing sectors were depressed in 1975 following a sharp fall in mineral prices, declining foreign investment and reduced domestic demand resulting from a decline in real wages. Copper exports reached U.S. $393.2 million in 1974 but fell to U.S. $212.1 million in 1975. However, there was significant growth in the nickel industry in 1975 and a new U.S. $270 million refinery was opened in Mindanao. In an effort to reduce dependence on oil as the primary source of energy, a national coal development programme was launched in 1976. The Government is anxious to develop mineral processing and there are plans for two new copper smelters and three aluminium plants. This investment, funded mainly by foreign and domestic borrowing, is aimed at reducing the country's vulnerability to world prices regulated by foreign processors. The aim of government investment is to change the emphasis from the export of raw materials (logs, copra, copper ore) to the export of finished and semi-finished products.

Inflation reached a rate of 40 per cent in 1974 but retail prices have subsequently stabilized and in 1975 the rate was estimated to be 8 per cent. In 1973 the world rise in commodity prices gave the Philippines an unprecedented balance of payments surplus. However, in 1975, largely as a result of falling commodity prices and rising oil prices, there was a trade deficit of nearly U.S. $1,200 million, creating a balance of payments deficit of about U.S. $500 million. Growth rate of G.N.P. in real terms, 5.8 per cent in 1975, rose to an estimated 6.3 per cent in 1976.

### Transport and Communications

In 1975 the Philippines had 112,870 kilometres of roads. Railway transport is confined to the major island (Luzon), with a few kilometres on the island of Panay. Bus services provide the most widely used form of inland transport. Shipping plays a considerable part in carrying passengers and cargo between the islands. There are 97 national and 502 municipal ports. Philippine Air Lines maintains domestic and international air services and there is an international airport at Manila. Mactan, in Cebu, and Zamboanga also serve as alternative international airports.

### Social Welfare

Government social insurance provides cover for retirement and life. Employed persons contribute to the scheme from their wages. Public health services such as inoculation and vaccination are provided free in the State Dispensaries.

### Education

There is free education in all primary schools of which there were 43,639 with 7.8 million pupils (1973). Nearly 2 million students were enrolled in the 3,666 secondary schools, universities and colleges. Instruction is in English, although Pilipino is sometimes used. There are 42 universities and some 7,000 colleges. Among the population aged 10 and over, the average illiteracy rate in 1970 was 16.6 per cent (males 15.4 per cent, females 17.8 per cent).

### Tourism

Tourism is a rapidly expanding sector of the Philippines' economy. In 1972 166,000 tourists visited the country, but by 1975 this had risen to 502,000 who spent an estimated 155.2 million U.S. dollars. A five-year tourism development plan, with an estimated investment requirement of 5,697 million pesos, was launched in 1976. Chief attractions are the warm climate, the tropical setting of the islands and the cosmopolitan city of Manila.

### Sport

Basketball is the most popular game, closely followed by baseball.

### Public Holidays

**1977:** May 1st (Labour Day), June 12th (Independence Day), June 19th (Birthday of Jose Rizal), July 4th (Philippine-American Friendship Day), September 21st (National Thanksgiving Day), November 1st (All Saints' Day), November 30th (Bonifacio Day), December 25th (Christmas Day), December 30th (anniversary of the death of Jose Rizal).

**1978:** January 1st (New Year's Day), March 23rd and 24th (Maundy Thursday and Good Friday), April 9th (Bataan Day).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centavos = 1 Philippine peso.

Exchange rates (December 1976):

£1 sterling = 12.325 pesos;
U.S. $1 = 7.438 pesos.

## FINANCE

100 centavos=1 Philippine peso.

Coins: 5, 10, 25 and 50 centavos; 1 and 5 pesos.

Notes: 1, 2, 5, 10, 20, 50 and 100 pesos.

Exchange rates (December 1976): £1 sterling=12.325 pesos; U.S. $1=7.438 pesos.

100 Philippine pesos=£8.11=$13.44

*Note:* Prior to January 1962 the official exchange rate was U.S. $1=2.00 pesos but other rates were effective for certain transactions. The multiple exchange rate system was ended in January 1962, when a free market was introduced. In May 1962 the free rate stabilized at $1=3.90 pesos (1 peso=25.64 U.S. cents) and this became the par value in November 1965. In February 1970 a free market was re-introduced and the peso "floated" downward. The exchange rate against the U.S. dollar is adjusted from month to month. The average market rate (pesos per U.S. dollar) was: 6.01 in 1970; 6.37 in 1971; 6.67 in 1972; 6.75 in 1973; 6.80 in 1974; 7.27 in 1975. In terms of sterling, the exchange rate between November 1967 and February 1970 was £1=9.36 pesos.

## THE CONSTITUTION

(Proclaimed January 17th, 1973; amended October 1976)

*Note:* When President Marcos proclaimed the ratification of the new Constitution following a plebiscite, he also proclaimed the suspension of the interim National Assembly initially envisaged by the Constitution and the continuation of martial law, in force since September 1972. In referenda held in July 1973, February 1975 and October 1976, a majority voted that martial law should be continued. The October 1976 referendum also approved amendments to the transitional provisions of the Constitution.

The following is a summary of the main features of the Constitution.

### BASIC PRINCIPLES

Sovereignty resides in the people; defence of the State is a prime duty and all citizens are liable for military or civil service; war is renounced as an instrument of national policy; the State undertakes to strengthen the family as a basic social institution, promote the well-being of youth, maintain adequate social services, promote social justice, assure the rights of workers and guarantee the autonomy of local government.

Other provisions guarantee the right to life, liberty and property, freedom of abode and travel, freedom of worship, freedom of speech, of the press and of petition to the Government, the right of *habeas corpus* except in cases of invasion, insurrection or rebellion, and various rights before the courts

### THE PRESIDENT

The President is elected from among the members of the National Assembly for a six-year term, by a majority vote; he ceases to be a member of the Assembly or of any political party; he must be at least 50 years of age; he may not receive any emolument other than that entitled to as the President; he can dissolve the National Assembly, call general elections and, when appropriate, accept the resignation of the Cabinet.

## THE NATIONAL ASSEMBLY

Legislative power is vested in the National Assembly; members are elected for six years and must be natural-born citizens, over 25 years of age, literate and registered voters in their district. All citizens of the Philippines over the age of 18 years, not disqualified by law, resident in the Philippines for at least one year and in their voting district for at least six months, are eligible to vote.

Regular elections are to be held on the second Monday of May; the Assembly convenes on the fourth Monday of July for its regular session; it elects a Speaker from among its members; the election of the President and Prime Minister precedes all other business following the election of the Speaker.

Various provisions define the procedures of the Assembly and the rights of its members, among them that the Assembly may withdraw its confidence in the Prime Minister by a majority vote; that no bill shall become law until it has passed three readings on separate days; that every bill passed by the Assembly shall be presented to the Prime Minister for approval, upon the withholding of which, the Assembly may reconsider a bill and, by a majority vote of two-thirds, enable it to become law.

## THE PRIME MINISTER AND CABINET

Executive power is exercised by the Prime Minister with the assistance of the Cabinet; the Prime Minister is elected from the members of the National Assembly by a majority vote; he appoints the members of the Cabinet.

The Prime Minister is Commander-in-Chief of the armed forces; he may suspend the writ of *habeas corpus* and proclaim martial law; all powers vested in the President under the 1935 Constitution are vested in the Prime Minister unless the National Assembly provides otherwise.

## THE JUDICIARY

The Supreme Court is composed of a Chief Justice and 14 Associate Justices, and may sit *en banc* or in two divisions.

## LOCAL GOVERNMENT

The National Assembly shall enact a local government code which shall establish a more responsive and accountable local government structure.

## CONSTITUTIONAL COMMISSIONS

These are the Civil Service Commission, the Commission on Elections and the Commission on Audit. The Commission on Elections enforces and administers all laws relating to the conduct of elections and registers and accredits political parties.

## THE NATIONAL ECONOMY

The National Assembly shall establish a National Economic Development Authority which shall recommend co-ordinated social and economic plans to the National Assembly and all appropriate governmental bodies. Various provisions relating to the public interest in economic matters are set forth.

## AMENDMENTS

Amendments and revisions to the Constitution may be proposed by the National Assembly upon a vote of three-quarters of its members, or by a constitutional convention. Any amendment or revision is valid when ratified by a majority of votes cast in a plebiscite.

## TRANSITIONAL PROVISIONS

There shall be an interim Batasang Pambansa (Legislative Assembly) of not more than 120 members, unless otherwise provided by law, including the incumbent President of the Philippines, regional representatives elected by proportional representation, and those chosen by the incumbent President from the Cabinet. The President shall, within 30 days of the election and selection of its members, convene the interim Batasang Pambansa and preside over it until the Speaker is elected.

The President shall be the Prime Minister and he shall continue to exercise his powers and prerogatives under the 1935 constitution and the powers vested in the President and Prime Minister under this constitution. The President and the Cabinet shall exercise all the powers and functions of the regular President and Prime Minister and Cabinet, and shall be subject only to such disqualifications as the President may prescribe. The President may appoint a deputy Prime Minister or as many deputy Prime Ministers as he deems necessary. The President shall continue to exercise legislative powers until martial law is lifted. Whenever, in the judgement of the President, there exists a grave emergency or whenever the interim Batasang Pambansa or the regular National Assembly fails or is unable to act adequately on any matter for any reason that in his judgement requires immediate action, he may, in order to meet the exigency, issue the necessary decrees or instructions which shall form part of the law of the land.

Referenda may be called at any time the Government deems it necessary to ascertain the will of the people regarding any important matter whether of national or local interest. The present Judiciary shall continue to exercise its powers and functions. The Constitution notes the structure of the local councils (*Barangays*) set up under martial law under the Department of Local Government, their composition being subject to alteration by law.

# THE PRESS

The Philippines had a large and diverse press, with about 15 metropolitan dailies and 175 weeklies, before the imposition of martial law by President Marcos in September 1972, when all newspapers and radio stations were shut down. The President claimed that he had "silenced the media because some were undermining Philippine society and giving aid and comfort to the Communists". A number of reporters, editors and publishers were arrested, and before publication could be resumed the Government's Mass Media Council had to screen staff and give its authorization. The strict controls on content and comment were gradually relaxed, and the Mass Media Council was replaced in May 1973 by a Media Advisory Council, composed of representatives of the various media. In November 1974 controls were further relaxed with the abolition of the Media Advisory Council and its replacement by the all-civilian Philippine Council for Print Media (P.C.P.M.). Newspapers are expected to publish only what the President described as news of "positive national value" and to eschew sensationalism.

# FINANCE

(cap.=capital, p.u.=paid up, dep.=deposits, m.=million, amounts in pesos)

### BANKING

The Central Bank of the Philippines supervises the entire financial system.

The financial structure consists of: (1) the banking system: commercial banks, thrift banks (savings and mortgage banks, stock savings and loan associations and private development banks), regional unit banks (rural banks), and specialized and unique government banks such as the Development Bank of the Philippines, and the Land Bank of the Philippines; (2) non-bank financial intermediaries: investment houses and companies, securities dealers, financing companies, fund managers, pawnshops and lending investors. Legislation passed in September 1976 permitted the establishment of offshore banks in the Philippines.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Puerto Rico lies 50 miles east of Hispaniola (Haiti and the Dominican Republic) in the outer Caribbean. The climate is maritime-tropical with temperatures ranging from 63°F (17°C) to 96°F (36°C). The official language is Spanish and English is widely spoken. About 85 per cent of the population are Roman Catholic, the remainder belonging to Protestant denominations. The national flag (proportions 5 by 3) has five alternating red and white horizontal stripes, with a blue triangle containing a white star next to the staff. The capital is San Juan.

### Recent History

Puerto Rico was a Spanish colony for 400 years until 1898 when it was ceded to the U.S.A. American citizenship was granted in 1917 and in 1947 Puerto Rico was given the right to elect its own Governor. In 1952 a Constitution was promulgated by which the island attained the status of a self-governing "Commonwealth" associated with the United States. In a plebiscite held in 1967, 60.5 per cent of voters ratified a continuation of Commonwealth status in preference to independence (0.6 per cent) or incorporation as a State of the United States (39 per cent). Emigration to the United States, once at a high rate in the 1940s and 1950s, has now almost ceased. In the general elections of 1972 the Popular Democratic Party, under the leadership of Rafael Hernández Colón, regained the governorship and legislative control from the New Progressive Party, which had been in power from 1968. In 1975 rising unemployment and the economic recession contributed to an increase in militant nationalism, including terrorist attacks in the United States.

The New Progressive Party regained the governorship and legislative control in 1976, led by Carlos Romero Barcelo. Early in 1977 the outgoing U.S. President, Gerald Ford, called for Puerto Rico to become the 51st U.S. State, but received little support domestically or in Puerto Rico.

### Government

Executive power is vested in a Governor, elected for a four-year term, and a Cabinet of fourteen Secretaries. The Legislature is the bi-cameral Legislative Assembly consisting of the Senate of 27 members and the House of Representatives of 52 members elected for four-year terms. A Resident Commissioner, elected for a four-year term, represents Puerto Rico in the U.S. House of Representatives. Puerto Ricans are citizens of the United States.

### Defence

The United States and Puerto Rico have a common defence policy.

### Economic Affairs

Puerto Rico has very few natural resources, especially of fuels. An intensive government-sponsored programme of industrialization has changed the country's economy from an agricultural to a mixed one. Manufacturing is the main source of income, with textiles, clothing, electrical and electronic equipment, plastics, chemicals, petrochemicals and processed foods as the main products.

In the agricultural sector, the second largest source of income, dairy and livestock product income has overtaken that of sugar, the main crop. Tobacco, coffee and sugar products such as rum and molasses are also important. In 1974 the Government announced its plan for agriculture, including higher credit, assured markets and a minimum price system. The high foreign investment of recent years, encouraged by tax incentives and duty-free access to the U.S.A., has levelled off. The attraction of Puerto Rico to foreign investors as a source of cheap labour declined with the proposed extension of U.S. wage minima to the island. The United States provides the principal market for Puerto Rican imports and exports. Tourism is an important source of revenue.

Puerto Rico is very densely populated and has a persistent unemployment problem, partly alleviated by emigration to the United States. The unemployment rate, which averaged 10 to 12 per cent before 1974, rose in 1975 to 18 per cent and in 1976 to 20 per cent, claimed to represent only half the true rate. At the same time inflation was running at twice the rate of the United States on which its economy is very dependent.

### Transport and Communications

The only railway on Puerto Rico is owned by the sugar corporation. There were over 10,456 miles of roads in 1974. There are 11 ports, the chief ones being San Juan, Ponce and Mayagüez. Internal and international air services are provided by over thirty local American and foreign lines.

### Social Welfare

Puerto Rico is included in the U.S. social security programme and also has a system of its own covering health, accident, disability and unemployment. About 24 per cent of the budget is devoted to social welfare and public health.

### Education

The public education system is centrally administered by the Department of Education. Education is compulsory between the ages of 6 and 16. In the academic year 1975–76 there were 1,964 public day schools with a total of 709,574 pupils and 310 private schools with 102,871 pupils. The 12-year curriculum is subdivided into six grades of elementary school, three years junior high school and three years senior high school. Vocational schools at the high school level and kindergartens also form part of the public education system. Instruction is conducted in Spanish but English is a required subject at all levels. The Department of Education operates an island-wide radio and television educational network. About 30 per cent of the annual budget is devoted to education.

Public higher education policy is formulated by the Council on Higher Education which appoints the President of the University of Puerto Rico and Chancellors for the principal campuses. The State University system consists of four principal campuses and five regional colleges. There are also private universities and colleges.

**Tourism**

There has been a sharp increase in tourism in recent years and it now forms a major source of income ($392.5 million in 1976). Attractions include the mountain scenery in the interior and fine beaches and game fishing in coastal waters. In 1976 1,298,738 people visited the island.

United States laws and regulations apply to foreign visitors to Puerto Rico.

**Sport**

Baseball, basketball, boxing and cockfighting are the most popular sports.

**Public Holidays**

**1977:** May 31st (Memorial Day), July 4th (U.S. Independence Day), July 16th (Birthday of Luis Muñoz Rivera), July 26th (Constitution Day), July 27th (Birthday of José Celso), September 6th (Labour Day), October 12th (Discovery of America), October 25th (Veterans' Day), November 19th (Discovery of Puerto Rico), November 25th (Thanksgiving Day), December 25th (Christmas).

**1978:** January 1st (New Year's Day), January 6th (Epiphany), January 11th (Birthday of Eugenio María de Hostos), February 18th (Birthday of George Washington), March 22nd (Emancipation of the Slaves), March 24th (Good Friday), April 16th (Birthday of José de Diego).

**Weights and Measures**

The United States system is officially in force and some old Spanish weights and measures are used in local commerce.

**Currency and Exchange Rates**

United States currency:
100 cents = 1 U.S. dollar.

Exchange rates (December 1976):
£1 sterling = U.S. $1.66;
U.S. $1 = 60.35 pence.

# THE CONSTITUTION

### RELATIONSHIP WITH THE U.S.A.

On July 3rd, 1950, the United States Congress adopted an Act (Public Law No. 600) which was to allow "the people of Puerto Rico to organize a government pursuant to a constitution of their own adoption". This Act was submitted to the voters of Puerto Rico in a referendum and was accepted in the summer of 1951. A new Constitution was drafted in which Puerto Rico was styled as a commonwealth, or *estado libre asociado*, "a state which is free of superior authority in the management of its own local affairs", though it remained in association with the United States. This Constitution, with its amendments and resolutions, was ratified by the people of Puerto Rico on March 3rd, 1952, and by the Congress of the United States on July 3rd, 1952; and the Commonwealth of Puerto Rico was established on July 25th, 1952.

Under the terms of the political and economic union between the United States and Puerto Rico, United States citizens in Puerto Rico enjoy the same privileges and immunities as if Puerto Rico were a member state of the Union. Puerto Rican citizens are citizens of the United States and may freely enter and leave that country.

The Congress of the United States has no control of, and may not intervene in, the internal affairs of Puerto Rico.

Puerto Rico is exempted from the tax laws of the United States. While it has no representation in the United States Congress, the Puerto Rican Resident Commisioner to the United States, elected for a four-year term, enjoys the privileges of membership, without voting, of the House of Representatives of the United States Congress.

There are no customs duties between the United States and Puerto Rico. Foreign products entering Puerto Rico—with the single exception of coffee, which is subject to customs duty in Puerto Rico, but not in the United States—pay the same customs duties as would be paid on their entry into the United States.

The United States social security system is extended to Puerto Rico except for unemployment insurance provisions. Laws providing for economic co-operation between the Federal Government and the States of the Union for the construction of roads, schools, public health services and similar purposes are extended to Puerto Rico. Such joint programmes are administered by the Commonwealth Government.

Amendments to the Constitution are not subject to approval by the U.S. Congress, provided that they are consistent with the U.S. Federal Constitution, the Federal Relations Act defining federal relations with Puerto Rico, and Public Law No. 600. Subject to these limitations, the Constitution may be amended by a two-thirds vote of the Puerto Rican Legislature and by the subsequent majority approval of the electorate.

The Constitution starts with a definition of democracy and continues with a Bill of Rights.

### BILL OF RIGHTS

No discrimination shall be made on account of race, colour, sex, birth, social origin or condition, or political or religious ideas. Suffrage shall be direct, equal and universal for all over the age of 18. Public property and funds shall not be used to support schools other than State schools. The death penalty shall not exist. The rights of the individual, of the family and of property are guaranteed. The Constitution establishes trial by jury in all cases of felony, as well as the right of *habeas corpus*. Every person is to receive free elementary and secondary education. Social protection is to be afforded to the old, the disabled, the sick and the unemployed.

### THE LEGISLATIVE POWER

The Legislative Assembly consists of two houses, whose members are elected by direct vote for a four-year term. The Senate is composed of 27 members, the House of Representatives of 52 members. Senators must be over 30 years of age, and Representatives over 25 years of age. The Constitution guarantees the minority parties additional representation in the Legislature, which may fluctuate from a quarter to a third of the seats in each house.

The Senate elects a President and the House of Representatives a Speaker from their respective members. The sessions of each house are public. A majority of the total number of members of each house constitutes a quorum. Either house can initiate legislation, though Bills for raising revenue must originate in the House of Representatives. Once passed by both Houses, a Bill is submitted to the Governor, who can either sign it into law or return it, with his reasons for refusal, within ten days. If it is returned, the Houses may pass it again by a two-thirds majority, in which case the Governor must accept it.

The House of Representatives, or the Senate, can impeach one of its members for treason, bribery, other felonies and "misdemeanours involving moral turpitude". A two-thirds majority is necessary before an indictment may be brought. The cases are tried by the Senate. If a representative or senator is declared guilty, he is deprived of his office and becomes punishable by law.

### THE EXECUTIVE

The Governor, who must be at least 35 years of age, is elected by direct suffrage and serves for four years. He is responsible for the execution of laws, is commander-in-chief of the militia, and has the power to proclaim martial law. At the beginning of every regular session of the assembly, in January, he presents a report on the state of the treasury, and on proposed expenditure. To assist him, the Governor chooses his Secretaries of Departments, subject to the approval of the Legislative Assembly. These are led by the Secretary of State, who replaces the Governor at need.

### LOCAL GOVERNMENT

The island is divided into 78 municipal districts for the purposes of local administration. The municipalities comprise not only urban areas but also the surrounding neighbourhood. The are governed by a mayor and a municipal assembly, both elected for a four-year term.

## TRANSPORT

### RAILWAYS

**Ponce and Guayama Railway:** Aguirre, P.R. 00608; owned by the Corporación Azucarera de Puerto Rico; Exec. Dir. Joselo Sanchez Dergan; Gen. Man. C. V. Rodriguez; 96 km.

### ROADS

Paved roads totalled 10,456 miles in 1974. A modern highway system links all cities and towns along the coast and cross-country. In response to the demand for road expansion due to industrial growth, the Highways Authority was created in 1965 to design and build roads, highways and bridges. The annual investment in 1971–72 was $130m.

### SHIPPING

There are ten ports in the island, the principal ones being San Juan, Ponce and Mayagüez. San Juan, one of the finest and longest all-weather natural harbours in the Caribbean, is the principal port of entry for foodstuffs and raw materials and for shipping finished industrial products. Sugar is shipped in bulk mostly through special piers located near production sites. Ocean passenger traffic is limited to tourist cruises since most travel to and from Puerto Rico is made by air.

The Puerto Rico Ports Authority regulates maintenance and use of port facilities, both governmental and private.

# QATAR

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The State of Qatar occupies a peninsula on the west coast of the Arabian Gulf. The climate is exceptionally hot and humid in the summer and mild in the winter. Rainfall is negligible. The official language is Arabic, though English is spoken in business, official and government circles. Almost all the inhabitants are Muslims, the native Qataris being mainly of the Wahhabi sect. The national flag (proportions 30 by 11) is maroon, with a white serrated border at the hoist. The capital is Doha.

### Recent History

Qatar became an independent sovereign state on September 1st, 1971, after being protected since 1916 by treaties and agreements with Britain. In February 1972 the Prime Minister, Sheikh Khalifa bin Hamad al-Thani, deposed his cousin the Amir, Sheikh Ahmad, in a bloodless coup, and has since adopted a policy of wide-ranging social and economic reform.

### Government

Qatar is an absolute monarchy, with full powers vested in the Amir as Head of State. A provisional constitution came into effect in July 1970. Executive power resides in the Council of Ministers, which is appointed by the Head of State, who is also Prime Minister. An advisory Council with 20 nominated members was set up in April 1972, and was expanded to include 30 members in December 1975. Qatar has no parliament or political parties.

### Defence

Armed forces consist of 2,200 men, all under the control of the army, although some units carry out naval and air force roles.

### Economic Affairs

Qatar's economy is dependent on oil, although a policy of industrial diversification is being pursued. Although petroleum was first discovered in the mid-1930s, the first exports were not made until December 1949. At present oil production is carried out by only two companies, the Qatar Petroleum Company Ltd. (QPC), and Shell Company of Qatar, which together produced about 475,000 barrels of crude oil per day in 1976, compared with 440,000 barrels per day in 1975 and 517,000 barrels per day in 1974. Oil revenues in 1974 were estimated at U.S. $1,650 million rising to U.S. $1,700 million in 1975 compared with U.S. $600 million in 1973. A revenue of U.S. $2,000 million is expected for 1976. In 1974 the Government secured a 60 per cent interest in QPC and Shell Qatar, and agreement was reached on extending this to a 100 per cent interest in late 1976. A petrochemicals industry is being developed. Rapid progress is being achieved in implementing plans to develop the country's infrastructure, including a new general hospital, airport building, electricity generation and desalination plants, roads and a variety of government buildings.

### Social Welfare

Free health services are provided to all residents, whether Qatari or non-Qatari, and fixed monthly allowances are paid to widows, divorcees, orphans and the elderly.

### Education

Education is free at all levels and has been expanding at a rapid rate since the inception of a state educational system in 1956. Total school attendance in 1975/76 was over 30,000, and about 800 Qatari students attended foreign colleges and universities.

### Public Holidays

**1977:** July 14th* (Leilat al Meiraj, Ascension of the Prophet), August 16th* (Ramadan begins), September 3rd (National Day), September 15th* (Id ul Fitr, end of Ramadan), November 22nd* (Id ul Adha, Feast of the Sacrifice), December 12th* (Muslim New Year), December 21st* (Ashoura).

**1978:** February 20th (Mouloud, Birth of the Prophet).

* Religious holidays, which are dependent on the Muslim lunar calendar, and may differ from the dates given.

### Weights and Measures

The metric system has been adopted legally, but imperial measures are still used.

### Currency and Exchange Rates

100 dirhams = 1 Qatar riyal.

Exchange rates (December 1976):

£1 sterling = 6.547 riyals;
U.S. $1 = 3.951 riyals.

100 dirhams = 1 Qatar riyal (QR).
Coins: 1, 5, 10, 25 and 50 dirhams.
Notes: 1, 5, 10, 50, 100 and 500 riyals.
Exchange rates (December 1976): £1 sterling = 6.547 riyals; U.S. $1 = 3.951 riyals.
100 Qatar riyals = £15.27 = $25.31.

*Note:* Before June 1966 Qatar's currency was the Persian Gulf Indian rupee, valued at 1s. 6d. sterling (£1 = 13.33 rupees). When the Indian rupee was devalued in June 1966 Qatar adopted Saudi Arabian currency prior to the introduction of the Qatar/Dubai riyal (at par with the old rupee) in September 1966. This new currency was also used in the states of Trucial Oman (now the United Arab Emirates) except Abu Dhabi. The Q/D riyal was valued at 21 U.S. cents ($1 = 4.762 riyals) until August 1971. The riyal's value was 22.8 U.S. cents ($1 = 4.386 riyals) from December 1971 to February 1973; and 25.333 U.S. cents ($1 = 3.947 riyals) from February 1973 to March 1975. In terms of sterling, the value of the Q/D riyal between November 1967 and June 1972 was 1s. 9d. (8.75 new pence), the exchange rate being £1 = 11.429 riyals. When the United Arab Emirates adopted a national currency in May 1973 the Q/D riyal was superseded by the Qatar riyal, with the same value as the old currency. Since March 1975 the Qatar riyal has been linked to the IMF Special Drawing Right (at a mid-point of 1 riyal = 0.21 SDR), whose value is determined by changes in a weighted "basket" of 16 national currencies. For 1975 the average market rate was 1 riyal = 25.44 U.S. cents.

# THE CONSTITUTION

A provisional constitution came into effect in July 1970. Executive power is put in the hands of the Council of Ministers, appointed by the Head of State, and assisted by an Advisory Council of 20 members (increased to 30 in December 1975), whose term was extended for a further three years in May 1975. All fundamental democratic rights are guaranteed. In December 1975 the Advisory Council was granted power to summon individual ministers to answer questions on legislation before promulgation. Previously the Advisory Council was restricted to debating draft bills and regulations before framing recommendations to the Council of Ministers.

# TRANSPORT

## ROADS

There are some 600 miles of surfaced road linking Doha and the oil centres of Dukhan and Umm Said with the northern end of the peninsula. A 65-mile long road from Doha to Salwa was completed in 1970, and joins one leading from Al Hufuf in Saudi Arabia, giving Qatar land access to the Mediterranean. A 260-mile highway, built in conjunction with Abu Dhabi, links both states with the Gulf network. Road construction is a continual process.

## PIPELINES

Oil is transported by pipeline from the oilfield at Dukhan to the loading terminal at Umm Said. Natural gas is brought by pipeline from Dukhan to Doha where it is used as fuel for a power station and water distillation plant.

## SHIPPING

**Qatar National Navigation and Transport Co. Ltd.:** P.O.B. 153, Doha; shipping agents, lighterage contractors, ship chandlers, clearing and forwarding agents at the ports of Qatar.

**Director of Ports:** ALI AL-SAAD, P.O.B. 313, Doha.

*Doha Port:* A four-berth quay costing £10 million was completed in 1970; it is linked with Doha Town by a 3,600-ft. causeway. A further three berths should be completed by mid-1977.

*Umm Said Harbour:* Although accommodating smaller tankers (up to 60,000 d.w.t.) Umm Said still has the country's main oil terminal. A 220,000 ton capacity tank farm is connected by a series of pipelines with QPC's three main gathering stations. A 700 ft. wide jetty is linked to a grain mill and a newly constructed fertilizer plant.

## CIVIL AVIATION

Doha international airport is equipped to receive jumbo jets; its runway was extended to 15,000 ft. in 1970. Plans for a new civil airport, which will have one of the longest runways in the world (14,993 ft.), are under preparation.

Doha is served by the following airlines: Air France, Alia (Jordan), British Airways, EgyptAir, Gulf Air, Iranian Airways, Iraqi Airways, Kuwait Airways, MEA, Pakistan International Airlines, Saudia, Syrian Arab Airlines, TMA, Yemen Airlines.

# RHODESIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

Rhodesia is a land-locked state in southern Africa, with Mozambique to the east, Zambia to the north-west, Botswana to the south-west and South Africa to the south. Climate is tropical, modified considerably by altitude. The official language is English; the main African languages are Sindebele and Chishona. Most of the Africans follow traditional beliefs, while the Asians are almost equally Muslim or Hindu. About 20 per cent of the population are Christian. The official flag has a sky blue background, with the Union Jack in the upper hoist and the Rhodesia badge, consisting of a green shield with a gold pick and a red lion between two thistles. In 1968 the Smith regime adopted a national flag (proportions 2 by 1) with three vertical stripes of green, white and green, with the Rhodesian coat of arms on the central white stripe. The capital is Salisbury.

### Recent History

In 1923 Southern Rhodesia became a British colony with full self-government (except for African interests and some other matters) under an administration controlled by European settlers, a minority within the population, as African voting rights were restricted.

In 1953 the colony was merged with two British protectorates, Northern Rhodesia and Nyasaland (now Zambia and Malawi), to form the Federation of Rhodesia and Nyasaland. A new constitution ending most of the United Kingdom's legal controls (except for foreign affairs), was promulgated in December 1961, after approval by the predominantly European electorate, and made fully operative in November 1962. This constitution, unacceptable to African nationalists, provided for a limited African franchise and could have led to ultimate black majority rule. At elections in December 1962 Sir Edgar Whitehead, Prime Minister since 1958, lost power to the Rhodesian Front (RF), a coalition of white opposition groups committed to maintaining racial segregation. The Front's leader, Winston Field, became Prime Minister. The Federation was dissolved in December 1963 as a result of successful African nationalist movements in the other member countries.

In April 1964 Field resigned, accused of moving too slowly towards independence. He was replaced by his deputy, Ian Smith, who rejected British conditions for independence, including acceptance by the whole Rhodesian population and unimpeded progress to majority rule. At elections in May 1965 the RF won all 50 European seats in the legislature. After more unsuccessful negotiations with the British Government, Smith made a unilateral declaration of independence (UDI) on November 11th, 1965. The British-appointed Governor announced the Cabinet's dismissal but no effective steps were taken to remove it from power. The Smith regime abrogated the 1961 constitution and proclaimed a new one, under which the Governor was replaced by Clifford Dupont, formerly Minister of External Affairs and Defence, as "Acting Officer Administering the Government". The British Government regards Rhodesia's independence as unconstitutional and illegal, and no other country has formally recognized it.

The United Kingdom terminated all trading and other relations with Rhodesia, while the UN applied economic sanctions against the regime. However, through the evasion of sanctions by certain countries, the assistance of South Africa and Portugal and the diversification of the economy, the Smith regime was able to maintain itself in power. A new constitution was approved by referendum in June 1969 and took effect in March 1970, when Rhodesia was declared a republic, with Dupont as the first President. The RF won all 50 European seats in the House of Assembly in 1970 and 1974. President Dupont retired in December 1975 and was succeeded by John Wrathall, previously Deputy Prime Minister.

Attempts to reach a constitutional settlement acceptable to all parties, including Africans, were a failure and sanctions continued to be reinforced. The introduction of more discriminatory legislation was accompanied by increased African nationalist activity. In 1972 a major anti-guerrilla operation was initiated by the regime and numerous officials of the African National Council (ANC) were arrested the following year, against a background of student riots, falling white immigration, the resettlement of thousands of Africans and international isolation.

In 1974, despite the Rhodesian Front's victory at the polls in July, fiercer guerrilla attacks, the impending independence from Portugal of neighbouring Mozambique under black rule in 1975 and cooler relations with South Africa caused a dramatic change in the situation. In December a summit was held in Lusaka between three African Presidents and four nationalist leaders, resulting in agreement for a border ceasefire, conditional on the release of African political detainees and a constitutional conference to be held in 1975. Previously opposing liberation forces agreed to unite under the ANC, led by Bishop Abel Muzorewa.

In August 1975 constitutional talks were held between members of the Rhodesian Government, led by Ian Smith, and a delegation of the ANC led by Bishop Muzorewa, who demanded a promise of majority rule. The meeting was attended by the Zambian President and the South African Prime Minister, who both gave support to *détente*, but no agreement was achieved. In September the ANC split into rival factions, with Joshua Nkomo leading members in Rhodesia favouring a negotiated solution, and Bishop Muzorewa leading those, mainly in exile, advocating liberation through force. Constitutional talks between the Government and the ANC faction led by Nkomo began in December 1975 but broke down in March 1976 because of Ian Smith's refusal to accept immediate majority rule. British proposals for majority rule in 18 months to two years were similarly rejected later in March. Guerrilla attacks intensified after the President of Mozambique, Samora Machel, imposed sanctions and closed the Mozambique border with Rhodesia, also in March, since when South Africa has handled all Rhodesian trade.

In April 1976 the U.S. Secretary of State, Dr. Henry Kissinger, entered lengthy negotiations with the British Government, the Presidents of Botswana, Mozambique, Tanzania and Zambia, the South African Prime Minister and Ian Smith. On September 24th, under pressure from South Africa, Smith announced his Government's acceptance of proposals leading to majority rule within two years.

The British Government convened the Geneva Conference, which opened in October, to implement the transition to majority rule. It was attended by delegations representing the Rhodesian Front, led by Ian Smith, the African nationalists and the British Government, under a British chairman, Ivor Richard. The nationalist delegations were led by Bishop Muzorewa, the Rev. Ndabaningi Sithole, Joshua Nkomo and Robert Mugabe. Nkomo and Mugabe, who claimed the support of the guerrillas, adopted a joint position as the Patriotic Front. Although an independence date of not later than March 31st, 1978, was provisionally agreed, the Conference was adjourned in December after failing to agree on the composition of the interim government.

In January 1977 negotiations resumed with the various parties in Africa, and the Presidents of Botswana, Mozambique, Tanzania and Zambia declared their support for the Patriotic Front. Ian Smith rejected British proposals for an interim administration and received a mandate from the Rhodesian Front to repeal racially-discriminatory laws and to seek agreement with such African factions as he chose.

### Government

Under the 1969 Constitution, legislative power is held by the bicameral Legislative Assembly. The House of Assembly has 66 members, including 50 Europeans elected by non-African voters, eight Africans directly elected by African voters and eight Africans chosen by tribal electoral colleges (Chiefs, headmen and other government-appointed officials). The Senate (with delaying powers only) has 23 members, including 10 Europeans elected by white members of the House, 10 Africans elected by an advisory Council of Chiefs, and three members (of any race) appointed by the President. Members of both houses serve for up to five years. The President is a constitutional Head of State appointed for a five-year term on the nomination of the Executive Council (Cabinet). The Council, which directs the Government, is responsible to the legislature. The President appoints the Prime Minister and, on the latter's recommendation, other Ministers.

### Defence

Of total armed forces of 9,200 in 1976, the army numbered 7,900, including 2,400 conscripts, and the air force 1,300. Military service of 18 months and three years part-time training afterwards is compulsory for White, Coloured, Asian and some Black Rhodesians, and the reserves total 10,000. Para-military police forces number 8,000 active and 35,000 reservist and there is a civil police of 5,000. In 1976 a "War Council", comprising the Prime Minister, the Ministers of Defence, Law and Order and Internal Affairs, the Chiefs of Staff of the Armed Services and certain government officials, was given charge of defence matters.

### Economic Affairs

Rhodesia's minerals include notably gold, asbestos, coal and chrome, but copper and other minerals are mined. Despite sanctions, 1975 was a record year for the mining industry, with output valued at R$169.8 million. The U.S.A. imported more than $30 million worth of "strategic and critical commodities", particularly nickel and chromium in 1973. Nickel has emerged as a major export, and there are now four principal nickel mines operating. Manufactures now surpass mining in importance, particularly food processing, metals, engineering and textiles. The dam on Lake Kariba provides most of the country's electricity.

Tea, maize, potatoes and sugar are the main crops apart from tobacco, which has been severely affected by UN sanctions, and there is much stock-raising. Between 1965 and 1975 agricultural output rose by an estimated 75 per cent, while its value more than doubled. Maize, groundnuts, cotton and Oriental tobacco are the chief crops grown by African farmers, who have rights to half the land area of Rhodesia. In 1974 primary products accounted for over 80 per cent of export revenue.

The wage gap between Europeans and Africans widened considerably between 1965 and 1973 though unemployment decreased. Inflation, which had averaged less than 3.5 per cent per annum since 1964, rose to 8 per cent in 1975. Trade between the United Kingdom and Rhodesia has ceased since UDI and trade with many other countries has been restricted. This has led to considerable diversification of the economy and a search for new outlets. There has been widespread breaking of sanctions, with Rhodesia's mining, agriculture and manufacturing sectors improving and real G.D.P. growing at an annual average rate of 7.2 per cent. The economy, however, began to feel the effects of international recession in 1975, leading to low demand for primary exports, declining export prices, decreased industrial output and a strained balance of payments position.

The high cost of the guerrilla campaign was exacerbated in 1976. The closure of the Mozambique border left Rhodesia totally dependent on South Africa for its trade. Extended periods of military service reduced the skilled labour force and white emigration exceeded immigration by over 6,000 in 1976. The spread of the guerrilla campaign throughout most of the country hampered communications and reduced the numbers of tourists by over 35 per cent. Defence expenditure accounted for 23 per cent of the record 1976/77 budget, which forecast a deficit of R$21.5 million.

### Transport and Communications

The closure of the Mozambique border in March 1976 made Rhodesia totally dependent for its trade on South Africa, to which it is linked by two rail services. Major trunk roads are of high standard, but in many areas the threat of guerrilla attack has caused the introduction of protected convoys travelling by day. International and domestic air services connect most of the larger towns. There are also numerous charter and private aircraft used by mining companies, farmers and others. Over R$23 million is to be spent from 1973 to 1977 on roads and bridges, particularly in areas subjected to guerrilla attack. A large thermal power station costing an estimated R$250 million is to be built at Wankie.

### Social Welfare

There is no statutory provision for social security, though government and industrial schemes exist. The Social Welfare Department deals with child welfare and delinquency for all races. For Whites, the Department also deals with marriage guidance, alcoholics, care of the aged, and relief of distress.

### Education

Estimated expenditure for 1975/76 for African education was R$34.4m., for non-African R$31.1m. There were 848,533 African pupils in 1975 and 59,822 non-Africans in primary and secondary schools. The University College of Rhodesia at Salisbury provides multi-racial higher education and in 1976 enrolment of students totalled 1,167.

### Tourism

The principal tourist attractions are the Victoria Falls, the Kariba Dam and the Wankie Game Reserve and National Park. Zimbabwe Ruins near Fort Victoria and World's View in the Matopos Hills are of special interest. In the Eastern Districts around Umtali there is trout fishing and climbing. Safaris and game-watching holidays can be arranged. In 1975 there was a fall of over 35 per cent in the number of tourists visiting Rhodesia.

### Sport

The climate is suitable for almost every form of sport. Football, cricket, tennis, golf, baseball, swimming, athletics and horse-racing are catered for, and gliding, yachting, camping and game hunting are also popular.

### Public Holidays

**1977:** May 30th (Whit Monday), July 11th–12th (Rhodes' and Founders' Day), September 12th (Pioneers' Day), October 24th, November 11th (Independence Day), December 25th–26th (Christmas and Boxing Day).

**1978:** January 1st (New Year's Day), March 24th–27th (Easter).

### Weights and Measures

The imperial system is in use.

### Currency and Exchange Rates

100 cents = 1 Rhodesian dollar (R$).

Unofficial exchange rates (December 1976):

£1 sterling = R$ 1.022;
U.S. $1 = 61.7 Rhodesian cents.

## FINANCE

100 cents = 1 Rhodesian dollar (R$).
Coins: ½, 1, 2½, 5, 10, 20 and 25 cents.
Notes: 1, 2, 5 and 10 dollars.

Unofficial exchange rates (December 1976): £1 sterling = R$1.022; U.S. $1 = 61.7 Rhodesian cents.
R$100 = £97.86 = U.S. $162.15.

*Note:* The Rhodesian dollar (R$) was introduced in February 1970, replacing the Rhodesian pound (R£) at the rate of R£1 = R$2. From September 1949 the value of the Rhodesian pound was U.S. $2.80, so the initial value of the Rhodesian dollar was U.S. $1.40 (U.S. $1 = 71.43 Rhodesian cents). This valuation remained in effect until August 1971. Between December 1971 and February 1973 the Rhodesian dollar was valued at U.S. $1.52 (U.S. $1 = 65.79 Rhodesian cents). In February 1973 the Rhodesian dollar's value was fixed at U.S. $1.6889 (U.S. $1 = 59.21 Rhodesian cents) but this was subsequently adjusted. In September 1975 the median rate was fixed at R$1 = U.S. $1.60 but this was later revised. In terms of sterling, the exchange rate between February 1970 and June 1972 was R$1 = 11s. 8d. or 58.33 p (£1 = R$1.714). Where data for 1970 or earlier have been converted into Rhodesian dollars, this exchange rate for sterling is effective from November 1967.

# THE CONSTITUTION

(*November* 1969)

New constitutional proposals were endorsed by a referendum of the predominantly white electorate in June 1969, the constitution was promulgated in November 1969 and came into force in March 1970.

There is a President in and over Rhodesia, who is Commander-in-Chief of the Armed Forces of Rhodesia. The term of office is five years, and a second term is permissible but not a third.

Legislative power is vested in a legislature consisting of the President and Parliament, and Parliament consists of a Senate and a House of Assembly. Members of both Houses serve a maximum term of five years.

The Senate comprises 23 members, ten Europeans elected by the European members of the House of Assembly, and ten African chiefs, elected by an electoral college consisting of members of the Council of Chiefs. Five of these African Senators shall be chiefs in Matabeleland and five chiefs in Mashonaland.

The remaining three Senators are appointed by the President.

The House of Assembly initially consists of 66 members, 50 Europeans, elected by voters on the European roll, and 16 African members. Half of these, four from Mashonaland and four from Matabeleland, are elected by Africans on an African voters roll, the other half, again drawn equally from Matabeleland and Mashonaland are elected by electoral colleges made up from African chiefs, headmen and councillors from African councils.

When the aggregate of income tax assessed on the income of Africans exceeds sixteen sixty-sixths of that assessed on the income of Europeans and Africans then the number of African members in the House of Assembly will increase in proportion but only until the number of African members equals that of the European members.

To advise the President there is an Executive Council, consisting of the Prime Minister and other such persons, being Ministers as the President, on the advice of the Prime Minister may appoint. In 1976 the constitution was amended to allow the Prime Minister to appoint Ministers who are not members of the House of Assembly.

The President appoints as Prime Minister the person, who, in his opinion, is best able to command the support of a majority of the members of the House of Assembly and acting on the advice of the Prime Minister, he appoints other Ministers.

### LAND TENURE ACT

The Act regulates the ownership, leasing and occupation of land in all areas on racial grounds and preserves the special status of the Tribal Trust Land within the African area.

The total extent of Rhodesia is approximately 96.5 million acres divided as follows: European Area 44.95 million acres, African Area 44.95 million acres, National Area—reserved for the purpose of Wild Life Conservation and National Parks—6.6 million acres.

Exchange of land between one area and the other are controlled by two Boards of Trustees, one of which watches over the interests of Europeans and the other the interests of Africans.

## SENATE

The Senate has 23 members: 10 Europeans elected by white members of the House of Assembly; 10 Africans elected by the advisory Council of Chiefs; and three members (of any race) appointed by the President.

# POLITICAL PARTIES*

**Rhodesian Front:** P.O.B. 242, Salisbury; governing party with 50 seats (1974); aims to maintain Rhodesia's independence; Pres. IAN D. SMITH; Chair. DESMOND FROST.

**African National Council (ANC):** Salisbury; f. March 1972, after originally having been formed in December 1971 as an *ad hoc* organization to campaign for the rejection of the Anglo-Rhodesian settlement proposals; provided a platform for the integration of separate African nationalist movements in 1974; split in September 1975; Pres. Bishop ABEL MUZOREWA; Vice-Pres. ELLIOT GABELLA; Sec.-Gen. Dr. GORDON CHAVUNDUKA; Leader of ZAPU faction JOSHUA NKOMO.

**Centre Party:** Savoy House, Inez Terrace, Salisbury; f. 1968; multi-racial and withdrew support for the Anglo-Rhodesian settlement proposals when the Rhodesian Front enacted new discriminatory legislation; Pres. PAT BASHFORD.

**National Association of Coloured People:** Chair. GERRY RAFTOPOULOS.

**National Pledge Association:** f. May 1976; opposes racial discrimination; Chair. Mr. STUMBLES; Sec. BERNARD WHALEY.

**Patriotic Front:** f. October 1976 by JOSHUA NKOMO and ROBERT MUGABE, who remain leaders of ZAPU and ZANU respectively, to adopt a joint negotiating position during the independence negotiations; received the support of the Presidents of Mozambique, Tanzania, Zambia and Botswana in January 1977.

**Rhodesia Party:** f. 1972; supports qualified franchise, the Common Roll and "responsible" government; opposes Rhodesian Front policies, particularly on control of the media and racially discriminative laws; proposes a five-year transitional period leading to majority rule; Chair. R. A. ANDERSON; Pres. TIMOTHY GIBBS.

**Southern Africa Solidarity Conference (SASCON):** opposes majority rule and seeks closer links between Rhodesia and South Africa.

**United Front Against Surrender:** Salisbury; f. February 1972; supports "overriding principle that the white man's position must be supreme for all time".

**United Conservative Party:** f. 1975; right-wing; proposes system of separate legislatures for Africans and Whites; Leader WILLIAM HARPER.

**Zimbabwe African People's Union (ZAPU):** f. 1961; African nationalist party advocating universal adult suffrage; Leader JOSHUA NKOMO; Chair. (vacant); Sec.-Gen. JOSHUA CHINAMANO; banned September 1962; now operating from Mozambique and Zambia.

**Zimbabwe African National Union (ZANU):** f. 1963 after split in ZAPU; African nationalist; Leader ROBERT MUGABE, although this is disputed by the President, the Rev. NDABANINGI SITHOLE; based in Mozambique and Zambia.

**Zimbabwe Reformed African National Council:** f. 1976; Chair. Rev. THOMPSON TIRIVAVI.

**Zimbabwe United People's Organization (ZUPO):** f. December 1976; advocates majority rule, but not universal adult suffrage; Leader Senator Chief JEREMIAH S. CHIRAU; Deputy Leader Senator Chief KAYISA NDIWENI.

* Under the agreement reached at the Lusaka Summit in December, 1974, the leaders of ZAPU, ZANU, FROLIZI and the ANC agreed to work together to achieve majority rule in Rhodesia. They united under the ANC with Bishop Muzorewa as President. In September 1975 a separate wing of the ANC was formed by Joshua Nkomo following internal disputes. The Rev. Ndabaningi Sithole withdrew his faction of ZANU from the ANC in September 1976. In January 1977 the Centre Party, the National Pledge Association and the Rhodesia Party agreed to form an umbrella organization, The National Unifying Force, to urge the necessity for a settlement of the constitutional problem based on majority rule.

# DIPLOMATIC REPRESENTATION

No country has yet recognized Rhodesia. South Africa has an accredited Diplomatic Mission in Salisbury.

# JUDICIAL SYSTEM

The legal system is Roman-Dutch, based on the system which was in force in the Cape at the time of the occupation. Cape Ordinances form the basis of much of the early legislation.

The High Court has two Divisions, General and Appellate. The Appellate Division is the final Court of Appeal under the 1969 Constitution. It consists of the Chief Justice, the Judge President, and a Judge of Appeal.

The General Division comprises the Chief Justice and puisne judges. Below the High Court are Regional Magistrates' Courts with criminal jurisdiction only and Magistrates' Courts with both civil and criminal jurisdiction.

In April 1976, a number of special criminal courts were established to try cases arising from the guerrilla campaign. Citizens may be detained, without right of appeal to the courts, for up to 30 days on the authority of any police officer and indefinitely on the authority of the Minister of Justice, Law and Order.

**Chief Justice:** Rt. Hon. Sir Hugh Beadle, P.C., C.M.G., O.B.E.

**Judge President:** Mr. Justice H. N. Macdonald.

**Judge of Appeal:** Mr. Justice J. V. R. Lewis.

Trunk lines run from Bulawayo south through Botswana to the border with the Republic of South Africa, connecting with the South African Railways; north-west to the Victoria Falls, where there is a connection with Zambia Railways though since January 1973 the border with Zambia has been closed to all rail traffic; and north-east to Salisbury and Umtali connecting with the Mozambique Railways' line from Beira. From a point near Gwelo, a line runs to the south-east, making a connection with the Mozambique Railways' Limpopo line and with the port of Maputo (formerly Lourenço Marques). The present lines total 3,394 km. Owing to political developments in Mozambique the construction of Rhodesia's R$6m. rail link with South Africa from Rutenga to Beit Bridge was accelerated and completed in 1974. Rail links with Mozambique were severed following the closure of the border in March 1976.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Rwandese Republic is a landlocked state in central Africa just south of the equator, bounded by Zaire to the west, Uganda to the north, Tanzania to the east and Burundi to the south. The climate is tropical with an average temperature of 18°C (64°F). French and Kinyarwanda, the native language, are both in official use. About half the population follow animist beliefs, most of the remainder being Roman Catholic. There are Protestant and Muslim minorities. The national flag (proportions 3 by 2) has three vertical stripes of red, yellow and green, the yellow band bearing a black letter R. The capital is Kigali.

### Recent History

Rwanda was formerly part of the Belgian-administered Trust Territory of Ruanda-Urundi. Tribal dissensions have long been rife and in 1959 led to serious disturbances and the establishment of a state of emergency. In 1961 it was decided by referendum to abolish the monarchy and set up a republic. Internal autonomy was granted in 1961 and full independence followed in 1962. Tribal strife broke out again in December 1963 and large-scale killings (estimated at 20,000) were carried out by the Hutu against their former overlords the Tutsi. During 1964–65 large numbers of displaced Rwandans were resettled in neighbouring countries. President Kayibanda was re-elected in 1969 for a third four-year term, and all 47 seats in the Assembly were retained by the governing party, the *Mouvement démocratique républicain* (also known as *Parmehutu*).

At the end of 1972 tribal tension between Hutu and Tutsi flared up again and continued throughout February 1973. In July 1973 the Minister of Defence and head of the National Guard, Maj.-Gen. Juvénal Habyalimana, led a bloodless coup, announced the Second Republic and set up a military administration known as the Committee for National Peace and Unity. This ruled until August, when a new cabinet, with Maj.-Gen. Habyalimana as President, was formed. The normal legislative processes were held in abeyance and all political activity was banned until July 1975, when a new ruling party, the National Revolutionary Movement for Development (MRND), was formed. The party was designed to embrace both civilian and military sectors and its establishment was preceded by an extensive cabinet reshuffle in which several military ministers were replaced by civilians. Elections of party officials at both commune and prefecture levels took place in 1976 and the first national congress was held in January 1976.

### Government

Rwanda has been under military rule since July 1973. Executive power is exercised by the President, assisted by an appointed Council of Ministers. The country is divided into 10 Prefectures and subdivided into 143 communes or municipalities, each administered by a governor appointed by the President and assisted by an elected council of local inhabitants.

### Defence

Total armed forces number 3,750 and all services form part of the army. There is an air-force division of 150 men.

### Economic Affairs

The economy is predominantly agricultural, mainly at subsistence level, and development is hampered by the high population density and Rwanda's great distance from the sea. Irregular rainfall in 1974 and 1975 caused a fall in agricultural production and contributed to general stagnation of the economy and a steep rise in the rate of inflation. The principal cash crops are coffee, tea, cotton and pyrethrum, of which the most important is coffee, accounting for over 50 per cent of export earnings in 1974. An ambitious programme to expand tea production began in 1970 and by 1974 had achieved an increase in production of 175 per cent. Hides and skins are also exported.

Minerals, particularly cassiterite (tin ore), are the main export after coffee. There are also reserves of tungsten, gold, tantalite and beryl, and work has begun on the exploitation of natural gas reserves. Industry is still in its infancy. Aside from the processing of foodstuffs there are small textile, brewing, chemical and engineering interests, but development of these is very slow.

Rwanda's main trading partners are neighbouring African states, Belgium and other EEC countries, Iran, Japan and the U.S.A. In 1974 55 per cent of imports came from Europe. Eighty per cent of Rwandan exports and 75 per cent of imports are carried via Uganda and the temporary closure of the border in 1976 severely disrupted trade. Rwanda receives aid from the EEC, of which it is an associate member, and from several western and communist countries and the Arab League. In 1975 a trade and co-operation agreement with Yugoslavia was signed and in September 1976 Rwanda established, with Burundi and Zaire, the Economic Community of the Great Lakes (CEPGL).

### Transport and Communication

There are no railways. A programme of asphalting main roads is being undertaken with foreign aid and there are highways linking Rwanda with Burundi, Tanzania and Kenya. In 1974 there were 6,500 km. of roads, of which 2,200 km. were main roads. The rivers are not navigable but there is traffic on Lake Kivu. There are seven airfields and two international airports, at Kigali and Kamembe. Regular flights are made between Rwanda and Bujumbura (Burundi), Cairo, Addis Ababa, Paris and Brussels.

### Social Welfare

State schemes cover family allowances, accidents and pensions. The Government-assisted Native Welfare Fund provides community centres and medical services. Religious missions also provide socio-medical services. The ratio of physicians to population in 1973 was 1 to 52,763.

### Education

Primary education is free and compulsory for children aged 7–11. Schools are run by the State and by Missions but provide education for only 55 per cent of children. In 1975/76 there were 425,000 pupils enrolled at primary schools, 10,500 at secondary schools and 1,160 at tertiary level. There is a university at Butare and several other institutions of higher education, but a number of students go to universities abroad. An ambitious scheme to extend primary education has been launched with World Bank support.

### Tourism

Tourism is developing slowly. Attractions include national parks, Lake Kivu and fine mountain scenery.

### Sport

Football is the most popular sport.

### Public Holidays

**1977:** May 1st (Labour Day), May 30th (Whit Monday), July 1st (National Holiday), July 5th (National Peace and Unity Day), August 15th (Assumption), September 25th (Kamparampaka Day), October 26th (Armed Forces Day), November 1st (All Saints' Day), December 25th (Christmas).

**1978:** January 1st (New Year), January 28th (Democracy Day), March 27th (Easter Monday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes = 1 Rwanda franc.

Exchange rates (December 1976):

£1 sterling = 153.84 Rwanda francs;
U.S. $1 = 92.84 Rwanda francs.

### FINANCE

100 centimes=1 franc rwandais (Rwanda franc).
Coins: 50 centimes; 1, 2, 5 and 10 francs.
Notes: 20, 50, 100, 500 and 1,000 francs.
Exchange rates (December 1976): £1 sterling=153.84 Rwanda francs;
U.S. $1=92.84 Rwanda francs.
1,000 Rwanda francs=£6.50=$10.77.

*Note:* The Rwanda franc was introduced in May 1964, replacing (at par) the Rwanda-Burundi franc, valued at 2 U.S. cents ($1=50.000 RB francs). This remained the official exchange rate (with a free rate of $1=112 Rwanda francs) until April 1966, when the currency was devalued by 50 per cent. The new par value of the Rwanda franc, fixed at 1 U.S. cent ($1=100 francs), remained in effect until August 1971. From December 1971 to February 1973 the Rwanda franc was valued at 1.08571 U.S. cents ($1=92.105 francs). Between February 1973 and January 1974 the Rwanda franc's value was officially 1.20635 U.S. cents ($1=82.895 francs), although trade transactions during this period were valued at the previous exchange rate. Since January 1974 the Rwanda franc has been valued at 1.0771 U.S. cents ($1=92.842 francs). In terms of sterling, the value of the Rwanda franc between November 1967 and June 1972 was 1d. or 0.4167p (£1=240 Rwanda francs).

# THE CONSTITUTION

(*promulgated November* 1962)

**The Republic.** Rwanda is a democratic, social and sovereign State. There is equality among citizens, who exercise national rights through their representatives.

**Civil Rights.** Fundamental liberties as defined in the Declaration of Human rights are guaranteed.

**The Executive.** Executive power is exercised by the President and his Ministers. (The President is elected for four years by direct universal suffrage and may be re-elected). (This article of the Constitution is in temporary suspension following the military *coup* of July 1973). The President, who nominates and dismisses Ministers, presides over the Council of Ministers; negotiates and terminates all treaties; promulgates laws; may suspend but not dissolve the National Assembly; exercises the prerogative of mercy; and is the Commander-in-Chief of the Armed Forces.

**Legislative power.** Exercised jointly by the National Assembly and the President. The National Assembly, which is elected by universal direct suffrage, votes laws and the budget. (This section of the Constitution is in temporary suspension as a result of the military *coup*).

**The Judiciary.** The Supreme Court has sole jurisdiction over penal matters affecting the President, Ministers and certain individuals as designated by the President (this section of the Constitution was changed following the military *coup*).

**Revision of the Constitution.** Both the President and the National Assembly may initiate Constitutional reforms.

# SÃO TOMÉ AND PRÍNCIPE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Democratic Republic of São Tomé and Príncipe lies in the Gulf of Guinea off the west coast of Africa. There are two main islands, São Tomé and Príncipe, and the rocky islets of Pedras Tinhosas and Rolas. The climate is warm and humid with an average yearly temperature of 80°F. Portuguese is the official language and native dialects are widely spoken. The major Christian denomination is Roman Catholicism. The national flag consists of horizontal green, yellow and green stripes, with a red triangle at the hoist and two five-pointed black stars on the yellow stripe. The capital is the town of São Tomé.

### Recent History

A former colony, São Tomé and Príncipe became an overseas province of Portugal in 1951 and received local autonomy in 1973. A nationalist group, the Committee for the Liberation of São Tomé and Príncipe (CLSTP), was formed in 1960 and became the Movement for the Liberation of São Tomé and Príncipe (MLSTP) in 1972, under the leadership of Dr. Manuel Pinto da Costa. Based in Libreville, Gabon, the MLSTP was recognized by the Organization of African Unity in 1973. The movement carried out underground activity, mainly in the form of protests by African workers against low wages. After the military *coup* in Portugal in April 1974, Portugal recognized the right of the islands to independence but negotiations did not take place until November 1974. Portugal then recognized the MLSTP as the sole representative of the people and it was agreed that the islands should become independent in July 1975. In the meantime the country was administered by a transitional government composed of MLSTP members and a Portuguese High Commissioner. In March 1975 over 40 radical members of the MLSTP, led by two ministers, were expelled from the movement for deviation from the MLSTP's political line. On July 12th the country became independent, with Dr. Manuel Pinto da Costa as its first President, and in December 1975 a People's Assembly was elected. The Government is following a policy of non-alignment and is laying emphasis on agrarian and social reforms. The Government has banned overflying by airliners going to or from South Africa. São Tomé and Príncipe is a member of the OAU.

### Government

The 1975 constitution proclaimed the MLSTP as the leading political force of the nation. The supreme organ of state is the People's Assembly, a legislative body of 33 members (mainly MLSTP officials) who hold office for four years. Executive power is held by the President and the Government he appoints. The President is elected for four years by the People's Assembly on the proposal of the MLSTP.

### Defence

Since independence the Republic has had control over its armed forces and the President is the Supreme Commander of the Armed Forces.

### Economic Affairs

The economy is based on the export crops of cocoa, copra, palm kernels, bananas, coffee and coconuts. Cocoa production reached its peak at the beginning of the century when São Tomé and Príncipe were one of the world's main producers. Production subsequently fell to about 10,000 tons per year due to poor soil, archaic techniques, disease and labour problems. Output dropped further in 1974 and 1975 as plantation owners left the country and the plantation workers failed to plant new crops. The exclusive production of export commodities has forced São Tomé to import nearly all its food. The high concentration of land ownership and the failure to diversify agriculture has caused widespread malnutrition.

There is virtually no manufacturing industry except small soap, soft drinks and processing factories. A British company has the rights to prospect for oil and gas but, although preliminary surveys have been encouraging, no decision has yet been taken to begin production. A Portuguese mission is studying the prospects for developing a fishing and fish-processing industry. Due to the fall-off in cocoa production and the return of 10,000 refugees there is an estimated 20 per cent unemployment rate.

The Government's main objectives are the nationalization of all large plantations previously owned by Portuguese absentee landlords; sweeping agrarian reforms to reduce the country's dependence on imported food and incentives to encourage foreign capital to establish small-scale industries and to develop tourism.

### Transport and Communications

There are no railways. In 1973 there were 287 km. of roads. São Tomé airport has regular services to Príncipe, Angola and Brazil.

### Education

Primary education is compulsory for children over six years of age. There is a government secondary school and a technical school on São Tomé. Any improvement in educational standards is hampered by the lack of facilities.

### Tourism

São Tomé is a port of call for some cruise liners.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rate

100 centavos = 1 escudo.

Exchange rates (December 1976):
£1 sterling = 52.45 escudos;
U.S. $1 = 31.535 escudos.

# THE CONSTITUTION

The constitution was approved by the People's Assembly on December 12th, 1975.

## GENERAL PRINCIPLES

The Democratic Republic of São Tomé and Príncipe is a sovereign, independent, unitary and democratic state. There shall be complete separation between Church and State. The MLSTP (Movimento de Libertação de São Tomé e Príncipe) is the leading political force of the nation and shall encourage the creation and development of people's organizations in order to guarantee the people's active participation in the political development of the country.

It is the aim of the State to destroy the colonial economic structure and all injustices in order to improve the standard of living and general wellbeing of the people. All land and natural resources in the soil or subsoil, the territorial water and the shelf around the Islands, belong to the State. The State shall promote economic planning and shall be the dominant sector in the national economy. Private property shall be allowed as long as it does not impair the general interests of the State. Authorized foreign investment shall be permitted. It shall be the duty of the armed forces to defend the nation and to participate in the reconstruction of the nation.

## RIGHTS, FREEDOMS AND DUTIES

The State guarantees to uphold the principles of the Universal Declaration of Human Rights. Every citizen has the duty to defend the State and to take part in military service. All citizens are equal before the law. Men and women have equal rights and duties. All citizens over the age of eighteen have the right to vote and be elected. Work is the basic right and duty of every citizen. The State guarantees to help all citizens in the case of illness or old age. The Constitution guarantees freedom of expression, thought, meeting, association, demonstration and religion, and the right not to be detained, arrested or condemned other than according to the law in force and also the right to inviolability of domicile and correspondence.

## LEGISLATURE

### People's Assembly

The People's Assembly is the supreme organ of the State. It comprises the Political Bureau of the MLSTP, the Government, 13 representatives of the Area Committees, 2 representatives of the Women's Organization, 2 representatives of the Youth Organization and 5 suitable citizens. The MLSTP chooses the candidates.

The Assembly is elected for four years and meets in ordinary session twice a year. It may meet in extraordinary session on the proposal of the President, the Council of Ministers or of two-thirds of its members. The Assembly elects its own President. In the period between ordinary sessions of the Assembly its functions are assumed by a Permanent Commission elected from among its members.

A member can be dismissed on the proposal of the MLSTP or two-thirds of the members of the Assembly. Members enjoy the usual parliamentary immunity. It is the duty of the Assembly to discuss internal and external policy and to control such policy as defined by the MLSTP. It may amend or overrule any policies adopted by other organs of State if they are contrary to MLSTP policy. The Assembly elects and dismisses the President of the Republic on the proposal of the MLSTP. It may delegate legislative power to the Council of Ministers. Any legislative decisions made by the Council of Ministers must be ratified by the Assembly.

### Permanent Commission

The Permanent Commission comprises three members of the Political Bureau of the MLSTP, two members of the Government, three representatives of the Area Committees, one representative of the Women's Organization and one representative of the Youth Organization and one suitable citizen. The Commission is responsible to the Assembly and all decisions taken by it must be ratified by the Assembly.

## HEAD OF STATE

The Head of State is the President of the Republic and is elected for a period of four years by the People's Assembly on the proposal of the MLSTP. He is the Supreme Commander of the Armed Forces and has the following functions:

to supervise the observance of the Constitution, to represent the State in international affairs, to conclude agreements and ratify international treaties, to convene the People's Assembly, to promulgate laws, decrees and decree-laws, to create Ministries and define their function, to direct the activities of the Council of Ministers and preside over its sessions, to appoint and dismiss members of the Government, to receive the credentials of foreign ambassadors, to appoint and dismiss São Tomé's diplomatic representatives, to grant amnesties and pardons and to declare a state of emergency.

The President is responsible before the People's Assembly. In the case of the President's death, permanent incapacity or resignation, his functions shall be assumed by the President of the People's Assembly until a new President is elected.

## GOVERNMENT

The Government comprises the President of the Republic and the Ministers. It has executive power, and is responsible before the People's Assembly through the President of the Republic.

## JUDICIARY

Judicial power is exercised by the Supreme Court and all other competent tribunals and courts. The Supreme Court is the supreme judicial authority and is only accountable to the People's Assembly. Its members are appointed by the Assembly on the proposal of the MLSTP. The right to a defence is guaranteed.

## CONSTITUTIONAL REVISION

The Constitution may be revised only by the People's Assembly on the proposal of at least one-third of its members. Any amendment must be approved by a two-thirds majority of the Assembly.

# SAUDI ARABIA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Saudi Arabia occupies about four-fifths of the Arabian peninsula, with the Yemen Arab Republic and the Red Sea to the west and the Persian Gulf and the United Arab Emirates to the east. Jordan, Iraq and Kuwait are to the north and Oman and the People's Democratic Republic of Yemen to the south. Much of the country is desert. In summer temperatures range from 38° to 49°C (100°–120°F) in coastal regions and humidity is high. Temperatures sometimes reach 54°C (130°F) in the interior. Winters are mild, except in the mountains. The language is Arabic. The great majority of the population are Sunni Muslims, and in the Najd there is a preponderance of members of the Wahhabi sect. The national flag (proportions 3 by 2) is green and bears, in white, an Arabic inscription ("There is no God but God and Muhammad is the prophet of God") above a white sword. The royal capital is Riyadh and the administrative capital is Jeddah.

### Recent History

Saudi Arabia has been a member of the Arab League since 1945. King Saud ibn Abdul Aziz succeeded his father in 1953 but in 1964 full executive powers passed into the hands of Crown Prince Faisal, the Prime Minister since 1962. In November 1964 the Council of Ministers asked King Saud to resign in favour of his brother. King Faisal continued in the office of Prime Minister, and ruled the country directly through the Council of Ministers. During 1973 Faisal became increasingly more militant in the Arab cause, and in October the Saudi Government reduced oil production by 10 per cent, at one time reaching a peak of more than 30 per cent, and placed an embargo on the export of oil to the U.S.A. between October 1973 and March 1974. During 1974 Saudi Arabia was one of the leading advocates of reduced oil prices, although generally falling in line with decisions of the Organization of Petroleum Exporting Countries (OPEC). In December 1976, however, Saudi Arabia and the United Arab Emirates raised their oil prices by only 5 per cent, while the remaining OPEC countries agreed on a 10 per cent rise, followed by a further 5 per cent in mid-1977.

In March 1975 King Faisal was assassinated by a nephew and was succeeded by his brother Khalid, but no drastic change of policy resulted.

### Government

Saudi Arabia is an absolute monarchy, with no parliament or political parties. Constitutionally, the King rules in accordance with the *Sharia*, the sacred law of Islam. He appoints and leads a Council of Ministers, which serves as the instrument of royal authority in both legislative and executive matters. Decisions of the Council are reached by majority vote but require royal sanction. The principal administrative divisions are Najd, Hijaz, 'Asir, Najran, and Eastern Province.

### Defence

In 1976 military forces numbered 51,500: army 40,000, air force 10,000, navy 1,500. Military service is voluntary. There is a 20,000-man National Guard and a 6,500-man Frontier Force and Coastguard. Defence expenditure for 1975/76 is estimated at 23,700 million Saudi riyals.

### Economic Affairs

Saudi Arabia was the largest producer of crude petroleum in the Middle East and the second largest in the world in 1976. It is also the world's leading oil exporter. Average daily production of crude oil during 1974 was 8.35 million barrels. During 1975 output averaged 6.97 million barrels per day, a 16.6 per cent drop compared with 1974, but returned to the level of 8.4 million barrels per day in 1976. The huge oil revenues have encouraged Saudi Arabia to embark on a Five-Year Plan whose total expenditure in the period 1975–80 will be 498,000 million riyals. Port congestion and manpower shortages have meant that some of the Plan's projects will be delayed.

Saudia Arabia has been acquiring increasing control of its oil industry. In June 1974 an interim agreement was reached whereby the Saudi Government acquired a 60 per cent interest in ARAMCO. Agreement on a 100 per cent takeover of ARAMCO has been reached in principle, but remains to be finalized. A petrochemicals complex and harbour is to be built at Jubail, and numerous other projects are planned.

Apart from oil the chief activity is agriculture. The principal products are dates, wheat, barley, fruit, hides and wool. Camels, horses, donkeys and sheep are raised. Another source of revenue is the income from religious pilgrims, who come from all parts of the Muslim world to the holy cities of Mecca and Medina. Much attention is being given to underground water resources and to desalination projects.

### Transport and Communications

There is a railway from Dammam on the Persian Gulf to Riyadh via Dharan, Hofuf and al-Kharj. Under the 1975–80 Plan some 13,000 km. of paved roads will be added to the existing network, bringing the total to over 24,000 km. by 1980. Saudia (Saudi Arabian Airlines) operate internal and external air services. The principal ports are Jeddah, on the Red Sea, and Ras Tanura and Dammam, on the Gulf.

### Social Welfare

Oil revenues have enabled the Saudi Arabian government to provide free medicine and medical care for all citizens and foreign residents. A far reaching Labour Act and Social Security Ordinance were passed in 1969. In 1975 the country had more than 9,200 hospital beds and more than 2,200 doctors. The King Faisal Medical City, on the outskirts of Riyadh, is claimed to be the most technically advanced unit in the world.

### Education

Elementary, secondary and higher education is free but not compulsory. Under the current five-year plan the number of Saudi children attending schools is expected to rise from 760,000 in 1975 to 1,300,000 in 1980. Enrolment at universities is expected to rise from 15,600 in 1975 to 53,000 by 1980.

### Tourism

All devout Muslims try to pay at least one visit to the holy cities of Medina, the burial place of Muhammad, and Mecca, his birthplace. More than 719,000 pilgrims visited Saudi Arabia in the Muslim year 1396 (1976).

*Visas* are not required for visits to Saudi Arabia by nationals of Kuwait.

### Sport

The main sports are football, bicycle racing, hawking and horse-riding.

### Public Holidays

Government offices work a five-day week, Thursday and Friday being the two rest-days.

**1977:** September 12th and subsequent six to eight days (Id ul Fitr, end of Ramadan), November 19th and subsequent five days (Id ul Adha, Feast of the Sacrifice), December 12th (Muslim New Year).

**1978:** February 20th (Mouloud, Birth of the Prophet).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 halalah=20 qursh=1 Saudi riyal.

Exchange rates (December 1976):

£1 sterling=5.85 Saudi riyals;
U.S. $1=3.53 Saudi riyals.

### SAUDI ARABIA-IRAQ NEUTRAL ZONE

The Najdi (Saudi Arabian) frontier with Iraq was defined in the Treaty of Mohammara in May 1922. Later a Neutral Zone of 7,000 sq. km. was established adjacent to the western tip of the Kuwait frontier. No military or permanent buildings were to be erected in the zone and the nomads of both countries were to have unimpeded access to its pastures and wells. A further agreement concerning the administration of this zone was signed between Iraq and Saudi Arabia in May 1938. In July 1975 Iraq and Saudi Arabia signed an agreement providing for an equal division of the diamond-shaped zone between the two countries, with the border following a straight line through the zone.

### SAUDI ARABIA-KUWAIT PARTITIONED ZONE

A Convention signed at Uqair in December 1922 fixed the Najdi (Saudi Arabian) boundary with Kuwait. The Convention also established a Neutral Zone of 5,770 sq. km. immediately to the south of Kuwait in which Saudi Arabia and Kuwait held equal rights. The final agreement on this matter was signed in 1963. Since 1966 the Zone has been divided between the two countries and each administers its own half, in practice as an integral part of the state. However, the oil wealth of the whole Zone remains undivided and production from the on-shore oil concessions in the Partitioned Zone is shared equally between the two states' concessionaires (Aminoil and Getty).

## FINANCE

100 halalah = 20 qursh = 1 Saudi riyal.

Coins: 1, 5, 10, 25 and 50 halalah; 1, 2 and 4 qursh.*

Notes: 1, 5, 10, 50 and 100 riyals.

Exchange rates (December 1976): £1 sterling = 5.85 Saudi riyals; U.S. \$1 = 3.53 Saudi riyals.

100 Saudi riyals = £17.10 = \$28.33.

* The coins of 1, 2 and 4 qursh are being gradually withdrawn from circulation.

*Note:* Prior to January 1960 the prevailing exchange rate was U.S. \$1 = 3.75 Saudi riyals (1 riyal = 26.67 U.S. cents). From January 1960 to August 1971 the exchange rate was \$1 = 4.50 riyals (1 riyal = 22.22 U.S. cents). Between December 1971 and February 1973 the rate was \$1 = 4.145 riyals (1 riyal = 24.13 U.S. cents). It was \$1 = 3.730 riyals (1 riyal = 26.81 U.S. cents) from February to August 1973; and \$1 = 3.55 riyals (1 riyal = 28.17 U.S. cents) from August 1973 to March 1975, when the riyal's direct link with the dollar was ended and the currency was valued in terms of the IMF Special Drawing Right (based on a weighted "basket" of 16 national currencies since July 1974), with a mid-point of 1 SDR = 4.28255 riyals. Wide fluctuations around this are allowed in order to permit a fixed rate against the U.S. dollar for extended periods of time. Since August 1975 the rate has been \$1 = 3.53 riyals. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 10.80 riyals.

# THE CONSTITUTION

After Ibn Saud had finally brought the whole of present-day Saudi Arabia under his control in 1925, the territory was made into a dual kingdom.

Six years later, in 1932, the realm was unified by decree and became the Kingdom of Saudi Arabia. Saudi Arabia as a whole has in practice been developing, in recent years particularly, from monarchical towards ministerial rule. The power of the Cabinet was increased in May 1958, when several ministries were delegated to the Crown Prince. In December 1960, however, the Crown Prince resigned and King Saud assumed the Prime Ministership. In 1962, Prince Faisal resumed the Prime Ministership. In 1964 King Saud was relieved of his duties and his brother Prince Faisal was proclaimed King. King Faisal was assassinated in 1975 and succeeded by his brother Khalid.

The organs of local government are the General Municipal Councils, the District Council and the tribal and village councils A General Municipal Council is established in the towns of Mecca, Medina and Jeddah. Its members are proposed by the inhabitants and must be approved by the King. Functioning concurrently with each General Municipal Council is a General Administration Committee, which investigates ways and means of executing resolutions passed by the Council. There are also elected district councils under the presidency of local chiefs, consisting of his assistant, the principal local officials and other important persons of the district. Every village and tribe has a council composed of the sheikh, who presides, his legal advisers and two other prominent personages. These councils have power to enforce regulations.

The principal administrative divisions are as follows:

**Najd:** capital Riyadh. Najd is sub-divided as follows:

1. The principality of Riyadh, to which are associated Wadi al-Dawasir, al-Aflaj, al-Hariq, al-Kharj, al-'Aridh, al-Washm and Sudair.
2. The principality of al-Qasim, comprising 'Unaizah, Buraidah, al-Ras and their villages, and al-Mudhanban and its dependencies.
3. The Northern principality (capital Hayil). This includes the tribes of Shammar, 'Anzah, al-Dhafir and Mutair, the Town of Taima in the south and some northerly towns.

**Hijaz:** capital Mecca. Includes the principalities of Tabuk, al-'Ula, Dhaba, al-Wajh, Amlaj, Yanbu', Medina, Jeddah, al-Lith, al-Qunfundhah, Baljarshi and Tayif.

**'Asir:** capital Abha. Includes Abha, Qahtan, Shahran, Rijal Alma', Rijal al-Hajr, Banu Shahr, Mahayil, Bariq and Bisha.

**Najran** and its villages.

**Eastern Province** (*Al Hasa*): capital Dammam. Includes Hofuf, Al-Mubarraz, Qatif, Dhahran, Al-Khobar and Qaryat al-Jubail.

## JUDICIAL SYSTEM

Justice throughout the kingdom of Saudi Arabia is administered according to Islamic law by a Chief Judge, who is responsible for the Department of Sharia Affairs. Sentences in the kingdom are given according to the Koran and the Sunna of the Prophet.

The judicial system provides for three grades of court and a Judicial Supervisory Committee:

**The Judicial Supervisory Committee.** The Committee consists of three members and a president appointed by the King. It supervises all the other courts and is situated at Mecca.

**Chief Justice, Mecca:** Sheikh ABDULLAH IBN HASSAN.

**Courts of Appeal (Courts of Cassation).** There are several courts of appeal in Hijaz and Najd, having jurisdiction to hear appeals from the *Mahkamat al-Sharia al-Koubra*.

**Mahkamat al-Sharia al-Koubra.** The competence of these courts extends to all cases not covered by the above. They are situated in Mecca, Medina and Jeddah. Appeal may be made to the Courts of Cassation.

**Mahkamat al-Omour al Mosta'jalah.** These courts, which are held throughout the country, deal with cases of minor misdemeanours and actions in which the value does not exceed SR 30. Other branches of these courts deal exclusively with affairs of the Bedouin tribes with the same competence. The decisions of these courts are final.

**Chief Qadi and Grand Mufti:** (vacant).

## RELIGION

Arabia is the centre of the Islamic faith and includes the holy cities of Mecca and Medina. Except in the Eastern Province, where a large number of people follow Shi'a rites, the majority of the population are of the Sunni faith. The last seventy years have seen the rise of the Wahhabi sect, who originated in the eighteenth century, but first became unified and influential under their late leader King Ibn Saud. They are now the keepers of the holy places and control the pilgrimage to Mecca.

**Mecca:** Birthplace of the Prophet Muhammad, seat of the Great Mosque and Shrine of Ka'ba visited by a million Muslims annually.

**Medina:** Burial place of Muhammad, second sacred city of Islam.

## THE PRESS

Since 1964 most newspapers and periodicals have been published by press organizations administered by boards of directors with full autonomous powers, in accordance with the provisions of the Press Law. These organizations, which took over from small private firms, are privately owned by groups of individuals widely experienced in newspaper publishing and administration (*see* Publishers).

There are also a number of popular periodicals published by the Government and by the Arabian American Oil Co. and distributed free of charge. The press is subject to no legal restriction affecting freedom of expression or the coverage of news.

# FINANCE

## BANKING

The Saudi Arabian banking system consists of: the Saudi Arabian Monetary Agency, as central note-issuing and regulatory body; twelve commercial banks (two national and ten foreign banks); and three specialist banks.

The rising volume of oil revenues imposed a need for a central monetary authority and in 1952 the Saudi Arabian Monetary Agency (SAMA) was established in Jeddah. SAMA's functions include: bankers to the government; stabilization of the value of the currency; administration of monetary reserves; issue of coin and notes; and regulation of banking.

In June 1966, a Banking Control Law formalized SAMA's control of the commercial banking system. Commercial banks are obliged to maintain a certain proportion of their deposit liabilities (currently, 10 per cent of demand deposits, and 5 per cent of time and savings deposits) as statutory deposits with SAMA. They must also maintain liquid reserves equivalent to a certain proportion (currently 20 per cent) of their total deposit liabilities and are required to be Saudi Joint Stock Companies, and may not trade for purposes other than banking. Their paid-up capital must be not less than 2.5 million Saudi riyals; banks' total deposit liabilities may not exceed 15 times their paid-up capital and reserves; and banks must plough back 25 per cent of their undistributed profits in the form of reserves, until such reserves equal, as a minimum, their paid-up capital.

(SAFCO):** P.O.B. 553, Dammam; f. 1965; 51 per cent shareholding, remainder open to public subscription; the plant at Dammam has a capacity of about 1,100 tons of urea and 35 tons of sulphur a day; construction and management have been undertaken by Occidental Petroleum Co. of U.S.A.

**Sulb:** P.O.B. 1826, Jeddah; wholly-owned by Petromin; steel rolling mill at Jeddah.

### FOREIGN CONCESSIONAIRES

**Arabian-American Oil Co. (Aramco):** Dhahran; f. 1933; holds the principal working concessions in Saudi Arabia, covering approx. 85,000 square miles; production (1975) 2,491.8 million barrels; Saudi Government acquired 60 per cent participation in June 1974 and by early 1977 negotiations were almost completed by which the Saudi Government would effect complete nationalization; Pres. R. W. POWERS; Chair. and Chief Exec. Officer F. JUNGERS.

**Arabian Oil Co. Ltd.:** P.O.B. 335, Riyadh; f. 1958; holds concession for offshore exploitation of Saudi Arabia's half-interest in the Kuwait-Saudi Arabia Partitioned Zone; oil production (1975) 119.9m. barrels; natural gas production (1974) 56.7m. cubic feet; Chair. SOHEI MIZUNO; Pres. YOSHIHISA OJIMI; Dir. in Saudi Arabia TAKASHI HAYASHI.

**Getty Oil Co.:** P.O.B. 363, Riyadh; also office in Kuwait; f. 1928; holds concession for exploitation of Saudi Arabia's half-interest in the Saudi Arabia-Kuwait Partitioned Zone, both on-shore and in territorial waters; total Zone production (1975) 62.5 million barrels.

# TRANSPORT

## RAILWAYS

**Saudi Government Railroad Organization:** Dammam; Dir.-Gen. Faysal M. Al-Shehail.

The Saudi Government Railroad is a single track, standard gauge line 563 km. long. In addition, the total length of spur lines and sidings is 170 km. The main line connects Dammam Port at the Arabian Gulf with Riyadh, and passes Dhahran, Abqaiq, Hofuf, Harad, Khurais and al-Kharj.

The Organization is an independent entity with a Board of Directors headed by the Minister of Communications. The Organization also manages the Port of Dammam.

## ROADS

Asphalted roads link Jeddah to Mecca, Jeddah to Medina, Medina to Yanbo, Taif to Mecca, Riyadh to al-Kharj, and Dammam to Hofuf as well as the principal communities and certain outlying points in Aramco's area of operations. Work is proceeding on various other roads, including one which will link Medina and Riyadh. A road from Taif to Jizan in the south, near the Yemeni border, was officially opened in 1976. The trans-Arabian highway, linking Dammam, Riyadh, Taif, Mecca and Jeddah, was completed in 1967. In 1975 there were 16,231 km. of asphalted roads.

## SHIPPING

**Saudi Arabian Ports Authority:** Jeddah; Pres. Dr. Fayez Badr.

The deep-water port of Jeddah is the main port of the kingdom and the port for pilgrims to Mecca. An expansion scheme providing for nine new piers for large ships, costing £20 million was completed in January 1973. Yanbo, the port of Medina, has been extended and modernized, with new docks, storage space and a special Pilgrim centre; other ports on the Red Sea are Muwaih, Wejh and Rabigh. On the Gulf there are the small ports of Al-Khobar, Qatif and Uqair, suitable only for small local craft, and a deep-water port at Ras Tanura built by the Arabian American Oil Co. for its own use. The deep-water Dammam Port, which was also built by the Arabian American Oil Co. and is operated by the Saudi Government Railroad, lies approximately 12 km. from the coast and is connected to the mainland by a railway causeway. Expansion at Dammam is in progress.

**Nashar Saudi Line:** P.O.B. 79, Jeddah; roll-on, roll-off service U.K. to Jeddah; every 21 days.

**Saudi Lines:** P.O.B. 66, Jeddah; regular cargo and passenger services between Red Sea and Indian Ocean ports.

**Saudi National Lines:** P.O.B. 66, Jeddah; regular service from U.S.A. to Saudi Arabia and Red Sea ports.

## CIVIL AVIATION

**Saudia—Saudi Arabian Airlines:** Saudia Bldg., P.O.B. 620, Jeddah; f. 1945; regular internal services to all major cities of Saudi Arabia; regular international services to London, Paris, Geneva, Rome, Beirut, Casablanca, Algiers, Tunis, Tripoli, Dubai, Doha, Bahrain, Muscat, Port Sudan, Khartoum, Cairo, Kuwait, Baghdad, Damascus, Amman, Asmara, Karachi, Bombay, Istanbul, Shiraz; fleet of 19 aircraft, principally Boeing 707, 720B, 737, TriStar, DC-3 and Convair 340; Dir.-Gen. Sheikh Kamil Sindi; Exec. Vice-Pres. and Dep. Dir.-Gen. S. W. Chambers; Vice-Pres. (External Affairs) Rida Hakeem.

Saudi Arabia is also served by the following foreign airlines: Air Algérie, Air France, ALIA, Alitalia, AUA, British Airways, CSA, EgyptAir, Iranair, Iraqi Airways, KLM, Lufthansa, MEA, PIA, Sabena, Sudan Airways, and Syrian Arab Airlines.

# TOURISM

**Saudi Company for Hotels and Tourist Areas:** Riyadh; Saudi Government has 22 per cent interest.

# ATOMIC ENERGY

Saudi Arabia joined the International Atomic Energy Agency in January 1963. Radio isotopes are used in the oil industry and are being introduced into state-controlled agricultural schemes.

# UNIVERSITIES

**Imam Mohammed bin Saud Islamic University:** Riyadh; 11,200 students.

**Islamic University:** Medina; f. 1961; 172 teachers, 2,944 students.

**King Abdulaziz University:** P.O.B. 1540, Jeddah; f. 1967; 330 teachers, 3,659 students.

**King Faisal University:** Dammam; f. 1975.

**University of Petroleum and Minerals:** Dhahran; f. 1963; 164 teachers, 1,383 students.

**Riyadh University:** Riyadh; f. 1957; 365 teachers, 6,000 students.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Senegal lies on the west coast of Africa, bordered to the north by Mauritania, to the east by Mali and to the south by Guinea and Guinea-Bissau. In the southern part of the country the Gambia forms a narrow enclave extending some 200 miles inland. The climate is tropical, with a long dry season followed by a short wet season. Average annual temperature is about 29°C (84°F). French is the official language but there are numerous native tongues of which Wolof and Toucouleur are the most widespread. About 80 per cent of the population is Muslim and about 10 per cent Christian, mostly Roman Catholic. The remainder follow traditional beliefs. The national flag (proportions 3 by 2) has three vertical stripes of green, gold and red, the gold stripe bearing a five-pointed green star. The capital is Dakar.

### Recent History

After 300 years as a French colony, Senegal became a self-governing member state of the French Community in November 1958. In April 1959 it joined with the former French Sudan to form the Mali Federation, which became independent in June 1960 but was dissolved two months later. The independent Republic of Senegal was proclaimed, and in September Léopold Sédar Senghor was elected President. In December 1962 the Prime Minister, Mamadou Dia, was imprisoned and the President added the office of Prime Minister to his own responsibilities. In March 1963 a new Constitution, incorporating this innovation, was adopted. Later that year the governing Party, *Union progressiste sénégalaise* (UPS), won a decisive victory in elections for the National Assembly. Riots against alleged electoral fraud were harshly quashed. By 1966 all opposition parties had been either outlawed or incorporated into the UPS. A general strike in 1968, after protests by students and workers, was resolved by the introduction of reforms, but a similar crisis in 1969 was more summarily dealt with, as the Government was stronger. In 1970 a constitutional amendment recreated the post of Prime Minister, and this was given to a young man, Abdou Diouf. The President both encourages young militants and supports the traditional Muslim leaders, whose influence is strong in rural areas. In January 1973 President Senghor, as sole candidate for the Presidency, was re-elected, and the UPS, as sole party, won all 100 seats in the National Assembly. In the same month there were clashes between radical students and government supporters, which were followed by arrests and the banning of the teachers' union.

In 1974 the Government freed all political prisoners, including notably the former Prime Minister, Mamadou Dia, and permitted the formation of a legal opposition party, the *Parti démocratique sénégalais* (PDS). Although two leaders of the PDS were imprisoned for subversion in 1975, Senghor confirmed his intention to make Senegal a multi-party state. In March 1976 a constitutional amendment limited the number of political parties to three and stipulated that each should represent a particular ideology: socialist and democratic, liberal and democratic and Marxist-Leninist or Communist. However, in November 1976 the Government UPS party won 85 out of 87 seats in elections to two regional assemblies and so maintained its monopoly in the National Assembly.

Relations with Guinea have been strained, and in 1972 Senegal joined with Mali and Mauritania in the Organization for the Development of the Senegal River (OMVS), excluding Guinea. Senegal's closest links have always been with France, but relations have cooled somewhat in recent years. Senegal has drawn closer to other Muslim countries and has strongly supported national liberation movements.

### Government

Legislative power rests with the unicameral National Assembly, with 100 members elected for five years by universal adult suffrage (at the last election, in January 1973, all candidates were elected unopposed). Executive power is held by the President, also directly elected for five years at the same time as the Assembly. He appoints and leads a Cabinet, including a Prime Minister. Senegal comprises seven regions, each with an appointed Governor and an elected local assembly.

### Defence

Senegal has an army of 5,500 men, a navy of 250 and an air force of 200. Military service is selective and lasts for two years. There are 1,600 men in paramilitary forces. France provides technical and material aid, but under an agreement signed in 1974 France is to hand over its military bases in Senegal and to begin withdrawing military and technical personnel. Defence expenditure in the 1976 budget was 8,823 million francs CFA.

### Economic Affairs

About 70 per cent of the population is engaged in agriculture and stock rearing, and the economy is dominated by the production and processing of groundnuts. Groundnuts and groundnut products provide about a third of export earnings. Attempts to diversify the range of crops grown and become self-sufficient in foodstuffs were hampered in 1976 by a plague of rats. The fishing industry is expanding rapidly and the development of mining, industry and tourism are priorities of the 1973–77 five-year plan.

At present only phosphates are mined on a large scale, but a considerable deposit of iron ore is known to exist at Falemé and traces of copper and gold have been found. The tripling of the world price of phosphates in 1974 and a fivefold increase in 1975 elevated them to a major place in the economy.

Industry is fairly well developed and includes textiles, chemicals, building materials and various light industries, including food processing. In 1976 industrial production accounted for about 25 per cent of G.D.P.

With the aim of attracting foreign companies and providing employment, an Industrial Free Zone is being established near Dakar. Foreign firms operating there will be free of taxes, duties and bureaucratic controls. In the rest of Senegal, on the other hand, a policy of "Senegalization" is increasing state control and native management of affairs. A rise in tourist visits from an estimated 132,000 in 1973 to 190,000 in 1977 is envisaged in the present development plan, and this would make tourism a major sector of the economy.

For the present, however, Senegal faces inflation, a balance of payments problem and a budgetary deficit, and remains heavily dependent on foreign investment and aid.

Senegal is a member of the Union Monétaire Ouest-Africaine (UMOA), the Organisation Commune Africaine et Mauricienne (OCAM), the Organization of African Unity (OAU) and is an associate member of the EEC.

### Transport and Communications

The main railway line runs east from Dakar into Mali and another line runs north to St. Louis along the coast, with a branch to Linguera, totalling 1,034 km. The road network is good with over 7,000 km. passable at all seasons. The Senegal river is used to transport goods by both Senegal and Mauritania. Dakar is the largest port in West Africa and serves both Senegal and Mauritania. There is an international airport at Dakar and numerous small airports.

### Social Welfare

Social services include a state medical service and certain family and maternity benefits for workers. There are 4 teaching hospitals with about 2,600 beds, 4 regional hospitals with 600 beds, 32 health centres with 950 beds, 51 maternity hospitals with 1,250 beds and nearly 400 dispensaries.

### Education

Education is compulsory for all children between six and fourteen years old, although facilities exist for only 40 per cent of this age group to attend school. Since 1971 education has been re-orientated towards practical subjects. Secondary school pupils have been encouraged to follow science-based courses and school-leavers directed to take up professional training in fields where personnel are needed. In line with the policy of "negritude", the university specializes in local studies, and half its teachers are Africans.

### Tourism

There is a wild game reserve in the Nikolo-Koba National Park, and there are fine beaches. The island of Goré, near Dakar, is of great historical interest. Tourists provide a valuable source of foreign currency and encourage traditional crafts, and hotel accommodation is being increased. Senegal is a member of the Office Inter-Etats du Tourisme Africain.

*Visas* are not required by nationals of countries in the EEC or OCAM.

### Sport

Football is the most popular game. Many forms of sport are practised, particularly watersports, hunting, golf and riding.

### Public Holidays

**1977:** May 1st (Labour Day), May 19th (Ascension Day), May 30th (Whitsun), July 14th (Day of Association), August 15th (Assumption), September 15th (Korité, end of Ramadan), November 1st (All Saints' Day), November 22nd (Tabaski, Feast of Sacrifice), December 25th (Christmas).

**1978:** January 1st (New Year's Day), February 20th (Mouloud, Birth of the Prophet), March 27th (Easter Monday).

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 centimes=1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1976):

1 franc CFA=2 French centimes;
£1 sterling=414.1 francs CFA;

## THE CONSTITUTION

(*Promulgated March 7th*, 1963, *last revised March 17th*, 1976)

**Preamble:** Affirms the Rights of Man, liberty of the person and religious freedom. National sovereignty belongs to the people who exercise it through their representatives or by means of referenda. There is universal, equal and secret suffrage. French is the official language.

**The President:** The President of the Republic is elected by direct universal suffrage for a five-year term and is eligible for re-election. He holds executive power and conducts national policy with the assistance of ministers chosen and nominated by himself. He is Commander of the Armed Forces and responsible for national defence. He may, after consultation with the President of the National Assembly and with the Supreme Court, submit any draft law to referendum. In circumstances where the security of the State is in grave and immediate danger, he can assume emergency powers and rule by decree. The President of the Republic can be impeached only on a charge of high treason or by a secret ballot of the National Assembly carrying a three-fifths majority.

**The Prime Minister:** The Prime Minister is nominated or dismissed by the President, but is responsible to the National Assembly. Should the Presidency fall vacant, the Prime Minister will assume the office for the duration of the term.

**The National Assembly:** Legislative power is vested in the National Assembly which is elected by universal direct suffrage for a five-year term at the same time as the Presidential election. The Assembly discusses and votes legislation and submits it to the President of the Republic for promulgation. The President can direct the Assembly to give a second reading to the bill, in which case it may be made law only by a three-fifths majority. The President of the Republic can also call upon the Supreme Court to declare whether any draft law is constitutional and acceptable. Legislation may be initiated by either the President of the Republic or the National Assembly.

**Amendments:** The President of the Republic and Deputies to the National Assembly may propose amendments to the Constitution. Draft amendments are adopted by a three-fifths majority vote of the National Assembly. Failing this they are submitted to referendum.

**Judicial Power:** The President appoints the members of the Supreme Court of Justice, on the advice of the Superior Court of Magistrates, which determines the constitutionality of laws. A High Court of Justice, appointed by the National Assembly from among its members, is competent to impeach the President or members of the Government.

**Local Government:** Senegal is divided into seven regions, each having a Governor and an elected Local Assembly.

**Political Parties:** There may be no more than three political parties.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Seychelles comprises 89 islands widely scattered over the western Indian Ocean. Apart from the Seychelles archipelago, the country contains several other island groups, the southernmost being about 130 miles north of Madagascar. The climate is tropical, with small seasonal variations in temperature and rainfall. Average temperature in Port Victoria is nearly 27°C (80°F) and average annual rainfall 236 cm. (93 in.). The official languages are English and French but about 94 per cent of the population speak Creole. Almost all the inhabitants are Christian, 90 per cent belonging to the Roman Catholic Church. The national flag (proportions 4 by 3) consists of a white diagonal cross on a background of dark blue (the upper and lower segments) and red. The capital is Port Victoria.

### Recent History

Seychelles was uninhabited until annexed by France in the eighteenth century. It was ceded to the United Kingdom in 1814 and administered as a dependency of Mauritius until 1903, when it became a Crown Colony

Several political parties were formed in the 1960s, of which the most important are the Seychelles Democratic Party (SDP), led by James Mancham, and the Seychelles People's United Party (SPUP), led by Albert René. In response to their demands, a new constitution was promulgated in 1967, establishing a Governing Council with a majority of elected members. This, however, received the backing of neither party and, following a constitutional conference in London in 1970, a ministerial system of government was introduced. In the general election of November 1970, the SDP won 10 seats in the Legislative Council to the five of the SPUP, and Mr. Mancham was appointed Chief Minister.

The SPUP, supported by the Organization of African Unity (OAU), demanded immediate independence for Seychelles, while Mr. Mancham favoured integration of the colony within the United Kingdom. In the election campaign of 1974, however, the parties were united on the independence issue. The results caused bitter controversy. The SDP, which polled 52 per cent of the votes, was allocated 13 seats in the Legislative Council, while the SPUP, with 48 per cent of the votes, received only two. At another constitutional conference in London, in March 1975, it was agreed that Seychelles should have internal self-government from October and the two parties formed a coalition under Prime Minister Mancham. An independence constitution was agreed in January 1976 and Seychelles became a sovereign republic on June 29th.

The coalition government headed by President Mancham and Prime Minister René has stated its intention to rule the country until the next general election in 1979. Under the independence agreement, the United Kingdom returned to Seychelles the islands of Aldabra, Farquhar and Desroches, detached in 1965 to form part of the British Indian Ocean Territory and subsequently leased to the U.S.A. Seychelles is a member of the Commonwealth and the OAU, and has declared its intention of maintaining neutrality in international affairs.

### Government

Executive power is vested in the President, who is Head of State. The first President is the pre-independence Prime Minister but future Presidents will be elected for a five-year term by direct popular vote. The President appoints the Prime Minister and other Ministers from the members of the National Assembly, and also the holders of certain public offices and the judiciary. The Prime Minister is the principal minister and leader of government business in the National Assembly.

The legislature consists of the Parliament of Seychelles, which comprises the President and the National Assembly. The Assembly has 25 members elected by universal adult suffrage for five years: eight representing constituencies and 17 elected by proportional representation. The first Assembly was formed by the 25 elected members of the pre-independence Legislative Assembly.

### Defence

The country has no standing defence forces. There is a small communications and tracking station on the main island, Mahé, operated by the U.S.A.

### Economic Affairs

The economy, traditionally based on agriculture, is diversifying into tourism and the growth of related infrastructure and services. Only 5 per cent of the land is suitable for agriculture. The most important crops are copra and cinnamon bark, grown on plantations, which together provided 85 per cent of export earnings in 1975. Small quantities of tea, sweet potatoes, cassava, yams, sugar cane and bananas are grown for local consumption, although the staple food, rice, is imported in bulk. Agricultural production suffers from lack of finance, expertise and labour. Although 80 per cent of Seychellois were employed on the land in 1945, this had fallen to 20 per cent in 1971. The Government plans to increase local crop and livestock production to meet the growing demands of the local population (which is expected to double by 2000) and tourism. Extension services are to be expanded and more land made available. A large-scale fishing industry is also planned; fish are plentiful and fishing is a traditional occupation, but research and technical assistance are needed to realize the full potential.

There are no mineral resources except guano. The manufacturing sector is small and is largely organized on a family basis. Seychelles' economy expanded rapidly, mainly because of tourism, after the opening of the international airport in 1971. There were an estimated 33,000 visitors in 1975, compared with 1,622 in 1970, while the number of beds available increased from 141 to 1,350 over the same period. The industry contributed 9 per cent to G.D.P. in 1974, a figure which is expected to double by 1980, when 74,000 tourists are expected. The growth of tourism led to a boom in the construction industry and in related infrastructural development, although this has declined since 1974. From 1969 to 1974, Rs. 178 million was invested in capital projects, including the airport, the reclamation of Port Victoria and La Gogue dam, and G.D.P. grew by 16 per cent.

The ability to sustain this high level of economic activity, and to offset a growing visible trade deficit, depends in part on the country's continuing access to foreign capital, both aid and private investment. Capital aid grants from the United Kingdom have financed nearly all public investment expenditure and will total £10 million in 1976–78, in addition to direct budget support and technical assistance. The Government is considering various schemes to establish Seychelles as a tax haven and offshore banking centre and to turn Mahé, the largest island, into an international free port. A five-year development plan is under discussion.

### Transport and Communications

Most investment in transport has been put into Mahé, Praslin and La Digue, which contain 98 per cent of the population. These islands have 226 km. of roads, mostly surfaced. There are no railways. Mahé is well served by a number of international airlines. Inter-island transport is mostly by sea, but international shipping services have declined since the airport was opened in 1971, although the port of Victoria can handle 150,000 tons of goods annually. There are plans to invest Rs. 20 million in telecommunications between 1977 and 1980.

### Social Welfare

There are four hospitals, one mental hospital and 11 clinics, mostly on Mahé and La Digue. The Poor Relief Ordinance provides for children and mothers in need and the Workmen's Compensation Ordinance provides insurance against injury or death.

### Education

Although education is not compulsory, 90 per cent of children of school age attend schools. Most schools are run by the churches but the Government directs educational policy and provides finance. There is a Technical College and a Teacher Training College. A number of students study abroad, principally in the United Kingdom. In 1971 adult illiteracy averaged 42.2 per cent (males 44.3 per cent, females 40.2 per cent).

### Tourism

Seychelles is renowned for its excellent climate, beaches, and scenery. There are more than 500 varieties of flora and many rare species of birds. The Government is determined that development of the tourist industry shall not contribute to the destruction of the environment and strict laws govern the building of hotels. There are national parks at Morne Seychellois and Valley de Mai.

*Visas* are not normally required to visit Seychelles except for nationals of certain countries outside the Commonwealth.

### Sport

Football is popular.

### Public Holidays

**1977:** May 1st (Labour Day), June 9th (Corpus Christi), June 29th (Independence Day), August 15th (Assumption), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 25th (Christmas Day).

**1978:** January 1st–2nd (New Year), March 24th–27th (Easter).

### Weights and Measures

The imperial system is in force.

### Currency and Exchange Rates

100 cents = 1 Seychelles rupee.

Exchange rates (December 1976):
£1 sterling = 13.33 rupees;
U.S. $1 = 8.05 rupees.

# THE CONSTITUTION*

An independence constitution came into effect on June 29th, 1976. Its central features are the following:

Seychelles is a sovereign republic, with the constitution as supreme law. The President is elected by popular vote simultaneously with elections to the National Assembly. Full executive powers are invested in the President. The Cabinet consists of a Prime Minister and 10 other ministers (or such number as the National Assembly might prescribe by law), appointed by the President from members of the National Assembly. The National Assembly consists of 25 elected members, of whom eight represent constituencies and 17 are elected by proportional representation by the party list system. The normal life of the Assembly is five years. There are provisions relating to citizenship, the protection of fundamental human rights, the judiciary, the public service, finance and pensions.

* The first National Assembly was formed by elected members of the pre-independence Legislative Assembly. They will continue their five-year term, due to end in June 1979. The first President was the pre-independence Prime Minister.

# SIERRA LEONE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Sierra Leone lies on the west coast of Africa with Guinea to the north and east and Liberia to the south. The climate is hot and humid with an average temperature of 21°C (80°F); the rainy season lasts from May to October. English is the official language and Krio, Mende and Temne are widely spoken. The vast majority of the population follow animist beliefs and there are Muslim and Christian minorities. The national flag proportions 3 by 2) has horizontal stripes of green, white and blue. The capital is Freetown.

### Recent History

Formerly under British rule, Sierra Leone became independent in April 1961. Elections were held in 1962 and won by the Sierra Leone People's Party (SLPP) led by Sir Milton Margai. In 1964 Sir Milton Margai died, and was succeeded as Premier by his brother Mr. (later Sir) Albert Margai, several members of whose government were later convicted on charges of corruption. Following disputed elections in March 1967, the army assumed control of the country and set up a National Reformation Council. The Governor-General was forced to leave the country. A second army revolt in April 1968 led to the restoration of civilian government and the return to power of the Prime Minister elected in 1967, Dr. Siaka Stevens.

In 1970 several of those who took part in the army *coup* of 1967 were tried and sentenced for treason. In April 1971 a republican constitution was introduced and Dr. Siaka Stevens became Executive President after another unsuccessful army revolt had been put down with the aid of troops from Guinea.

The 1972 by-elections were not contested by the Opposition SLPP, six members of which had been detained on charges of murder. SLPP candidates withdrew from the general elections held in May 1973 after the nominations of 12 of their candidates were declared null and void, which resulted in no official opposition in the House of Representatives. Twenty-one people, including two former Cabinet ministers and a former Army Chief, were found guilty of treason for alleged involvement in a plot to overthrow the Government in July 1974, and eight were subsequently executed. In August 1975 the House of Representatives unanimously approved a motion calling for a one-party system of government and the introduction of a new republican constitution. In 1976, President Stevens was unanimously re-elected for a second five-year term of office. A state of emergency was declared following student riots in February 1977.

While progressively strengthening its rule of the country, the Government has pursued closer relations with socialist and Arab states in recent years.

### Government

Legislative power is held by the unicameral House of Representatives, with 100 members: 85 elected for five years by universal adult suffrage, 12 Paramount Chiefs (one from each District) and three members appointed by the President. Executive power is held by the President, elected by the House for five years. He appoints and leads the Cabinet, including a Vice-President and a Prime Minister. The country is divided into four regions: the Northern, Eastern and Southern Provinces, and the Western Area. These are administered through the Ministry of the Interior and divided into 147 Chiefdoms, each controlled by a Paramount Chief and Council of Elders known as the Tribal Authority.

### Defence

In 1976 the armed forces comprised 2,800 men, including a naval force of 100 and an air force of 25. Police number about 4000.

### Economic Affairs

The economy is based on agriculture and mining, the chief products being palm kernels, coffee, cocoa, rice, timber and diamonds. Iron ore production ceased with the closure of the Delco mine in 1975, though there are plans to open new mines. Sierra Leone is striving to reach self-sufficiency in rice. Diamonds account for about 60 per cent of export receipts, although smuggling is a problem. In 1970 the Government took a 51 per cent share in the main diamond mining company, DIMINICO. It is hoped that exploitation of bauxite and rutile reserves will offset the decline in diamond production, and there are plans to establish an alumina plant. Industry is on a small scale, covering palm oil, furniture and weaving.

A Ten-Year Plan was launched in 1962 to develop industry and plantation agriculture. Trade remains largely controlled by foreign firms and immigrant communities. Sierra Leone adheres to a free trade agreement with Guinea, the Ivory Coast and Liberia signed in 1965 but largely ineffective owing to differences between the Ivory Coast and Guinea, and also to currency problems. In October 1973 Sierra Leone and Liberia concluded the Mano River Agreement which is to establish the economic union of the two countries in two stages, the first of which was completed in 1977. The agreement involves a local free trade area, the establishment of a Union Secretariat and a Customs Training School in Monrovia. The economy has been badly affected by the rise in import prices for oil, machinery, manufactures and food, with the latter representing 17 per cent of imports in 1974, and the trade deficit and inflation have grown steadily worse. Declining export receipts led to the introduction of import controls in 1975, greatly reducing government revenue; failure to control government spending caused the World Bank to suspend loans to Sierra Leone in 1976.

A Five-Year Development Plan (1975–79) aimed for an investment of Le. 623 million and an annual growth rate of 6.5 per cent. Particular emphasis is placed on agriculture, mining and transport development, restructuring the educational system and improving health services. Since 1975, however, acute domestic financial problems have caused a drastic revision of these estimates.

Sierra Leone is a member of the Economic Community of West African States.

### Transport and Communications

The railway system has been closed down and the road network considerably expanded. A road linking Freetown to Monrovia in Liberia is being planned by the African Development Bank. Under the 1975–79 Five-Year Plan it is hoped to build 1,040 km. of feeder roads. Inland waterways total 789 km., much of it navigable for only three months in the year. The chief ports are Freetown and Pepel. Internal air transport is well developed and international air services are provided by Sierra Leone Airways and eleven foreign lines. There is an international airport at Lungi.

### Social Welfare

There is no state scheme for social security, but the Division of Social Welfare provides community developments centres, youth clubs and maternity welfare centres. Sierra Leone signed a two-year agreement with the People's Republic of China which is to provide medical personnel.

### Education

Education is both private and government owned. At the end of 1973 there were 1,080 primary schools, 108 secondary schools and 6 teacher training colleges. A second education project financed by the International Development Association aims to improve secondary and technical school facilities.

Illiteracy is estimated at 80 per cent.

### Tourism

The Tourist Board was set up in 1962 to develop Sierra Leone's tourist potential. The main attractions are the beaches, the mountains, jungle and wild life.

*Visas* are not required to visit Sierra Leone by nationals of Belgium, Denmark, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, San Marino, Spain, Sweden, Turkey and United Kingdom and Commonwealth.

### Sport

The most popular sports are football, cricket, athletics, lawn tennis and boxing. The National Sports Council supervises and encourages sport.

### Public Holidays

**1977:** May 30th (Whit Monday), August 1st (Bank Holiday), August 24th (President's birthday), September 15th (Id ul Fitr, end of Ramadan), November 22nd (Id ul Adha, Feast of the Sacrifice), December 25th–26th (Christmas and Boxing Day).

**1978:** January 1st (New Year's Day), February 20th (Mouloud, Birth of the Prophet), March 24th–27th (Easter), April 19th (Republic Day).

Muslim religious holidays dependent on the lunar calendar may differ slightly from the dates given.

### Weights and Measures

The metric system is in force.

### Currency and Exchange Rates

100 cents = 1 leone.

Exchange rates (December 1976):

£1 sterling = 2.000 leones;
U.S. $1 = 1.207 leones.

## FINANCE

100 cents = 1 leone (Le.).
Coins: ½, 1, 5, 10, 20 and 50 cents.
Notes: 50 cents; 1, 2 and 5 leones.
Exchange rates (December 1976): £1 sterling = 2.000 leones; U.S. $1 = 1.207 leones.
100 leones = £50.00 = $82.85.

*Note:* The leone was introduced in August 1964, replacing the West African pound (at par with the pound sterling) at the rate of £1 = 2 leones. The exchange rate of £1 sterling = 2 leones has remained in force since the leone's introduction. From September 1949 the pound had been valued at U.S. $2.80, so the initial value of the leone was $1.40 ($1 = 71.43 Sierra Leone cents). In November 1967 the leone was devalued (in line with sterling) to $1.20 ($1 = 83.33 S.L. cents). This valuation remained in force until August 1971. The exchange rate was 1 leone = $1.3029 ($1 = 76.75 S.L. cents) from December 1971 to June 1972, since when the leone has been "floating" in line with sterling. The average value of the leone was $1.25 in 1972; $1.23 in 1973; $1.17 in 1974; and $1.11 in 1975.

## THE CONSTITUTION

(*April* 1971, subsequently amended)

The Constitution provides for an Executive President, a Vice-President and a Prime Minister, all of whom are members of the Cabinet. Not more than three Ministers may be appointed from outside the House of Representatives. The House of Representatives consists of a Speaker and Deputy Speaker, 85 elected members, 12 Paramount Chiefs who do not stand for office under party auspices and three members appointed by the President. Constitutional provisions are designed to safeguard certain fundamental democratic liberties, concerning the House of Representatives, elections, appointments, the Supreme Court, the office of Paramount Chief and the independence of the judiciary.

Under the 1961 Constitution a general election was required for approval of any fundamental constitutional change. However, since the new Constitution is basically the same as the republican constitution approved by the House of Representatives during Sir Albert Margai's term of office, the Government considered the March 1967 general election to have provided the necessary approval for the changeover to a republic which took place in April 1971. Certain clauses of the Margai Constitution which the present Government does not agree with and which could not be altered under the 1961 procedure for constitutional amendments are to be changed as the need arises.

* * *

Following the unanimous approval of the House of Representatives in August 1975, the Government announced plans to introduce a new one-party republican constitution after a national referendum.

# SINGAPORE

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Singapore comprises one main island and several offshore islands, situated approximately 77 miles north of the equator. The country is flanked by Malaysia in the north, with the Philippines to the north-east and Indonesia to the south. It is linked to the Malay Peninsula by a causeway. The climate is equatorial with a uniformly high daily and annual temperature varying between 75°F and 80°F (24°C–27°C). Relative humidity is high, and the average annual rainfall is 96 in. There are no well-defined wet and dry seasons. The national language is Malay, and there are four official languages—Malay, Chinese (Mandarin), Tamil and English. The language of administration is English. There is complete religious freedom: the main religions practised are Islam, Christianity, Buddhism, Hinduism, Confucianism and Taoism. The national flag (proportions 3 by 2) has two equal horizontal stripes of red and white, with a white crescent moon and five white stars in the top left. The capital is Singapore City.

### Recent History

After the Second World War, Singapore was governed by the British Military Administration. When civil rule was restored in 1946, Singapore was detached from the other Straits Settlements and became a separate crown colony. A new constitution in 1955 introduced some measure of self-government, and in 1959 the state achieved complete internal self-government with Lee Kuan Yew as Prime Minister. The Federation of Malaysia came into being in September 1963, with Singapore as a constituent state. In August 1965, the association was ended and Singapore was separated from Malaysia and became a fully independent and sovereign nation. In December 1965 it became a republic with a President as Head of State. In May 1973 the last major ties with Malaysia, currency and finance, were broken. In September 1972 Lee Kuan Yew's ruling People's Action Party (PAP) won all the 65 parliamentary seats in the general election, also contested by five opposition parties. Singapore has achieved considerable political stability though the ruling PAP exercises strong control over the media.

After independence the Government took a staunchly anti-communist line and supported a strong U.S. military presence in South-East Asia. However, with the collapse of American influence in the area during 1974 and 1975, Singapore adopted a conciliatory attitude towards China and its communist neighbours. The Government called for the removal of foreign bases from ASEAN countries and advocated a policy of neutrality and non-alignment.

During 1976 the Government continued its campaign against internal communist activity. In a parliamentary election in December 1976 the ruling party, the PAP, was returned to power, taking all 69 seats, including 16 uncontested. The Opposition share of the vote fell from 29 per cent (in the 1972 election) to 25 per cent.

### Government

Legislative power rests with the unicameral Parliament of 69 members, elected by universal adult suffrage from single-member constituencies for five years (subject to dissolution). The President is elected by Parliament for a four-year term as a constitutional Head of State. Effective executive authority rests with the Cabinet, led by the Prime Minister, which is appointed by the President and responsible to Parliament.

### Defence

In 1975 the Singapore armed forces totalled 30,000 troops: 25,000 in the army, 2,000 in the navy and 3,000 in the air force. Para-military forces numbered 37,500 and defence expenditure for 1975/76 amounted to S$613 million.

### Economic Affairs

Strategically situated for trade, Singapore is the entrepôt for Malaysia and other South-East Asian states. It handles most of Peninsular Malaysia's external trade and is the world centre of the rubber and tin markets. The main commodities in trade are rubber and petroleum products, whilst foodstuffs form a quarter of retained imports. The services sector, including transport, communications, finance, storage and tourism, is important in providing foreign exchange and financing a growing balance of trade deficit. Transport, communications and storage accounted for about 13 per cent of G.D.P. in 1974.

Manufacturing has become an increasingly significant sector of the economy. The principal industries are petroleum refining, ship-building and repairing, textiles and electronics. Manufacturing employs about 26 per cent of the labour force. Expansion of output reached 16 per cent in 1973 but, following the world recession and slump, fell to 2 per cent in 1974. There was virtually no expansion in 1975 and this resulted in rising unemployment. However, there was some recovery in 1976 and industrial production rose 14.2 per cent in the first half of the year.

Although Singapore has no petroleum reserves of its own, oil plays a vital role in the economy. Singapore has the third largest refining complex in the world. Oil is the principal import and oil products are the main export. In 1973 chemical and petroleum products contributed more than 25 per cent of manufacturing output. Shell East Petroleum embarked on a S$600 million project for a chemical refinery on Pulau Bukom, to be completed by 1977.

Less than a quarter of the land area is under cultivation, and the agricultural sector accounted for about 1.6 per cent of the G.D.P. in 1975. Fruit and vegetable market gardening and offshore fishing are the major activities in the primary sector.

Singapore enjoys one of the highest per capita incomes in Asia. During 1974 and 1975 Singapore felt the effects of inflation and world recession. Growth rate of G.D.P. fell to an estimated 4 per cent in 1975. However, in 1976, with a recovery in manufacturing output and investment, the real growth rate rose to over 7 per cent. The trade deficit, S$6,259 million in 1974, rose to S$6,513 million in 1975, although this was compensated for by capital inflow and services, resulting in a balance of payments surplus of S$972 million. Despite falling demand for its exports, Singapore has a strong currency, backed 100 per cent by gold and foreign assets. In December 1975 reserves stood at S$7,486 million. The Government is promoting Singapore as an international banking centre.

### Transport and Communications

Singapore is the largest port in south-east Asia, and is used by more than 200 major shipping lines. A new container port became fully operational in late 1973.

At the end of 1975 there were 2,167 km. of roads, of which 1,716 km. were asphalt-paved. The road system includes dual carriageways, flyovers and expressways. Singapore international airport at Payar Lebar has been expanded to handle Boeing 747s. By the end of 1976 work had started on the building of a new international airport at Changi.

### Social Welfare

The Social Welfare Department, aided by local voluntary bodies, provides a wide range of welfare services to individuals and families in need. There are no state social insurance systems but there is a Central Provident Fund into which contributions must be paid by employers and employees.

### Education

Primary and secondary education is available in the four official languages of Malay, Chinese, Tamil and English. Government schools are either integrated schools with two or three language streams in one building under one administration or schools with only one language stream as is the case with government-aided and private schools. In June 1975 there were 391 primary schools with 328,401 students, and 114 secondary schools with 153,029 students. Outside the school system there are several higher education centres and vocational institutes providing craft level industrial training and technical institutes providing advanced craft training. There is a technical college, a polytechnic, a teacher training college and two universities. Adult education courses are conducted by a statutory board. In 1970 adult illiteracy averaged 31.1 per cent (males 17 per cent, females 45.7 per cent).

### Tourism

In 1974 tourism accounted for 6.2 per cent of G.N.P. and concentrated efforts are being made to expand the industry. In 1975 1,324,312 tourists spent S$794 million in Singapore.

*Visas* are not required by Commonwealth nationals and citizens of EEC countries, Finland, Iceland, Japan, Liechtenstein, Monaco, Norway, San Marino, Spain, Sweden, Switzerland and the U.S.A.

A 14-day *visa*-free facility is available to all except nationals of Albania, Bulgaria, the People's Republic of China, Cuba, Czechoslovakia, the German Democratic Republic, Hungary, the Democratic People's Republic of Korea, Poland, Rhodesia, Romania, South Africa, Taiwan, the U.S.S.R., Viet-Nam and Yugoslavia.

### Sport

Facilities exist for swimming, sailing, skin/skuba diving, water skiing, golf, horse racing and bowling.

### Public Holidays

**1977:** May 2nd (Labour Day), June 1st (Wesak Day), August 9th (National Day), September 15th (Hari Raya Puasa, end of Ramadan), November 10th (Deepavali), November 21st (Hari Raya Haji), December 25th (Christmas).

**1978:** January 1st (New Year's Day), January or February* (Chinese New Year), March 24th (Good Friday).

* From the first to the third day of the first moon of the lunar calendar.

### Weights and Measures

Conversion to the metric system by 1980 is planned; currently metric, imperial and local weights and measures are in use.

Weight: 16 Tahils = 1 Kati = $1\frac{1}{3}$ lb.
100 Katis = 1 Picul = $133\frac{1}{3}$ lb.
40 Piculs = 1 Koyan = $5,333\frac{1}{3}$ lb.

Capacity: 1 Chupak = 1 Quart.
1 Gantang = 1 Gallon.

### Currency and Exchange Rates

100 cents = 1 Singapore dollar (S$).

Exchange rates (December 1976);
S$1 = 1 Brunei dollar;
£1 sterling = S$4.07;
U.S. $1 = S$2.455.

## FINANCE

100 cents = 1 Singapore dollar (S$).
Coins: 1, 5, 10, 20 and 50 cents; 1 dollar.
Notes: 1, 5, 10, 25, 50, 100, 500, 1,000 and 10,000 dollars.
Exchange rates (December 1976): S$1 = 1 Brunei dollar; £1 sterling = S$4.07; U.S. $1 = S$2.45.
S$100 = £24.59 = U.S. $40.73.

*Note:* The Singapore dollar (S$) was introduced in June 1967, replacing (at par) the Malayan dollar (M$). From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M$8.5714) or 32.667 U.S. cents (U.S. $1 = M$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Singapore dollar was valued at 35.467 U.S. cents (U.S. $1 = S$2.8195). From February to June 1973 the Singapore dollar's value was 39.407 U.S. cents (U.S. $1 = S$2.5376). In terms of sterling, the exchange rate was £1 = S$7.347 from November 1967 to June 1972. The formal link with the Malaysian dollar, begun in June 1967, ended in May 1973 but the Brunei dollar remains tied to the Singapore dollar. Since June 1973 the Singapore dollar has been allowed to "float". The average exchange rate (Singapore dollars per U.S. dollar) was: 2.809 in 1972; 2.444 in 1973; 2.437 in 1974; 2.371 in 1975.

# THE CONSTITUTION

(1958, subsequently amended)

### HEAD OF STATE

The Head of State is the President, elected by Parliament for a four-year term. He normally acts on the advice of the Cabinet.

### THE CABINET

The Cabinet, headed by the Prime Minister, is appointed by the President and is responsible to Parliament.

### THE LEGISLATURE

The Legislature consists of a Parliament of sixty-nine members, presided over by a Speaker who may be elected from the members of Parliament themselves or appointed by Parliament although he may not be a member of Parliament. Members of Parliament are elected by universal adult suffrage.

A 21-Member Presidential Council chaired by the Chief Justice examines material of racial or religious significance, including legislation, to see whether it differentiates between racial or religious communities or contains provisions inconsistent with the fundamental liberties of Singapore citizens.

### CITIZENSHIP

Under the constitution Singapore citizenship may be acquired either by birth, descent or registration. Persons born when Singapore was a constituent State of Malaysia could also acquire Singapore citizenship by enrolment or naturalization under the constitution of Malaysia.

## JUDICIAL SYSTEM

A Supreme Court consisting of the High Court, the Court of Appeal and the Court of Criminal appeal was established by the Supreme Court of Judicature Act. The High Court exercises original criminal and civil jurisdiction in appeals from the Subordinate Courts. An appeal from the High Court lies to the Court of Criminal Appeal or the Court of Appeal which exercises appellate jurisdiction. In certain cases, a further appeal lies from the decision of the Court of Criminal Appeal or Court of Appeal, as the case may be, to the Judicial Committee of the Privy Council in the United Kingdom.

The Subordinate Courts consist of Magistrates' and District Courts which have limited civil and criminal jurisdiction. There is also an Industrial Arbitration Court to regulate labour relations.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Somali Democratic Republic lies on the east coast of Africa, with Ethiopia to the north-west and Kenya to the west. There is a short frontier with the French Territory of the Afars and the Issas. The climate is dry and hot with a mean temperature of 80°F (20°C) rising to 108°F (42°C) inland. The national language and official written language is Somali. English, Italian and Arabic are also widely spoken. The population is mainly Muslim but there is a small Christian community, mostly Roman Catholic. The national flag (proportions 3 by 2) is pale blue, with a large five-pointed white star in the centre. The capital is Mogadishu.

### Recent History

The former British Somaliland and Italian Somaliland united to form the independent Republic of Somalia in July 1960. The frontier dispute between Britain and Somalia over the Kenya Northern Frontier District resulted in the breaking off of diplomatic relations by Somalia in 1963. A further dispute over frontiers with Ethiopia led to fighting in 1964. Diplomatic relations with Kenya and the United Kingdom were resumed in 1968, although relations with Ethiopia have deteriorated as a result of Somalia's claim to the Ogaden district and its support for the Eritrean Liberation Front (ELF). The dispute with Ethiopia over the future of the adjoining French Territory of the Afars and the Issas remains unresolved.

In October 1969 the President of the Republic, Abdi Rashid Ali Shermarke, was assassinated and the police and army seized power. The 1960 constitution was suspended and a new government was formed by a Supreme Revolutionary Council (S.R.C.). On the first anniversary of the revolution in October 1970 the Head of State, General Mohamed Siad Barre, declared Somalia a socialist state and began a revolutionary programme of national unification and social and economic reform.

Somalia has become more aligned with Communist countries and a friendship and co-operation treaty with the U.S.S.R. was ratified in July 1974, though Somalia denies the existence of Soviet bases on its territory. The country has taken a strong pro-Arab stance in foreign policy, and in 1974 became a member of the Arab League.

The 1974/75 Rural Development Programme, in which over 30,000 students and other volunteers participated, achieved considerable success in bridging the wide gap between the nomads and the more advanced sector of society. In October 1974 a state of emergency was declared in view of the devastation being caused by the worst drought in Somali history. With foreign assistance, especially from the U.S.S.R., relief was provided for a third of the population, and 120,000 nomads who had lost their livestock were resettled in farming areas in the south and in fishing settlements along the coast.

In 1976 the Somali Socialist Revolutionary Party (S.S.R.P.) was formed by the Government. Although power was formally transferred to the party, the personnel of government remained largely unchanged.

### Government

Government is by the Supreme Revolutionary Council, all former army officers, headed by the President, and the Central Committee of the S.S.R.P., which is responsible for ministerial appointments. Somalia is a one-party state. There are 15 regions divided into 78 districts.

### Defence

Of total armed forces of 25,000 in 1976, the army numbered 22,000 men, the navy 300 and the air force 2,700. In addition there were 500 para-military border guards and 2,500 members of the People's Militia. Military service is voluntary. The armed forces are partly equipped by the Soviet Union. There are facilities for the Soviet fleet at the port of Berbera, and an estimated 1,500 Soviet military advisers in Somalia.

### Economic Affairs

The economy is based mainly on the raising of livestock by nomads and subsistence agriculture, which together provide a living for about 90 per cent of the population. Livestock and livestock products account for 70 per cent of export earnings. Agriculture consists of a large dry farming sector, producing maize, sorghum and other food grains, and a smaller commercial sector relying on irrigation for the cultivation of bananas, sugar cane and cotton. Bananas are the principal cash crop and the second largest source of foreign exchange.

Much of the country's livestock perished in the drought which began in 1973 and this has accelerated moves to diversify and stabilize the economy. The Government is encouraging settled agriculture on a collectivist basis and expanding the fishing industry with technical assistance from the U.S.S.R. The modest mineral resources so far discovered, including tin, gypsum, uranium and iron ore, are being exploited, and petroleum prospecting has gathered momentum since it began in 1957. The small agro-based industrial sector, formed principally by state-owned food processing plants, is growing and there are plans for a second major sugar refinery, an oil refinery and a cement works. The private sector of the economy has been greatly reduced by systematic nationalization.

The 1971–73 Development Programme, with an estimated expenditure of about 1,000 million Somali Shillings, gave the most emphasis to transport and communications. Estimated expenditure for the 1974–78 Development Plan will be over three and a half times as much, and two-thirds of the investment will come from foreign sources. The current Plan concentrates primarily on transport and communications, agriculture and industry. Somalia's usual balance of payments deficit has been exacerbated by the costs of the drought, although there are signs of economic recovery for 1977.

### Transport and Communications

There are no railways, and roads, though generally poor, provide the principal means of transport. There is an extensive road development programme, with Chinese and World Bank aid, designed to link north and south and all the main towns and villages. The highway between Belet-

Uen and Burao is the second largest Chinese aid project in Africa, costing an estimated 75 million Somali shillings. Nomads rely on pack transport. The ports of Mogadishu and Kismayu are connected by regular services with ports of Eastern Africa and Italy. The port of Mogadishu is currently undergoing expansion. There are eight airfields.

### Social Welfare

There is no state system of social insurance but plans are under way for improving social welfare facilities. Medical treatment is free at government hospitals and dispensaries. Health services are being further developed, and 40 million Somali shillings were allocated to the Health Ministry in the 1975 budget, compared with 23.8 million in 1969. There are plans to build three hospitals near the resettlement areas between the Juba and Shebelli rivers.

### Education

All private schools were nationalized in 1972, and education is now free. The illiteracy rate, which was 90 per cent before the introduction of the Somali script in 1972, fell below 40 per cent following the 1974/75 literacy campaign. There were 240,550 children at school in 1975, compared with just over 55,000 in 1969, and university enrolment rose from 337 to 2,809 over the same period. A new university, due to be completed in 1977, will have an intake of 2,000 students. Formal education is being geared to the technical and economic needs of the country, and there are plans to create comprehensive training centres for nomads in ten regions. UNESCO is assisting in the development of a countrywide library service.

### Tourism

Tourism in Somalia is undeveloped.

*Visas* are required by nationals of all countries.

### Sport

Football is the most popular game. Other sports are basketball, volleyball, boxing, shooting and swimming.

### Public Holidays

**1977:** May 1st (Labour Day), June 26th (Independence Day), July 1st (Foundation of the Republic), September 15th (Id ul Fitr, end of Ramadan), October 21st (National Day, anniversary of military *coup* in 1969), October 24th (United Nations Day), November 22nd (Id ul Adha, Feast of the Sacrifice), December 21st (Ashoura).

**1978:** February 20th (Mouloud, Birth of the Prophet).

### Weights and Measures

The metric and imperial systems are both used.

### Currency and Exchange Rates

100 centesimi = 1 Somali shilling.

Exchange rates (December 1976):

£1 sterling = 10.431 Somali shillings;
U.S. $1 = 6.295 Somali shillings.

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of South Africa occupies the southern extremity of the African continent. To the north-west lies Namibia (South West Africa), with Botswana and Rhodesia to the north, Mozambique to the north-east, and Swaziland to the east. South African territory encircles the independent state of Lesotho. The climate is warm and sunny, with average temperatures about 63°F (17°C). The official languages are Afrikaans and English; the principal African languages are Xhosa, Zulu and Sesotho. The population is mainly Christian. The politically influential Dutch Reformed Church is adhered to by 55 per cent of the white population. About a fifth of the African Christians belong to African Separatist Churches and others are Methodists and Anglicans. Most Asians are Hindus. The national flag (proportions 3 by 2) is a horizontal tricolour of orange, white and blue, charged in the centre of the white stripe with the Union Jack, the old Orange Free State flag, and the old Transvaal Vierkleur. The administrative capital is Pretoria, the legislative capital is Cape Town and the judicial capital is Bloemfontein.

### Recent History

In 1910 four British dependencies were merged to form the Union of South Africa, a dominion under the British Crown. Under the Statute of Westminster, passed by the British Parliament in December 1931 and accepted by South Africa in June 1934, the Union was recognized as an independent country. Since the establishment of South Africa, national administration has been the exclusive preserve of Europeans, who formed less than 17 per cent of the population in 1974. Only Europeans may vote and all members of Parliament must be white. Africans, who comprise over 70 per cent of the population, have no representation of any kind at national level.

The National Party came to power in 1948 and has ruled South Africa ever since. South Africa became a Republic in 1961. The main architect of *apartheid* (in theory the separate but equal development of all racial groups, in practice leading to white, particularly Afrikaner, supremacy) was Dr. Hendrik Verwoerd, Prime Minister from 1958 to 1966, when he was assassinated. *Apartheid* has been internationally condemned with the result that South Africa has been increasingly ostracized. This has led to its expulsion from many international bodies, and its withdrawal from the Commonwealth in 1961.

The South African Government has established "homelands", comprising some 13 per cent of all land in the country, for African ethnic groups as an integral part of the *apartheid* policy, and promises to make them independent by stages. The Transkei homeland was granted its independence in October 1976, but only South Africa has accorded it diplomatic recognition. The other "homelands", except for Bophuthatswana, have declared their opposition to independence. The mass of discriminatory laws which regulate the lives of the Republic's African, Coloured and Asian populations and stringent security legislation have led to the detention without trial of many of the Government's opponents, the banning of African political organizations outside the homelands, a large prison population and the forced removal of hundreds of thousands of Africans under the Group Areas Act and the homelands policy. In 1974 there were further bannings of dissidents and stricter curbs on what remains an outspoken press. Verwoerd's successor, Balthazar Vorster, has continued Verwoerd's basic policies, although in the early 1970s some petty aspects of *apartheid* were relaxed. In 1976, however, he used the virtually limitless powers conferred by the Internal Security Act to crush riots and strikes in African urban areas. These began in June at Soweto (South-Western Townships), near Johannesburg, and spread to many other black and coloured communities. Several hundred people died in confrontations with the police and many more were detained without trial. Only minor concessions were made to the black and coloured communities, despite appeals for change from many sources.

The parliamentary majority of the National Party increased in each election between 1948 and 1970, when the opposition United Party (UP) made small gains. These were lost in the 1974 elections, which the Nationalists won convincingly, and a new opposition platform was formed the following year when the anti-*apartheid* Progressive Party became the Progressive Reform Party after assimilating a breakaway group of UP members. Following the riots in 1976, the UP initiated moves to form a united opposition to the National Party.

The International Court of Justice and the UN have declared South Africa's presence in Namibia (South West Africa) illegal. The Namibian constitutional conference organized by South Africa late in 1975 failed to win the recognition of the UN and the OAU because of the ethnic and non-democratic system of representation. In 1976 South Africa accepted the conference's proposal of December 31st, 1978, as a target date for Namibian independence, although the UN and the OAU recognize the South West Africa People's Organisation (SWAPO) as the sole representative of the Namibian people. SWAPO has boycotted the conference and is waging a mounting guerrilla campaign against South African military forces in the territory.

South African support for Rhodesia after its unilateral declaration of independence in 1965 attracted world criticism but, since the independence of the neighbouring Portuguese territories of Angola and Mozambique under black rule and the consequent change in the balance of power in favour of black Africa, the Vorster government has exerted pressure on the Smith regime to negotiate with African nationalists. South African military support of the forces opposing the Soviet-backed MPLA nationalist movement in the Angolan civil war in late 1975 and early 1976 caused widespread criticism and threatened to undo the achievements of *détente*. Nevertheless, it was pressure from Mr. Vorster, as well as the U.S. Secretary of State, Dr. Henry Kissinger, that persuaded Ian Smith to announce his acceptance of proposals leading to majority rule within two years and to attend the unsuccessful conference at Geneva in 1976.

### Government

Legislative power rests with the bicameral Parliament, made up exclusively of European (white) members who hold office for five years, subject to dissolution. The Senate has 55 members: 42 elected by electoral colleges of the four provinces, two similarly elected for South West Africa (Namibia) and 11 nominated by the State President (two for each province and South West Africa and one representative of the Cape Coloured people). The House of Assembly has 171 members directly elected by Europeans: 165 for South Africa and six for South West Africa. Only Europeans may vote.

Executive power is vested in the State President, elected by a joint session of Parliament for a seven-year term as constitutional Head of State. He acts on the advice of the Executive Council (Cabinet), led by the Prime Minister, which is appointed by the President and responsible to Parliament.

A Coloured Persons' Representative Council was introduced in 1969, and in 1976 a Cabinet Council, comprised of government ministers and leaders of the Indian and Coloured communities, was set up as an advisory body.

Each province has an Administrator appointed by the State President for five years and a unicameral Provincial Council elected by whites for five years.

The Transkei "homeland" was granted independence in October 1976 but only South Africa has accorded it diplomatic recognition. Legislative Assemblies have been created for the other seven homelands.

### Defence

In 1976 the armed forces totalled 16,100 regulars: army 7,000, navy 3,600 and air force 5,500. Military training is compulsory for all European citizens. The period of service is a minimum of 12 months continuous service with five further annual training periods. A Coloured Cadet Corps has been established. The Citizen Force reserve totals 173,500, of which the army has 138,000, the navy 10,500 and the air force 25,000. In 1976 the army had 31,000 conscripts, the navy 1,400 and the air force 3,000. Paramilitary forces number 90,000. There is limited military service for Coloureds and a service battalion for Asians was established in 1976. The 1976/77 defence estimates totalled R1,350 million, 42 per cent higher than the figure for 1975/76.

### Economic Affairs

South Africa has successfully diversified its economy and about one-third of the national income is now derived from manufacturing. The establishment of the South African Iron and Steel Industrial Corporation (ISCOR) and the South African Coal, Oil and Gas Corporation (SASOL) laid the foundations of the heavy engineering, chemical and petroleum industries. The textile and food processing industries are also growing. Mining still contributes largely to the economy and gold is the main export, providing about a third of all export earnings. In December 1973 the government terminated its gold agreement with the International Monetary Fund because of the rise of the free market price of gold to far above the official parity price with the U.S. dollar. Uranium is mined with gold. Much of the mining labour force comes from Lesotho, Botswana and Malawi, where President Banda suspended recruitment in 1974. The huge wages gap between Europeans and Africans remains a major source of discontent.

Industrial development is dependent on the white population for capital, management and higher technical skill, with the Africans, Coloureds and Asians providing most of the unskilled labour force.

Much livestock is reared in South Africa and there are valuable fruit, wine and fishing industries. The export of wool, maize, sugar and karakul pelts is important.

Despite the soaring cost of oil imports and increasing inflation, reaching 14 per cent in 1974, real G.D.P. and G.N.P. rose by 7.2 and 10 per cent respectively in 1974. The huge rise in the gold price on the free market, the country's large reserves of cheap coal and record prices for maize and sugar exports were indications of the strength of the economy in 1974 although recession set in the following year. A sharp fall in the price of gold and a worsening trade deficit, accentuated by heavy government purchases of oil and arms, caused a 17.9 per cent devaluation of the rand in September 1975. Despite the continuing rise in inflation, government expenditure for 1975/76 rose by 33 per cent and gave priority to defence and the infrastructure. The 1976/77 budget contains measures to curb inflation, which was 11 per cent in the year to July 1976, and to reduce the balance of payments deficit, although defence estimates, which account for much of the deficit, were increased by 42 per cent. A 20 per cent import deposit scheme, from which oil and other essential imports are exempt, was introduced for six months from August 1976. Foreign investment has declined rapidly since 1975 and unemployment, principally among black workers, was almost 20 per cent at the end of 1976.

### Transport and Communications

Railways, ports, airways and harbours are administered by the state. There are no navigable rivers. Private omnibus services are regulated to dove-tail with the railways. Roads are good and a national highway system is being built. There are many internal and international air services and considerable ocean shipping traffic. An 800-km. railway line links Sishen with Saldanha Bay for the export of iron ore and associated products. A substantial extension has been made to the harbours at Richards Bay and Saldanha Bay, and to the rail link from Witbank to Richards Bay for coal export. South Africa's first television service, in English and Afrikaans, was opened in January 1976.

### Social Welfare

Social welfare services protect the old, the blind, the war disabled, the unemployed and those injured at work. Medical services are administered by the Provinces. These reach a high standard although there is considerable disparity between health facilities available to whites and non-whites.

### Education

For Europeans, schooling is compulsory from seven to sixteen in English-medium or Afrikaans-medium schools; for Coloureds it is compulsory from seven to sixteen in Natal and seven to fourteen in the Cape Province where possible; for Asians attendance is compulsory where possible. In 1970 there were fewer than 10,000 African, Coloured and Asian graduates. Though in 1975 over 3 million Africans were at primary school, about half leave before their fifth year. In 1976 schooling was made compulsory for all Africans between the ages of 7 and 11. Africans' education is in English and their own languages and the curriculum is limited. Segregation is enforced by the Government in all universities though a few non-white individuals attend specialized courses at "white" universities.

### Tourism

Tourism is an important industry and there were over half a million visitors to South Africa in 1973. South Africa's attractions are the climate, the scenery and wildlife. The great game reserves, of which the Kruger National Park is the largest, attract thousands of visitors from Europe, America and Africa. South Africa, Malawi, Mauritius and Swaziland are members of a regional tourist council for Southern Africa.

*Visas* are not required to visit South Africa by holders of British, Canadian and Irish passports.

### Sport

Sport is strictly racially segregated except at international level. Rugby football is the national game but many games are played, such as soccer, tennis, cricket, bowls, golf and baseball. The country is almost completely isolated in world sport because of *apartheid*, and the country is barred from competing in the Olympic Games.

### Public Holidays

**1977:** May 19th (Ascension), May 31st (Republic Day), September 6th (Settlers' Day), October 10th (Kruger Day), December 16th (Day of the Covenant), December 25th–26th (Christmas Day and Boxing Day/Family Day).

**1978:** January 1st (New Year's Day), March 24th–27th (Easter).

### Weights and Measures

The metric system is in use.

### Currency and Exchange Rates

100 cents = 1 rand (R).

Exchange rates (December 1976):

£1 sterling = 1.441 rand;
U.S. $1 = 87.0 S.A. cents.

## FINANCE

100 cents=1 rand (R).
Coins: ½, 1, 2, 5, 10, 20 and 50 cents.
Notes: 1, 2, 5, 10 and 20 rand.
Exchange rates (December 1976): £1 sterling=1.441 rand; U.S. $1=87.0 S.A. cents.
100 rand=£69.40=$115.00.

*Note:* The rand was introduced in February 1961, replacing the South African pound (at par with the pound sterling) at the rate of £1=2 rand. From September 1949 the pound had been valued at U.S. $2.80, so the initial value of the rand was $1.40 ($1=71.43 South African cents). This valuation remained in effect until August 1971. Since December 1971 the exchange rate has been frequently adjusted. It was U.S. $1=75 South African cents (1 rand=$1.333) from December 1971 to June 1972; $1=78.29 S.A. cents (1 rand=$1.277) from October 1972 to February 1973; $1=70.46 S.A. cents (1 rand=$1.419) from February to June 1973; and 1 rand=$1.49 ($1=67.114 S.A. cents) from June 1973 to June 1974. In terms of sterling the rand was valued at 11s. 8d. or 58.33p (£1=1.714 rand) from November 1967 to August 1971; and at 51.17p (£1=1.954 rand) from December 1971 to June 1972. From June 1974 to June 1975 the South African authorities had an exchange rate policy of "independent managed floating", with frequent small adjustments made to the buying and selling rates. The rand was devalued from $1.47 to $1.40 in June 1975, and further devalued to $1.15 in September 1975. The average market value of the rand was $1.444 in 1973; $1.472 in 1974; and $1.366 in 1975.

# THE CONSTITUTION

(Republican Constitution, 1961, subsequently amended)

### Executive Power

Executive power is vested in a State President, acting on the advice of Ministers of State or the Cabinet, composed of a Prime Minister and 17 other Ministers. The President is elected by an electoral college of members of the Senate and House of Assembly, presided over by the Chief Justice or a Judge of Appeal. He holds office for a seven-year term and is not eligible for re-election unless "it is otherwise decided" by the electoral college. He is Head of State and Commander-in-Chief of the Armed Forces. The Ministers are members of the Executive Council and they are appointed to administer such departments of State as are established by the State President-in-Council. Deputy Ministers, not exceeding eight in number, may be appointed by the State President to assist Ministers in the administration of departments of State. Deputy Ministers are not members of the Executive Council.

### Parliament

The Parliament of the Republic consists of the State President, a Senate and a House of Assembly. The State President has power to summon, prorogue and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. There must be a session of Parliament at least every twelve months.

### The Senate

Senators must be nationals of European descent, at least 30 years of age, qualified as voters, and resident at least five years within the Republic.

The Senate, as constituted in December 1965 and reconstituted in 1974 consists of 55 white members: 42 elected by the electoral colleges of the four provinces (15 for the Transvaal, 11 for the Cape Province, 8 each for the Orange Free State and Natal) and two similarly elected for South West Africa. Eleven members are nominated by the State President, two for each of the four provinces and South West Africa (of whom half are chosen for their thorough knowledge of the reasonable wants and wishes of the non-White people) and one special representative of the interests of the Cape Coloured people.

### The House of Assembly

Members of the House of Assembly must be nationals of European descent, must be registered voters and resident for at least five years in the Republic. The House of Assembly continues for five years unless previously dissolved.

All White persons over the age of 18 are entitled to vote, except those who have been convicted of treason, murder, or any other offence punishable by a term of imprisonment without option of a fine.

The House consists of 171 White members; 165 directly elected by white citizens, aged 18 years or over, to represent the electoral divisions of the Republic, and 6 similarly elected to represent the electoral divisions of South West Africa.

### Representation of Coloureds

The Coloured Persons' Representative Council Act of 1964 established a Council for Coloured Affairs whose function is to advise the Government in regard to matters affecting the interests of the Coloured people of the Republic. This Council has become a self-governing body for the Coloured people with certain legislative and administrative powers and consists of 40 members elected by Coloured voters and 20 nominated members. It is called the Coloured Persons' Representative Council. First elections took place in September 1969. All Coloured men and women over 21 are able to vote.

In 1976, a cabinet council of government ministers and Asian and coloured leaders was established as an advisory body.

### Representation of Blacks

Five of eleven nominated Senators are selected for their thorough acquaintance with the reasonable wants and wishes of the African peoples.

The Native Affairs Act, 1920, made provisions for the establishment in African areas of local and general councils with minor powers of local self-government.

The Representation of Natives Act, 1936, transferred Cape Africans from the same voters' lists as Whites to the Cape Native Voters' Roll and, as a *quid pro quo* for their rights to participate in ordinary elections, empowered them to elect three members of the House of Assembly and two members of the Cape Provincial Council. Special representation for the African population of the Republic as a whole was provided for in that, through electoral colleges Africans could elect four Senators to represent their interests in Parliament, and could also elect some members of the Natives Representative Council, established by the Act.

### Procedure

Money Bills must originate in the House of Assembly, which may not pass a Bill for taxation or appropriation unless it has been recommended by message from the State President during the session. The amendment of money Bills by the Senate is restricted and such Bills, when passed by the House of Assembly in any session, may become law even if the Senate in the same session fails to pass them or passes them with amendments to which the House of Assembly cannot agree. The provisions of sections 108 and 118 of the Republic of South Africa Constitution Act, relating to the equality of the two official languages of the Republic and the amendment of that Act, may be altered or repealed only by both Houses of Parliament sitting together, and at the third reading must be agreed to by not less than two-thirds of the total number of members of both Houses.

Other Bills may, in the event of disagreement between the two Houses, become law after rejection by the Senate in two successive sessions.

The State President may assent to, or withhold assent from, a Bill. Two copies of every law, one in English and one in Afrikaans, are to be enrolled on record in the office of the Registrar of the Appellate Division of the Supreme Court of South Africa. In case of conflict between the two copies, that signed by the State President shall prevail.

### Provincial Government

Provision is made for the appointment of an administrator in each province, who holds office for a term of five years. In each province there is also a provincial council consisting of the same number of members as are elected in the province for the House of Assembly, but in no case is the membership to be less than 25. A member of a provincial council ceases to be a member on being elected to either House of the Central Parliament. The powers of the provinces, which relate chiefly to the administration of local affairs (mainly roads, hospitals and education) are subordinate to the powers of the Central Parliament and all provincial ordinances require the consent of the State President-in-Council.

An executive committee of four persons, not necessarily members of the council, together with the administrator as chairman, is elected by the provincial council at its first meeting after each general election. This committee carries on the administration of affairs on behalf of the provincial council. The administrator may, and when required to do so must, act on behalf of the State President-in-Council in regard to all matters in respect of which no powers are reserved or delegated to the provincial council.

## COLOURED PERSONS' REPRESENTATIVE COUNCIL

The Coloured Persons' Representative Council was prorogued in July 1974, after the anti-*apartheid* Labour Party had gained control of the Council. Previously the Federal Party, led by Tom Swartz and basically supporting *apartheid*, had held a majority in the 60-member Council through the aid of 20 Government appointees. A delegation from the CRC led by the Labour Party leader Sonny Leon demanded direct representation in the all-white central parliament, but the Prime Minister refused, saying it would lead to the exploitation of the Coloured vote. New elections for the CRC were held in March 1975 when the Labour party won 28 seats, the Federal party 8 and Independents 1; Chair. ALATHEA JANSEN.

**The South African Indian Council:** f. 1964 to protect the interests of Asians in South Africa.

# POLITICAL PARTIES

**National Party:** P.O.B. 245, Pretoria; f. 1912; aims: (1) to safeguard the White nation in its South African homeland; (2) to lead the Black nations to effective self-government in their homelands; (3) to give all nations equal opportunity to develop the social and political organizations best suited to their own particular characteristics and aspirations; (4) to raise living standards in White and Black homelands alike; Leader Balthazar Johannes Vorster.

**United Party:** French Bank Bldg., 4 Church Square, Cape Town 8001; f. 1934; seeks a solution of racial problems through the creation of a Federation of Races governed by a Central Parliament in which all racial groups will be represented. There will be a sharing of power at the central level and each group will control its own affairs at the next level; Leader Sir De Villiers Graaf.

**Progressive Reform Party:** 6th Floor, Garmor House, Plein St., Cape Town; f. 1975 after merger of Progressive and Reform parties; advocates a federal constitution with self-governing states based on territorial not racial divisions, power-sharing between all races and the abolition of discriminatory legislation; 14 representatives in Parliament; Leader Colin W. Eglin; Nat. Chair. R. A. F. Swarz; Chair. Nat. Exec. H. Schwartz.

**Herstigte Nasionale Party:** Pretoria; f. Oct. 1969 by M.P.s expelled from National Party; believes in word of God as defined by Calvinism, that *apartheid* must be more strictly applied, that external relations must not affect South Africa's sovereignty and that immigration must be controlled to preserve Christian national civilization, favours Afrikaans becoming the National language; Leader Dr. Albert Hertzog; Deputy Leader Jaap Marais.

**Democratic Party:** formed to provide a moderate centre group in South African politics; Chair. Theo Gerdener.

**African National Congress of South Africa:** f. 1912; aims to establish a non-racial society in co-operation with left-wing and liberal organizations of other races; banned 1960; Pres. Nelson Mandela (detained for life); Acting Pres. Oliver Tambo; Sec.-Gen. Walter Sisulu (detained for life).

**Black Unity Front** (**BUF**): f. 1976; Leader Chief Gatsha Buthelezi.

**Pan-Africanist Congress of Azania:** f. 1959; splinter group from the African National Congress; believes that a democratic society can only come through African and not multi-racial organizations; banned 1960.

**Black People's Convention:** f. 1972; first non-tribal black political movement to emerge since 1960; membership limited to Africans; Pres. Kenneth Rachidi (detained); Acting Pres. Mxolisi Mvovo.

## JUDICIAL SYSTEM

The common law of the Republic of South Africa is the Roman-Dutch law, the uncodified law of Holland as it was at the time of the secession of the Cape in 1806. The law of England is not recognized as authoritative, though the principles of English law have been introduced in relation to civil and criminal procedure, evidence and mercantile matters. In all other matters, however, Roman Dutch law prevails.

The Supreme Court consists of an Appellate Division; three Provisional Divisions and one Local Division in the Cape Province, one Provincial and one Local Division in each of the provinces of the Transvaal and Natal and one Provincial Division in the Orange Free State and Namibia (South West Africa). Except for the fact that the local divisions in the Transvaal and Natal have no jurisdiction to hear appeals, they exercise within limited areas the same jurisdiction as Provincial Divisions.

The provinces are further divided into districts and regions with Magistrates' Courts, whose criminal and civil jurisdiction is clearly defined. From these courts appeals may be taken to the Provincial and Local Divisions of the Supreme Court, and thence to the Appellate Division.

## THE PRESS

The press in South Africa is extremely vigorous, and an outspoken section of it supports the opposition. The English-language newspapers have considerable freedom of expression but in October 1974, the Newspaper Press Union amended its code of conduct under strong Government pressure and empowered the South African Press Council to fine newspaper editors up to R.10,000 if they infringed it. The new amendments related to security matters and stirring up of inter-racial feeling, and were strongly criticized for their vagueness by some editors.

Under the Publications Act of 1974 the Publications Control Board had its powers extended, and appeal to the courts against its decisions was removed. This tightened still further the censorship prevailing in South Africa particularly regarding reading material and the cinema. The Newspaper Press Union members were exempted from the provisions of the Bill.

South African Broadcasting Corporation's first television service was opened in January 1976. There are English and Afrikaans programmes in colour and black-and-white. The service is expected to run at a loss until commercial television begins in 1978. Work has started on an African service due to be completed in 1980. There were an estimated 1 million viewers and 250,000 sets in early 1976.

## BANKING

(cap.=capital; p.u.=paid up; dep.=deposits; m.=million; R.=Rand)

In May 1973 the Government announced plans for increased local shareholdings in banks over the next ten years though these have since been considerably modified. In November 1973 the Minister of Finance said that though foreign-controlled banks would be required to reduce foreign shareholdings in them to 50 per cent by 1983, they would no longer be forced to reduce them further to 10 per cent.

## THE BANTU HOMELANDS

The Bantu Self Government Act, 1959, accepts the natural division of the African population into eight national units. The Transkei Territorial Authority was set up in 1962 and it received limited internal "self-government" in 1963, this being the next step to independence which the South African Government has promised the homelands. In 1971 the Bantu Homelands Constitutional Bill empowered the South African Government to grant self-government, on a similar basis to that already granted to the Transkei, to any African area which had a Territorial Authority, at its request. Bophuthatswana (June 1972), the Ciskei (August 1972), Lebowa (October 1972), Gazankulu (February 1973), Vhavenda (February 1973), KwaZulu (April 1973) and Basotho Qwaqwa (November 1974) have since been granted "self-government". The Transkei was declared independent in October 1976. However, Chief Gatsha Buthelezi of KwaZulu has strongly opposed the homelands policy and called for majority rule in South Africa.

## THE CONSTITUTION

The independence constitution which came into effect on October 26th, 1976, provides for Umtata to be the seat of government. Executive power resides in the President, elected by the National Assembly for a seven-year term. He acts on the advice of an executive council, appointed by the President, of not more than 15 ministers. All powers, authorities and functions of the President of South Africa have been transferred to the President of the Transkei.

There is a unicameral parliament of 70 chiefs and five paramount chiefs, who are co-opted by their peers, and 75 members who are elected for five years by universal suffrage of all Transkeian citizens aged 25 or over. A quorum is formed by 35 or more members.

The National Assembly has repealed 28 South African Acts, including the 1950 Group Areas Act, the 1953 Reservation of Separate Amenities Act and the 1964 Coloured Persons' Representative Council Act.

All citizens and residents of the Transkei are "assured of social, political and economic justice, freedom of speech, assembly and worship and unimpeded access to, and equality before, the law". Africans of Xhosa origin living outside the Transkei are given the option of becoming citizens.

The official language is Xhosa, although Sotho and English are used for judicial, legislative and administrative purposes.

# SPANISH NORTH AFRICA

Spanish North Africa comprises two enclaves within Moroccan territory, Ceuta, on the north African coast opposite Gibraltar, and Melilla, situated on a small peninsula jutting into the Mediterranean; two small towns on the Mediterranean coast and some uninhabited islands. In 1977 Spanish North Africa was being administered as an integral part of Spain, although this arrangement was disputed in the territories.

## CEUTA

**Area:** 19 square km.

**Population** (1973): 64,576.

**External Trade:** Ceuta is a duty-free port. Trade is chiefly with Spain, the Balearic and Canary Islands and Melilla.

**Transport:** Much of the traffic between Spain and Morocco passes through Ceuta; there are ferry services to Algeciras, Spain.

**Education:** (1972-73): Primary: 215 schools, 10,038 pupils; Secondary: 2,838 pupils.

**Government:** In both Ceuta and Melilla civil authority is vested in an official directly responsible to the Ministry of the Interior and military authority is vested in a Commandant-General. At present both these positions are held by one official. A Mayor administers the town of Ceuta and he is also a member (under the title *Procurador*) of the Spanish Parliament in Madrid. Procurador SERAFINO BECERRA.

**Religion:** Most Africans are Muslims; Europeans are nearly all Catholics; there are a few Jews.

**Radio:** *Radio Ceuta*, Virgilio Oñate 1, Ceuta; commercial; owned by Sociedad Española de Radiodifusión; Dir. J. SOLERA.

## MELILLA

**Area:** 12.3 square km.

**Population** (1973): 59,529.

**External Trade:** Melilla is a duty-free port. Most imports are from Spain but over 90 per cent of exports go to non-Spanish territories. Chief exports: fish and iron ore from Moroccan mines.

**Transport:** There is a daily ferry service to Málaga and a weekly service to Almería. Melilla airport is served by a daily service to Málaga, operated by Iberia.

**Education** (1972-73): Primary: 232 schools, 7,028 pupils; Secondary: 3,048 pupils.

**Government:** A mayor administers the town.

**Radio:** *Radio Melilla*, O'Donell 26, Melilla; commercial; owned by Sociedad Española de Radiodifusión; Dir. G. PALAU.

## OTHER POSSESSIONS

These are Peñón de Vélez de la Gomera and Villa Sanjurjo, on the Mediterranean coast between Ceuta and Melilla, and the Chafarinas Islands lying east of Melilla near the Algerian border. Peñón de Vélez de la Gomera and Villa Sanjurjo are small towns. The Chafarina Islands have no permanent inhabitants.

# SRI LANKA

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Republic of Sri Lanka (formerly called Ceylon) lies 50 miles east of the southern tip of India. The climate is tropical, average temperature 80°F (26°C); the south-west around Colombo receives heavy monsoon rains. The official language, Sinhala, is spoken by about 70 per cent of the people; Tamil and English are also widely used. More than 66 per cent of the population are Buddhist, about 18 per cent are Tamil-speaking Hindus and there are important Christian (mostly Roman Catholic) and Muslim minorities. The national flag (proportions 35 by 18) is dark crimson with a yellow border, in each corner of which a Bo leaf is depicted. In the centre is a gold lion and at the left are two vertical stripes of green and orange. The capital is Colombo.

### Recent History

Sri Lanka, known as Ceylon until 1972, gained its independence from the United Kingdom in February 1948. From then until 1956, for a brief period in 1960 and from 1965 to 1970 the country was ruled, latterly in coalition, by the United National Party (U.N.P.), which was concerned to protect the rights of the Tamils, Hindus living in the north and north-east of the country. The socialist Sri Lanka Freedom Party (S.L.F.P.), formed in 1951 by Solomon Bandaranaike, emphasized the national heritage, winning the support of groups that advocate the recognition of Sinhala as the official language and the establishment of Buddhism as the predominant religion. The S.L.F.P. won the 1956 elections decisively and remained in power, except for a three-month interruption in 1960, until 1965, having formed a coalition government with the Trotskyist Lanka Sama Samaj Party (L.S.S.P.) in 1964. Following the assassination of Solomon Bandaranaike in September 1959, his widow, Sirimavo Bandaranaike, took over the leadership of the S.L.F.P. which at the 1970 elections became the leading partner of a United Front coalition government with the L.S.S.P. and the Communist Party (Moscow Wing).

In 1971 the United Front Government introduced reforms of the judicial system and in May 1972 the Republican Constitution of Sri Lanka was adopted. This abolished the upper house of parliament and the Governor-General became President. Land reform laws were also passed.

No government since independence has effectively handled the country's economic problems of inflation, unemployment and dependence on foreign aid. In 1971 the United Front Government suppressed an uprising led by the left-wing Janatha Vimukti Peramuna (People's Liberation Front), which consists mostly of unemployed young graduates. A state of emergency was declared. In October 1976 the Government ended restrictions of movement of those arrested during the uprising and stopped surveillance of those given suspended prison sentences. A new People's Liberation Front emerged, led by Mahinda Wijesekera.

Tension between the Sinhalese and the Ceylon Tamils increased after 1970. In 1976 the main Tamil party, the Federal Party, and other Tamil groups formed the Tamil Liberation Front, calling for a separate Tamil state in the northern and eastern parts of the country.

In foreign policy Sri Lanka has adopted a non-aligned role. Sirimavo Bandaranaike is President of the non-aligned movement for 1976–79. Negotiations have been held with India since 1964 on the repatriation of stateless Tamils of Indian origin. In February 1974 India agreed to accept half the 150,000 Tamils in question.

The Government lost 10 out of 12 by-elections between 1970 and 1977. In 1975 three Trotskyist ministers were dismissed from the Cabinet and the L.S.S.P. was expelled from the coalition government. Communist support in the coalition weakened in 1976. The Communists supported strikes of transport unions in December, which were initiated by the U.N.P. and the L.S.S.P. The strikes ended in January 1977, when the Government threatened to recruit new employees for the strikers' positions. In February 1977 Mrs. Bandaranaike prorogued Parliament until May 19th. Several members of the S.L.F.P. resigned from the party and seven members of the Communist Party left the coalition government, forming an independent group within the opposition. The state of emergency was lifted in February 1977. General elections, postponed in 1976, are to be held in 1977.

### Government

Legislative and executive powers are vested in the unicameral National State Assembly, with 157 members: 151 elected for six years by universal adult suffrage and six appointed by the Cabinet. Direction of the Government is vested in the Cabinet, headed by the Prime Minister, which is responsible to the Assembly. Ministers are appointed by the President, a constitutional Head of State appointed for four years on the nomination of the Prime Minister. The country comprises 22 districts, each administered by an appointed government agent.

### Defence

In 1976 the armed forces totalled 13,600: army 8,900, navy 2,400, air force 2,300. Defence expenditure for 1976 was 159.8 million rupees.

### Economic Affairs

The predominantly rural population is concentrated in the wet south and south-west zones, where rubber, tea and coconuts are grown. Under land reform legislation, private ownership was limited in 1972 and company-owned estates, both foreign and domestic, were nationalized in 1975. One-third of the national income and 80 per cent of foreign exchange earnings are derived from the cultivation of tea and rubber, mostly on estates, and coconuts, a smallholders' crop. Output of these crops fell in the 1970s because of drought, and coconut exports were restricted in 1976.

Rice, the staple food, has been imported from the People's Republic of China (under the rubber-for-rice barter agreement), Thailand and Pakistan. Self-sufficiency in rice is expected to result from improved irrigation in the north, one of the aims of the Mahaweli Development Project inaugurated in January 1976. The Project also embraces flood control, the supply of water for domestic use and of hydro-electricity for industry.

The only commercially important mineral is graphite, although there are also deposits of iron ore, monazite, ilmenite sands, limestone, clay and kaolin. Export earnings of gems rose from Rs. 3 million in 1971 to Rs. 200 million in 1975. Inshore and off-shore oil exploration, begun in 1975, was not successful. Sri Lanka is developing its water resources and the Maskeli Oya and Samanalawewa projects are expected to produce sufficient power to meet immediate domestic requirements.

The public sector industries, which include cement, textiles, petroleum and fertilizers, are undertaken by state-sponsored corporations, and supply primarily the domestic market. Export earnings from industrial products increased from 1971 and reached a record Rs. 537.9 million in the first nine months of 1976. The Government encourages foreign investment.

Sri Lanka's principal trading partner is the People's Republic of China. Foreign aid for development projects has come from Middle East countries, Japan, the Netherlands, the U.S.S.R., the Federal Republic of Germany, the U.S.A., the Democratic People's Republic of Korea and Yugoslavia. Internal revenue finances the country's comparatively advanced welfare system. Increased spending on food subsidy and education resulted in a record budget deficit in 1976.

### Transport and Communications

Central Sri Lanka is hilly and thickly wooded, but good road and rail links make most parts of the island accessible. The railways are state-owned with about 1,500 km. of track. The state also runs a national omnibus service. Air Ceylon connects the main towns of the north and east to Colombo, and there are international services. The port of Colombo is one of the most important in the East.

### Social Welfare

There is an island network of hospitals, clinics and dispensaries where treatment is free. There were 456 hospitals in 1973, with 39,732 beds. In 1972 there were 3,251 doctors. Rice, the staple food, is subsidized by the state. The birth-rate dropped by almost 10 per cent between 1970 and 1976.

### Education

Education is compulsory and free between the ages of 5 and 14. The majority of schools are state-controlled and co-educational. There are nearly 10,000 primary and secondary schools, with 2.6 million pupils, and 28 teacher training colleges with over 9,000 students. The University of Sri Lanka is divided into five campuses. There are many technical colleges. The literacy rate is between 80 and 90 per cent.

### Tourism

As a stopping place for luxury cruises and by virtue of the spectacle of its Buddhist festivals, ancient monuments and natural scenery, Sri Lanka is one of Asia's most important tourist centres. Good motor roads connect Colombo to the main places of interest.

In 1975 103,204 visitors came to Sri Lanka.

*Visas* are not required to visit Sri Lanka by nationals of Australia, Austria, Canada, Denmark, Finland, France, Federal Republic of Germany, Ireland, Italy, Malaysia, the Netherlands, New Zealand, Norway, Pakistan, the Philippines, Singapore, Sweden, Switzerland, the United Kingdom and the U.S.A.

### Sport

Football, rugby, volleyball and cricket are the most popular games.

### Public Holidays

**1977:** May 2nd (May Day), May 3rd–4th (Wesak Full Moon holiday), May 23rd (Republic Day), June 30th (Bank Holiday), September 15th (Ramazan Festival Day), September 26th (Bandaranaike Commemoration Day), November 10th (Deepavali Festival Day), November 22nd (Id-ul-Azha), December 25th (Christmas), December 31st (Bank Holiday).

**1978:** January (Tamil Thai Pongal Day), February (Maha Sivarathri), February 20th (Milad-un-Nabi, Birth of the Prophet), March 24th and 27th (Easter), April 11th and 12th (Sinhala and Tamil New Year).

There is a holiday every lunar month on the day of the full moon.

*Note:* A number of Hindu, Muslim and Buddhist holidays depend on lunar sightings.

### Weights and Measures

Legislation in November 1974 provided for the introduction of the metric system but imperial units are still used for some purposes.

### Currency and Exchange Rates

100 cents = 1 Sri Lanka rupee.

Exchange rates (December 1976):

£1 sterling = 14.66 rupees;

U.S. $1 = 8.85 rupees.

## FINANCE

100 cents = 1 Sri Lanka rupee.

Coins: 1, 2, 5, 10, 25 and 50 cents; 1 rupee.

Notes: 2, 5, 10, 50 and 100 rupees.

Exchange rates (December 1976): £1 sterling = 14.66 rupees; U.S. $1 = 8.85 rupees.

100 Sri Lanka rupees = £6.82 = $11.30.

*Note:* Between September 1949 and November 1967 the Ceylon (now Sri Lanka) rupee was valued at 21 U.S. cents (U.S. $1 = 4.7619 rupees). In November 1967 the rupee was devalued by 20 per cent to 16.8 U.S. cents ($1 = 5.9524 rupees) and this valuation remained in effect until August 1971 and from November 1971 to July 1972. In terms of sterling, the exchange rate was £1 = 14.286 rupees from November 1967 to November 1971; and £1 = 15.510 rupees from December 1971 to June 1972. From July 1972 to May 1976 the Sri Lanka authorities maintained an official exchange rate against sterling at a mid-point of £1 = 15.60 rupees, thus allowing the rupee's value to fluctuate against other currencies in line with sterling ("floating" since June 1972). In May 1976 the link with sterling was ended and the rupee's value has since been determined in relation to a weighted "basket" of currencies of Sri Lanka's trading partners. The average market rate (rupees per U.S. dollar) was: 6.4048 in 1973; 6.6485 in 1974; 7.0498 in 1975.

## THE CONSTITUTION

The Constitution of the new Republic of Sri Lanka (Ceylon) was adopted and enacted by the Constituent Assembly of the People of Sri Lanka on May 22nd, 1972.

A summary of the main provisions of the Constitution follows.

### THE NATIONAL STATE ASSEMBLY

The Assembly consists of 157 representatives and exercises:

(*a*) the legislative power of the people;

(*b*) the executive power of the people, including the defence of Sri Lanka, through the President and Cabinet Ministers; and

(*c*) the judicial power of the people through Courts and other institutions created by law, except in the case of matters relating to its powers and privileges, wherein the judicial power of the people may be exercised directly by the National State Assembly.

The normal life of the Assembly is six years and there is universal suffrage for those over 18 years old.

### EXECUTIVE GOVERNMENT

A cabinet of Ministers is vested with the direction and control of the government of the Republic and is collectively responsible to the National State Assembly and answerable to the National State Assembly on all matters for which they are responsible. The Prime Minister determines the number of Ministers and Ministries and the assignment of subjects and functions to Ministers. The Prime Minister and other Ministers of the Cabinet and Deputy Ministers are appointed by the President.

### OTHER PROVISIONS

# JUDICIAL SYSTEM

**Chief Justice:** Hon. VICTOR TENNEKOON.

The judicial system consists of the Supreme Court, the Court of Criminal Appeal and 28 District Courts which have unlimited original civil jurisdiction and criminal jurisdiction in respect of all offences which are not within the exclusive jurisdiction of the Supreme Court. District Courts try only cases committed to them for trial by Magistrates' Courts.

There are 30 Courts of Requests with original civil jurisdiction in all actions in which the debt, damage or demand, or the value of land in dispute, does not exceed a stipulated amount. There are forty-five Rural Courts.

The Judicial Commission tries offences in connection with any rebellion, insurrection or any widespread breakdown of law and order, currency offences and sabotage of industrial plants.

The Constitutional Court of five persons, appointed by the President, rules on the validity of legislation enacted within the National State Assembly. Jurisdiction in these matters is now outside the sphere of ordinary courts.

# SUDAN

## INTRODUCTORY SURVEY

### Location, Climate, Language, Religion, Flag, Capital

The Democratic Republic of Sudan lies in north-east Africa. To the north is Egypt, to the east is Ethiopia and the Red Sea, to the west the Central African Empire and Chad, and to the south Kenya, Uganda and Zaire. The climate shows a marked transition from the desert of the north to the rainy equatorial south. Temperatures vary with height and latitude. The overall average is about 70°F (21°C). Arabic is the main language but English is widely understood. Most Sudanese are Muslims with animists as the next largest group. There is a small Christian community. The national flag has three horizontal stripes of red, white and black, with a green triangle at the hoist. The capital is Khartoum.

### Recent History

The Sudan (as the country was known before 1975) was ruled as an Anglo-Egyptian condominium from 1899 until achieving independence as a parliamentary republic on January 1st, 1956. After a military coup in November 1958 the army took control of the state, suspending Parliament and abolishing political parties. A Supreme Council of the Armed Forces was set up and ruled until October 1964, when it was overthrown in a civilian revolution. The governments which followed failed to improve the economic situation or to deal with the problem of the southern provinces, and in May 1969 power was seized by a group of officers and civilians led by Col. (later Gen.) Gaafar Mohammed Nimeri. All existing political institutions and organizations were abolished and the "Democratic Republic of the Sudan" was proclaimed with supreme authority in the hands of the Revolutionary Command Council. A more militant policy towards Israel was adopted and co-ordination committees with Egypt and Libya were established. In November 1970 the Presidents of Egypt and Libya and President Nimeri agreed in principle to political union between their countries, but internal opposition to Nimeri prevented Sudanese participation in the Federation of Arab Republics which was formed in January 1972 with Syria as the third member.

In July 1971 a section of the army, led by Communists, overthrew the Government. However, President Nimeri regained power in a counter-*coup* three days after being ousted and a massive purge of Communists followed.

In a referendum held in October 1971 to confirm Gen. Nimeri's nomination as President, there were almost four million votes in favour, and only 56,000 against. A new government was formed, the Revolutionary Command Council was dissolved, and the Sudanese Socialist Union was recognized as the only political party.

Since first coming to power, the Nimeri government had made attempts to settle the problem of the three racially and culturally different southern provinces. Rebellion against rule from the north had first broken out in 1955 and fighting continued until March 1972. A permanent constitution was endorsed in April 1973. Elections to the Regional People's Assembly for the Southern Sudan took place in November 1973 and for the national People's Assembly in April 1974.

The establishment of a National Assembly and a political party broadened the Government's base of power, though the army continues to play a key role in the country's affairs. In spite of a succession of abortive plots by extreme right- and left-wing elements in 1973, 1974, 1975 and 1976, President Nimeri has consolidated his rule. Since the unsuccessful communist coup in 1971, which resulted in a period of strained relations with the U.S.S.R., Sudan's foreign policy has become more pragmatic and it now enjoys growing links with a variety of African, Arab and European countries, as well as the U.S.A. and the People's Republic of China. Following the unsuccessful coup in July 1976, Sudan severed diplomatic relations with Libya and established a mutual defence pact with Egypt. Relations with Ethiopia deteriorated early in 1977 following allegations that Sudan was aiding Eritrean secessionists in Ethiopia.

### Government

Under the 1973 Constitution, executive power is vested in the President, nominated by the Sudanese Socialist Union (SSU), the only recognized political organization. The President governs with the assistance of an appointed Council of Ministers. Legislative power is vested in the unicameral People's Assembly of 250 members: 125 elected for four years by universal adult suffrage, 100 nominated by workers and other groups and 25 appointed by the President. All members of the Assembly must belong to the SSU. Sudan comprises 15 provinces.

The Regional Constitution for the Southern Sudan grants the three southern provinces of Sudan a large degree of autonomy from the central government and the area has a Regional People's Assembly.

### Defence

The armed forces totalled 52,600 in 1976: army 50,000, navy 600, air force 2,000. Para-military forces total 3,500. Defence expenditure for 1975/76 was estimated at £S37 million. Sudan has defence agreements with the Arab League Unified Military Command and with Egypt. Military service is voluntary.

### Economic Affairs

Since the 1969 revolution the economy has become increasingly nationalized, including the cotton industry, but the Government has been forced to change its policy to attract private investment from overseas. Over 80 per cent of the population derive their living from the land.

Long-staple cotton, grown under irrigation, is overwhelmingly Sudan's most valuable export, though the Government plans to reduce production owing to decreased world demand for this variety. A 25-year plan with an estimated capital investment of £S2,287 million over the first 10 years, to expand agriculture, livestock and agro-industries, was launched in 1976. It envisages a combination of finance from the Arab Fund for Economic and

Social Development and western technology. The Gezira scheme has been expanded and now covers nearly two million acres, of which half is cultivated for cotton and the rest for wheat, sorghum (durra), bean lubia, groundnuts and other foods. The Khashm El Girba Dam on the Atbara River serves 300,000 acres. The principal food crops are sorghum and cassava but coffee, tobacco, rice and sugar are also grown. Nomadic tribes breed cattle, sheep, goats and camels. The vast forest areas provide timber and 80 per cent of the world's gum arabic, which is an important export. Industry is confined mainly to the manufacture of food and vegetable oils though a number of industries producing simple consumer goods have been established in recent years. There are plans for a cement works, additional sugar refineries, textile and paper mills and a second oil refinery, among other large industrial projects. Petroleum deposits have been found in the southern and coastal regions, and exploratory drilling is taking place. There are plans to double chromite output to 50,000 tons annually by 1978 and estimated reserves of 250 million tons of iron ore have been discovered in the Red Sea area.

The 1970–75 plan had as its main objects an increase in agricultural output, the establishment of industries for import substitution, improvements in education and social services and a higher rate of increase in national income than population growth. Two dams are under construction on the Atbara river and the Blue Nile. A combined sugar plantation and refinery estate has been established at Kenara, with private capital. It is hoped to produce 300,000 tons of sugar annually by 1980. The Rahad project, financed by the World Bank, Kuwait and the U.S.A. and designed to irrigate 300,000 acres, is due for completion in 1978. Transport problems are a severe hindrance to development but work has begun on the Port Sudan–Khartoum oil products pipeline financed by Kuwait. Egypt is co-operating with Sudan in constructing the 280-km. Jonglei Canal project to increase the flow of water in the White Nile and aid the Southern Sudan. Increased oil and reduced cotton prices contributed towards a £S123.3 million balance of payments deficit on current account in 1975, and debt servicing currently accounts for almost 32 per cent of total government expenditure. Proposed expenditure for 1976/77 totalled £S377.7 million, while estimated revenues were £S448.4 million. Development expenditure for the same period gave priority to industry, agriculture and transport and communications.

## Transport and Communications

There are 4,781 km. of railways owned by the state. There is a six-year plan to modernize the narrow-gauge system with French assistance. Generally roads are only cleared tracks impassable immediately after rain. Highways from the capital to the provinces are under construction and plans have been drawn up for a network of highways in the Western Sudan. A major highway from Port Sudan to Khartoum is due for completion in 1978 while the road from Juba to Kitale, in Kenya, opened in 1976, provides access to the port of Mombasa. Sudan Railways operate passenger and freight steamer services on navigable reaches of the Nile. These are linked to the railway services of Egypt, Uganda and Kenya. Sudan Airways, the Government airline, maintains internal and external services. In November 1974 the Umm Haraz earth satellite station was completed and this has given Sudan vastly improved international communication links. New relay broadcasting stations have been built at Omdurman and Juba.

## Social Welfare

The Ministry of Health organizes the public health services. In 1973 there were 122 hospitals, 139 health centres, 662 dispensaries, 1,708 dressing stations and 115 child welfare centres. A social insurance agreement with Egypt was signed in September 1975.

## Education

The Government provides free elementary education from the ages of seven to eleven, intermediate from eleven to fifteen and secondary from fifteen upwards. Nevertheless, only about 20 per cent of Sudanese are literate. In 1973–74 there were 37,516 teachers and about 1,400,000 pupils. Pupils from secondary schools are accepted at the University of Khartoum, subject to their reaching the necessary standards. Cairo University also has a Khartoum branch and there is an Islamic university at Omdurman. Under the 1970–75 plan all curricula were revised and the system reorganized.

## Tourism

The rain forests in the south teem with wild game and attract hunters and observers from all over the world. In the north are the sites of several temples and pyramids of ancient Sudanese civilizations. There is a national park at Dinder. About 39,240 tourists visited the Sudan in 1975.

*Visas* are required by nationals of all countries.

## Sport

Football is the most popular game.

## Public Holidays

**1977:** May 25th (Anniversary of the Revolution), September 13th–17th (Id ul Fitr, end of Ramadan), October 12th (Republic Day), November 21st–25th (Kurban Bairan), December 10th (Muslim New Year), December 25th (Christmas).

**1978:** January 1st (Independence Day), February 20th (Mouloud, Birth of the Prophet), March 3rd (Unity Day), April 26th (Sham el Nassim).

The dates of the Muslim holidays may be slightly different from those given above. The holiday "Sham el Nassim" is variable in April each year.

## Weights and Measures

The metric system is gradually replacing traditional weights and measures.

## Currency and Exchange Rates

1,000 millièmes = 100 piastres = 1 Sudanese pound (£S).

Exchange rates (December 1976):

£1 sterling = 577.04 millièmes;
U.S. $1 = 348.24 millièmes.

**Births and Deaths** (1966): Registered births 143,052 (birth rate 10.1 per 1,000); registered deaths 13,416 (death rate 1.0 per 1,000). Birth registration is believed to be about 20 per cent complete and death registration 5 per cent complete. UN estimates for 1965–70 put the average annual birth rate at 48.5 per 1,000 and the death rate at 19.0 per 1,000. These figures indicate that the natural increase rate is nearly 3.0 per cent per year, but the results of the 1973 census suggest a much lower increase rate.

**Employment** (1970): Total economically active population 5,065,000, including 4,046,000 engaged in agriculture (ILO and FAO estimates).

*Note:* The Sudanese pound was introduced in April 1957, replacing (at par) the Egyptian pound, valued at U.S. $2.87156 since September 1949. This valuation has been maintained in Sudan ever since, despite two devaluations of the U.S. dollar. Since March 1972 the effective exchange rate for foreign trade transactions, excluding exports of cotton and gum arabic, has been £S1=U.S. $2.50 ($1=400 millièmes). The exchange rate was £1 sterling=835.78 millièmes (£S1=£1.1965 sterling) from November 1967 to August 1971; and £1 sterling=907.42 millièmes (£S1=£1.102 sterling) from December 1971 to June 1972.

## THE CONSTITUTION

A Provisional Constitution was introduced by the Revolutionary Command Council in August 1971. A People's Council, including various categories of the people's working forces, was called to draft and ratify a permanent constitution. It was endorsed by the People's Assembly in April 1973 as the Permanent Constitution of Sudan.

### The President

The President must be a Sudanese of at least 35 years of age. He is nominated by the Sudanese Socialist Union, is Head of State, and is responsible for maintaining the Constitution. He may appoint Vice-Presidents, a Prime Minister and Ministers who are responsible to him. He is the Supreme Commander of the People's Armed Forces and Security Forces, and the Supreme Head of the Public Service.

If satisfied that a national crisis exists, the President may declare a State of Emergency, which may entail the suspension of any or all freedoms and rights under the Permanent Constitution other than that of resort to the courts. In the event of the President's death, the First Vice-President will temporarily assume office for a period not exceeding 60 days. Following the abortive coup of September 1975, a constitutional amendment was introduced which empowers the President to take any measures and decisions he sees as "suitable".

### The People's Assembly

The President may appoint up to a tenth of the members of the Assembly. The duration of a sitting is four years and sittings are held in public. A quorum consists of half the number of members. Amendments to the Constitution may be proposed by the President or one third of the membership of the People's Assembly. An amendment to the Constitution must have a two-thirds majority of the People's Assembly and the assent of the President.

### Judiciary

The State is subject to the rule of law which is the basis of government. The judiciary is an independent body directly responsible to the President and judges are appointed by the President.

### Religion

Unrestricted freedom of religion is allowed and mention is specifically made of the Islamic and Christian religions.

### Southern Region

Under the Regional Constitution for the Southern Sudan, the three southern provinces form a single region, with its own regional executive in Juba headed by a president who is also a Vice-President of the whole Republic. The regional executive is responsible for all matters except national defence, external affairs, economic and social development, education, currency and coinage, air and inter-regional river transport, communications and telecommunications, nationality and immigration, public audit, customs and foreign trade regulations except for border trade. The regional President is appointed by and responsible to a Regional People's Assembly. The Assembly may postpone legislation of the central Government which it considers adverse to the interests of the South; though the President is not compelled to accede to its request. The Regional Constitution can be amended only by a four-fifths majority of the central People's Assembly, where southerners are represented.

The People's Assembly has 250 seats, which include 70 for the people's working forces alliance, 30 for the administrative units to be filled both by election and selection, 25 appointed by the President and 125 for the geographical areas. The regional People's Assembly consists of 60 members of whom 30 represent the geographical areas, 21 the people's working forces alliance and 9 the administrative units. They are elected by direct secret ballot.

# JUDICIAL SYSTEM

The administration of justice is the function of the judiciary, as a separate and independent department of state. The general administrative supervision and control of the judiciary is vested in the Higher Judiciary Council headed by the President of the Republic. The members are the President of the Supreme Court, his three deputies, the Attorney-General and two co-opted members in the case of appointment and dismissal of judges, if the President so directs.

**Civil Justice:** is administered by the courts constituted under the 1973 Judiciary Act, namely the Supreme Court, Court of Appeal and Other Courts. The Supreme Court consists of a president and one or more vice-presidents and sufficient number of judges. It is the custodian of the constitution under the Permanent Constitution of Sudan of 1973. The powers and jurisdiction of the courts are defined by the Code of Civil Procedure of 1974.

**Criminal Justice:** is administered by the courts constituted under the 1973 Judiciary Act, namely Major Courts and Magistrates' Courts, and their powers and jurisdiction are defined by the Criminal Procedure Code of 1974. Serious crimes are tried by Major Courts which are composed of a president and two members and have power to pass the death sentence. Major Courts are as a rule presided over by a Province Judge. There is a right of appeal against any decision or order of a Major Court and findings of guilty of murder and sentences of death or life imprisonment are subject to confirmation.

Lesser crimes are tried by Magistrates' Courts consisting of a single magistrate, or a bench of magistrates.

**Local Popular Courts:** try a substantial portion of criminal and civil cases and work in parallel to some extent with the State Courts.

**President of the Supreme Court:** KHALAFALLA EL RASHEED.

### ISLAMIC LAW COURTS

Justice in personal matters for the Muslim population is administered by the courts constituted under the 1973 Judiciary Act. These courts consist of panels of judges in personal matters. The religious Law of Islam is administered by these courts in matters of inheritance, marriage, divorce, family relationships and charitable trusts.

**Mufti:** AWADALLA SALIH.

# RELIGION

The majority of Sudanese are followers of Islam, but some communities in the south practise animism or fertility worship. It is estimated that there are more than 9 million Muslims and over 400,000 Catholics. The government plans to create a Sudanese National Church.
